

Ortivus is awarded a strategically important contract covering prehospital electronic patient records, case management and navigation to Region Jönköpings län

Ortivus has been awarded a contract for the delivery of pre-hospital electronic patient record, case management and navigation to the ambulance service in Region Jönköpings län. The contract refers to the delivery of Ortivus' solution MobiMed ePR, including MobiMed enRoute, to all ambulance vehicles in the region. The contract duration is 5 years with a possible extension for another 5 years. The order value is 4.2 MSEK for the first period and an additional 4.2 MSEK if the contract duration is extended.

Ortivus currently supply MobiMed to 16 out of Sweden's 21 regions. Region Jönköpings län is already a customer using MobiMed Monitor and MobiMed Life. This contract covers MobiMed ePR, electronic patient record and MobiMed enRoute for case management and navigation.

"We are very pleased with this award and that we have once again received Region Jönköping län's trust. Region Jönköpings län will be first in Sweden to switch to the second-generation solution for prehospital electronic patient record, navigation, and case management. We look forward to a continued good cooperation!" says Elias Obaid, Sales Manager at Ortivus

MobiMed enRoute is the latest module in the MobiMed suite where the ambulance crew receives navigation support and valuable information from the dispatch center. It is integrated to the MobiMed ePR system.

This award decision does not mean that a contract has been signed and that contractual obligations applies. The contract can be signed after the contract lock has expired. The contract can earliest be signed within 10 days after the award decision has been announced.

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 3.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
