

Eurovent Certita Certification and BIMObject announce partnership to bring Eurovent's certified performance data to European construction

Eurovent Certita Certification SAS (ECC), world leader in third-party product performance certification in the Heating, Ventilation, Air Conditioning, and Refrigeration fields and BIMObject, the global marketplace for the construction industry, today announced that the two organizations have formed a new partnership.

Under the terms of the partnership, BIMObject and Eurovent Certita Certification will work to integrate their platforms to supply BIMObject's over 3 million registered users with Eurovent's certified performance data. Users of BIMObject's platform will also be able to verify the reliability of HVAC data on bimobject.com directly through the "Eurovent Certified Performance" mark.

"We're very pleased to announce this partnership with BIMObject", said Sylvain Courtey, President of Eurovent Certita Certification. "For Eurovent Certita Certification as a third-party certifier, working with BIMObject ensures our performance data can reach construction professionals all across Europe".

To support Eurovent's many small- and medium-sized member companies, BIMObject has also developed an offering specifically for Eurovent member companies with discounted pricing on both BIM services and platform subscriptions for bimobject.com.

"Reliable data is key to any digitalization process within construction. Through the partnership with Eurovent, we will be able to bring certified performance data to HVAC designers in all of Europe", commented Martin Lindh, interim CEO of BIMObject.

About Eurovent Certita Certification

Founded in 1993, Eurovent Certita Certification is recognised as a world leader in third party certification of product performance in the fields of heating, ventilation, air conditioning and refrigeration. Based on a voluntary approach, Eurovent Certita Certification's schemes enable manufacturers to achieve higher quality standards, and to comply with government incentives in Europe and beyond. Eurovent certification thus increases confidence between the different players in the construction industry and reduces investment risks for all HVAC and refrigeration solutions
