2023						0.61%	0.71%	0.92%	0.84%	0.63%	0.49%	0.58%	<b>4.78%</b>

### Yield Exposure

Exposure by credit type for Yield as of 2026-04-30.

### About Yield

The Yield strategy is suitable for investors willing to accept higher volatility in pursuit of higher long-term returns.

With Yield, your capital is invested across a large number of loans with higher expected returns, some volatility and varying cash flow profiles. The higher target return is based on an investment horizon of 36 months or more. Following each twelve-month period, investments of up to SEK 100,000 may be sold free of charge. Any unused withdrawal allowance accumulates over time.
