

Ortivus and Region Värmland have signed contract regarding the delivery of semi-automatic defibrillators for the fire department and public access.

Ortivus has signed a contract for the delivery of semi-automatic external defibrillators (AEDs) to Region Värmland. The agreement applies to Värmland's 12 municipalities and other authorities, and the order value is estimated to 3.2 MSEK. The contract duration is 2 years with a possible extension for another 2 years.

We are pleased to announce that a contract has been signed between Region Värmland and Ortivus for the delivery of MobiMed Life defibrillators to the region. Region Värmland is a new customer for Ortivus, and this contract means that the company will now supply 16 out of Sweden's 21 regions. The defibrillators will be used in the fire department and for public access and the contract covers 300 units of the model Reanibex 100, for which Ortivus has exclusive distribution rights in the Nordic countries, UK, and Ireland.

"We look forward to delivering MobiMed Life to Region Värmland. Reanibex 100 is an easy-to-use, innovative, and secure AED and this award proves that we offer competitive solutions for public access." Says Stefan Ekblom, Senior Account Manager at Ortivus

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 3.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
