BLINCVISION

PRESS RELEASE
11 November 2026 08:00:00 CET

BLINCVISION FEATURED ON JMV'S MINING VEHICLE AT AUTOMATION EVENT IN MALMÖ

Today, BlincVision is showcasing its sensor solution together with Jakob Mining Vehicles (JMV) at Passion4RuggedAutomationDays 2026 in Malmö. BlincVision's MVP (Minimum Viable Product) is mounted on the roof of JMV's electric mining vehicle, TerraCharge.

Passion4RuggedAutomationDays is organised by B&R Industrial Automation, part of the ABB Group. The event brings together companies and experts in automation, electrification and technology for demanding environments.

JMV is a German company with extensive experience in developing and adapting specialised vehicles for the mining industry. Its electric vehicle, TerraCharge, is designed to meet high standards of safety and reliability. BlincVision and JMV already have a collaboration agreement focused on improving safety and reducing operating costs in the mining industry.

Mining requires safe and efficient operations. Dust, darkness and large vehicles moving in confined spaces create challenging conditions where visibility is often limited. Being able to quickly detect people and obstacles is important for reducing the risk of accidents and avoiding costly downtime.

"We appreciate the opportunity to showcase BlincVision together with JMV. Their experience and strong position in the mining industry make them a valuable partner for us. This is a great opportunity to show our solution in a relevant setting and raise interest in how our technology can help improve safety in demanding environments," says Jonas Renander, CCO at BlincVision.

About BlincVision AB (publ)
BlincVision is a Swedish technology company developing advanced sensor technology for autonomous and safety-critical applications. The technology enables rapid detection and analysis of changes in the surrounding environment, giving more time to make decisions and take action. The company focuses on three main markets: defence, autonomous driving in confined areas, and automotive. The aim is to improve safety and efficiency in environments where quick decisions are essential.

BlincVision is headquartered in Lund, Sweden, and also operates in Gothenburg.
The company is listed on Nasdaq First North Premier Growth Market.
