

Mycronic receives order for two SLX mask writers

Mycronic AB (publ) has received an order for two SLX mask writers from a new customer in Asia. The order value is in the range of USD 13-15 million. Delivery of the first system is planned for the second quarter of 2025, while the second system is planned for delivery during the first quarter of 2026.

The SLX laser mask writer meets rising demand for photomasks for the semiconductor industry and a future need for replacement and modernization. Photomasks manufactured by laser mask writers are of high importance and account for a majority of all photomasks produced for semiconductor manufacturing. SLX is a modern and energy efficient mask writer based on the same technology as Mycronic's mask writers for displays.

"Thanks to the modern SLX platform's performance, productivity and reliability, we are able to attract new customers and successfully grow the installed base of SLX mask writers serving the semiconductor industry", says Charlott Samuelsson, Sr VP Pattern Generators at Mycronic.

Mycronic's Pattern Generators division provides mask writers and metrology systems for display manufacturing and production of semiconductors.
