

Board member resigns at his own request due to medical reasons

At his own request, BG (Bengt-Göran) Svensson has chosen to leave NanoEcho's board for medical reasons. At the same time, he announces that he is leaving all his board assignments.

BG Svensson has been an elected board member on NanoEcho's board since 2020.

"This was sad news, I have appreciated working together with BG and I am grateful for the work he has put into NanoEcho's board," says Linda Persson CEO of NanoEcho.

NanoEcho develops a new technology for clearer diagnostics of, in the first indication, rectal cancer. The imaging technology is based on a new medical approach where nanotechnology is used in combination with modern ultrasound technology. The images that are generated are intended to facilitate differentiation between healthy and diseased tissue and at the same time determine the location of the cancer tissue more precisely. The aim is to provide more precise, simple, and less costly diagnosis of cancers and other diseases. With clearer diagnostics, the company wants to assist treating physicians with better guidance for more personalised treatment. Both the quality of life of the patients and their chance of survival can improve after treatment, with reduced treatment costs. www.nanoecho.se
