

Ortivus and Region Skåne have now signed contact regarding a delivery to the regions prehospital care

Ortivus was, as previously reported, awarded a contract for the delivery of equipment to Region Skånes' ambulance organisation. The contract covers Ortivus' MobiMed Monitor and MobiMed Life defibrillators, including hard- and software, to the regions entire ambulance fleet. The order value is estimated to 33 MSEK. The contract duration is 2 years with a potential extension of another 2 years.

We are happy to announce that contract has been signed between Region Skåne and Ortivus regarding the delivery of MobiMed to the regions ambulance organisation. The award decision that was announced on November 17, 2021, got appealed by another tenderer. The administrative court decided on the 15th of February, 2022, to reject the appeal and the contract could thereafter be finalised.

"We are really looking forward to deliver MobiMed Monitor and MobiMed Life to Region Skåne, that is a new customer for Ortivus. MobiMed is a unique monitoring solution that, together with a stand-alone defibrillator, is completely adapted to the ambulance service's mission." Says Reidar Gårdebäck, CEO Ortivus

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12 000 paramedics in over 2 700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 2.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
