Soltech company Annelunds Tak wins combined solar energy and roof order

Herrljunga-based Annelunds Tak is one of the Soltech Group's roof companies in transformation from a traditional roof company to also offering solar energy in its product range. The company has won its largest solar energy and roof order to date. The assignment contains roof contracting at Stuma Fastigheter in Viared and the company will also install a 4,100 sqm solar energy solution that covers the entire newly laid roof. The project is expected to be completed during spring.

Soltech has a transformation strategy within the electrical engineering, roof/sheet metal and facade industries where the companies are transformed when solar energy competence is added to their existing product range. A combination that is increasingly demanded by customers and society.

The strategy has now resulted in a new deal for Annelunds Tak that applies to both a large-scale roof contracting and 4,100 sqm solar installation at an industrial property in Viared.

The company has previously been involved in projects where both solar energy and roof contracting have been demanded, but this order is the company's largest combination deal. CEO Mikael Markusson is proud of the order and that the company is now taking another step in its development as a roofing company that also specializes in solar.

– This is by far the largest order with both new reroofing and solar energy which feels great. There has been a significant increase in requests regarding solar energy and reroofing from the same supplier. The fact that we are part of the Soltech Group helps us meet the growing demand, **says Mikael Markusson, CEO of Annelunds Tak.**

Beneficial for both customers and the climate

After the subsidiaries, like Annelunds Tak, is acquired, the process of adding solar energy to the product range begins but they keeping the core competence and business. Something that creates a competitive advantage as many customers are increasingly asking for sustainable solutions for both roof contracting and solar energy solutions.

Press Release**21 February 2023 13:45:00 CET**

– The transformation of our companies is fantastic to witness. It creates new business opportunities, strengthens their offers and not least, it contributes to the green transition. By helping traditional companies into the future by offering solar energy solutions, we change society in a sustainable direction, **says Stefan Ölander, CEO of Soltech Energy.**
