

# MossHydro AS secures a NOK 0.9 million commercial contract

## **MossHydro AS secures a NOK 0.9 million commercial contract with delivery of prefiltration for landbased fish farming**

MossHydro AS, a subsidiary of Nordic Technology Group AS, has signed a commercial contract for the delivery of pre-filtration systems to a land-based aquaculture customer, with delivery in Q2 2026 and a contract value of NOK 0.9 million.

The contract represents an important commercial milestone and strengthens MossHydro's position in the fast-growing market for water purification solutions for land-based fish farming. This segment is expected to see sustained long-term growth as the aquaculture industry transitions toward more sustainable, land-based production facilities.

### *About MossHydro:*

MossHydro develops and manufactures water purification systems and filtration using proprietary technologies. Headquartered in Lier, Norway with manufacturing in Sweden, Switzerland and TX /USA, MossHydro have water purification systems installed globally in ships and marine operations as well as municipal water supplies and industrial applications –
