GOODTECH ASA: ENTERS INTO A STRATEGIC PARTNERSHIP WITH LEADING DEFENCE MANUFACTURER IN MULTI-YEAR DIGITALIZATION PROGRAM

Goodtech has been selected as a strategic partner in a digitalization program with a leading defence manufacturer. The collaboration is focused on manufacturing digitalization, operational excellence, and initiatives supporting the customer's ongoing transformation of its production operations.

The engagement marks the beginning of a broader transformation program expected to span multiple years and phases, supporting the customer's long-term ambitions for digital manufacturing and operational excellence. The first phase includes the deployment of a Manufacturing Execution System (MES) designed to strengthen production traceability, operational visibility, and decision support across manufacturing operations, delivering measurable benefits from the outset.

Margrethe Hauge, CEO of Goodtech, comments:
“This award represents an important milestone for Goodtech as a strategic partner of the defence industry and further strengthens our position within industrial digitalization and advanced manufacturing. In industries where traceability, quality, and operational excellence are essential, customers rely on trusted partners with deep domain expertise and proven delivery capabilities. We look forward to supporting the customer's long-term transformation journey and creating sustainable value through close collaboration over the coming years.“

The scope will be delivered by Goodtech's industrial digitalization specialists and further strengthens the company's position within digital transformation projects for complex and highly regulated industrial environments.
