

Swedish landscape architecture firm Wi Landskap joins XPartners

XPartners is strengthening its landscape architecture offering and welcomes Wi Landskap AB to the group. The company is a well-established landscape architecture firm with specialist expertise in cultural heritage environments and extensive experience in both design and detailed design documentation. The acquisition adds sought-after niche expertise to XPartners' Swedish platform in Stockholm and Mälardalen.

Wi Landskap was founded in 2014 and works broadly across landscape architecture, including parks and the public realm, outdoor environments for children and young people, cultural environments, residential courtyards and commercial places. It supports both early-stage planning and detailed design. Clients primarily include construction companies, municipalities, government agencies and housing companies. In the most recently reported financial year, net sales amounted to just over SEK 13 million.

"We are pleased to welcome Wi Landskap to XPartners. They complement the group with niche landscape architecture expertise, and together we create clear opportunities for collaboration where more of the group's clients can benefit from Wi Landskap's capabilities. At the same time, the company gains access to additional competence and new customers," says **Magnus Trollius**, Managing Director, XPartners Sweden.

"We are proud and happy to become part of XPartners. We will continue as Wi Landskap with the same identity and quality, while gaining even greater opportunities to create beautiful, functional, and sustainable environments for our clients. This collaboration gives us the momentum to take the next step in our growth journey," says **Åsa Wilke**, CEO of Wi Landskap.
