

International launch of EandoX - an Environmental Product Performance (EPP) Software

Following last week's launch of Bim.com, BIMObject Group is launching EandoX in Europe. This software is an industry agnostic Environmental Product Performance (EPP) and aims to further strengthen our company's ability to serve the need of reliable product information related to regulatory requirements and commercial demand for environmental data.

The demand for accurate sustainability accounting and reliable sustainability reporting on product level is high and expected to further increase as regulations like CSRD and CBAM are being fully adopted. EandoX is a novel software that enables companies that produce physical products to take control of their sustainability data. Having reliable information on products is the only way for these companies to prove commitment to ESG goals.

"EandoX is a powerful, easy-to-use, data-driven EPP software. It's designed to simplify sustainability data management. It helps businesses optimize supply chains, comply with environmental regulations, and drive sustainability improvements through accurate, connected data. By using EandoX, companies can make informed decisions, improve their environmental impact, and transform sustainability into a valuable business asset.", comments Daniel Olausson, Chief Product Officer of BIMObject Group.

"Most solutions available today are unable to generate accurate and product specific environmental data and instead are solely based on generic assumptions that prevent its users from reaching their targets. EandoX will therefore be an important component to our clients as well as to our ecosystem on Bim.com. It is built with our deep expertise within LCA and thus able to generate flexible data for multiple purposes such as for EPDs, input to regulatory requirements and corporate reporting. It also brings our LCA offering to a new level as it automates the data generation and thus provides a much more scalable solution to our clients.", comments Martin Lindh, CEO of BIMObject Group.

EandoX will be made accessible on bim.com to clients within the building industry and on the website eandox.com managed by our subsidiary CarbonZero AB for clients operating in non building related sectors.

For further information and for commercial enquires about EandoX please reach out to Nicklas Gerhardsson (nicklas.gerhardsson@carbonzero.se).
