

Introducing Audiosphere: 3D Audio Personalized Just for You

Press release - Product launch

Step into a new dimension of sound with **Audiosphere**, where immersive, 3D audio meets the power of **Personal Sound**. This groundbreaking feature creates a fully enveloping sound environment, bringing audio to life by delivering it from all directions—above, below, and around you. Whether you're gaming, listening to music, watching a movie, or attending a virtual meeting, **Audiosphere** transforms your auditory experience into something deeply immersive and spatially precise.

But what truly sets **Audiosphere** apart is its integration with **Personal Sound**. Unlike traditional spatial audio systems, **Audiosphere** doesn't just place sound in a 3D environment—it tailors each sound to your unique hearing profile. Every nuance is optimized for your specific hearing strengths and weaknesses, ensuring that every sound, no matter its origin, reaches you with unmatched clarity, depth, and realism.

Imagine being in the heart of an orchestra, with each instrument perfectly placed around you, or hearing the subtleties of dialogue in a movie, as if the characters were standing right next to you. **Audiosphere** delivers not just a 3D audio experience, but a **personalized** 3D audio experience, offering a level of immersion that is both spatially dynamic and **precisely tuned** for your hearing.

The result is an audio experience where you're not just a listener—you're part of the sound environment. With **Audiosphere**, you'll feel like you're **living** the sound, surrounded by it in every direction, with every detail tailored to your auditory profile.

This innovative feature is part of our commitment to pushing the boundaries of sound personalization and immersive technology!

Hear what you've been missing!

About Us

Based in Malmö, Sweden, Audiodo™ leverages over three decades of expertise in acoustical algorithms to pioneer cutting-edge audio personalization technologies for consumer electronics. Crafted by passionate music enthusiasts, Audiodo Personal Sound™ harnesses the capabilities of digital signal processing to deliver tailor-made sound quality, ensuring every music lover an unparalleled audio quality that has been perfected for them.
