

OEM International acquires Ingemar Liljenberg AB

OEM International has today signed an agreement for the acquisition of Ingemar Liljenberg AB with an annual turnover of SEK 62 million in 2022/2023. Ingemar Liljenberg with headquarters in Vellinge, sells and markets customer-unique products such as cast, punched, and processed components for the engineering and electronics industry. The company also provides a fixed product range of locks, rails and fittings for wood and steel interiors.

- Ingemar Liljenberg is a well-managed company with products and solutions that complement OEM's existing range. The company will continue to be operated in its current form, but the ambition is to take advantage of synergy effects within the group, such as product range development, marketing and supplier coordination, comments Jörgen Zahlin, CEO and CEO of OEM International.

The acquisition is estimated to have a marginal impact on OEM's results for the current year.

About Us

OEM International is one of Europe's leading technology trading companies with 34 operating units in 15 countries. The group operates in the trade of components and systems from leading suppliers in selected markets in Europe. A well-structured local market organisation and efficient logistics make OEM a better alternative to the supplier's own sales organisations.
