

## Realfiction announces license and collaboration agreement with Goworld

**Realfiction Holding AB (“Realfiction”) is excited to announce the signing of a significant license and collaboration agreement with Shantou Goworld Display Co. Ltd. (“Goworld”). This milestone agreement is set to pave the way for mass manufacturing of innovative display products featuring Realfiction’s Directional Pixel Technology™ (DPT), initially targeting multi-view applications in 2025 and 3D applications thereafter.**

As communicated before, Realfiction and Goworld have been collaborating to establish a scalable production framework for our Directional Pixel Technology™. The production process for the key component is progressing well, and with the signing of the new license and collaboration agreement we are now ready to focus on mass-producing display products. The partnership will initially focus on market-ready multi-view LCD demonstrators. This is planned to pave the way for mass-manufacturing advanced multi-view displays.

“The agreement represents a significant moment for Realfiction,” said Clas Dyrholm, CEO of Realfiction. “By joining forces with Goworld, we validate the scalability of our DPT technology and address critical industry demands. Further perspectives about the agreement will be shared in a following press release”

### **About Goworld**

Goworld is a leading manufacturer in the display technology sector, with decades of experience in producing high-quality LCD and related components. The company serves a diverse range of industries, including automotive, consumer electronics, and industrial applications. Known for their advanced production capabilities and commitment to innovation, Goworld has built a reputation as a trusted partner for developing and scaling cutting-edge display solutions. Their collaboration with Realfiction underscores their dedication to pushing the boundaries of display technology. Its parent company, Guangdong Goworld Co., Ltd. is a publicly listed company with a market capitalization of USD 766 million and trailing twelve months (as of 30 September 2024) revenues exceeding USD 750 million, reflecting its strong position in the global display market.

**About Realfiction Holding AB**

Founded in Denmark in 2008, Realfiction is a provider of cutting-edge 3D display technologies designed for tomorrow's needs, featuring technological breakthroughs with its Directional Pixel Technology for LCD, OLED and microLED. These technologies support a wide range of use cases, including enhancing driving safety, medical imaging, immersive gaming and entertainment, digital signage, as well as applications in architecture, engineering, and design. The Company offers a comprehensive intellectual property portfolio tailored for OEMs and Tier-1 partners involved in developing and marketing displays for markets and industries requiring high-resolution multistereoscopic displays. All technologies are ready for licensing, and Realfiction is actively pursuing commercial licensing agreements and partnerships to pave the way to mass production. Realfiction's patent portfolio comprises 15 patent families with applications filed in multiple countries. Realfiction Holding AB's shares are publicly traded on Nasdaq Stockholm First North under the symbol "REALFI", with the share's ISIN code being SE0009920994.
