

Ovzon Receives Order from New NATO Customer of 40 MSEK

Ovzon has received an order from a new NATO customer. The order is for the company's integrated SATCOM platform. The SATCOM service part of the order is for 6 months, with start in the fourth quarter. The order value amounts to 40 MSEK (4.1 MUSD), of which half pertains to Ovzon's mobile satellite terminals, which will be delivered during the third and fourth quarter of 2026.

The order is based on third party satellite capacity and includes mobile satellite terminals as well as Ovzon's dedicated customer support.

"We are proud to welcome another NATO customer. This further strengthens our presence within NATO. The order reflects the growing demand for high-performing and resilient mobile satellite communication, and that reliable connectivity is shifting from a strategic advantage to operational necessity. Customers are increasingly looking to gain access to end-to-end systems that provide sovereign control over space-based infrastructure," says Per Norén, CEO of Ovzon.
