

High Coast releases Alba II

Our prized whisky Alba is back as Alba II

The American oak, Quercus Alba and our fruity new-make are a union of two continents, a result that has been characterised by the northern climate over time. Expect the same finesse between the vanilla notes of the American oak and the bourbon barrels that have had almost ten years to develop, where we have allowed the oak's flavours to take centre stage without competing with smoke. Our new make work well with Quercus Alba, both with smoke and without, as several blind tastings have shown over the years. Comments from festivals about Alba have clearly shown the same, the combination therefore deserves its own series where this will be the second one. Enjoy an unpeated whisky packed with toffee, vanilla and the fresh fruitiness of the spirit, enjoy Alba II. Alba II will be launched in Sweden on 31st of May and in selected international markets during 2024.

Quick facts

About Us

The whisky from High Coast Distillery under the High Coast Whisky brand has been available since 2014. The Origins series with Berg, Älv, Timmer and Hav is already a big sellers among the premium brands. At the production and visitor facility in Bjärträ, Sweden, whisky is produced seven days a week and more than 17,000 casks are maturing in the warehouses. High Coast Whisky is currently sold in about ten countries. The company's shares are traded on Nasdaq First North Growth Market. Turnover is about SEK 60 million excluding alcohol tax and the business employs about 25 people.
