

Fram Skandinavien AB (publ) publishes monthly NAV report, September 2026 - NAV at 6 SEK per share

Significant events during the month

September NAV declined by -16% m-o-m, primarily driven by the continued ramp-down of Carmudi's lending business.

Carmudi: NAV fell by -27% m-on-m due to lower LTM pre-tax profit and contracting peer multiples. Carmudi reported a modest pre-tax income of c. 2 kUSD for the month.

EveHR: NAV declined by -6% m-o-m, as contracting peer valuation multiples more than offset the increase in LTM gross profit. EveHR also recorded a modest pre-tax profit in September.

Liven Technology: NAV grew by +20% m-on-m, mainly attributable to increasing LTM revenues.
