

CEO Hanna Sjöström Elected to the Board of SwedenBIO

Neola Medical's CEO Hanna Sjöström has been unanimously elected to the board of SwedenBIO, Sweden's largest industry organization for life sciences. The decision followed the nomination committee's proposal and was confirmed during the association's Annual General Meeting on May 6.

"I am honored to join SwedenBio's board and look forward to strengthening Sweden's life science industry, supporting our innovative companies to thrive," says Hanna Sjöström, CEO of Neola Medical

Hanna Sjöström's appointment strengthens the voice of MedTech within SwedenBIO and reflects her continued engagement in advancing Sweden's position in life science innovation, commercialization, and international growth.

Sjöström has previously been profiled for her role in SwedenBIO's expert network, where she leads the Medtech Working Group, a forum focused on key strategic issues such as market access, regulatory alignment, and internationalization.

About SwedenBIO

SwedenBIO is the national industry organization for life sciences in Sweden. Member companies within SwedenBIO primarily focus on the development of biotechnology, diagnostics, pharmaceuticals, and medical technology, or they specialize in areas such as business development, intellectual property, and legal matters. SwedenBIO also brings together financiers, incubators, science parks, regional investment promotion actors, and many more. A common characteristic among all members is their contribution to the advancement of medical innovations that enhance people's health in Sweden and around the world. Founded in 2002, SwedenBIO is a non-profit membership organization.

About Neola Medical

Neola Medical AB (publ) develops an innovative medical technology device for non-invasive, continuous lung monitoring and real-time alerts of potentially life-threatening lung complications in preterm born babies. By enabling instant detection, the technology aims to support earlier intervention, improve clinical decision-making, enhance long-term outcomes, and ultimately contribute to saving lives. The patented, cutting-edge technology was developed at Lund University in Sweden and is based on a spectroscopic method that measures changes in lung volume and oxygen gas concentration. Neola Medical builds on Sweden's longstanding legacy of medical technology innovation and contributions to global health care. Neola Medical was founded in 2016 and is listed on NASDAQ First North Growth Market (ticker: NEOLA). Read more at www.neolamedical.com. The company's Certified Adviser is FNCA Sweden AB.
