

Cavotec signs order in India for motorised cable and hose reels

Cavotec has signed a significant order with a leading engineering company in India for the supply of motorised cable and hose reels. The reels are part of the customer's first project for ship unloaders.

The order includes a total of fourteen motorised cable and hose reels for installation in ship unloaders at bulk material handling facilities in India. The systems will be used for unloading bulk materials such as coal and limestone from vessels to shore. Cavotec contributes to reliable and efficient operations through its electrification and fluid handling technologies. Delivery is scheduled for the third quarter of 2026.

"This order demonstrates Cavotec's ability to deliver reliable and high-performance solutions for demanding industrial applications. We are pleased to support the customer's first ship unloader project with our technology and expertise," says David Pagels, CEO of Cavotec.
