

Realfiction Holding AB receives Notice of Allowance from the US Patent Office for protection of its ECHO directional OLED display technology

Realfiction Holding AB (“Realfiction” and the “Company”) is proud to announce that it has received a notice of allowance for the patent protection for the US patent application 17/439,033 regarding the Company’s ECHO directional OLED display technology from the US Patent Office (USPTO). The Company announced the submission of the patent application in a press release on 18 March 2019.

The notice of allowance is a formal communication from the patent authority in which it indicates that the patent application has reached the status where it is allowed for issuance as a patent. The USPTO examiner concludes that the directional OLED display technology is novel and non-obvious. When issued in the near future, the patent will be valid until 2039.

This is the first formal patent authority notice received by the Company that confirms the patentability of its ECHO directional display technology and pertains to the first of several patent applications submitted by the Company during the past 4 years.

“This is an important step for Realfiction in the process of protecting the intellectual property rights of its ECHO 3D display technology, and we are happy to receive this news from one of the strategically selected countries”, says Clas Dyrholm, CEO, Realfiction.
