

## **BONESUPPORT HOLDING AB (publ) – Information on the impact of tariffs in connection with the company's import into the United States**

**Given global market turbulence and many questions regarding the financial impact of the US announced 20% import tariffs on European goods, BONESUPPORT would like to clarify the potential impact on its operations.**

BONESUPPORT's largest single market is the US, representing some 75% of total sales. With the assumption of 20% tariffs on the last reported period, Q4 2024; then Operating Profit in the quarter would have been SEK 74,9 million instead of the reported SEK 78 million. Hence a 20% tariff on CERAMENT® would have led to a total financial negative impact of SEK 3.1 million for the business, for Q4 2024.
