

## iZafe Group signs partnership agreement with Vivago and launches initial joint pilot project

**Stockholm, Sverige – iZafe Group AB (publ) (NASDAQ First North: IZAFE B) – a leading Life Science company focused on the digitalisation of medication management, is announcing that it has signed a partnership agreement with Vivago, a Finnish provider of safety and well-being solutions for preventive care. In conjunction, iZafe and Vivago are launching an initial joint pilot project covering 20 Dosell medication dispensing robots.**

The results of the pilot project will be used as decision input for a future commercial arrangement based on an integrated solution involving automated dispensing of medication in dose-packed sachets from dispensing robots. The goal is to create a full-coverage solution for users while reducing the need for home health visits in connection with taking medication.

*“We are proud of the partnership and are looking forward to working with Vivago to further develop the industry in Finland. In the first stage, we will perform a joint market analysis to build knowledge about the Finnish market. We are especially pleased that our partnership has already resulted in a strategically important pilot project.”* comments Anders Segerström CEO, iZafe Group.

Major training initiatives were carried out in the autumn to prepare for the pilot project, which is expected to begin immediately after the end of the year. Twenty people will be using Dosell to manage their medication during the pilot project.

*“We are delighted by the partnership between Vivago and iZafe. The partnership will be a key step in Vivago’s future ventures in the digitalisation of medication dispensing in Finland while reinforcing our service offering. The partnership with iZafe and their Dosell digital medication dispenser makes a more comprehensive service offering to our customers in Finland possible. Vivago’s health and well-being solutions combined with Dosell will enhance safety and provide better care to our elderly people.”* Says Niina Vilkas, CEO Vivago Ltd.

### About Vivago

Vivago develops smart safety and wellbeing solutions for preventive care by monitoring users’ health status in real-time and wellbeing 24/7. The Vivago solution includes all features required for nurse call systems and covers the entire chain of care from home care and assisted living to rehabilitation centres and hospitals. More than 100,000 people use Vivago solutions every single day. Full digitalisation of health status monitoring is opening a revolutionary path to changing care delivery from reactive to preventive while tailoring entirely patient-centred and results-driven care.
