# Precise Biometrics receives SEK 12 million order for digital access devices

**Precise Biometrics, a global leader in biometrics, has received a new order to provide its fingerprint sensor technology for digital access devices. The order is expected to generate revenue of approximately SEK 12 million during 2027.**

The customer, a global provider of digital security and authentication solutions, will integrate Precise's fingerprint sensors into digital access devices, enabling secure and phishing-resistant authentication. The order further strengthens Precise's position in the growing market for secure digital access, supporting the transition towards stronger, passwordless authentication.

Precise sees significant growth potential in the market for biometric digital access devices, driven by increasing cybersecurity threats, growing security awareness and stricter security requirements. As organizations seek more robust and phishing-resistant authentication solutions, the adoption of biometrics in digital access devices is expected to increase. This creates growing opportunities for Precise's fingerprint sensors and biometric algorithms, as well as its integrated biometric systems FPC AllKey and FPC AllKey Ultra.

**Joakim Nydemark, CEO of Precise Biometrics, commented:**

> *"We see growing demand for biometric authentication in digital access devices as organizations strengthen their security. This order reinforces our position in this growing market, where we offer both fingerprint sensors and integrated biometric systems such as FPC AllKey and FPC AllKey Ultra."*

**About Precise Biometrics**

Precise Biometrics AB (publ) ("Precise") is a Swedish-rooted global leader in biometrics, providing trusted access and identity solutions that securely verify and identify people across physical and digital environments.

Guided by our vision of making everyday life safer and more seamless in a world where YOU are the key, we combine biometric hardware systems, algorithms, cloud solutions, and decades of domain expertise to help protect identities, places, devices, data, and digital services against fraud, identity threats, and unauthorized access. Applications range from mobile phones and consumer electronics to physical and logical enterprise access, visitor management, and government identity programs, powering hundreds of millions of devices and authentications every day.

Precise has a strong global presence with local teams across Europe, North America, and Asia. The company is headquartered in Lund, Sweden, and is listed on Nasdaq Stockholm (PREC).
