SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

---

FORM 20-F

---

(Mark One)

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

**For the fiscal year ended December 31, 2025**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

**For the transition period from \_\_\_\_\_ to \_\_\_\_\_**

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report

**Commission file number 001-41676**

---

**Himalaya Shipping Ltd.**

(Exact name of Registrant as specified in its charter)

---

**Bermuda**

(Jurisdiction of incorporation or organization)

---

**S. E. Pearman Building  
2nd floor, 9 Par-la-Ville Road  
Hamilton HM 11  
Bermuda**

(Address of Principal Executive Office)

---

**Mi Hong Yoon  
S.E. Pearman Building  
2nd Floor 9 Par-la-Ville Road, Hamilton  
HM 11, Bermuda  
Telephone: +1 (441) 542-4577**

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to section 12(b) of the Act.

Title of each class	Trading Symbol	Name of each exchange on which registered
Common shares, par value \$1.00 per share	HSHP	New York Stock Exchange

Securities registered or to be registered pursuant to section 12(g) of the Act: **None**

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: **None**

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

**46,650,000 Common Shares, par value \$1.00 per share**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act 1934.

Yes  No

Note: Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See definition of "large accelerated filer," "accelerated filer" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one).

Large accelerated filer  Accelerated filer  Non-accelerated filer  Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards<sup>†</sup> provided pursuant to Section 13(a) of the Exchange Act.

<sup>†</sup> The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Yes  No

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Yes  No

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Yes  No

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP  International Financial Reporting Standards as issued by the International Accounting Standards Board   
Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17  Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

Yes  No

## NOTE ON THE PRESENTATION OF INFORMATION

We have prepared this annual report using a number of conventions, which you should consider when reading the information contained herein. In this annual report, unless the context otherwise requires, (i) references to “Himalaya Shipping Ltd.,” “Himalaya Shipping,” the “Company,” the “Registrant,” “we,” “us,” “Group,” “our” and words of similar import refer to Himalaya Shipping Ltd. and its consolidated subsidiaries, (ii) references to “our vessels” and “our fleet” refer to the 12 Newcastlemax dry bulk vessels.

References in the annual report to (i) our “Board” or “Board of Directors” refer to the board of directors of Himalaya Shipping Ltd. as constituted at any point in time and “Director” or “Directors” refers to a member or members of the Board, as applicable, (ii) our “Memorandum,” and the “Bye-Laws,” refer to the memorandum of association and the amended and restated bye-laws of Himalaya Shipping Ltd., respectively, each as in effect from time to time, (iii) “Magni” or “Magni Partners” refers to Magni Partners (Bermuda) Limited, (iv) “Drew” refers to Drew Holdings Limited, (v) “New Times” or “New Times Shipyard” refers to New Times SB Jingjiang shipyard in China, (vi) “1-4 Shipbuilding Contracts” refer to the shipbuilding contracts with New Times relating to four vessels with hull numbers 0120833, 0120834, 0120835 and 0120836, (vii) “5-8 Shipbuilding Contracts” refer to the shipbuilding contracts with New Times relating to four vessels with hull numbers 0120837, 0120838, 0120839 and 0120840, (viii) references to “9-12 Shipbuilding Contracts” refer to the shipbuilding contracts with New Times relating to four additional vessels with hull numbers 0120841, 0120842, 0120843 and 0120844, (ix) “Shipbuilding Contracts” refer to 1-4 Shipbuilding Contracts, 5-8 Shipbuilding Contracts and 9-12 Shipbuilding Contracts, as the context requires, (x) “Avic Leasing Arrangements” or “Avic Leasing” refers to our sale and leaseback agreements with subsidiaries of Avic International Leasing Co., Ltd. in relation to the four vessels under our 1-4 Shipbuilding Contracts, (xi) “CCBFL Leasing Arrangements” or “CCBFL Leasing” refers to our sale and leaseback agreements with subsidiaries of CCB Financial Leasing Co., Ltd., in relation to six vessels under our 5-8 Shipbuilding Contract and 9-12 Shipbuilding Contracts, (xii) “Jiangsu Financial Leasing Arrangements” or “Jiangsu Financial Leasing” refers to our sale and leaseback agreements with subsidiaries of Jiangsu Financial Leasing Co. Ltd. in relation to vessels with hull numbers 0120839 and 0120840, originally financed under the CCBFL Leasing, (xiii) “Sale and Leaseback Agreements” refer to the Avic Leasing, the CCBFL Leasing, and the Jiangsu Leasing, (xiv) “Drew Holdings Revolving Credit Facility” or “Drew Holdings RCF” refers to our unsecured revolving credit facility with Drew, (xv) “Financing Arrangements” refer to our Avic Leasing Arrangements, CCBFL Leasing Arrangements, Jiangsu Financial Leasing Arrangements and Drew Holdings RCF described more fully herein, collectively, (xvi) the “Corporate Support Agreement” refers to our corporate services agreement with Magni Partners, (xvii) the “Management Agreement” refers to our management agreement with 2020 Bulkera Management AS (“2020 Bulkera Management” or “Manager”), and (xviii) the “Ship Management Agreements” refer to management agreements with respect to each vessel in our fleet, with either Wilhelmsen Ship Management (Norway) AS, or “Wilhelmsen,” or OSM Bergen Dry AS, or “OSM,” each a “Ship Manager.”

References in this annual report to (i) the “SEC” refer to the US Securities and Exchange Commission and (ii) “U.S. GAAP” refer to the generally accepted accounting principles in the United States.

## PRESENTATION OF FINANCIAL INFORMATION

We produce financial statements in accordance with U.S. GAAP and all financial information included in this annual report is derived from our U.S. GAAP consolidated financial statements, except as otherwise indicated.

Our consolidated financial statements included in this annual report comprise our consolidated statements of operations, consolidated statements of cash flows and changes in shareholders’ equity for the years ended December 31, 2025, 2024 and 2023 and consolidated balance sheets as of December 31, 2025 and 2024 (the “Audited Consolidated Financial Statements”). We present our consolidated financial statements in U.S. dollars.

Unless otherwise indicated, all references to “U.S.\$” and “\$” in this annual report are to, and amounts are presented in, U.S. dollars. All references to “£,” “Pounds” or “GBP” are to pounds sterling. All references to “NOK” are to Norwegian Kroner.

## NON-U.S. GAAP FINANCIAL INFORMATION

In this annual report, we disclose non-GAAP financial measures, namely average Time Charter Equivalent (“TCE”) earnings, gross and EBITDA, as defined under "Item 5. Operating and Financial Review and Prospects." These measures are important measures that we and our business use to assess financial performance. Average TCE earnings, gross, is a non-U.S. GAAP measure of the average daily revenue performance of a vessel. Average TCE earnings, gross, when used by the Company, means time charter revenues and voyage charter revenues adding back address commissions, and dividing by the number of operational days. Our management believes average TCE earnings, gross can provide additional meaningful information for investors to analyze our fleets' daily income performance. EBITDA is calculated as net income adjusted for depreciation of vessels and equipment, total financial expenses, net and income tax expense. We believe that EBITDA increases the comparability of total business performance from period to period and against the performance of other companies by removing the impact of depreciation, financing and tax items. Our calculation of these non-GAAP financial measures may not be comparable to that reported by other companies.

## MARKET AND INDUSTRY DATA

In this annual report, we present certain market and industry data. Unless otherwise indicated, information contained in this annual report concerning our industry and the markets in which we operate, including our general expectations and market position, market opportunity and market size, is based on industry publications and other published industry sources prepared by third parties, as well as publicly available information. We believe the data from third-party sources to be reliable based upon our management’s knowledge of the industry, but have not independently verified such data. Forward-looking information obtained from third party sources is subject to the same qualifications as the uncertainties regarding the other forward-looking statements in this annual report.

Market data and statistics are inherently predictive and subject to uncertainty and do not necessarily reflect actual market conditions. Such statistics are based on market research, which, itself, is based on sampling and subjective judgments by both the researchers and the respondents, including judgments about what types of products and transactions should be included in the relevant market. As a result, investors should be aware that statistics, statements and other information relating to markets, market sizes, market shares, market positions and other industry data set forth in this annual report, including in the section entitled “Item 4. Information on the Company—B. Business Overview—The dry bulk shipping industry” (and projections, assumptions and estimates based on such data) may not be reliable indicators of our future performance and the future performance of the dry bulk shipping industry. See the sections entitled “Item 3. Key Information—D. Risk Factors” and “Cautionary Statement Regarding Forward-Looking Statements.”

## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This report and any related discussions contain statements that constitute forward-looking statements. Within the meaning of the Private Litigation Securities Reform Act of 1995 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements appear in a number of places in this document and include statements regarding our intent, belief or current expectations, and many of the forward-looking statements contained in this annual report can be identified by the use of forward-looking words such as “anticipate,” “believe,” “may,” “could,” “expect,” “should,” “plan,” “intend,” “estimate,” “objective” and “potential,” among others.

Forward-looking statements are based on our management’s beliefs and assumptions and on information currently available to our management, and include the following:

- our charters and charter strategy;
- expected trends in our industry, including those discussed under Item 4.B. “Business Overview—Dry Bulk Shipping Industry” and “—Capesize Fleet Development”;
- the development of projects in Guinea and Brazil, including timing of completion of such projects, output of such projects and impact on the Capesize market;
- environmental and other regulations and our compliance therewith;
- expected benefits of our vessels;
- expected environmental impact, including the lower CO2 emissions and the efficiency of our vessels;
- expected trends in the global fleet and demand of Newcastlemax vessels;
- expected market trends and expected impact of sanctions;
- the expected benefits of scrubbers, including potential scrubber driven savings and VLSFO - HSFO forward curves;

- potential benefits of dual fuel engines and potential savings from running vessels on LNG;
- our strategy and plans;
- the statements in Item 5.D “Trend Information”;
- our plans to meet our liquidity requirements;
- our dividend policy;
- our plans to make modifications to our vessels as discussed in Item 4.B.;
- our plan to increase our ownership in 2020 Bulkers Management; and
- other non-historical statements.

Such statements are subject to risks and uncertainties, and actual results may differ materially from those expressed or implied in the forward-looking statements due to various factors, including the following:

- general economic, political and business conditions;
- general dry bulk market conditions, including fluctuations in charter hire rates and vessel values;
- charter rates, operating days for our fleet and our ability to achieve charter rates above our break-even rate;
- changes in demand in the dry bulk shipping industry, including the market for our vessels;
- demand for the products our vessels carry and the status of projects, and timing of commencement of operations and number of production of projects that produce iron ore and other products we ship;
- changes in the supply of dry bulk vessels;
- our ability to successfully re-employ our dry bulk vessels at the end of their current charters and the terms of future charters;
- changes in our operating expenses, including fuel or bunker prices, dry docking and insurance costs;
- compliance with, and our liabilities under, governmental, tax environmental and safety laws and regulations;
- changes in governmental regulation, tax and trade matters and actions taken by regulatory authorities;
- potential disruption of shipping routes due to accidents, hostilities or political events including risks relating to the military actions in the Middle East;
- our ability to refinance our debt and other obligations as they fall due;
- fluctuations in foreign currency exchange rates;
- potential conflicts of interest involving members of our board and management and our significant shareholder;
- the risk of a continued economic slowdown in China and other factors impacting demand from China;
- global economic and trade conditions, the impact of tariffs and trade wars, wars and geopolitical events and the risk of heightened geopolitical tensions, including the impact of military actions in the Middle East;
- changes in the size of the fleet or ton miles;
- the development of projects in Guinea and Brazil, including timing of completion of such projects, output of such projects and impact on the Capesize market;
- our ability to pay dividends and cash distributions, and the amount of dividends and cash distributions we ultimately pay;
- risks related to climate change, including climate-change or greenhouse gas related legislation or regulations and the impact on our business from climate-change related physical changes or changes in weather patterns, and the potential impact of new regulations relating to climate change, as well as the impact of the foregoing on the performance of our vessels;
- other factors that may affect our financial condition, liquidity and results of operations;
- risks relating to our depending on the Ship Managers and the Manager; and
- other risks described in Item 3. Key Information—D.—Risk Factors.

Please see our Risk Factors in Item 3.D. of this annual report for a more complete discussion of these and other risks and uncertainties. Forward-looking statements speak only as of the date they are made, and we do not undertake and expressly disclaim any obligation to update them except as required by law.

## PART I

### ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS

Not applicable.

### ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

### ITEM 3. KEY INFORMATION

#### A. [Reserved]

#### B. Capitalization and Indebtedness

Not applicable.

#### C. Reasons for the Offer and Use of Proceeds

Not applicable.

#### D. Risk Factors

The risk factors summarized and detailed below could materially and adversely affect our business, our financial condition, our results of operations and the trading price of our common shares.

## **SUMMARY OF KEY RISKS**

*Our business, financial condition, results of operations and liquidity may be materially affected by the risks described below. Apart from the risks that we consider material, we may also be adversely impacted by additional risks affecting other companies, such as risks related to the conducting of international operations, climate change, technological changes and geopolitical events. These risks may cause our future results to be materially different than our current expectations. Some of the factors and events discussed may have occurred previously. Any such disclosure of risks and potential consequences of risks materializing does not constitute a representation that such factors, events, or contingencies have or have not occurred in the past; it is provided because their potential future occurrence could have a material adverse effect on our business.*

### **Risks Related to Our Business**

- We charter our vessels on time charters in a volatile shipping industry.
- We depend upon a limited number of significant customers for a large part of our revenues.
- Rising crew costs, inflation, and their connected increase in wages could adversely affect our results of operations.
- Liquidity risk could impair our ability to fund operations.
- We are subject to risks with respect to our counterparties on contracts and their failure to meet their obligations.
- We may be subject to litigation that may not be resolved in our favor and may not be sufficiently insured against.
- We depend on our subsidiaries to distribute or loan funds to us in order to make dividend payments.
- As an exempted company incorporated under Bermuda law, our operations may be subject to economic substance requirements.
- We rely on information technology, and if we are subject to service interruptions, data corruption, cyber-based attacks or network security breaches, our operations could be disrupted and our business could be negatively affected.
- The shipping industry has inherent operational risks that may not be adequately covered by our insurance.

### **Risks Related to Our Relationship with 2020 Bulkers Management and our Ship Managers**

- We depend on our Manager to operate our business and our business could be harmed if our Manager or the Ship Managers fail to perform their services satisfactorily.
- We are dependent on our Ship Managers and their ability to hire and retain key personnel.
- Our contracted Chief Executive Officer and Chief Financial Officer do not devote all of their time to our business, which may hinder our ability to operate successfully.

### **Risks Related to Taxation**

- We may be subject to U.S. federal income tax on U.S. source income, which may reduce our earnings.
- If we are classified as a “passive foreign investment company,” U.S. Holders of our common shares may be subject to adverse U.S. federal income tax consequences.
- A change in tax laws in any country in which we operate or loss of a major tax dispute or a successful tax challenge to our operating structure, intercompany pricing policies or the taxable presence of our subsidiaries in certain countries could adversely affect us.

### **Risks Related to Our Indebtedness**

- If our vessel charters do not provide sufficient revenue to service our obligations under our Financing Arrangements, we may be unable to make required payments thereunder.
- We may require additional capital in the future, which may not be available on favorable terms, or at all.
- Covenants in our Financing Arrangements impose financial and other restrictions on us, and any breach of these covenants could result in the acceleration of our indebtedness and foreclosure on our vessels.

### **Risks Related to Our Industry**

- Charter hire rates for dry bulk vessels are volatile and may decrease below our cash break-even rates.
- The global financial markets and economic conditions may adversely impact our business, results of operation, financial condition and our ability to obtain additional financing.
- Changes in international trade policies, or the escalation of tensions in international relations, particularly with regard to China, may adversely impact our business and operating results.
- A decrease in China’s imports and export of goods could have a material adverse effect on our business.

- We may be adversely affected by political instability, terrorist or other attacks, war and international hostilities and global public health threats can affect the seaborne transportation industry.
- A significant decrease in the market values of our vessels could cause us to incur an impairment loss and could have a material adverse effect on our ability to obtain future financing.
- We are subject to complex laws and regulations, including environmental regulations that can adversely affect the cost, manner or feasibility of doing business.
- We may be subject to requirements and standards imposed by charterers and the failure to comply with these may subject us to increased costs and adversely affect our operations.
- If our vessels fail to maintain their class certification imposed by classification societies and/or fail any annual survey, intermediate survey, dry docking or special survey, those vessels would be unable to carry cargo, thereby reducing our revenues and profitability and violating certain provisions in our credit agreements.
- If our vessels do not meet certain operational and technical requirements imposed by ports, our vessels may be refused entry into these ports or incur increased costs to meet these requirements which could have an adverse effect on our business, results of operations and financial conditions.
- Scrutiny of environmental, social and governance matters may impact our business and reputation.
- Natural or man-made disasters and other similar events may significantly disrupt our business and could have an adverse effect on our business, results of operations and financial condition.
- Political decisions may affect our vessels' trading patterns and could have an adverse effect on our business, results of operations and financial condition.
- If our vessels call on ports located in countries that are subject to restrictions imposed by the U.S., the European Union, the United Nations or other governments, this could lead to monetary fines or penalties and adversely affect our reputation and the market for our common shares and trading price.
- Increased inspection procedures, tighter import and export controls and security standards could increase costs and disrupt our business.
- Our results of operations are subject to seasonal fluctuations, which may adversely affect our financial condition.
- We operate dry bulk vessels worldwide and our business has inherent operational risks, which may result in damage to our vessels leading to unexpected drydocking costs and delays or total loss of our vessels.
- The smuggling of drugs or other contraband onto our vessels may lead to governmental claims against us.

#### **Risks Related to Our Common Shares**

- Our common share price may fluctuate due to a number of factors.
- Sales of substantial amounts of our common shares in the public market could cause the market price of our common shares to decline, and any additional capital raised by us may dilute your ownership in us.
- Our largest shareholder has significant influence over us.
- Certain of our major shareholders may have interests that are different from the interests of our other shareholders.
- We depend on directors who are associated with affiliated companies, which may create conflicts of interest.
- Our Board of Directors may not declare cash dividends and/or cash distributions in the future.
- Bermuda law differs from the laws in effect in the United States and may afford less protection to shareholders.
- Our Bye-laws restrict shareholders from bringing legal action against our officers and directors.
- We have anti-takeover provisions in our Bye-laws that may discourage a change of control.

## **Risks Related to Our Business**

***We charter our vessels on time charters in a volatile shipping industry and a decline in charter hire rates could affect our business, results of operations and financial condition.***

Our fleet currently operates on index-linked time charters and we intend to employ our vessels primarily in the index-linked market. Under our index-linked time charters, we have the option to convert these to fixed time charters subject to certain conditions, including agreement of the parties. For example, we have agreed to convert the index-linked charters to fixed rate time charters for four vessels from January 1, 2026 to March 31, 2026. The time charter market is highly competitive and spot market charter hire rates (which affect time charter rates) may fluctuate significantly based upon available charters and the supply of, and demand for, seaborne shipping capacity. While the index-linked time charter market may enable us to benefit in periods of increasing charter hire rates, we must renew our charters in a volatile dry bulk market, which makes us vulnerable to declining charter rates. When our time charter agreements are terminated or expire without being renewed, we must seek new bareboat or time charter agreements for these vessels or operate on the spot market. Bareboat or time charters may not be available for the vessels following termination or expiration, and bareboat or time charter rates in effect at the time of such termination or expiration may not be comparable to those in effect under the existing time charters. In addition, we are subject to market volatility as a result of our index-linked charters. As a result of the volatility in the dry bulk carrier charter market, we may not be able to employ our vessels upon the termination of their existing charters at their current charter hire rates or premiums or at all. Future charter hire rates may not enable us to operate our vessels profitably, or to pay dividends.

***We depend upon a limited number of significant customers for a large part of our revenues and the loss of one or more of these customers could adversely affect our business, results of operations and financial condition.***

We derive a significant part of our revenues from a limited number of charterers. If one or more of our charterers chooses not to charter our vessels or is unable to perform under one or more charters with us and we are not able to find a replacement charter, we could suffer a loss of revenues that could have a material adverse effect on our business, results of operations and financial condition.

***Rising crew costs, inflation, and their connected increase in wages could adversely affect our results of operations.***

Over the last few years, worldwide economies have experienced inflationary pressures. Supply chain and transportation constraints, as well as volatility and rising energy, food and commodity prices, have contributed to global price growth. Inflationary pressures could result in increased operating, voyage and administrative costs which could in turn negatively impact the Company's operating results and cash flows. Although historically the ocean shipping industry has been able to largely offset the inflationary pressure by passing the costs of inflation onto its customers, the industry as a whole and the Company in particular may not be able to offset such cost increases sufficiently. In addition, the increase in the size of the global shipping fleet has led to the limited supply of, and increased demand for crew, creating upward pressure on crew costs. Continued higher crew costs or further increases in crew costs coupled with a persistent inflationary environment and the connected increase in crew wages could adversely affect our results of operations.

***Liquidity risk could impair our ability to fund operations and jeopardize our financial condition, growth and prospects.***

We are dependent on cash generated by our current and future operations, cash on hand, and borrowings under the Revolving Credit Facility with Drew Holdings ("Drew Holdings RCF") to meet our operating expenses, service our indebtedness and fund our other liquidity needs. The level of cash available to us depends on numerous factors, including demand for our services and the rates we are paid by our customers, global economic conditions, the price of oil and bunker prices, our ability to control costs, our ability to access capital markets and any amounts available to us under the Drew Holdings RCF. One or more of such factors could be negatively impacted and our sources of liquidity could be insufficient to fund our operations and service our obligations such that we may require capital in excess of the amount available from those sources. Our access to funding sources in amounts adequate to finance our operations and planned capital expenditures and repay our indebtedness on terms that are commercially acceptable could be impacted by factors such as negative views and expectations about us, the oil and gas industry or the economy in general and disruptions in the financial markets, as well as conditions in the dry bulk market or demand for our services or rates we are paid.

If we experience a significant decrease in cash generated from our operations, or are unable to maintain our access to or secure new sources of financing, this would have a significant impact on our ability to meet our obligations or continue our operations. In such cases, if additional financing sources are unavailable, or not available on reasonable terms, our financial condition, results of operations, growth, and future prospects, could be materially adversely affected, and we may be unable to continue as a going concern. As such, we cannot assure you that cash flow generated from our business and other sources of cash, including the Drew Holdings RCF or any new debt and equity financings, will be sufficient to enable us to pay our indebtedness and to fund our other liquidity needs.

***We are subject to risks with respect to our counterparties on contracts, and failure of such counterparties to meet their obligations could cause us to suffer losses or negatively impact our business.***

We have entered, and plan to enter, into various contracts, including charter parties with our customers, vessel management agreements, our Sale and Leaseback Agreements, and other agreements. Such agreements subject us to counterparty risks. Such risks may be relevant for contracts we may enter into in the future and for the contracts, which we have already entered into, including the Avic Leasing, CCBFL Leasing and Jiangsu Leasing, the Management Agreement and the Corporate Support Agreement. The ability or willingness of each of our counterparties to perform their obligations under a contract with us depends on a number of factors that are beyond our control, which may include, among other things, general economic conditions, the condition of the maritime industry, the overall financial condition of the counterparty, charter rates received for our Newcastlemax dry bulk carriers, the supply and demand for commodities and various other factors. Should our counterparties fail to honor their obligations under agreements with us, this could have a material adverse effect on our business, results of operations and financial condition.

Charterers are sensitive to the commodity markets and demand for our services may be impacted by market forces affecting commodities. In addition, in depressed market conditions, charterers may no longer need a vessel that is currently under charter or may be able to obtain a comparable vessel at lower rates. As a result, charterers may have incentive to renegotiate their charters or default on their obligations under charters. Should a charterer fail to honor its obligations under agreements with us, it may be difficult to secure substitute employment for such vessel, and any new charter arrangements we secure on the spot market or on time charters may be at lower rates compared to the rates currently being earned on our vessels. If our charterers fail to meet their obligations to us or attempt to renegotiate charter agreements, we could sustain significant losses which could have a material adverse effect on our business, results of operations and financial condition. Any steps the Company may take to mitigate such consequences for example through re-negotiation of terms with its lenders, or striving to re-charter or seek remedies from defaulting charterers, may not be successful and may lead to negative reactions from its lenders which may be detrimental for the Company's business.

***We may be subject to litigation that, if not resolved in our favor or covered by insurance, could have a material adverse effect on our business, results of operations and financial condition.***

We may be, from time to time, involved in various litigation matters. These matters may include, among other things, contract disputes, personal injury claims, environmental claims or proceedings, including in connection with any potential malfunctioning or failure of the scrubbers installed in our vessels, or any other maritime or environmental pollution issues, asbestos and other toxic tort claims, employment matters, governmental claims for taxes or duties, and other litigation that arises in the ordinary course of our business. The ultimate outcome of any litigation or the potential costs to resolve them may have a material adverse effect on us. Insurance may not be applicable or sufficient in all cases and/or insurers may not remain solvent which may have a material adverse effect on our business, results of operations and financial condition.

***We are a holding company, and we depend on our subsidiaries to distribute or loan funds to us in order to satisfy our financial obligations include making dividend payments.***

We are a holding company and our subsidiaries, which are all wholly owned by us, conduct all of our operations and own all of our operating assets. As a result, our ability to satisfy our financial obligations and pay dividends depends on our subsidiaries and their ability to distribute funds to us. In addition, pursuant to the Avic Leasing Arrangement, a dividend or cash or other distributions by our subsidiaries that are obligors under that arrangement, is only allowed if immediately following such dividend or other distribution, there will be maintained in the relevant subsidiary's account a total amount no less than the higher of (a) \$3.6 million, and (b) the bareboat hire rate under the facility and the operating expenses for the relevant vessel that are payable within the next six months on a pro forma basis after such payment distribution; and the obligation of each of our subsidiaries to maintain a minimum cash balance in its account equivalent to three months' charter hire under the applicable CCBFL Leasing and Jiangsu Leasing. The foregoing amounts to approximately \$1.5 million per subsidiary that is an obligor under such arrangement which limits the amount of dividends that the subsidiaries are able to pay up to us.

The ability of a subsidiary to make these distributions could be affected by a claim or other action by a third-party, including a creditor, and the laws of the Republic of Liberia, where our subsidiaries are incorporated, which may in the future regulate the payment of dividends by companies. For a description of the restrictions on dividends under the Avic Leasing Arrangement, see "Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements." If we are unable to obtain funds from our subsidiaries, our Board of Directors may decide not to declare or pay dividends.

***As an exempted company incorporated under Bermuda law, our operations may be subject to economic substance requirements.***

The Economic Substance Act 2018 and the Economic Substance Regulations 2018 of Bermuda (the "Economic Substance Act" and the "Economic Substance Regulations," respectively) became operative on December 31, 2018. The Economic Substance Act applies to every registered entity in Bermuda that engages in a relevant activity and requires that every such entity shall maintain a substantial economic presence in Bermuda. Relevant activities for the purposes of the Economic Substance Act are banking business, insurance business, fund management business, financing and leasing business, headquarters business, shipping business, distribution and service center business, intellectual property business and conducting business as a holding entity.

The Bermuda Economic Substance Act provides that a registered entity that carries on a relevant activity complies with economic substance requirements if (a) it is directed and managed in Bermuda, (b) its core income-generating activities (as may be prescribed) are undertaken in Bermuda with respect to the relevant activity, (c) it maintains adequate physical presence in Bermuda, (d) it has adequate full-time employees in Bermuda with suitable qualifications and (e) it incurs adequate operating expenditure in Bermuda in relation to the relevant activity.

A registered entity that carries on a relevant activity is obliged under the Bermuda Economic Substance Act to file a declaration in the prescribed form (the "Declaration") with the Registrar of Companies (the "Registrar") on an annual basis.

If we fail to comply with our obligations under the Bermuda Economic Substance Act or any similar law applicable to us in any other jurisdictions, we could be subject to financial penalties and disclosure of information to foreign tax officials in related jurisdictions, and may be struck from the register of companies in Bermuda or such other jurisdiction. Any of these actions could have a material adverse effect on our business, results of operations and financial condition.

***We rely on information technology, and if we are subject to service interruptions, data corruption, cyber-based attacks or network security breaches, our operations could be disrupted and our business could be negatively affected.***

We rely on information technology systems and networks in our operations and administration of our business. The safety and security of our vessels and efficient operation of our business, including processing, transmitting and storing electronic and financial information, depends on computer hardware and software systems, which are increasingly vulnerable to security breaches and other disruptions. Any significant interruption or failure of our information systems or any significant breach of security could adversely affect our business, results of operations and financial condition.

Our vessels rely on information systems for a significant part of their operations, including navigation, provision of services, propulsion, machinery management, power control, communications and cargo management. We have in place safety and security measures on our vessels and onshore operations. However, measures we take to try to protect our vessels and other operations against cybersecurity attacks and any disruption to their information systems may not be effective or adequately prevent security breaches, which are constantly evolving and have become increasingly sophisticated. Cybersecurity threats may not be recognized or detected until they have been launched, and we may be unable to anticipate these threats and may not become aware in a timely manner of such a security breach, which could exacerbate any damage we experience. A disruption to the information system of any of our vessels could lead to, among other things, incorrect routing, collision, grounding and propulsion failure.

Beyond our vessels, we rely on security measures and technology to securely maintain confidential and proprietary information maintained on our information systems. However, these measures and technology may not adequately prevent security breaches. The technology and other controls and processes designed to secure our confidential and proprietary information, detect and remedy any unauthorized access to that information cannot provide absolute assurance that such information is secure and that any unauthorized access is identified and addressed appropriately. Such controls may fail to prevent or detect unauthorized access to our confidential and proprietary information. In addition, the foregoing events could result in violations of applicable privacy and other laws. If confidential information is inappropriately accessed and used by a third-party or an employee for illegal purposes, we may be subject to claims that we are responsible to the affected individuals for any losses they may have incurred as a result of misappropriation. In such an instance, we may also be subject to regulatory action, investigation or liable to a governmental authority for fines or penalties associated with a lapse in the integrity and security of our information systems.

We may be required to expend significant capital and other resources to protect against and remedy any potential or existing security breaches and their consequences. A cyber-attack could also lead to litigation, fines, other remedial action, heightened regulatory scrutiny and diminished customer confidence. In addition, any remediation efforts that we take may not be successful and we may not have adequate insurance to cover these losses. The unavailability of the information systems or the failure of these systems to perform as anticipated for any reason could disrupt our business and could have a material adverse effect on our business, results of operations and financial condition.

***We are subject to data privacy laws, including the European Union’s General Data Protection Regulation, and any failure by us to comply could result in proceedings or actions against us and subject us to significant fines, penalties, judgments and negative publicity.***

We are subject to numerous data privacy laws, in particular the European Union’s General Data Protection Regulation (2016/679), or the GDPR, which relates to the collection, use, retention, security, processing and transfer of personally identifiable information about our customers and employees in the countries where we operate. The EU data protection regime expands the scope of the EU data protection law to all companies processing data of EEA individuals, imposes a stringent data protection compliance regime, including administrative fines of up to the greater of 4% of worldwide turnover or €20 million (as well as the right to compensation for financial or non-financial damages claimed by any individuals), and includes new data subject rights such as the “portability” of personal data.

We process and obtain certain personal information relating to individuals, and any failure by us to comply with the GDPR or other data privacy laws where applicable could result in proceedings or actions against us, which could subject us to significant fines, penalties, judgments and negative publicity.

***Artificial intelligence poses security risks to our confidential information and personal data, and failure to manage these security risks could result in breaches to data privacy laws and lead to significant fines, penalties and negative publicity that could have a material adverse effect on our business.***

There continues to be significant evolution and developments in the use of artificial intelligence technologies, including generative artificial intelligence. While we currently only use artificial intelligence to a limited extent to assist in preparing reports and have not integrated the use of artificial intelligence in our business, we could integrate it in the future. Our Ship Managers and other third party providers may incorporate artificial intelligence tools in their operations which may fail to meet current or evolving data privacy laws. If we, our Ship Managers, or our third-party providers experience an actual or perceived privacy or security breach in connection with the use of generative artificial intelligence, we could lose valuable confidential information, and our reputation and the public perception of the effectiveness of our security measures could be materially harmed. In addition, threat actors worldwide are using increasingly sophisticated techniques, including artificial intelligence, to engage in unlawful activities involving the theft and misuse of personal data and confidential information. Any of these outcomes could result in significant fines, penalties and reputational damage that could have a material adverse effect on our business.

***The shipping industry has inherent operational risks that may not be adequately (or at all) covered by our insurance. Further, because we obtain some of our insurance through protection and indemnity associations, we may also be retrospectively subject to calls or premiums in amounts based not only on our own claim records, but also on the claim records of all other members of the protection and indemnity associations.***

We procure insurance for our fleet against risks commonly insured against by vessel owners and operators. Our current insurance includes loss of hire, hull and machinery insurance, war risks insurance, demurrage and defense insurance and protection and indemnity insurance (which includes environmental damage and pollution insurance). We may not be adequately insured against all risks and our insurers may not pay a particular claim. Even if our insurance coverage is adequate to cover our losses, we may not be able to timely obtain a replacement vessel in the event of a loss. Furthermore, in the future, we may not be able to obtain adequate insurance coverage at reasonable rates for our fleet. Our insurance policies also contain deductibles, limitations and exclusions which, although we believe are standard in the shipping industry, may nevertheless result in uninsured losses and therefore increase our costs. If our insurance is not sufficient to cover claims that may arise, the deficiency may have a material adverse effect on our financial condition and results of operations. We may also be retrospectively subject to calls, or premiums, in amounts based not only on our own claim records but also the claim records of all other members of the protection and indemnity associations through which we receive indemnity insurance coverage for tort liability, including pollution-related liability. These calls could result in significant expenses to us.

#### **Risks Related to Our Relationship with 2020 Bulkers Management and our Ship Managers**

***We depend on our Manager to operate our business and our business could be harmed if our Manager or the Ship Managers fail to perform their services satisfactorily.***

Pursuant to our Management Agreement, our Manager, 2020 Bulkers Management, provides us with certain operational, commercial and management services, including obtaining technical management services for the vessels, and assisting us with procuring insurance for our vessels and operations.

Our operational success depends in part upon our Manager's satisfactory performance of these services and upon our Manager's relationships within the industry. Our business would be harmed if our Manager failed to perform these services satisfactorily or if our Manager suffered reputational harm. The Management Agreement has an indefinite duration and may be terminated by either party with one-month written notice. If the Management Agreement were to be terminated or if its terms were to be altered, our business could be adversely affected, as we may not be able to replace the services provided under this agreement on a timely basis, and even if replacement services were immediately available, the terms offered could be less favorable than those under the existing agreements.

Our ability to compete for and enter into charters and to expand our relationships with our existing charterers depends largely on our relationship with our Manager and its reputation and relationships in the shipping industry. If our Manager suffers material damage to its reputation or relationships, this may harm our ability to:

- renew existing charters upon their expiration;
- obtain new charters;
- successfully interact with shipyards during periods of drydocking;
- obtain financing on commercially acceptable terms;
- maintain satisfactory relationships with our charterers and suppliers; and
- successfully execute our business strategies.

Our Manager's ability to render management services will depend in part on its own financial strength and its ability and intention to continue to provide management services to us. Circumstances beyond our and our Manager's control could impair our Manager's plans, ability or financial strength.

Any financial or other problems affecting 2020 Bulkera Management could impair the management services provided to us and if our ability to do any of the things described above is impaired, this could have a material adverse effect on our business results, results of operations and financial condition.

In addition, we rely on the Ship Managers to provide technical management of our vessels, and any failure by such managers to perform such services satisfactorily could impact our operations and our customers.

***We are dependent on our Ship Managers and their ability to hire and retain key personnel.***

We have entered into Ship Management Agreements to outsource the technical management of our vessels to Wilhelmsen Ship Management (Norway) AS ("Wilhelmsen") and OSM Bergen Dry AS ("OSM"). There may be conflicts of interest between us and the Ship Managers that may not be resolved in our favor. Our success depends to a significant extent upon the abilities and efforts of our Ship Managers and their ability to perform their obligations under the Ship Management Agreements, and if they are unable to do so, could adversely affect our business prospects and financial condition.

Our continued success will also depend upon our Ship Managers' ability to hire and retain key personnel. In crewing our vessels, we require technically skilled employees with specialized training who can perform physically demanding work. Competition to attract and retain qualified crew members is intense. The loss of any of these individuals or if our Manager is not able to obtain higher charter rates to compensate for any crew cost increases, this could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Pursuant to the Ship Management Agreements for our vessels, we pay to our Ship Managers an annual fee for each vessel, to be revised annually. The fees under the Management Agreement and Ship Management Agreements are payable whether or not our vessels are employed.

***Our contracted Chief Executive Officer and Chief Financial Officer do not devote all of their time to our business, which may hinder our ability to operate successfully.***

Our contracted Chief Executive Officer, Chief Financial Officer and part of the Manager team pursuant to the Management Agreement, participate in other business activities not associated with us, including serving as members of the management team of 2020 Bulkera Management, and are not required to work full-time on our affairs. 2020 Bulkera Ltd. has announced that it has agreed to sell all of its vessels. We have agreed that following the sale of the remaining vessels of 2020 Bulkera Ltd. which is expected to take place at the end of March 2026, we will increase our ownership in 2020 Bulkera Management to 54% effective from April 1, 2026, with the remaining 46% to be owned by 2020 Bulkera Ltd. and Bruton Limited, The Manager team will also perform services for Bruton Limited under a management agreement. As a result, our contracted Chief Executive Officer and Chief Financial Officer, and such other members of our Manager team, may devote less time to us than if they were not engaged in other business activities and may owe fiduciary duties to our shareholders as well as shareholders of other companies with which he may be affiliated, including the Manager, 2020 Bulkera Management, which may lead to conflicts of interest. Any of the foregoing could have a material adverse effect on our business, results of operations and financial condition.

## **Risks Related to Taxation**

*We may be subject to U.S. federal income tax on U.S. source income, which may reduce our earnings.*

In general, under Section 883 of the Code, certain non-U.S. corporations, such as us, are not subject to U.S. federal income tax or branch profits tax on U.S. source income derived from, or incidental to, the international operation of a ship or ships. Applicable U.S. Treasury Regulations generally provide that a non-U.S. corporation will qualify for the benefits of Section 883 if, in relevant part, (i) the country in which the non-U.S. corporation is organized grants an equivalent exemption to corporations organized in the United States in respect of each category of shipping income for which an exemption is being claimed under Section 883 and (ii), for more than half of the days of the year for which the non-U.S. corporation claims the benefits of Section 883, shares of stock of the non-U.S. corporation are primarily and regularly traded on one or more established securities markets.

Whether we qualify for the benefits of Section 883, in certain circumstances, depends on a specified percentage of our common shares being owned, directly or indirectly, by shareholders who meet certain tests, including being resident in the United States or certain other countries. In such circumstances, we would be required to satisfy certain substantiation and reporting requirements to establish that we so qualify, which in turn would require such shareholders (and certain intermediaries through which they indirectly own our common shares) to provide us with certain documentation. The ownership of our common shares may not allow us to so qualify for the benefits of Section 883, or, even if the ownership of our common shares would allow us to so qualify, we may not be able to satisfy the substantiation and reporting requirements that we would need to meet to establish that we so qualify. As a result, there can be no assurance that we will qualify for the benefits of Section 883 for the 2026 taxable year or any subsequent taxable year.

If we do not qualify for the benefits of Section 883 for any taxable year, we could be subject to a 4% U.S. federal income tax on the shipping income we derive during the year, on a gross income basis, that is attributable to the transport of cargoes to or from the United States. The imposition of this tax may adversely affect our business and would result in decreased earnings available for distribution to our shareholders.

*If we are classified as a “passive foreign investment company,” U.S. Holders of our common shares may be subject to adverse U.S. federal income tax consequences.*

A non-U.S. corporation, such as us, will be classified as a passive foreign investment company (“PFIC”) for U.S. federal income tax purposes for any taxable year if either (i) 75% or more of its gross income consists of passive income (the “income test”) or (ii) 50% or more of its assets (determined on the basis of a quarterly average) is attributable to assets that produce or are held for the production of passive income (the “asset test”). PFIC status is a factual determination that must be made annually after the close of each taxable year. This determination will depend on, among other things, the composition of our income, assets and operations, as well as the value of our assets (which may be determined, in part, by reference to the public price of our common shares, which may fluctuate significantly), from time to time.

We believe that the income we earn from our time charters and from our voyage charters should not be treated as passive income for the purposes of the income test. Accordingly, based on the current composition of our income and assets, and our expected income and operations, we believe that we were not a PFIC for our most recent taxable year ending December 31, 2025 and we do not expect to be a PFIC for the current taxable year or foreseeable future taxable years. There can be no assurance, however, that we were not a PFIC for the taxable year ending December 31, 2025 or will not be classified as a PFIC for the current taxable year or for future taxable years. If we are treated as a PFIC for any taxable year during which a U.S. Holder (as defined below) holds our common shares, such U.S. Holder could be subject to adverse U.S. federal income tax consequences. See “Item 10. Additional Information—E. Taxation—U.S. Federal Income Tax Considerations—Passive Foreign Investment Company Considerations.”

*A change in tax laws in any country in which we operate or loss of a major tax dispute or a successful tax challenge to our operating structure, intercompany pricing policies or the taxable presence of our subsidiaries in certain countries could adversely affect us.*

Tax laws, treaties and regulations are highly complex and subject to change and differing interpretation. Consequently, we and our subsidiaries are subject to changing laws, treaties and regulations of and between the countries in which we operate. Our tax expense is based on our interpretation of the tax laws in effect at the time the expense was incurred. A change in tax laws, treaties or regulations, or in the interpretation thereof, could result in a materially higher tax expense or a higher effective tax rate on our earnings. Such changes may include measures enacted in response to the ongoing initiatives in relation to fiscal legislation at an international level such as the Action Plan on Base Erosion and Profit Shifting of the Organization for Economic Co-Operation and Development. For example, on December 27, 2023, Bermuda enacted the Corporate Income Tax Act (the “CIT Act”). Entities subject to tax under the CIT Act are the Bermuda constituent entities of multi-national groups. While we have a tax-exempt status in Bermuda until March 31, 2035, Bermuda specifically provided that the CIT Act applies notwithstanding any assurance given pursuant to the Exempted Undertakings Tax Protection Act 1966 (the “EUTP Act”). Based on a number of operational, economic and regulatory assumptions, we do not expect to have consolidated revenue sufficient for us to fall within scope of the CIT Act in the near future. We will monitor the developments on the Bermuda internal regulations with regards to the CIT Act implementation. To the extent our consolidated revenue is sufficient for us to be within the CIT Act thresholds, we may be subject to taxation in Bermuda. If we are subject to taxation in Bermuda under the CIT act, our international shipping income may be excluded from taxation if we can demonstrate either strategic or commercial management in Bermuda.

In addition, if any tax authority successfully challenges positions we may take in tax filings, our operational structure, intercompany pricing policies, the taxable presence of our subsidiaries in certain countries or any other situation, or if the terms of certain income tax treaties are interpreted in a manner that is adverse to our structure, or if we lose a material tax dispute in any country, our effective tax rate on our worldwide earnings could increase substantially and our earnings and cash flows from operations could be materially adversely affected.

#### **Risks Related to Our Indebtedness**

***If our vessel charters do not provide sufficient revenue to service our obligations under our Financing Arrangements, we may be unable to make required payment thereunder.***

For the substantial financing required for the dry bulk carriers, we entered into the Sale Leaseback Agreements, for a total amount of \$758.4 million. For the first four vessels delivered to us, we have entered into the Avic Leasing for pre-delivery and delivery financing by way of a sale leaseback financing. Upon delivery of the relevant vessels from New Times, each relevant vessel owning subsidiary of the Company sold its vessel to a special purpose vehicle (SPV) owned by Avic, and the SPVs chartered the vessel back to the relevant Company’s subsidiary, under bareboat charters, under which we have the obligation to pay the hire rates irrespective of any contingency (“Hell and High Water Terms”).

In addition to the Avic Leasing, we entered into the CCBFL Leasing for six vessels and Jiangsu Leasing for two vessels, which are sale leaseback arrangements.

We are required to pay our Leasing Providers an aggregate amount of lease payments under the lease agreements of approximately \$72.6 million per year. If our vessel charters do not provide sufficient revenue to pay the corresponding lease payments (in addition to our operating, administrative and other expenses), we may be unable to make required payment under our leases which may result in events of default under such arrangements. If we are unable to meet our lease obligations or if a default occurs under our Sale Leaseback Agreements or other Financing Arrangements, our lenders could exercise remedies under our Financing Arrangements, which may include the leasing providers eventually taking control of the vessels. See “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements” which provides an overview of such installments, how they have been financed and how they are intended to be financed going forward.

We also rely on borrowings under the Drew Holdings RCF to operate our business and are required to make payments thereunder, of which none has been drawn as of March 5, 2026.

***We may require additional capital, which may not be available on favorable terms, or at all.***

Depending on many factors, including market developments, our future earnings, the value of our assets and expenditures for any new projects, we may need additional funds. We may not be able to obtain additional financing on commercially acceptable terms or at all. If adequate funds are not available, it could prevent us from obtaining required capital or meeting our obligations or realizing potential revenues from investments and it could have a material adverse effect on our business, results of operations and financial condition.

We had cash and cash equivalents of \$32.4 million as of December 31, 2025. Our only Credit Facility currently in place for additional borrowings is the Drew Holdings RCF, which provides for borrowing of up to \$10 million, of which none has been drawn as of March 5, 2026.

***Covenants in our Financing Arrangements impose financial and other restrictions on us, and any breach of these covenants could result in the acceleration of our indebtedness and foreclosure on our vessels.***

Our existing Financing Arrangements impose, and any future credit facility, financing and leasing agreement may impose, customary operating and financial restrictions on us. The restrictions under our existing Financing Arrangements generally require us to maintain, among other things, minimum cash balance requirements, and limit our ability to incur new indebtedness, among other things, pay dividends. For example, under the Avic Leasing, a dividend or other distribution by our subsidiaries that are obligors under such arrangement is only allowed if immediately following such payment or distribution there will be maintained in the relevant subsidiary's account a total amount no less than the higher of (i) \$3.6 million, and (ii) the bareboat rate under the facility and the operating expenses for the relevant vessel that are payable within the next six months on a pro forma basis after such distribution. There is also an obligation of each of our subsidiaries that are obligors under such arrangement to maintain a minimum cash balance in its account equivalent to three months' charter hire under the applicable CCBFL Leasing and Jiangsu Leasing. This may limit our ability to pay dividends to our shareholders, finance our operations or pursue business opportunities.

A failure to meet our payment and other obligations or to maintain compliance with the applicable financial covenants could lead to defaults under our Financing Arrangements. Upon an event of default, our Leasing Providers could declare default under our bareboat charters, terminate such arrangements, and any outstanding amounts and unpaid charter hire shall become payable, including other amounts representing the Leasing Providers' losses as a result of the early termination, as applicable (the "Termination Sum"). If the outstanding amounts are not paid, the vessel may be redelivered to the Leasing Provider, which will also have the right to lease the vessel to any other parties or sell the relevant vessel and apply the net sale proceeds against the Termination Sum and claim from us for any shortfall. The loss of these vessels would have a material adverse effect on our business, results of operations and financial condition.

***Because we generate all of our revenues in U.S. dollars but incur certain expenses in other currencies, exchange rate fluctuations could adversely impact our results of operations.***

We generate all of our revenues in U.S. dollars and the majority of our expenses are also in U.S. dollars. However, certain limited expenses are currently incurred and expected to be incurred in other currencies. Changes in the value of the U.S. dollar relative to the other currencies or the amount of expenses we incur in other currencies could cause fluctuations in our net income.

## **Risks Related to Our Industry**

***Charter hire rates and spot rates for dry bulk vessels are volatile, have fluctuated significantly over the past years, and may decrease below our cash break-even rates, which may adversely affect our business, results of operations and financial condition.***

The dry bulk shipping industry is cyclical and charter hire rates and spot rates and profitability are volatile. Time charter and spot market rates for dry bulk vessels have in the past declined below operating costs of vessels. We are exposed to changes in charter and spot rates for dry bulk carriers and such changes may adversely affect our earnings and the value of our dry bulk carriers at any given time.

Fluctuations in charter rates in the dry bulk market result from changes in the supply of and demand for vessel capacity for the major commodities carried on water internationally and the degree of charter hire rate volatility among different types of dry bulk vessels has varied widely. Volatility in charter rates affects our earnings and results of operations and also affects the value of our dry bulk vessels. The Baltic Dry Index, or the BDI, a daily average of charter rates for key dry bulk routes published by the Baltic Exchange Limited, which has long been viewed as the main benchmark to monitor the movements of the dry bulk vessel charter market and the performance of the entire dry bulk shipping market has been very volatile. The market for Capesize vessels, which is more relevant for Himalaya Shipping, is considered to be particularly volatile. This is reflected in fluctuations in the Baltic Capesize Index (“BCI”), which is the weighted average rate of 5 time charter routes. In 2024, the BCI ranged from 8,945 per day to 35,780 per day. In 2025, the BCI ranged from 5,899 per day to 44,672 per day. Because the volatility in the dry bulk carrier charter industry and factors affecting the supply of and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in charter rates are also unpredictable, and may continue to have adverse consequences for our industry, including an absence of financing for vessels, charterers seeking to renegotiate the rates for existing time charters, and widespread loan covenant defaults in the dry bulk shipping industry. Volatility and low charter rates could also cause the value of our common shares to be substantially reduced or eliminated.

The relatively low rates from the fourth quarter of 2024 continued into the first quarter of 2025. Rates increased from March and stabilized through 2025, The year ended with strong rates in December, and ending at an average of \$28,875 in the fourth quarter of 2025, On March 5, 2026, the rate was \$23,262 per day for the standard BCI vessel. There are many uncertainties in the market and rates could also decline as a result of the hostilities between Russia and Ukraine, and in the Middle East, or for any other reason. We may not be able to successfully charter our vessels at rates sufficient to allow us to cover our cash break even, meet our obligations or pay any dividends in the future. See “Item 3. Key Information—D. Risk Factors—Risks Related to Our Industry—Our results of operations are subject to seasonal fluctuations, which may adversely affect our financial condition.”

Factors that influence demand for dry bulk vessel capacity include:

- supply of and demand for, changes in the exploration or production of, and the location of consuming regions for energy resources, commodities, and semi-finished and finished consumer and industrial products;
- the location of regional and global exploration, production and manufacturing facilities;
- globalization and nationalization of production and manufacturing;
- global and regional economic and political conditions, wars and other armed conflicts, including the war in Ukraine and the current military conflicts in the Middle East, terrorist activities, embargoes, strikes, tariffs and “trade wars,” developments in international trade and fluctuations in industrial and agricultural production;
- economic slowdowns caused by public health events, including pandemics and other diseases and viruses, affecting livestock and humans;
- disruptions and developments in international trade;
- changes in seaborne and other transportation patterns, including the distance cargo is transported by sea and trade patterns;
- the development of iron ore and bauxite mining projects, including timing of completion of such projects, output of such projects and impact on the Capesize market;
- environmental and other regulatory developments; and
- currency exchange rates.

Demand for dry bulk vessels is dependent upon economic growth in the world’s economies, seasonal and regional changes in demand, the sources and supply of dry bulk cargo transported by sea. Adverse economic, political or social conditions or other developments could negatively impact charter rates and have a material adverse effect on our business, results of operations and financial condition.

Factors that influence the supply of dry bulk vessel capacity include:

- the number of newbuilding orders and deliveries, including delays in deliveries;
- the number of shipyards and ability of shipyards to deliver vessels;
- port and canal congestion;
- the degree of scrapping of older vessels, which depends on, among other things, on recycling rates and international recycling regulations;
- disruption of shipping routes due to accidents, wars or political events;

- speed of vessels;
- vessel casualties;
- the number of vessels that are out of service, namely those that are laid-up, dry docked, awaiting repairs or otherwise not available for hire;
- sanctions (in particular, sanctions on Russia, Iran, and Venezuela, among others);
- availability of financing for new vessels and shipping activity;
- changes in national or international regulations that may limit the useful life of vessels or effectively cause reductions in the carrying capacity of vessels or early obsolescence of tonnage and encourage the construction of vessels; and
- changes in environmental and other regulations that may limit the useful lives of vessels.

In addition to the prevailing and anticipated freight rates, factors that affect the level of newbuilding, and changes in the capacity of the global dry bulk fleet, scrapping and laying-up include newbuilding prices, second-hand vessel values in relation to scrap prices, costs of bunker and other operating costs, costs associated with classification society surveys, normal maintenance costs and insurance coverage costs, the efficiency and age profile of the existing dry bulk fleet in the market, and government and industry regulation of maritime transportation practices, particularly environmental protection laws and regulations. These factors influencing the supply of and demand for dry bulk shipping capacity are outside of our control, and we may not be able to correctly assess the nature, timing and degree of changes in industry conditions.

Demand for our dry bulk vessels depends upon economic growth in the world's economies, including China and India, seasonal and regional changes in demand, changes in the capacity of the global dry bulk fleet and the sources and supply of dry bulk cargo to be transported by sea. While there has been a general decrease in new dry bulk carrier ordering since 2014, the capacity of the global dry bulk carrier fleet could increase and economic growth may not resume in areas that have experienced a recession or continue in other areas. In addition, adverse economic, political, social or other developments could have a material adverse effect on our business, results of operations and financial condition. Further, the dry bulk market fluctuates widely based on a variety of factors including changes in overall market movements, political and economic events, wars, acts of terrorism, natural disasters (including disease, epidemics and pandemics) and changes in interest rates or inflation rates.

***The global financial markets and economic conditions may adversely impact our business, results of operation, financial condition and our ability to obtain future financing.***

Global financial markets and economic conditions have been, and continue to be, volatile. Global financial markets, including financial markets in the U.S., have experienced significant volatility in recent years, including as a result of the Russian invasion of Ukraine and armed conflict between Israel and Hamas, and more recently the military conflict involving Iran, the U.S. and Israel. Coupled with existing supply disruptions and changes in U.S. Federal Reserve policies on interest rates, these wars have exacerbated, and may continue to exacerbate, inflation and significant volatility in commodity prices, credit and capital markets, as well as supply chain disruptions. Sanctions and other penalties have been imposed on Russia including removing Russian-based financial institutions from the Society for Worldwide Interbank Financial Telecommunication payment system and restricting imports of Russian oil, liquefied natural gas and coal. These sanctions have caused supply disruptions in the oil and gas markets and could continue to cause significant volatility in energy prices. These factors may result in the weakening of the financial condition of our charterers, suppliers, counterparties and other agents in the shipping industry. As a result, our business, financial condition and results of operations may be negatively affected since our operations are dependent on the success and economic viability of our counterparties.

These and other sanctions that may be imposed as well as the ongoing conflicts could further adversely affect the global economy and financial markets and cause further instability, negatively impacting liquidity in the capital markets and potentially making it more difficult for us to access additional debt or equity financing on attractive terms in the future, to the extent needed. The state of global financial markets and current economic conditions might adversely impact our ability to issue additional equity at prices that will not be dilutive to our shareholders or preclude us from issuing equity at all. Economic conditions may also adversely affect the market price of our common shares.

We may require additional financing to meet operating requirements, debt revenue or capital expenditures in the future. Additional financing may not be available if needed and to the extent required, on acceptable terms or at all. If financing or refinancing is not available when needed on favorable terms or at all, we may be unable to meet our obligations as they come due or we may be unable to meet our obligations as they come due or we may be unable to enhance our existing business, complete additional vessel acquisitions or otherwise take advantage of business opportunities as they arise.

We face risks attendant to changes in economic environments, changes in interest rates, and instability in the banking and securities markets around the world, among other factors, which may have a material adverse effect on our business, results of operations and financial condition.

***Changes in international trade policies, or the escalation of tensions in international relations, particularly with regard to China, may adversely impact our business and operating results.***

Increased trade protectionism globally could adversely affect our business. Trade barriers implemented to protect or revive their domestic industries in the face of foreign imports, may depress demand for shipping. Restrictions on imports, including in the form of tariffs, could have a major impact on global trade and demand for shipping. Trade protectionism in the markets that we serve may cause an increase in the cost of exported goods, the length of time required to deliver goods and the risks associated with exporting goods and, as a result, a decline in the volume of exported goods and demand for shipping.

Any unfavorable government policies on international trade, such as capital controls or tariffs, and any renegotiation of existing trade agreements, retaliatory trade actions or trade wars, may impact the global economy, and therefore adversely affect our business, results of operations, financial condition and cash flows. There have been heightened tensions in international relations in recent years. For example, the U.S. government has made statements and taken actions that have and may lead to a number of changes to U.S. and international trade policies. These policy pronouncements have created significant uncertainty about the relationship between the United States and China and other exporting countries, including with respect to trade policies, treaties, government regulations and tariffs and has led to concerns regarding the potential for an extended trade war. Tensions over trade and other matters remain high. Protectionist developments, or the perception they may occur, may have a material adverse effect on global economic conditions, and may significantly reduce global trade and, in particular, trade between the United States and other countries. Any unfavorable government policies on international trade, such as capital controls or tariffs, or the U.S. dollar payment and settlement system may impact our competitive position and materially and adversely affect our business, results of operations and financial condition.

Recently, the United States has proposed to impose multiple rounds of tariffs on a wide range of goods imported from multiple countries, including, China, and China has responded with retaliatory tariffs. Additionally, the United States Trade Representative (“USTR”) effected Section 301 Action on China, charging fees on Chinese-built ships and vessel owners and operators of China, which fees would increase over the following years, effective from October 14, 2025. In October 2025, China’s Ministry of Transport announced reciprocal port fees on U.S. linked vessels calling at Chinese ports. These fees were set to increase annually. Following a meeting on October 30, 2025, both countries have agreed to suspend the implementation of the port fees from November 10, 2025 for a period of one year.

Historically, tariffs have led to increased trade and political tensions, between the U.S. and China, as well as between the U.S. and other countries. Political tensions as a result of trade policies could reduce trade volume, cross-border investment, technological exchange, and other economic activities between major economies, resulting in a material adverse effect on global economic conditions and the stability of global financial and stock markets. The port fees or any new tariffs, legislation and/or regulations which are implemented, or any renegotiation of existing trade agreements or any retaliatory trade actions could have an adverse effect on our business, results of operations and financial condition.

Moreover, the war in Ukraine and sanctions on Russia have increased the uncertainties in the relations between China and the United States, and tensions between these two countries could be heightened as a result. These tensions have affected both diplomatic and economic ties between the two countries. Heightened tensions could reduce levels of trade, investments, technological exchanges, and other economic activities between the two major economies. The existing tensions and any further deterioration in international relations may have a negative impact on the general, economic, political, and social conditions in China and, given that China is a major market for the drybulk industry, may adversely impact our business, results of operations and financial condition.

***A decrease in the level of China’s imports and export of goods could have a material adverse effect on our business.***

The key trades for our vessels are Brazil to China and Australia to China and therefore our business depends to a significant extent on the level of imports and exports to and from China. As China exports considerably more goods than it imports, any reduction in or hindrance to China-based exports, whether due to decreased demand from the rest of the world, an economic slowdown in China, seasonal decrease in manufacturing levels due to the Chinese New Year holiday or other factors, could have a material adverse effect on our business. In recent years, China has experienced an increasing level of economic autonomy and a gradual shift toward a “market economy” and enterprise reform. However, many of the reforms implemented, particularly some price limit reforms, are unprecedented or experimental and may be subject to revision, change or abolition. The level of imports to and exports from China could be adversely affected by changes to these economic reforms by the Chinese government, as well as by changes in political, economic and social conditions or other relevant policies of the Chinese government. In addition, a decline in China’s level of exports due to decreased demand could result in a slow down in the construction sector as demand for factories, commercial and industrial properties decreases. This could result in a reduced demand for iron ore imported by China. Changes in laws and regulations, including with regard to tax matters, and their implementation by local authorities could affect our vessels calling on Chinese ports and could have a material adverse effect on our business, results of operations and financial condition.

***We may be adversely affected by political instability, terrorist or other attacks, war and international hostilities and global public health threats can affect the seaborne transportation industry, which could adversely affect our business, results of operations and financial condition.***

We may be adversely affected by changing economic, political and government conditions in the countries and regions where our vessels are employed or registered. Moreover, the dry bulk shipping industry is likely to be adversely impacted by the effects of political conflicts.

The world economy faces a number of challenges, including the war in Ukraine, which, although a further ceasefire took effect, there have been subsequent claims of breaches on both sides, the recent military conflict involving Iran, the U.S. and Israel, trade tensions between the United States and China, stabilizing growth in China, continuing threat of terrorist attacks around the world, continuing instability and conflicts and other recent occurrences in the Middle East and in other geographic areas and countries, which may lead to armed conflict or acts of terrorism around the world, as well as the impact of future pandemics, which may contribute to further economic instability in the global financial markets, and international commerce.

In the past, political instability has also resulted in attacks on vessels, mining of waterways and other efforts to disrupt international shipping, particularly in the Arabian Gulf region and most recently in the Red Sea and the Gulf of Aden off the coast of Somalia, as well as in the Black Sea in connection with the recent conflicts between Russia and Ukraine. Acts of terrorism and piracy have also affected vessels trading in the regions including in the South China Sea. Any of these occurrences could have a material adverse impact on our business, results of operations, and financial condition. Following the outbreak of war in Israel, attacks on ships in the Red Sea have impacted many vessels traveling through and resulted in significant changes in vessel travel patterns to avoid the Red Sea.

Furthermore, the continuing war in Ukraine may also adversely impact our business and may lead to further regional and international conflicts or armed action. Such conflict could further disrupt supply chains and cause instability in the global economy. Additionally, resulting changes in currency exchange rates, tariffs, treaties and other regulatory matters could in turn adversely impact our business and operations. Furthermore, any violations of sanctions by our charter parties, any extension or worsening of the conflict in these regions, as well as any significant sanctions resulting from the conflicts that affect, among other things, the performance of our charter party agreements specifically or the dry bulk industry more generally, may have a material adverse effect on our business, results of operations and financial condition.

***Political or other factors may affect our vessels’ trading patterns and could have an adverse effect on our business, results of operations and financial condition.***

Our vessels trade globally, and the operation of our vessels are therefore exposed to political risks that might result in a closure of or restrictions in operating on major waterways.

Attacks on vessels in the Red Sea following the outbreak of war in the Middle East had a significant impact on vessel travel in that region. In addition, political disturbances in the Middle East in general may potentially result in a closure of the Suez Canal, combined with a port strike in the Gulf and East Coast regions of the United States that began on October 1, 2024. Globally, the shipping industry faces other challenges, including labor disputes at major ports and railways and weather-related disruptions, such as droughts in Panama reducing capacity in the Panama Canal. Geopolitical risks, which are outside of our control, could potentially limit or disrupt our access to markets and operations and could have a material adverse effect on our business, results of operations and financial condition.

***Outbreaks of epidemic and pandemic diseases and governmental responses thereto could adversely affect our business, results of operations and financial condition.***

Global public health threats, such as COVID-19, influenza and other highly communicable diseases or viruses, outbreaks of which have from time to time occurred in various parts of the world in which we operate, including China, could adversely impact our operations as well as the operations of our charterers. Pandemics or similar occurrences could cause delays and uncertainties relating to the delivery of newbuildings, dry dockings and other functions of shipyards.

***A significant decrease in the market values of our vessels could cause us to incur an impairment loss and could have a material adverse effect on our ability to obtain additional financing.***

We review for impairment of our vessels held and used whenever events or changes in circumstances indicate that the carrying amount of the vessels may not be recoverable. Such indicators include declines in the fair market value of vessels, decreases in market charter rates, vessel sale and purchase considerations, fleet utilization, regulatory changes in the dry bulk shipping industry or changes in business plans or overall market conditions that may adversely affect our financial condition. We may be required to record an impairment charge with respect to our vessels and any such impairment charge resulting from a decline in the market value of our vessels or a decrease in charter rates may have a material adverse effect on our business, results of operations, financial condition and our ability to obtain additional financing.

***The fair market values of our vessels may decline, and we may incur a loss if we sell vessels following a decline in their market value.***

The market values of dry bulk vessels are related to prevailing freight charter rates, which have fluctuated significantly in recent years. While the market values of vessels and the freight charter market have a very close relationship as the charter market moves from trough to peak, the time lag between the effect of charter rates on market values of ships can vary.

The market values of dry bulk vessels have generally experienced high volatility, and the market values of our vessels are subject to fluctuation depending on a number of factors including:

- prevailing level of charter hire rates;
- general economic and market conditions affecting the shipping industry;
- types, sizes and ages of vessels;
- supply of and demand for vessels;
- the need to upgrade vessels as a result of charterer requirements;
- technological advances in vessel design or equipment or otherwise;
- cost of newbuildings;
- applicable governmental or other regulations;
- distressed asset sales; and
- competition from other shipping companies and other modes of transportation.

Furthermore, if we sell any of our vessels, which we could do after exercising any of our options to repurchase any such vessels under our finance lease agreements, at a time when prices are depressed and before we have recorded an impairment adjustment to our financial statements, the sale may be less than the vessel's carrying value on our financial statements, resulting in a loss and a reduction in earnings, and may have a material adverse impact on our business, results of operations and financial condition.

***An over-supply of dry bulk vessel capacity may lead to reductions in current charter rates, vessel values and profitability.***

The market supply of dry bulk carriers increased materially between 2009 and 2013 due to a high level of new deliveries. Although dry bulk newbuilding deliveries have tapered off since 2014, newbuildings continue to be delivered.

Should circumstances change or a demand in dry bulk vessels decrease, an over-supply of dry bulk carrier capacity could result in low charter rates for an extended period of time.

***We are subject to complex laws and regulations, including environmental regulations that can adversely affect the cost, manner or feasibility of doing business.***

Our business and the operations of our vessels are subject to numerous environmental regulations in the form of international conventions, national, state and local laws and regulations in force in the jurisdictions in which our vessels will operate, as well as in the country or countries where we plan to register them, including those governing the storage, management and disposal of hazardous and non-hazardous substances and wastes, the cleanup of oil spills and other contamination, air emissions (including greenhouse gases), water discharges and ballast water management, liability for damage to natural resources and occupational health and safety. These regulations include European Union regulations, the U.S. Oil Pollution Act of 1990 (“OPA”), requirements of the USCG and the U.S. EPA, the U.S. Clean Air Act of 1970 (including its amendments of 1977 and 1990), the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”), the U.S. Clean Water Act, the U.S. Maritime Transportation Security Act of 2002, regulations of the IMO, including the International Convention on Civil Liability for Oil Pollution Damage of 1969, the International Convention for the Prevention of Pollution from Ships of 1973, as modified by the Protocol of 1978, collectively referred to as MARPOL 73/78 or MARPOL, including designations of Emission Control Areas, thereunder, International Convention for the Safety of Life at Sea of 1974 (“SOLAS Convention”), the International Convention on Load Lines of 1966, the International Convention of Civil Liability for Bunker Oil Pollution Damage, the IMO’s International Safety Management Code (the “ISM Code”), and regulations established by flag state administrations. Such conventions, laws, and regulations are often revised, which could impact the ultimate cost of complying with such requirements or the resale price or useful life of our vessels. Additional conventions, laws and regulations may be adopted that could limit our ability to do business or increase the cost of our doing business and which may materially adversely affect our operations. Government regulation of vessels, particularly in the areas of safety and environmental requirements, continue to change, which may require us to incur significant capital expenditures on our vessels to keep them in compliance, or even to scrap or sell certain vessels altogether. In addition, we may incur significant costs in meeting new maintenance and inspection requirements, in developing contingency arrangements for potential environmental violations and in obtaining insurance coverage.

Certain environmental laws impose strict and joint and several liability for remediation of spills, discharges of oil and releases of hazardous substances, which could subject us to liability without regard to whether we were negligent or at fault. Under the OPA, for example, owners and operators are jointly and severally strictly liable for the discharge of oil within the 200-mile exclusive economic zone around the United States.

In addition, we are required by various governmental and quasi-governmental agencies to obtain certain permits, licenses, certificates, approvals and financial assurances with respect to our operations, and satisfy insurance and financial responsibility requirements for potential oil (including marine fuel) spills and other pollution incidents. If we fail to maintain necessary permits, licenses, certificates, approvals or financial assurances, we could be required to incur substantial costs or temporarily suspend operation of one or more of our vessels, or lead to the invalidation or reduction of our insurance coverage. We have entered into agreements with insurers for coverage of our vessels. However, the insurance we obtain may not be sufficient to cover all such risks and any claims may have a material adverse effect on our business, results of operations and financial condition.

Environmental requirements can also affect the resale value or useful lives of our vessels, require a reduction in cargo capacity, ship modifications or operational changes or restrictions, lead to decreased availability of insurance coverage for environmental matters or result in the denial of access to certain jurisdictional waters or ports, or detention in certain ports. Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including for cleanup obligations and natural resource damages, in the event that there is a release of petroleum or hazardous substances from our vessels or otherwise in connection with our operations. We could also become associated with our existing or historic operations. Violations of, or liabilities under, environmental requirements can result in substantial penalties, fines and other sanctions, including in certain instances, seizure or detention of our vessels.

The operation of our vessels is also affected by other safety regulations in the form of international conventions, including the Maritime Labor Convention of 2006 (“MLC”), and national, state and local laws and regulations in force in the jurisdictions in which the vessels operate, as well as in the country or countries of their registration, including those established by flag state administrations. Such conventions, laws, and regulations are often revised, and could increase the ultimate cost of compliance which could impact the resale prices or useful lives of our vessels. Additional conventions, laws and regulations may be adopted which could limit our ability to do business or increase the cost of our doing business and which may materially adversely affect our operations. See “Item 4. Information on the Company—B. Business Overview” for a discussion of the environmental and other regulations applicable to us.

***We may be subject to requirements and standards imposed by charterers and the failure to comply with these may subject us to increased costs and adversely affect our operations.***

Certain of our charterers apply the Rightship rating system to our vessels. Rightship is the ship vetting service owned by Rio Tinto and BHP-Billiton, which has become the major vetting service in the dry bulk shipping industry. Rightship benchmarks maritime vessels based on 5 years of operational performance. We may be required to incur costs to ensure that our vessels achieve adequate Rightship ratings or otherwise meet the standards set by our charterers. While our vessels are expected to meet such standards, if any of our vessels fail to meet these standards, our ability to operate these vessels may be affected.

***If our vessels fail to maintain their class certification imposed by classification societies and/or fail any annual survey, intermediate survey, dry docking or special survey, those vessels would be unable to carry cargo, thereby reducing our revenues and profitability and violating certain provisions in our credit agreements.***

Every commercial vessel must be “classed” by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel, the IMO and the SOLAS Convention. Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified “in class” by a classification society which is a member of the International Association of Classification Societies, the IACS. The IACS has adopted harmonized Common Structural Rules, or “the Rules,” which apply to oil tankers and bulk carriers contracted for construction on or after July 1, 2015. The Rules attempt to create a level of consistency between IACS Societies.

Additionally, a vessel must undergo annual surveys, intermediate surveys, dry dockings and special surveys. In lieu of a special survey, a vessel’s machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period.

Every vessel also undergoes two underwater hull surveys during a five-year classification cycle. The intermediate survey at approximately every 36 months may, in lieu of a full drydocking, be credited by classification society, by conducting a diving survey, propeller inspection, tails shaft bearing clearance and overall hull condition, all of which are to be verified in the presence of a class surveyor. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry docking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable. Any such inability to carry cargo or be employed could have a material adverse effect on our business, results of operations and financial condition.

Compliance with the above requirements may require significant additional investments by us. If any vessel does not maintain its class or fails any annual, intermediate or special survey or dry docking, the vessel will be unable to trade between ports and will be unemployable and uninsurable, which could cause us to be in violation of certain provisions in our credit agreements. Any such inability to carry cargo or be employed, or any such violation of covenants, could have a material adverse effect on our business, results of operations and financial condition.

***If our vessels do not meet certain operational and technical requirements imposed by ports, our vessels may be refused entry into these ports or incur increased costs to meet these requirements which could have an adverse effect on our business, results of operations and financial conditions.***

Our vessels are subject to a wide range of operational and technical requirements imposed by the ports our vessels operate in. These requirements may include, but are not limited to, safety standards, environmental regulations, security protocols, and technical specifications related to vessel construction and equipment. The requirements can vary significantly from port to port and are subject to change.

If our vessels fail to meet these operational or technical requirements, they may be refused entry into certain ports. Such refusals could disrupt our shipping schedules, delay the delivery of cargo, and force us to reroute vessels to alternative ports, which may not be as commercially advantageous. In addition, we may incur significant costs to bring our vessels into compliance with new or evolving port requirements, or to address deficiencies identified by port authorities. For example, as discussed in Item 4.B., at the end of 2025, our Newcastlemax vessels were rejected for further calling at Port Hedland after successful and safe port calls since 2023. Pilbara Port Authority, which governs Port Hedland, now requires all calling Capesize and Newcastlemax vessels to be equipped with three diesel auxiliary engines.

Any refusal of entry, delay, or additional cost associated with non-compliance could have a material adverse effect on our business, results of operations, and financial condition. Further, repeated non-compliance could damage our reputation with customers and port authorities, potentially resulting in the loss of business opportunities and long-term contracts.

***Scrutiny of environmental, social and governance matters may impact our business and reputation.***

In addition to the importance of their financial performance, companies are increasingly being judged by their performance on a variety of environmental, social and governance matters, or “ESG,” which are considered to contribute to the long-term sustainability of companies’ performance. Governments across the globe and investor advocacy groups, certain institutional investors, investment funds, lenders and other market participants are focused on sustainability and ESG practices and in recent years have placed growing importance on the implications and social cost of their investments. The focus and activism related to sustainability and ESG and similar matters may hinder access to capital, as investors and lenders may decide to reallocate capital or not to commit capital as a result of their assessment of a company’s sustainability and ESG practices. If we do not adapt to or comply with governmental, investor, lender or other industry shareholder rules, expectations and standards, as applicable, which are evolving, or which are perceived to have not responded appropriately to the growing concern for sustainability and ESG issues, whether or not there is a legal requirement to do so, our business, financial condition or share price could be materially and adversely affected.

A variety of organizations measure the performance of companies on such ESG topics, and the results of these assessments are widely publicized. In addition, investment in funds that specialize in companies that perform well in such assessments are popular, and major institutional investors have publicly emphasized the importance of such ESG measures to their investment decisions. Financing from lenders may also take into consideration results of ESG assessments. Topics taken into account in such assessments include, among others, the company’s efforts and impacts on climate change and human rights, ethics and compliance with law, and the role of the company’s board of directors in supervising various sustainability issues.

By way of example, on January 5, 2023, the CSRD entered into force. Among other things, the CSRD expands the number of companies required to publicly report sustainability and ESG-related information on their management report, to understand their impact on sustainability matters as well as how sustainability matters affect their own development, performance and position, and defines the related information that companies are required to report in accordance with European Sustainability Reporting Standards (“ESRS”). The CSRD requires a “double materiality” analysis, meaning companies will have to detail both their impacts on the environment (e.g., the impact of corporate activity on sustainability matters from perspective of citizens, consumers, employees, etc.) and the climate-related risks they face (e.g., sustainability matters which from the investor perspective are material to the company’s development, performance and position). Impacts, risks and opportunities are material if they satisfy one or both of these materiality tests. On February 26, 2025, the European Commission released Omnibus Packages I and II, which focuses on sustainability. Omnibus Package I includes proposed amendments to CSRD including changes to the scope and timing of adoption of the CSRD, EU Taxonomy and the Corporate Sustainability Due Diligence Directive. The objective is to achieve at least 25% reduction in administrative burdens for large undertakings, and at least 35% for SMEs over a five-year period. Under the proposed amendments, the scope of the CSRD would change to large undertakings with more than 1,000 employees. On November 13, 2025, Members of the European Parliament voted to adopt its negotiating position on simplified sustainability reporting, such that only businesses employing on average over 1,750 employees and with a net annual turnover of over €450 million should have to carry out social and environmental reporting, including sustainability reporting under taxonomy rules. The European Parliament aims to finalize the legislation by the end of 2025. If the proposal to amend the scope of CSRD is enacted, we will not be subject to CSRD as we have less than 1,000 employees. Companies not subject to mandatory requirement could choose to report voluntarily using simplified standards to be published by the European Commission. Unless and until such proposals are enacted, there is still a risk that we will fall within the scope of application of such new reporting requirements under the CSRD. This will involve implementing processes to gather the relevant data, conduct materiality assessments and prepare a CSRD-compliant

report, which will likely be a time-consuming and costly exercise and in the event that our disclosures prove incorrect, we may incur liabilities.

As the nature, scope and complexity of ESG reporting, calculation methodologies, voluntary reporting standards and disclosure requirements expand, we may have to undertake additional costs to control, assess and report on ESG metrics. In addition, in recent years “anti-ESG” sentiment has gained momentum across the United States, with several states and Congress having proposed or enacted “anti-ESG” policies, legislation, or initiatives or issued related legal opinions, and the U.S. President having issued in 2025 executive orders opposing diversity equity and inclusion (DEI) initiatives in the public and private sectors. The orders apply, first, to federal government DEI programs and policies, and to federal contractors and grant recipients, but the U.S. administration has served notice that it plans to target large private sector organizations more generally, including major corporations, foundations, non-profits, professional organizations and educational institutions. Such anti-ESG and anti-DEI-related policies, legislation, initiatives, litigation, legal opinions, and scrutiny could result in us facing additional compliance obligations, becoming the subject of investigations and enforcement actions, or sustaining reputational harm. Therefore, to the extent we take actions that are seen as positive to some investors, other investors may take issue with such actions or face regulatory pressure to refrain from investing in, or divest from, our business. To the extent ESG matters negatively impact our reputation, it may also impede our ability to compete as effectively to attract and retain employees, which may adversely impact our operations.

In light of investors' focus on ESG matters, there can be no certainty that we will manage such issues successfully, or that we will successfully meet society's expectations as to our proper role. We may also incur costs as a result of complying with ESG disclosure requirements. Any failure or perceived failure by us in this regard could have a material adverse effect on our reputation and on our business, share price, financial condition, or results of operations, including the sustainability of our business over time.

***Natural or man-made disasters and other similar events may significantly disrupt our business and could have an adverse effect on our business, results of operations and financial condition.***

Natural or man-made disasters, including earthquakes, power outages, fires, floods, marine disasters, bad weather and other acts of God, nuclear disasters, terrorist attacks or other criminal activities or acts of crew malfeasance, may render it difficult or impossible for us to operate our business for some period of time. These hazards may result in death or injury to persons, loss of revenues or property, the payment of ransom, environmental damage, higher insurance rates, damage to our customer relationships and market disruptions, delay or rerouting. Epidemics and other public health incidents may also lead to crew member illness, which can disrupt the operations of our vessels, or to public health measures, which may prevent our vessels from calling on ports or discharging cargo in the affected areas or in other locations after having visited the affected areas.

Any disruptions in our operations related to the repair or replacement of our vessels or disruption of or reduced demand for shipping could have a material adverse impact on our business, results of operations and financial condition. In addition, we may not carry business insurance sufficient to compensate for losses that may occur.

***Our operations may be adversely impacted by severe weather, including as a result of climate change.***

The physical effects of climate change, including changes in weather patterns, extreme weather events, rising sea levels and scarcity of water resources may negatively impact our operations. Tropical storms, hurricanes, typhoons and other severe maritime weather events could result in the suspension of operations at the ports of call for our vessels and require significant deviations from our vessels' routes. In addition, climate change could result in an increase in the frequency and severity of these extreme weather events.

The impacts of climate change may include physical risks (such as rising sea levels, which could affect port operations or frequency and severity of extreme weather conditions, which could disrupt our operations and damage cargo and our facilities), compliance costs and transition risks (such as increased regulation and taxation to support carbon emissions reduction investments), shifts in customer demands (such as customers requiring more fuel efficient transportation modes or transparency to carbon emissions in their supply chains) and customer contractual requirements around environmental initiatives and other adverse effects. The closure of ports, rerouting of vessels, damage of mining sites and productive facilities, as well as other delays caused by increasing frequency of severe weather, could stop operations or shipments for indeterminate periods and have a material adverse effect on our business, results of operations and financial condition.

***Climate change and greenhouse gas restrictions may impact us.***

The increasing concern over climate change has resulted and may continue to result in more regulations relating to climate change, including regulating greenhouse gas emissions, restrictions on modes of transportation, alternative energy policies and sustainability initiatives. Due to concern over the risk of climate change, a number of countries and the IMO have adopted, or are considering the adoption of, regulatory frameworks to reduce greenhouse gas emissions. These regulatory measures may include, among others, the adoption of cap and trade regimes, carbon taxes, increased efficiency standards and incentives or mandates for renewable energy. For instance, the IMO imposed a global 0.5% sulfur cap on marine fuels that came into force on January 1, 2020. In addition, the IMO has adopted an initial strategy which identifies “levels of ambition” toward reducing greenhouse gas emissions, including (1) decreasing the carbon intensity from ships; (2) reducing carbon dioxide emissions per transport work, as an average across international shipping, by at least 40% by 2030, pursuing efforts towards 70% by 2050, compared to 2008 emission levels; and (3) reducing the total annual greenhouse emissions by at least 50% by 2050 compared to 2008 while pursuing efforts towards phasing them out entirely. These regulations and any additional regulations addressing similar goals could cause us to incur additional substantial expenses. See “Item 4. Information on the Company—B. Business Overview—Regulation” for a discussion of these and other environmental regulations applicable to our operations.

In addition, although the emissions of greenhouse gases from international shipping currently are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change (as this task was delegated under the Kyoto Protocol to the IMO for action), which required adopting countries to implement national programs to reduce emissions of certain gases, a new treaty may be adopted in the future that includes restrictions on shipping emissions. Compliance with changes in laws, regulations and obligations relating to climate change could increase our costs related to operating and maintaining our vessel and other vessels we may acquire and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. Revenue generation and strategic growth opportunities may also be adversely affected.

Adverse consequences of climate change, including growing public concern about the environmental impact of climate change, may also adversely affect demand for our services. For example, increased regulation of greenhouse gases or other concerns relating to climate change may reduce the demand for coal in the future, one of the primary cargoes carried by dry bulk vessels. Any long-term economic consequences of climate change could have a significant adverse financial and operational impact on our business.

***Acts of piracy on ocean-going vessels may have an adverse effect on our business, results of operations and financial condition.***

Acts of piracy have historically affected ocean-going vessels trading in regions of the world such as the South China Sea, Strait of Malacca, Arabian Sea, Red Sea, the Indian Ocean, the Gulf of Aden off the coast of Somalia, Sulu Sea, Celebes Sea and in the Gulf of Guinea. Sea piracy incidents continue to occur, with dry bulk vessels particularly vulnerable to such attacks. Acts of piracy could result in harm or danger to the crews that man our vessels. If these piracy attacks result in regions in which our vessels are deployed being characterized as “war risk” zones by insurers or Joint War Committee “war and strikes” listed areas, premiums payable for such coverage could increase significantly and such insurance coverage may be more difficult to obtain. In addition, crew costs, including due to employing on-board security guards, could increase in such circumstances. Furthermore, while we believe the charterer remains liable for charter payments when a vessel is seized by pirates, the charterer may dispute this and withhold charter hire until the vessel is released. A charterer may also claim that a vessel seized by pirates was not “on-hire” for a certain number of days and is therefore entitled to cancel the charter party, a claim that we would dispute. Although we have obtained insurance to cover risks associated with piracy acts, we may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, any detention or hijacking as a result of an act of piracy against our vessels, or an increase in cost, or unavailability, of insurance for our vessels, could have a material adverse effect on our business, results of operations and financial condition.

***If our vessels call on ports located in countries that are subject to restrictions imposed by the U.S. government, the European Union, the United Nations or other governments, this could lead to monetary fines or penalties and adversely affect our reputation and the market for our common shares and trading price.***

If our vessels call on ports or operate in countries subject to sanctions and embargoes imposed by the U.S. government or other governmental authorities (“Sanctioned Jurisdictions”) in violation of sanctions or embargoes laws, such activities may result in a sanctions violation and we could be subject to monetary fines, penalties, or other sanctions, and our reputation and the market for our common shares could be adversely affected. Although we endeavor to take precautions reasonably designed to mitigate such risks, it is possible, for example, that our vessels may call on ports located in Sanctioned Jurisdictions on charterer’s instructions and/or without our consent. If such activities result in a violation of sanctions or embargo laws, we could be subject to monetary fines, penalties, or other sanctions, and our reputation and the market for our securities could be adversely affected. As another example, charterers or other parties that we enter into contracts with may be affiliated with persons or entities that are the subject of sanctions imposed by the U.S., the EU or other applicable jurisdictions as a result of the Russian invasion of Ukraine. If the Company determines that such sanctions require it to terminate contracts, there would be risk of loss and periods of off-hire and there is a connected risk of reputational harm.

U.S. and other sanctions and embargo laws and regulations vary in their application, as they do not all apply to the same covered persons or proscribe the same activities, and such sanctions and embargo laws affiliated with persons or entities that are or may be in the future the subject of sanctions or embargoes may be imposed by the governments of the U.S., the U.K., the EU, and/or other international bodies. If we determine that such sanctions require us to terminate existing or future contracts to which we, or our subsidiaries, are party or if we are found to be in violation of such applicable sanctions, our results of operations may be adversely affected or we may suffer reputational harm.

The regulatory landscape is rapidly changing and is subject to changing interpretations, thus, our business may be affected by the changing regulatory landscape and the related sanctions regimes and may not be in compliance with applicable sanctions, laws, regulations and orders. Any such violation could result in fines, penalties or other sanctions that could negatively impact our ability to access U.S. capital markets and conduct our business, and could result in some investors deciding, or being required, to divest their interest, or not to invest, in us. A failure to comply with applicable laws and regulations may result in administrative and civil penalties, criminal sanctions or the suspension or termination of our operations, which in turn could have an adverse effect on our results.

In addition, our charterers may violate applicable sanctions and embargo laws and regulations as a result of actions that do not involve us or our vessels, and those violations could in turn negatively affect our reputation. Moreover, our reputation and the market for our securities may be adversely affected if we engage in certain other activities, such as entering into charters with individuals or entities that are controlled by the governments of countries or territories that are the subject of certain U.S. sanctions or embargo laws, or engaging in operations associated with those countries or territories pursuant to contracts with third-parties that are unrelated to those countries or territories or entities controlled by their governments. We outsource various functions to carry out certain screening procedures on our charterers and other third parties, including confirmation that such counterparties are compliant with sanctions laws and not included in sanctions lists, including sanctions administered by the Office of Foreign Assets Control (“OFAC”) of the U.S. Department of the Treasury, and therefore our ability to implement our related sanctions policies is more difficult, which can increase such risks.

***Any failure to comply with the U.S. Foreign Corrupt Practices Act could result in fines, criminal penalties, contract terminations and an adverse effect on our business, results of operations and financial condition.***

We operate our vessels in a number of countries, such as China, Brazil, Singapore and in some developing economies, including countries known to have a reputation for corruption, which can involve inherent risks associated with fraud, bribery and corruption and where strict compliance with anti-corruption laws may conflict with local customs and practices. As a result, we may be subject to risks under the U.S. Foreign Corrupt Practices Act, as amended, (“FCPA”), the U.K. Bribery Act 2010, the Bermuda Bribery Act 2016 and similar laws in other jurisdictions that generally prohibit companies and their intermediaries from making, offering or authorizing improper payments to government officials for the purpose of obtaining or retaining business.

We are subject to the risk that we, our affiliated entities or our or their respective officers, directors, employees and agents may be deemed to have taken actions determined to be in violation of such anti-corruption laws, including the FCPA. Any such violation could result in substantial fines, sanctions, civil and/or criminal penalties and curtailment of operations in certain jurisdictions, and might adversely affect our business, results of operations or financial condition. Our customers in relevant jurisdictions could seek to impose penalties or take other actions adverse to our interests. In addition, actual or alleged violations could damage our reputation and ability to do business. Furthermore, detecting, investigating, and resolving actual or alleged violations is expensive and can consume significant time and attention of our contracted senior management.

***Increased inspection procedures, tighter import and export controls and security standards could increase costs and disrupt our business.***

International shipping is subject to various security and customs inspection and related procedures in countries of origin and destination and trans-shipment points. In addition, pursuant to the SOLAS Convention, dry bulk vessels and the ports in which we operate are subject to the International Ship and Port Facility Security Code (“ISPS Code”), which is designed to enhance the security of ports and ships against terrorism. Inspection procedures may result in the seizure of contents of our vessels, delays in the loading, offloading, trans-shipment or delivery and the levying of customs duties, fines or other penalties against us.

Changes to inspection procedures and security standards could impose additional financial and legal obligations on us. Changes to inspection procedures could also impose additional costs and obligations on our customers and may, in certain cases, render the shipment of certain types of cargo uneconomical or impractical. Any such changes or developments may have a material adverse effect on our business, results of operations and financial condition.

***Our results of operations are subject to seasonal fluctuations, which may adversely affect our financial condition.***

We operate our dry bulk vessels in markets that have historically exhibited seasonal variations in demand, particularly in the Capesize segment given its share of the iron ore trade, and, as a result, in charter hire rates. As China is the most significant market for dry bulk shipping, the public holidays in relation to the Chinese New Year during the first quarter usually results in a decrease in market activity during this period. In addition, unpredictable and adverse weather conditions and patterns in the Southern Hemisphere, which often occur during the first quarter, in the past have had a negative impact on iron ore exports from Australia and from Brazil. Further, certain of the largest iron ore producers in Brazil usually schedule maintenance works on their plants in the first quarter, which also results in a decrease in iron ore export from Brazil. This seasonality affects our business, results of operations, financial condition, and could affect our ability to pay dividends.

***We operate dry bulk vessels worldwide and our business has inherent operational risks, which may result in damage to our vessels leading to unexpected drydocking costs and delays or total loss of our vessels.***

The operation of certain vessels, such as dry bulk carriers, has certain unique and inherent risks. With a dry bulk carrier, the cargo itself and its interaction with the vessel can be an operational risk. By their nature, dry bulk cargoes are often heavy, dense, easily shifted, and react badly to water exposure. In addition, dry bulk carriers are often subjected to battering treatment during unloading operations with grabs, jackhammers (to pry encrusted cargoes out of the hold) and small bulldozers. This treatment may cause damage to the vessel. Vessels damaged due to treatment during unloading procedures may be more susceptible to breach at sea. Hull breaches in dry bulk carriers may lead to the flooding of the vessels’ holds.

If a dry bulk vessel suffers flooding in its forward holds, the bulk cargo may become so dense and waterlogged that its pressure may buckle the vessel’s bulkheads, leading to the loss of a vessel. If we are unable to adequately repair our vessels after such damages, we may be unable to prevent these events. Any of these circumstances or events may have a material adverse effect on our business, results of operations and financial condition, if any, in the future, on our common shares.

If our vessels suffer damage, they may need to be repaired at a dry docking facility. The costs of dry dock repairs are unpredictable and may be substantial. We may have to pay dry docking costs that our insurance does not cover in full. The loss of revenues while these vessels are being repaired and repositioned, as well as the actual cost of these repairs, may adversely affect our business and financial condition. In addition, space at dry docking facilities is sometimes limited and not all dry docking facilities are conveniently located. We may be unable to find space at a suitable dry docking facility or our vessels may be forced to travel to a dry docking facility that is not conveniently located to our vessels’ positions. The loss of earnings while these vessels are forced to wait for space or to travel or be towed to more distant dry docking facilities, as well as the cost of such repositioning, may adversely affect our business, results of operations and financial condition. Further, the total loss of any of our vessels could harm our reputation as a safe and reliable vessel owner and operator. If we are unable to adequately maintain or safeguard our vessels, we may be unable to prevent any such damage, costs, or loss, which could negatively impact our business, results of operations and financial condition.

***The smuggling of drugs or other contraband onto our vessels may lead to governmental claims against us.***

Our vessels, when delivered, may call in ports in areas where smugglers may attempt to hide drugs and other contraband on vessels, with or without the knowledge of crew members. To the extent our vessels are found with contraband, whether inside or attached to the hull of our vessel and whether with or without the knowledge of any of our crew, we may face governmental or other regulatory claims which could have a material adverse effect on our business, results of operations and financial condition.

***Maritime claimants could arrest or attach one or more of our vessels.***

Crew members, suppliers of goods and services to a vessel, shippers of cargo, lenders, and other parties may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lien holder may enforce its lien by “arresting” or “attaching” a vessel through judicial or foreclosure proceedings.

The arrest or attachment of one or more of our vessels could interrupt the cash flows of the charterer and/or our cash flow and require us to pay large sums of money to have the arrest or attachment lifted, which would have an adverse effect on our business, results of operations and financial condition. In addition, in some jurisdictions, such as South Africa, under the “sister ship” theory of liability, a claimant may arrest both the vessel that is subject to the claimant’s maritime lien and any “associated” vessel, which is any vessel owned or controlled by the same owner. Claimants could attempt to assert “sister ship” liability against one vessel in our fleet for claims relating to another of our vessels.

***Governments could requisition our vessels during a period of war or emergency, which could negatively impact our business, results of operations and financial condition.***

A government could requisition one or more of our vessels for title or for hire and any such requisition could give the Leasing Providers the right to terminate our Sale Leaseback Agreements. Requisition for title occurs when a government takes control of a vessel and becomes its owner, while requisition for hire occurs when a government takes control of a vessel and effectively becomes its charterer at dictated charter rates. Generally, requisitions occur during periods of war or emergency, although governments may elect to requisition vessels in other circumstances. Although we would be entitled to compensation in the event of a requisition of one or more of our vessels, the amount and timing of payment would be uncertain. Government requisition of one or more of our vessels may negatively impact our business, results of operations and financial condition.

## **Risks Related to Our Common Shares**

***Our common share price may fluctuate due to a number of factors.***

The market price of our common shares may be influenced by many factors, some of which are beyond our control, including:

- actual or anticipated variations in our operating results;
- whether or not financial analysts cover our common shares;
- changes in financial estimates by financial analysts, or any failure by us to meet or exceed any of these estimates, or changes in the recommendations of any financial analysts that follow us or our competitors;
- changes in market valuations of similar companies;
- announcements by us or our competitors of significant contracts, acquisitions, strategic partnerships or joint ventures;
- future sales of our common shares by us or our shareholders;
- investor perceptions of us and the industry in which we operate;
- general economic, industry or market conditions; and
- the other factors described in this “Risk Factors” section.

In addition, the stock markets in general experience substantial price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of particular companies affected. These broad market and industry factors may materially harm the market price of our common shares, regardless of our operating performance. In the past, following periods of volatility in the market price of certain companies’ securities, securities class action litigation has been instituted against these companies. Such litigation, if instituted against us, could have a material adverse effect on our business, results of operations and financial condition.

***Sales of substantial amounts of our common shares in the public market could cause the market price of our common shares to decline, and any additional capital raised by us may dilute your ownership in us.***

Sales of substantial amounts of our common shares in the public market, or the perception that these sales may occur, could cause the market price of our common shares to decline. This could also impair our ability to raise additional capital through the sale of our equity securities. Under our authorized share capital, we are authorized to issue up to 140,010,000 common shares, of which 46,750,000 common shares are outstanding as of March 5, 2026. In addition, sales of common shares by our shareholders could have a material adverse effect on the trading price of our common shares.

Certain of our existing shareholders have the right to demand that we file a registration statement covering the offer and sale of their securities under the Securities Act of 1933 (the “Securities Act”), and that such shares be eligible for sale in the United States under the provisions of Rule 144 under the Securities Act (“Rule 144”). Any sales of securities by these shareholders pursuant to a registration statement or otherwise could have a material adverse effect on the trading price of our common shares. We cannot predict the size of future issuances of our common shares or the effect, if any, that future sales and issuances of shares would have on the market price of our common shares.

Future issuances and sales of our common shares may have a negative impact on the market price of our common shares. In particular, sales of substantial amounts of our common shares (including shares issued in connection with an acquisition), or the perception that such sales could occur, may adversely affect prevailing market prices of our common shares.

***Complying with reporting requirements of the Norwegian Securities Trading Act and the Oslo Stock Exchange Rules, as well as SEC reporting requirements demand certain resources and costs.***

As a result of our Initial Public Offering in the U.S. (“U.S. IPO”) in March 2023, we are subject to reporting and other requirements as a result of our listing on the Euronext Oslo Børs and on the New York Stock Exchange, or “NYSE.” We incur costs associated with being a U.S. listed company, including requirements under the Sarbanes-Oxley Act of 2002, as amended (the “Sarbanes-Oxley Act”), rules implemented by the SEC and NYSE, as well as reporting requirements applicable due to being listed in the Euronext Oslo Bors. The need to comply with these rules and regulations increases our legal and financial compliance costs and make some management and corporate governance activities more time-consuming and costly, particularly after we are no longer an “emerging growth company.” These rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage.

The additional demands associated with being a public company may disrupt regular operations of our business by diverting the attention of some of our contracted senior management team away from revenue producing activities to management and administrative oversight, adversely affecting our ability to attract and complete business opportunities and increasing the difficulty in both retaining professionals and managing and growing our businesses. Any of these effects could harm our business, financial condition and results of operations.

For as long as we are an “emerging growth company” under the JOBS Act, our independent registered public accounting firm will not be required to attest to the effectiveness of our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act. We could be an emerging growth company for up to five years from our initial listing in the United States. See “Item 10. Additional Information —B. Memorandum of Association and Bye-Laws—Implications of Being an Emerging Growth Company.” We intend to take advantage of the reduced reporting requirements and exemptions until we are no longer an emerging growth company or we become a large accelerated filer. As a result, we are not currently required to file an auditor attestation report on our internal control over financial reporting. However, we are required to include a management report on internal controls in our annual report on Form 20-F. In connection with our efforts to develop, implement and maintain the necessary procedures and practices related to internal control over financial reporting, we cannot be certain that we will be able to maintain adequate controls over our financial processes and reporting in the future, and we may identify deficiencies that we may not be able to remediate in time to meet the deadline imposed by the Sarbanes-Oxley Act for compliance with the requirements of Section 404. In connection with our efforts to maintain effective internal controls, we may need to hire additional accounting personnel as well as to make additional investments in software and systems. Failure to comply with Section 404 could subject us to regulatory scrutiny and sanctions, impair our ability to raise financing, cause investors to lose confidence in the accuracy and completeness of our financial reports and negatively affect our share price.

***Our largest shareholder has significant influence over us and could limit your ability to influence the outcome of key transactions, including a change of control.***

As of March 5, 2026, Drew Holdings, our largest shareholder, owns 29.1% of our shares. As a result, this shareholder may be able to influence matters requiring approval by our shareholders, including the election of directors and the approval of mergers or other extraordinary transactions. It may also have interests that differ from other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests.

For so long as Drew Holdings continues to own a significant percentage of our common shares, it will be able to significantly influence the composition of our Board of Directors and the approval of actions requiring shareholder approval through their voting power. Accordingly, for such a period of time, it will have significant influence with respect to our management, business plans and policies, including the appointment and removal of our officers. The concentration of ownership may have the effect of delaying, preventing or deterring a change of control of our company, could deprive our shareholders of an opportunity to receive a premium for their common shares as part of a sale of our company and might ultimately affect the market price of our common shares. In particular, for so long as Drew Holdings continues to own a significant percentage of our common shares, it may be able to cause or prevent a change of control of our company or a change in the composition of our Board of Directors and could preclude any unsolicited acquisition of our company.

***Certain of our major shareholders may have interests that are different from the interests of our other shareholders.***

Certain of our major shareholders may have interests that are different from, or are in addition to, the interests of our other shareholders. There may be real or apparent conflicts of interest with respect to matters affecting such shareholders and their affiliates whose interests in some circumstances may be adverse to our interests.

For instance, Drew Holdings, our largest shareholder, is also a shareholder of other large publicly traded companies involved in various sectors of the shipping and oil services industries (the “Drew Related Companies”). In addition, certain of our directors also serve on the boards of one or more of the Drew Related Companies. There may be real or apparent conflicts of interest with respect to matters affecting Drew Holdings and other Drew Related Companies whose interests in some circumstances may be adverse to our interests.

Such shareholders and their affiliates engage in a broad spectrum of activities. In the ordinary course of their business activities, they may engage in activities where their interests conflict with our interests or those of our shareholders. For example, they may pursue acquisition opportunities that may be complementary to our business, and, as a result, those acquisition opportunities may not be available to us. In addition, they may have an interest in our pursuing acquisitions, divestitures and other transactions that, in their judgment, could enhance their investment, even though such transactions might involve risks to us and our shareholders. Such potential conflicts may delay or limit the opportunities available to us, and it is possible that conflicts may be resolved in a manner adverse to us or result in agreements that are less favorable to us than terms that would be obtained in arm’s-length negotiations with unaffiliated third parties.

***We depend on directors who are associated with affiliated companies, which may create conflicts of interest.***

Our principal shareholder is Drew Holdings and certain of our directors are associated with affiliates thereof, including Magni Partners (collectively with Drew Holdings, the “Related Parties”). We maintain commercial relationships with our Related Parties, including the Corporate Support Agreement that is currently in place and under which services continue to be provided to us. Certain of our Related Parties have also provided credit facilities to us, including our Drew Holdings RCF. Please see the section entitled “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Drew Holdings Revolving Credit Facility” for more information, including information on the commercial arrangements between us and the Related Parties.

***Our Board of Directors may not declare cash dividends or cash distributions in the future.***

While our Board of Directors has adopted a dividend and cash distribution policy and we have started to return capital to shareholders through monthly cash distributions, there is no assurance that our Board of Directors will continue to declare dividends or cash distributions in the future. Any dividends or cash distributions will be subject to the discretion of our Board of Directors, requirements of Bermuda law and any other applicable laws, our results of operations, financial condition, cash requirements and availability, including requirements under capital expenditure programs, market prospects, contractual limitations under our Financing Arrangements, the ability of our subsidiaries to distribute funds to us and other factors deemed relevant by our Board of Directors. See “Item 8. Financial Information—A. Consolidated Financial Statements and Other Financial Information—Dividend Policy,” “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements” and “Item 10. Additional Information—A. Share Capital.” The international dry bulk shipping industry is highly volatile, and we cannot predict with certainty the amount of cash, if any, that will be available for distribution as dividends or cash distributions in any period. Also, there may be a high degree of variability from period to period in the amount of cash that is available for the payment of dividends or cash distributions. We have not adopted a separate written dividend or cash distribution policy to reflect our Board’s policy.

We may incur expenses or liabilities or be subject to other circumstances in the future that reduce or eliminate the amount of cash that we have available for distribution as dividends and cash distributions, including as a result of the risks described herein. If financing is not available to us on acceptable terms, our Board of Directors may determine to finance or refinance acquisitions with cash from operations, which would reduce the amount of any cash available for the payment of dividends and cash distributions.

***Bermuda law differs from the laws in effect in the United States and may afford less protection to holders of our common shares.***

We are incorporated under the laws of Bermuda. As a result, our corporate affairs are governed by the Companies Act 1981 of Bermuda, as amended (the “Companies Act”), which differs in some material respects from laws typically applicable to U.S. corporations and shareholders, including the provisions relating to interested directors, amalgamations, mergers and acquisitions, takeovers, shareholder lawsuits and indemnification of directors. Generally, the duties of directors and officers of a Bermuda company are owed to the company only. Shareholders of Bermuda companies typically do not have rights to take action against directors or officers of the company and may only do so in limited circumstances. Class actions are not available under Bermuda law. The circumstances in which derivative actions may be available under Bermuda law are substantially more proscribed and less clear than they would be to shareholders of U.S. corporations. The Bermuda courts, however, would ordinarily be expected to permit a shareholder to commence an action in the name of a company to remedy a wrong to the company where the act complained of is alleged to be beyond the corporate powers of the company or illegal, or would result in the violation of the company’s memorandum of association or bye-laws. Furthermore, consideration would be given by a Bermuda court to acts that are alleged to constitute a fraud against the minority shareholders or, for instance, where an act requires the approval of a greater percentage of the company’s shareholders than that which actually approved it.

When the affairs of a company are being conducted in a manner that is oppressive or prejudicial to the interests of some shareholders, one or more shareholders may apply to the Supreme Court of Bermuda, which may make such order as it sees fit, including an order regulating the conduct of the company’s affairs in the future or ordering the purchase of the shares of any shareholders by other shareholders or by the company. Additionally, subject to Section 14 of the Securities Act and Section 29(a) of the Exchange Act, which render void any purported waiver of the provisions of the Securities Act and Exchange Act, respectively, under our Bye-laws and as permitted by Bermuda law, each shareholder has waived any claim or right of action against our directors or officers for any action taken by directors or officers in the performance of their duties, except for actions involving fraud or dishonesty pursuant to Section 98 of the Companies Act. In addition, the rights of holders of our common shares and the fiduciary responsibilities of our directors under Bermuda law are not as clearly established as under statutes or judicial precedent in existence in jurisdictions in the United States, particularly the State of Delaware. Therefore, holders of our common shares may have more difficulty protecting their interests than would shareholders of a corporation incorporated in a jurisdiction within the United States.

***We are a Bermuda company and it may be difficult for shareholders to enforce judgments against us or our directors and executive officers.***

We are a Bermuda exempted company. As a result, the rights of holders of our common shares are governed by Bermuda law and our memorandum of association and Bye-laws. The rights of shareholders under Bermuda law may differ from the rights of shareholders of companies incorporated in other jurisdictions. A number of our directors are not residents of the United States, and a substantial portion of our assets are located outside the United States. As a result, it may be difficult or impossible for investors to bring an action against us or against these individuals in the United States if they believe that their rights have been infringed under securities laws or otherwise, effect service of process on those persons in the United States or to enforce in the United States judgments obtained in U.S. courts against us or those persons based on the civil liability provisions of the U.S. securities laws. Even if investors are successful in bringing an action of this kind, it is doubtful whether courts in Bermuda will enforce judgments obtained in other jurisdictions, including the United States, against us or our directors or officers under the securities laws of those jurisdictions or entertain actions in Bermuda against us or our directors or officers under the securities laws of other jurisdictions.

***Our Bye-laws restrict shareholders from bringing legal action against our officers and directors.***

Subject to Section 14 of the Securities Act and Section 29(a) of the Exchange Act, which renders void any purported waiver of the provisions of the Securities Act and Exchange Act, respectively, our Bye-laws contain a broad waiver by our shareholders of any claim or right of action, both individually and on our behalf, against any of our officers or directors. The waiver applies to any action taken by an officer or director, or the failure of an officer or director to take any action, in the performance of his or her duties, except with respect to any matter involving any fraud or dishonesty on the part of the officer or director. This waiver limits the right of shareholders to assert claims against our officers and directors, provided that pursuant to Section 98 of the Companies Act such waiver would not be effective to the extent the act or failure to act involves fraud or dishonesty. This waiver would not be effective as a waiver of the right to sue for violations of the Securities Act or the Exchange Act, the waiver of which would be prohibited by Section 14 of the Securities Act and Section 29(a) of the Exchange Act, respectively; and we do not intend this waiver be effective as a waiver of the right to sue for violations of the Securities Act or the Exchange Act.

***We have anti-takeover provisions in our Bye-laws that may discourage a change of control.***

Our Bye-laws contain provisions that could make it more difficult for a third-party to acquire us without the consent of our Board of Directors. These provisions provide for:

- our Board of Directors to determine the powers, preferences and rights of our preference shares and to issue the preference shares without shareholder approval;
- our Board of Directors, with the sanction of a resolution passed by a simple majority of votes cast at a general meeting with the necessary quorum for such meeting of two persons at least holding or representing by proxy 33 1/3% of our issued common shares (or the class, where applicable), to amalgamate or merge us with another company; and
- our Board of Directors to reduce the company's issued share capital selectively with the authority of a resolution of the shareholders.

These provisions could make it more difficult for a third party to acquire us, even if the third party's offer may be considered beneficial by many shareholders. As a result, shareholders may be limited in their ability to obtain a premium for their shares.

***The choice of forum under our Bye-laws for the resolution of any complaint asserting a cause of action under the U.S. Securities Act could limit the ability of shareholders of the Company to obtain a favorable judicial forum for disputes with directors, officers or employees.***

Our Bye-laws provide that, unless the Company consents in writing to the selection of an alternative forum, the federal district courts of the United States shall, to the fullest extent permitted by law, be the sole and exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act. In the absence of these provisions, under the Securities Act, U.S. federal and state courts have been found to have concurrent jurisdiction over suits brought to enforce duties or liabilities created by the Securities Act. This choice of forum provision will not apply to suits brought to enforce duties or liabilities created by the Exchange Act, which already provides that such federal district courts have exclusive jurisdictions over such suits. Additionally, investors cannot waive the Company's compliance with federal securities laws of the United States and the rules and regulations thereunder.

The choice of forum provision contained in our amended bye-laws may limit a shareholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with the Company or its directors, officers or other employees, which may discourage such lawsuits against the Company and its directors, officers and other employees. However, the enforceability of similar choice of forum provisions in other companies' governing documents has been challenged in recent legal proceedings, and it is possible that a court in the relevant jurisdictions with respect to the Company could find the choice of forum provision contained in our amended bye-laws to be inapplicable or unenforceable. While the Delaware Supreme Court ruled in March 2020 that U.S. federal forum selection provisions purporting to require claims under the Securities Act be brought in a U.S. federal court are "facially valid" under Delaware law, there can be no assurance that the courts in Norway and Bermuda, and other courts within the United States, reach a similar determination regarding the choice of forum provision contained in our amended bye-laws. If the relevant court were to find the choice of forum provision contained in our amended bye-laws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could materially adversely affect our business, financial condition and operating results.

***As a foreign private issuer, we are not subject to the same disclosure and procedural requirements as domestic U.S. companies under the Exchange Act, and rely on exemptions from certain New York Stock Exchange corporate governance standards applicable to U.S. issuers. This may afford less protection to holders of our common shares.***

As a foreign private issuer, we are not subject to the same disclosure and procedural requirements as domestic U.S. registrants under the Exchange Act. For instance, we are not required to prepare and file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act, we are not subject to the proxy requirements under Section 14 of the Exchange Act, and we are not generally required to comply with Regulation FD, which restricts the selective disclosure of material nonpublic information. Moreover, we are permitted to disclose compensation information for our executive officers on an aggregate, rather than an individual, basis because individual disclosure is not required under Bermuda law.

In addition, as a foreign private issuer, we are permitted to follow home country practice in lieu of a number of the corporate governance rules of the NYSE.

However, regulatory requirements for foreign private issuers are subject to change. For example, the SEC has issued a concept release soliciting comments as to whether changes in the definition of "foreign private issuer" are appropriate. In addition, on December 18, 2025, as part of the FY 2026 National Defense Authorization Act, the Holding Foreign Insiders Accountable Act ("HFIAA") was signed into law. The HFIAA amended Section 16(a) of the Securities Exchange Act of 1934 (Exchange Act), to require directors and officers of foreign private issuers to comply with the Section 16(a) insider reporting requirements beginning March 18, 2026. Directors and officers of foreign private issuers remain exempt from the short-swing profits rule under Section 16(b) and the short sale prohibition under Section 16(c).

If we lose our foreign private issuer status, the regulatory and compliance costs to us under U.S. securities laws as a U.S. domestic issuer would be significantly higher. We would be required to file periodic reports and registration statements with the SEC on U.S. domestic issuer forms, which are more detailed and extensive than the forms available to a foreign private issuer. We may also be required to modify certain of our policies to comply with governance practices associated with U.S. domestic issuers. Such conversion and modifications will involve additional costs. In addition, we would lose our ability to rely upon exemptions from certain corporate governance requirements on the NYSE that are available to foreign private issuers.

***We are an "emerging growth company" and are therefore subject to reduced disclosure requirements.***

We are an "emerging growth company," as defined in the JOBS Act, and take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not "emerging growth companies" including not being required to comply with the auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act. Investors may find our common shares less attractive because we will rely on these exemptions and the information that we provide our shareholders may be different from information provided by other public companies that are not emerging growth companies. As a result, there may be a less active trading market for our common shares and our share price may be more volatile.

## ITEM 4. INFORMATION ON THE COMPANY

### A. Our History and Development

Himalaya Shipping Ltd. was incorporated in Bermuda on March 17, 2021, pursuant to the Companies Act 1981 of Bermuda, as an exempted company limited by shares. Himalaya Shipping Ltd. was founded for the purpose of owning high-quality Newcastlemax dry bulk vessels, each with capacity in the range of 210,000 dead weight tons (“dwt”) which are equipped with the latest generation dual fuel LNG technology. We and our subsidiaries have twelve vessels in operation.

We are listed on the New York Stock Exchange and on the Euronext Oslo Bors under the symbol “HSHP.” Our common shares were introduced to the Euronext Growth Oslo and on April 29, 2022, our shares were listed on the Euronext Expand. Our shares started trading on Euronext Oslo Bors on June 3, 2025, following the transfer of our listing from Euronext Expand. Since our IPO in April 2023, our common shares are listed for trading on the New York Stock Exchange.

Our principal executive offices are located at S. E. Pearman Building, 2nd Floor, 9 Par-la-Ville Road, Hamilton HM11, Bermuda and our telephone number is +1 (441) 542-4577.

Our current agent in the United States is Puglisi & Associates upon whom process may be served in any action brought against us under the laws of the United States.

The SEC maintains an internet site that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC, which can be found at <http://www.sec.gov>. Our internet address is <https://himalaya-shipping.com/>. The information contained on our website is not incorporated by reference into, and does not form part of, this annual report.

### *Our Vessels*

We operate twelve Newcastlemax dry bulk vessels.

The following table sets out the purchase price and the actual delivery date for each vessel:

Vessel Name	Hull No.	Delivery Date	Purchase Price <sup>(1)(2)</sup>
Mount Norefjell	0120833	March 2, 2023	\$70.3 million
Mount Ita	0120834	March 9, 2023	\$70.3 million
Mount Etna	0120835	April 13, 2023	\$70.3 million
Mount Blanc	0120836	May 31, 2023	\$70.3 million
Mount Matterhorn	0120837	July 13, 2023	\$72.2 million
Mount Neblina	0120838	August 29, 2023	\$72.2 million
Mount Bandeira	0120839	January 5, 2024	\$72.2 million
Mount Hua	0120840	January 8, 2024	\$72.2 million
Mount Elbrus	0120841	January 11, 2024	\$72.7 million
Mount Denali	0120842	April 19, 2024	\$72.7 million
Mount Aconcagua	0120843	June 6, 2024	\$72.7 million
Mount Emai	0120844	June 13, 2024	\$72.7 million

(1) Includes cost of scrubbers: \$2.4 million per vessel.

(2) Does not reflect the variation orders and the deduction of the Address Commission from the purchase price. The average Address Commission for the vessels is \$679,000; whereas variation orders were approximately \$0.6 million per vessel as further described below.

Pursuant to the Shipbuilding Contracts, we acquired 12 vessels for an initial average purchase price of \$69.3 million per vessel. The total average purchase price, including estimated variation orders, Address Commissions and the cost of scrubbers was \$71.6 million. “Address Commission” refers to the commissions that were deducted from each of the final delivery installments paid under the Shipbuilding Contracts.

The purchase price for each vessel was increased as a consequence of variation orders under the Shipbuilding Contracts, which amounted to approximately \$0.6 million per vessel. This additional cost primarily related to an increase of the size of the Low Sulphur Fuel Oil (LSFO)/Marine Gas Oil (MGO) tanks on each vessel to 4,750 cbm, which were installed in order to increase flexibility in trading of the ships.

New Times paid an Address Commission to each of our subsidiaries for their efforts and cooperation in connection with the negotiation, agreement and execution of each Shipbuilding Contract, which were deducted from each of the final delivery installments, thus decreasing the purchase price for each vessel.

The first two installments on each vessel were financed with equity raised by the Company in 2021 and payments made by Magni on our behalf (see the section entitled “Item 10. Additional Information—A. Share Capital”). The remaining installments on the vessels were mainly financed by funds made available under the Avic Leasing, CCBFL Leasing and Jiangsu Leasing Agreements.

### **Ship Management Agreements**

We have outsourced technical management of our vessels to third-party ship managers, OSM and Wilhelmsen. The Ship Managers provide services including, crew, ship maintenance, repairs, alterations and the upkeep of the vessel, appointing surveyors and technical consultants, including arranging the transportation of shore personnel when servicing the vessel, technical support, arranging supervisory visits to the vessel, and maintaining a safety management system and related services to us.

### **Management of Our Business**

Our Board of Directors is responsible for determining the strategic vision and ultimate direction of our business, determining the principles of our business strategy and policies and promoting our long-term interests. Our Board of Directors exercises oversight authority over our business and, subject to our governing documents and applicable law, generally delegates day-to-day operational and commercial management of the Company to our contracted senior management team.

The contracted senior management team responsible for the day-to-day operational and commercial management has extensive experience in the dry bulk shipping market. Management of our business services, including the services of our contracted Chief Executive Officer, are provided to us by 2020 Bulkers Management under the Management Agreement. The services provided include negotiating contracts related to the vessels, negotiating terms of employment of the vessels, making all necessary arrangements for the proper employment of the vessels and negotiating the terms of all contracts for the purchase or sale of the vessels, in each case subject to the express limitations and guidelines imposed by us. Our Manager, 2020 Bulkers Management, which has experience operating in the dry bulk shipping industry, is a subsidiary of 2020 Bulkers Ltd., a company incorporated in Bermuda and listed on the Oslo Stock Exchange and which owns and operates dry bulk vessels. In August 2024, we acquired 40% of the outstanding shares of 2020 Bulkers Management for \$0.3 million, allowing us to exercise significant influence over our Manager.

In addition, pursuant to the Corporate Support Agreement, Magni, an affiliate of our largest shareholder, Drew Holdings, sources and advises on strategic opportunities for our Board of Directors’ consideration, and has a key role in identifying and pursuing business opportunities to the Company. For more information on management and related parties, see the sections entitled “Item 6. Directors, Senior Management and Employees” and “Item 7. Major Shareholders and Related Party Transactions.”

## **B. Business Overview**

### **Our Fleet**

We have twelve newbuilding dual fueled Newcastlemax 210,000 dwt dry bulk vessel in operation, which comprise our fleet.

In connection with the IMO sulfur cap regulations that came into force in January 2020, which limits emission of sulfur content to 0.5% m/m, all of our vessels have scrubbers installed. We believe that having scrubbers on all of our vessels distinguish us from Capesize vessel owners that do not have scrubbers on their vessels and therefore are not able to consume less expensive bunker fuel with higher sulfur content. Approximately 51% of the Capesize fleet in the market has installed scrubbers.

We estimate that each incremental \$50 per tonne increase in the Very Low Sulphur Fuel Oil (“VLSFO”) – High Sulfur Fuel Oil (“HSFO”) fuel spread would yield a potential scrubber-driven saving of around \$1.0 thousand per day for a scrubber-fitted dual fuel Newcastlemax vessel, assuming 27.4 tonnes per day fuel consumption and 75% retention of the scrubber premium by the Company when sailing. Between 2020 and 2025, the VLSFO–HSFO spread has been approximately \$142 per tonne.

None of our vessels were bunkered with LNG nor partially operated using LNG in 2025 (2024: two vessels).

At the end of 2025, our Newcastlemax vessels were no longer permitted to call at Port Hedland after having completed multiple successful and safe port calls since 2023. The Pilbara Port Authority, which governs Port Hedland, has implemented a requirement that all Capesize and Newcastlemax vessels calling at the port be equipped with three diesel auxiliary engines. Our Newcastlemax vessels are equipped with two auxiliary engines, however, with significantly greater total auxiliary engine power than a typical Capesize vessel.

The Company has agreed with its current Charterers that our vessels will not call at Port Hedland until the matter is resolved, without any commercial impact to the Company. The Company has initiated the process of implementing modifications to some of the vessels in order to comply with the updated port requirements. These modifications may require the installation of additional equipment. The Company is currently assessing the number of vessels on which such equipment will be installed and expects that the modifications will involve limited costs and can be completed within a relatively short timeframe.

### **Charter Agreements**

We have entered into charter agreements for all our vessels, pursuant to which eleven vessels are currently employed on index-linked time charters. There is an option under the time charter agreements which enables us to convert the rates to fixed rates from time to time subject to mutual agreement by the charterers. While the number of vessels in our fleet that participate in the time charter market will vary from time to time depending on whether the option is exercised or not, we anticipate that a significant portion of our fleet will continue to operate on index-linked time charters as eleven of our vessels are currently on index-linked time charters pursuant to charter agreements. As of March 5, 2026, index-linked charters for four vessels have been converted to fixed rate charters from January 1, 2026 to March 31, 2026. Once the fixed charter periods end, the vessels will resume their index-linked time charters.

The table below sets forth information about our vessel charters as of March 5, 2026:

Vessel Name	Hull No.	Delivery Date to Charterer	Rate (in U.S. dollars)	Charter period
Mount Norefjell	0120833	March 3, 2025	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)(7)</sup>	14 to 38 months <sup>(4)</sup>
Mount Ita	0120834	January 31, 2026	BCI 5TC plus premium <sup>(1)</sup>	11 to 14 months
Mount Etna	0120835	April 16, 2023	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)(7)</sup>	Until December 31, 2026 <sup>(6)</sup>
Mount Blanc	0120836	June 6, 2023	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)</sup>	Until December 31, 2026 <sup>(6)</sup>
Mount Matterhorn	0120837	July 15, 2023	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)(9)</sup>	32 to 38 months <sup>(9)</sup>
Mount Neblina	0120838	September 1, 2023	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)</sup>	Until December 31, 2026 <sup>(6)</sup>
Mount Bandeira	0120839	January 8, 2024	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)</sup>	Until December 31, 2026 <sup>(6)</sup>
Mount Hua	0120840	January 10, 2024	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)(7)</sup>	Until December 31, 2026 <sup>(6)</sup>
Mount Elbrus	0120841	January 4, 2026	\$30,000 <sup>(8)</sup>	Until June 30, 2026 <sup>(8)</sup>
Mount Denali	0120842	April 21, 2024	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)(7)</sup>	Until December 31, 2026 <sup>(6)</sup>
Mount Aconcagua	0120843	June 8, 2024	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)</sup>	22 to 26 months <sup>(5)</sup>
Mount Emai	0120844	June 15, 2024	BCI 5TC plus premium, scrubber benefit <sup>(1)(2)(3)</sup>	23 to 27 months <sup>(5)</sup>

- (1) Revenues are based on the Baltic 5TC Capesize Index published by the Baltic Exchange plus a premium which varies depending on the terms of each charter. This index-linked rate is based on actual charter hire rates under charters entered into by market participants, as well as daily assessments provided to the Baltic Exchange by a panel of major shipbrokers.
- (2) In addition, we earn a scrubber benefit based on the spread between HSFO and VLSFO or the spread between LNG and VLSFO as applicable depending upon the type of fuel the vessel is using.
- (3) Include a conversion provision which allows us to convert this index-linked time charters to fixed-rate charters, subject to certain conditions including mutual agreement of the parties to the charter agreement.
- (4) Charter period is in charterer's option with a minimum notice period of 30 calendar days.
- (5) Extension options for 11 to 13 months which may be exercised by the charterer prior to the redelivery date of the vessels.
- (6) Charter terms for these vessels expire on December 31, 2026, with an evergreen structure thereafter with a minimum six-month notice period for either party to terminate.
- (7) As of March 5, 2026, index-linked charters for these vessels have been converted to fixed rate charters from January 1, 2026 to March 31, 2026.
- (8) Converts to index-linked rates after the minimum commitment period. There is an evergreen structure thereafter with a minimum one-month notice period for either party to terminate.
- (9) On March 11, 2026, we entered into a new time charter agreement for the Mount Matterhorn for a period of 12 to 14 months. The vessel will commence the new time charter at the end of March or early April 2026 following the planned redelivery under its current charter. The vessel will earn an index linked rate plus a premium to the Baltic 5TC index, as well as certain rights to convert the time charters to fixed rates.

Under our time charters, the charterers pay us an average hire rate of 15 days in advance of each period and bear all voyage expenses, including the cost of bunker (fuel oil) and canal and port charges. We remain responsible for paying the chartered vessels' operating expenses, including the cost of crewing, insuring, repairing and maintaining the vessels.

Our charter agreements contain customary events of termination in charter agreements, such as the Company being subject to sanctions, which prohibit or render unlawful any performance under these agreements, an event of insolvency, among others.

## **Financing Arrangements**

A significant part of the purchase price of our vessels was financed under the Sale and Leaseback Agreements, and upon delivery to us, these vessels were sold to SPVs owned by our Leasing Providers and then leased back to us under bareboat charters. See “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements” for details of these Financing Arrangements.

## **Our Competitive Strengths**

### ***High quality fleet of vessels delivered in 2023 and 2024***

Our fleet consists of 12 dual fuel Newcastlemax dry bulk vessels, all of which are in operation. We have a young fleet with an average age of 2.2 years as of December 31, 2025, compared to the average age of the Capesize fleet, which is 11.5 years. Our new and modern vessels offer technically advanced, operationally flexible, safe and reliable contracting, including optimized hull lines, fuel-saving devices to improve propeller efficiency, advanced and robust machinery, and other features that offer relatively low fuel consumption and CO2 emission per tonne-mile. We believe that owning a young, high-quality, well-maintained fleet affords us significant benefits, including reduced operating costs, higher quality of service and a competitive advantage in securing favorable charters with high-quality counterparties.

Our vessels also benefit from dual fueled LNG technology and are installed with fuel-saving capability and scrubbers, which we believe assists us in chartering our vessels, enhances our operating performance by reducing voyage costs, allows us to adhere to increasingly stringent environmental standards and makes our vessels more environmentally friendly than vessels without these features. As the price of LNG is volatile, it might not always be economical to use. However, we believe the dual fuel capability can be a benefit. Since charterers pay for bunker fuel, they benefit from efficiency savings on our vessels, which makes our vessels more attractive to charterers than less efficient vessels.

In addition, all of the vessels in our fleet belong to the same size segment (Newcastlemax), with identical specifications and capabilities, which helps us market our fleet together with the support and collaboration of our Manager and Ship Managers.

Further, in light of the relatively low fuel consumption of our vessels, large fuel tanks and their dual fueled capability, we are one of the only fleets in the market which is capable of doing full-round routes in the key trade of Brazil to China and other similar long-haul routes without the need for bunkering, providing our customers additional flexibility. We believe this capability makes our fleet more attractive to charterers and enables us to focus on the most profitable routes with our customers.

### ***Demonstrated access to capital and financing***

Our twelve vessels were substantially funded by equity and debt financings (including the Sale and Leaseback Agreements) we entered into to finance our pre-delivery and delivery installments under each Shipbuilding Contract up to the delivery date of our newbuilding vessels, from which time we have started to generate cash flows from operations. In addition, we secured financing for the cost of scrubbers relating to the first four vessels under the 1-4 Shipbuilding Contract.

In 2023, we completed our IPO in the United States, raising total net proceeds of approximately \$45 million. In December 2023, we raised net proceeds of \$16.9 million in a private placement. Proceeds from the equity offerings were used to fund acquisitions of vessels on order, repayment of indebtedness, funding our working capital needs and general corporate purposes.

In March 2025, we raised gross proceeds of approximately \$15 million in a private placement, which was used for general corporate purposes.

### ***Management team with extensive experience in the dry bulk shipping industry***

Our contracted management team has extensive experience and a strong operational track record of over 20 years in the shipping industry. The members of our management team (contracted to us from 2020 Bulk Management) have held leadership positions at prominent dry bulk companies, including Golden Ocean Group Limited, 2020 Bulk Ltd., Western Bulk Chartering AS, among others, and have long-term relationships with companies in the industry which have assisted, and continue to assist, in our development. We have been able to capitalize such extensive experience together with the 2020 Bulk Management team's track record in the dry bulk shipping industry and more specifically in the Newcastlemax' segment.

### ***Commitment to safety and the environment***

We are focused on developing a strong Quality, Health, Safety and Environment ("QHSE") culture and operations. We believe that the combination of quality vessels and experienced and skilled management coordinating our business will continue to contribute to the safety and effectiveness of our operations. Our commitment to strong QHSE culture and performance is reflected in our fleet of modern, dual fuel vessels with scrubbers. We believe that our vessels, particularly when running on LNG (when economical, which depends upon LNG market prices), have lower emissions of sulfur, CO<sub>2</sub> and NO<sub>x</sub> compared to a standard Capesize, and that by having installed scrubbers we further mitigate our vessels' environmental impact. We believe that these features of our vessels and our commitment to QHSE enhance our growth prospects as we continue to work toward becoming one of the preferred providers in the industry.

### **Our Strategy**

#### ***Maximize shareholder returns***

Our strategy is to maximize shareholder returns from our fleet of 12 Newcastlemax vessels which are on charters with established counterparties. We plan to return capital to the shareholders in the form of monthly cash distributions, subject to available cash and capital requirements and other considerations. We may consider growth and acquisition opportunities that we believe to be in the best interest of our shareholders, however our primary focus is to maximize shareholder returns on our vessels.

#### ***Leverage dual fuel LNG technology, fuel-saving technology and lower environmental impact of our fleet***

All of our vessels are Newcastlemax vessels with dual fuel capability, scrubbers, fuel-saving devices and improved propeller efficiency, which offer relatively low fuel consumption and CO<sub>2</sub> emission per tonne mile. We believe these capabilities present a very attractive offering for our charterers, as compared to less efficient and environmentally friendly vessels in the industry. We believe this will help us to capture additional business opportunities, as these features will enhance our operating performance by reducing voyage costs, while allowing our LNG charterers, who pay for bunker fuel, to benefit from efficiency savings on our vessels.

As the price of LNG is volatile, it might not always be economical to use. We believe that LNG is a good alternative fuel in the shipping industry at this time. We see this fuel as the most suitable environmentally friendly alternative for the dry bulk vessel industry during the worldwide transition to carbon neutral fuels.

We have what we believe to be one of the most fuel-efficient fleets in the market, whether using LNG or traditional bunkers. We intend to leverage our efficient, modern fleet to become a preferred provider to the industry, while having at the same time a lower environmental impact than older vessels without dual fuel LNG capability and/or scrubbers.

#### ***Pursue our simple business model with a focus on the Newcastlemax segment***

Our vessels, all belong to the same segment (Newcastlemax), with the same characteristics and capabilities. We believe this is a fairly simple business model and easy to operate given the synergies and efficiencies we can take advantage of by managing and marketing a fleet of the vessels with identical specifications, with the support and collaboration of our Manager and Ship Managers.

A Newcastlemax dry bulk vessel is also expected to be more environmentally friendly than a 180k dwt 2014/15-built Capesize vessel, with 43% lower CO<sub>2</sub> mT per day (78 mT for a Himalaya Newcastlemax LNG propelled vessel versus a 138 mT for a Capesize vessel).

## **LNG Prices and Seasonality**

LNG might not always be economical to use for dual fuel vessels at certain market prices. In 2025, none of our vessels bunkered with LNG. In 2024, two vessels bunkered with LNG for a portion of the year. Currently, LNG is not economical to use at current LNG market prices; however, this could change in the future considering the volatility of the LNG market prices. LNG prices vary, depending on what part of the world the fuel is being purchased in and moves in close correlation with certain natural gas prices and benchmarks. Current EU carbon taxation and expected future carbon taxes are likely to make LNG a more appealing alternative compared to conventional fuel.

## **Dividend Policy**

In 2025, the Company declared cash distributions totaling \$0.57 per share. It is the Company's intention to pay regular dividends and cash distributions in support of our main objective which is to provide significant returns to our shareholders. Any cash distributions will be subject to the discretion of our Board of Directors, requirements from Bermuda law and other applicable laws, our results of operation, financial condition, cash requirements and availability, including requirements under capital expenditure programs, market prospects, contractual restrictions under our Financing Arrangements, the ability of our subsidiaries to distribute funds to us and other factors deemed relevant by our Board of Directors. See "Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements" and "Item 10. Additional Information—A. Share Capital." We cannot assure that we will be able to pay regular dividends as intended or at all. We have not adopted a separate written dividend policy to reflect our Board's policy.

## **Employment of Our Fleet**

As of March 5, 2026, all of our vessels are in operation. We have index-linked time charter agreements for 11 of our 12 vessels with certain rights to convert the time charter to fixed rates from time to time. As of March 5, 2026, index-linked charters for four vessels have been converted to fixed rate charters from January 1, 2026 to March 31, 2026. Charter periods under the time charter agreements are between 11 to 38 months, plus certain extension options. We generally seek to employ our vessels primarily in the index-linked time charter, fixed rate time charter or voyage charter markets. No vessels are currently employed on voyage charters.

Our vessels operate on a worldwide basis and are not restricted to specific locations. Our charterers determine the trading routes and the type of commodities transported on our vessels. Accordingly, it is not possible to breakdown our revenues to specific geographical locations.

## **Our Customers**

Our current customers are major commodity companies and multi-modal transport companies. Our potential customers also include regional and international companies, including large dry bulk operators and end users.

Under our time charters, the charterer typically pays us 15 days in advance of each period based on a 15-day average hire rate. The charterer bears all voyage expenses, including the cost of bunker and canal and port charges. We remain responsible for paying the chartered vessel's operating expenses, including the cost of crewing, insuring, repairing and maintaining the vessel.

A prospective charterer's financial condition, creditworthiness, reliability and track record are important factors in negotiating our vessels' employment.

We monitor developments in the dry bulk shipping industry on a regular basis and, subject to market demand, will seek to adjust the charter hire periods for our vessels according to prevailing market conditions. We regularly evaluate the duration of our charters and extend or reduce the charter hire periods of the vessels in our fleet according to the developments in the dry bulk shipping industry.

## **Our Competition**

We operate in markets that are highly competitive and based primarily on supply and demand. We compete for charters on the basis of price, vessel location, size, age and condition of the vessel, as well as on our reputation and that of our manager. We compete primarily with other independent and state-owned dry bulk vessel-owners. Ownership of dry bulk vessels is highly fragmented.

Our relevant competitors are owners of very large ore carriers, Newcastlemax and Capesize vessels, owning a total of around 2,057 vessels in February 2026. The current Capesize orderbook stands at approximately 11% for vessels larger than 100,000 dwt. We expect that new emission regulations that became effective in 2023, and the potential advantage of offering dual fuel LNG propelled Newcastlemaxes, which may give a significant benefit to the calculated CO2 emission per tonne-mile, may give us further competitive advantage over other vessels in the Capesize fleet which do not have dual fuel capability. In addition, our vessels include fuel-saving devices with improved propeller efficiency that save fuel, and other ship systems that offer relatively low fuel consumption, which are increasingly preferred by customers.

### **Seasonality**

We operate our vessels in markets that have historically exhibited seasonal variations in demand, particularly in the Capesize segment given its share of the iron ore trade, and, as a result, in charter hire rates. As China is the most significant market for dry bulk shipping, the public holidays in relation to the Chinese New Year during the first quarter usually results in a decrease in market activity during this period. In addition, unpredictable and adverse weather conditions and patterns in the Southern Hemisphere, which often occur during the first quarter, in the past have had a negative impact on iron ore exports from Brazil. Further, certain of the largest iron ore producers in Brazil usually schedule maintenance works on their plants in the first quarter which also results in a decrease on iron ore export from Brazil. This seasonality may materially affect our operating results and cash available for dividends.

### **Dry Bulk Shipping Industry**

The principal cargo markets for large dry bulk vessels including Capesize vessels are iron ore, bauxite and to a lesser extent coal. These cargoes are mostly transported between major exporting countries or regions (such as Australia, Brazil and West Africa) to importing countries or regions of raw materials (such as China, the rest of Asia and Europe).

The Baltic 5TC Capesize index as of March 5, 2026 stands at \$23,262 having averaged \$23,078 year to date in 2026, an increase from \$9,566 during the same period in 2025.

The Baltic 5TC Capesize index averaged \$28,875 in the fourth quarter of 2025, an increase from \$18,301 during the same period in 2024.

The fourth quarter of 2025 represented the second strongest market in a decade, and 2025 overall proved another year with sustainable and healthy rates.

China continues to import iron ore at a year-on-year increased volume, especially from long haul trades. China iron ore imports in 2025 were at an all-time high. As Brazil experiences increased competition on tonnage from West Africa bauxite exports, rates are stabilizing at a higher level than seen in previous years. In addition, we have seen more Brazil iron ore exports to India, providing beneficial competition to the Brazil - China trade lane.

Following the existing orders of Newcastlemax vessels, available newbuilding berths with delivery before the first half of 2029 are expected to be limited. The current newbuilding cost for a dual-fuel Newcastlemax in China is believed to be approximately \$95 million.

We continue to see potential upside to the future development in the Capesize market from current levels in the event of continued strong exports of iron ore and bauxite from Brazil and West Africa. The Simandou project in Guinea is reported to be advancing at a good pace, with the first shipment executed in November 2025 and an expected 24-month ramp-up to 60 million tons per annum for phase 1, and an additional 60 million tons per annum for phase 2. In addition, Vale has indicated that it is targeting a 50 million tons per annum increase in capacity by 2026 from Vargem Grande, Capanema and the S11D mine.

Key downside risks to the Capesize market include a potential slowdown in the Chinese economy and geopolitical tensions, including trade wars and tariffs. Although we have not been directly impacted by the tariffs and tolls announced by the U.S. administration in 2025, we are closely monitoring the Panamax and Supramax segments, as trends in the market for smaller dry bulk vessels have historically had an impact on the market for Capesize and Newcastlemax vessels. We are monitoring the impact of the current situation in the Middle East, however, there has been no direct impact on the BCI rates through March 5, 2026.

See “Item 3. Key Information—D. Risk Factors” for additional information.

### **Capesize Fleet Development**

Growth in vessel supply for large bulk carriers is anticipated to be moderate in the coming years with a current Capesize fleet at 407 million dwt as of January 1, 2026, compared to 401 million dwt in January 2025. In February 2026, the order book for Capesize dry bulk vessels stood at 11% of the existing fleet, up from an average of 9% in 2025. In the fourth quarter of 2025, 12 million dwt was ordered compared to 3.6 million dwt in the fourth quarter of 2024, and 22.5 million dwt was ordered in 2025, compared to 18.3 million dwt during 2024. In 2025, 1.4 million dwt has been scrapped, compared to 0.8 million dwt in 2024.

Only about 231 large bulk carriers are due for delivery prior to 2030 and we expect a significant number of vessels to be due for dry docking in the next couple of years. About 28% of the total Capesize fleet, ranging from 100k dwt to 211k dwt, are due for dry dock or special surveys in 2026 compared to an average of 17% in the previous five years. Based on the orderbook, the fleet is scheduled to have a growth of approximately 2.7% in 2026, adjusting for the upcoming dry dock schedule. Approximately 135 Capesize vessels are 20 years old or older as of January 2026, and the average fleet age is increasing.

### **Environmental and Other Regulation**

Governmental regulation and other regulations significantly affect the ownership and operation of our fleet. See “Item 4. Information on the Company—B. Business Overview” for additional information.

### **Risk of Loss and Liability Insurance**

The operation of any dry bulk vessel includes risks such as mechanical and structural failure, hull damage, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, piracy, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental incidents, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon owners, operators and demise charterers of vessels trading in the United States exclusive economic zone for certain oil pollution accidents in the United States, has made liability insurance more expensive for ship owners and operators trading in the United States market.

We maintain hull and machinery marine risks insurance, hull and machinery, war risks insurance and protection and indemnity insurance for our fleet. However, we may not be able to achieve or maintain adequate level of coverage throughout a vessel’s useful life. In addition, not all risks can be insured and our coverage may not be sufficient or available to cover losses we may experience, and there can be no guarantee that any specific claim will be paid, or that we will in the future be able to obtain adequate insurance coverage at reasonable rates.

### **Hull & Machinery and War Risks Insurance**

We maintain hull and machinery marine risks insurance and hull and machinery war risks insurance on vessels, which cover loss of or damage to a ship due to marine perils such fire or lightning, and loss of or damage to a ship due to war perils such as acts of war, terrorism or piracy. We also maintain hull disbursements and increased value insurance policies covering each of our ships, which provide, or will provide, additional coverage in the event of the total or constructive loss of a ship. Our marine risks insurance policies contain deductible amounts for which we will be responsible. However, there are no deductible amounts under the war risk policies or our total loss policies. Our vessels are covered up to at least fair market value.

### **Protection and Indemnity Insurance**

All of our vessels carry protection and indemnity insurance (“P&I insurance”), which insures liabilities to third-parties in connection with our current and future shipping activities. This includes third-party liability and other related expenses resulting from the injury or death of crew, passengers and other third-parties, the loss or damage to cargo, claims arising from collisions with other vessels, damage to other third-party property, pollution arising from oil or other substances and salvage, towing and other related costs, including wreck removal.

Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations (“P&I Clubs”). Our current P&I insurance is provided by P&I Clubs that are members of the International Group of Protection and Indemnity Clubs (“International Group”). Our P&I insurances are currently subject to customary limits in the range of \$3 billion per ship per event in respect of liability to passengers and seamen and \$1 billion per ship per event in respect of liability for oil pollution.

The 12 P&I Clubs that comprise the International Group insure approximately 90% of the world’s commercial tonnage and have entered into a pooling agreement to reinsure each association’s liabilities. The International Group’s website states that the pool provides a mechanism for sharing all claims in excess of \$10 million. As member of a P&I Association, which is a member of the International Group, we are subject to calls payable to the associations based on our claim records as well as the claim records of all other members of the individual associations and members of the shipping pool of P&I Associations comprising the International Group. Each vessel comprising our fleet is subject to supplemental calls, which are based on estimates of premium income and anticipated and paid claims. Such estimates are adjusted each year by the Board of Directors of the P&I Association until the closing of the relevant policy year, which generally occurs within three years from the end of the policy year. Supplemental calls, if any, are expensed when they are announced and according to the period they relate to.

### **Loss of Hire Insurance**

We currently carry a loss of hire insurance for our fleet of \$30,000 per day, with a deductible of 14 days. The loss of hire insurance values are reviewed at least quarterly and adjusted to reflect market rates.

### **Permits and Authorizations**

We are required by various governmental and quasi-governmental agencies to obtain certain permits, licenses and certificates with respect to our vessels. The kinds of permits, licenses and certificates required depend upon several factors, including the commodity transported, the waters in which the vessel operates, the nationality of the vessel’s crew and the age of a vessel. Additional laws and regulations, environmental or otherwise, may be adopted which could limit our ability to do business or increase the cost of us doing business.

### **Legal Proceedings**

To our knowledge, we are not currently a party to any legal proceeding that would have a material adverse effect on our financial position, results of operations or liquidity. From time to time in the future, in the ordinary course of conducting our business, we may become involved in various legal actions and other claims. Litigation is subject to many uncertainties, the outcome of individual litigated matters is not predictable with assurance, and it is reasonably possible that some of these matters may be decided unfavorably to the Company.

### **Bermuda Exchange Control**

Under the Exchange Control Act 1972 and related regulations, permission from the Bermuda Monetary Authority (the “BMA”) is required for all issuances and transfers of securities of a Bermuda exempted company, unless the proposed transaction is exempted by the BMA’s written general permissions. We have received a general permission from the BMA to issue any unissued common shares, and for the free transferability of our common shares to and between non-residents of Bermuda for exchange control purposes, provided that our common shares remain listed on an approved stock exchange, which includes the NYSE. Our common shares may therefore be freely transferred among persons who are residents or non-residents of Bermuda.

Although we are incorporated in Bermuda, we have been designated by the BMA as a non-resident of Bermuda for exchange control purposes. This designation allows us to engage in transactions in currencies other than the Bermuda dollar, and there are no restrictions on our ability to transfer funds (other than funds denominated in Bermuda dollars) into and out of Bermuda or to pay dividends to holders of our common shares. Approvals or permissions given by the BMA do not constitute a guarantee by the BMA as to our performance or our creditworthiness. Accordingly, in giving such consent or permissions, the BMA shall not be liable for the financial soundness, performance or default of our business or for the correctness of any opinions or statements expressed in this annual report. Certain issues and transfers of common shares involving persons deemed resident in Bermuda for exchange control purposes still require the specific consent of the BMA.

## **Environmental and Other Regulations in the Shipping Industry**

Government regulation and laws significantly affect the ownership and operation of our fleet. We are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which our vessels may operate or are expected to be registered relating to safety and health and environmental protection including the storage, handling, emission, transportation and discharge of hazardous and non-hazardous materials, and the remediation of contamination and liability for damage to natural resources. Compliance with such laws, regulations and other requirements entails significant expense, including vessel modifications and implementation of certain operating procedures.

A variety of government and private entities subject our vessels to both scheduled and unscheduled inspections. These entities include the local port authorities (applicable national authorities such as the USCG, harbor master or equivalent), classification societies, flag state administrations (countries of registry) and charterers, particularly terminal operators. Certain of these entities require us to obtain permits, licenses, certificates and other authorizations for the operation of our vessels. Failure to maintain necessary permits or approvals could require us to incur substantial costs or result in the temporary suspension of the operation of one or more of our vessels.

Further to the above, the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009 (the “Hong Kong Convention”), which applies to ships above 500 gross tonnage (“GT”), entered into force on June 26, 2025. Under the Hong Kong Convention, ships must maintain onboard an inventory of hazardous materials. Furthermore, ships must prepare a ship recycling plan prior to being recycled and shall only be recycled at ship recycling facilities authorized by competent authority.

Increasing environmental concerns have created a demand for vessels that conform to stricter environmental standards. We are required to maintain operating standards for all of our vessels that emphasize operational safety, quality maintenance, continuous training of our officers and crews to be hired and compliance with United States and international regulations. Because applicable environmental and other laws and regulations frequently change and may impose increasingly strict requirements, such laws and regulations and the ultimate cost of complying with these requirements, and the impact of these requirements on the resale value or useful lives of our vessels could adversely impact us. In addition, a future serious marine incident relating to one of our vessels that causes significant adverse environmental impact could result in additional legislation or regulation that could negatively affect our profitability. Finally, we are subject, to laws, directives, decisions and orders in various countries around the world that prohibit or restrict trade with certain countries, individuals and entities.

### ***International Maritime Organization***

The International Maritime Organization, the United Nations agency for maritime safety and the prevention of pollution by vessels (the “IMO”), has adopted the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto, collectively referred to as MARPOL 73/78 and herein as “MARPOL,” the International Convention for the Safety of Life at Sea of 1974 (“SOLAS Convention”), and the International Convention on Load Lines of 1966 (the “LL Convention”). MARPOL establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and the handling of harmful substances in packaged forms. MARPOL is applicable to dry bulk, tanker and LNG carriers, among other vessels, and is broken into six Annexes, each of which regulates a different source of pollution. Annex I relates to oil leakage and spilling; Annexes II and III relate to harmful substances carried in bulk in liquid or in packaged form, respectively; Annexes IV and V relate to sewage and garbage management, respectively; and Annex VI, lastly, relates to air emissions. Annex VI was separately adopted by the IMO in September of 1997; new emissions standards, titled IMO-2020, took effect on January 1, 2020, and new amendments to Annex VI, relating to carbon intensity and energy efficiency, took effect on January 1, 2023.

#### *Air Emissions*

In September 1997, the IMO adopted Annex VI to MARPOL to address air pollution from vessels. Effective May 2005, Annex VI sets limits on sulfur oxide and nitrogen oxide emissions from all commercial vessel exhausts and prohibits “deliberate emissions” of ozone depleting substances (such as halons and chlorofluorocarbons), emissions from the shipboard incineration of specific substances. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions, as explained below.

The Marine Environment Protection Committee, or “MEPC,” adopted amendments to Annex VI regarding emissions of sulfur oxide, nitrogen oxide, particulate matter and ozone depleting substances, which entered into force on July 1, 2010. The amended Annex VI seeks to further reduce air pollution by, among other things, implementing a progressive reduction of the amount of sulfur contained in any fuel oil used on board ships. On October 27, 2016, at its 70th session, the MEPC agreed to implement a global 0.5% m/m sulfur oxide emissions limit (reduced from 3.5%) starting from January 1, 2020. This limitation can be met by using low-sulfur compliant fuel oil, alternative fuels, or certain exhaust gas cleaning systems. Ships are now required to obtain bunker delivery notes and International Air Pollution Prevention (“IAPP”) Certificates from their flag states that specify sulfur content. Additionally, at MEPC 73, amendments to Annex VI were adopted and took effect March 1, 2020 to prohibit the carriage of bunker above 0.5% sulfur on ships with the exception of vessels fitted with Exhaust Gas Cleaning System (“EGCS”), or scrubbers, which can operate using fuel of higher sulfur content. These regulations subject ocean-going vessels to stringent emissions controls.

Sulfur content standards are even stricter within certain ECAs. As of January 1, 2015, ships operating within an ECA were not permitted to use fuel with sulfur content in excess of 0.1% m/m. Amended Annex VI establishes procedures for designating new ECAs. Currently, the IMO has designated four ECAs, including specified portions of the Baltic Sea area, North Sea area, North American area and United States Caribbean area. Ocean-going vessels in these areas will be subject to stringent emission controls and may cause us to incur additional costs. Other areas in China are subject to local regulations that impose stricter emission controls. In December 2021, the member states of the Convention for the Protection of the Mediterranean Sea Against Pollution (“Barcelona Convention”) agreed to support the designation of a new ECA in the Mediterranean. On December 15, 2022, MEPC 79 adopted the designation of a new ECA in the Mediterranean, with an effective date of May 1, 2025. In July 2023, MEPC 80 announced three new ECA proposals, including the Canadian Arctic waters and the North-East Atlantic Ocean, which were adopted in draft amendments to Annex IV that entered into force in March 2026. If other ECAs are approved by the IMO, or other new or more stringent requirements relating to emissions from marine diesel engines or port operations by vessels are adopted by the U.S. Environmental Protection Agency (“EPA”) or the states where we operate, compliance with these regulations could entail significant capital expenditures or otherwise increase the costs of our operations.

Amended Annex VI also establishes new tiers of stringent nitrogen oxide emissions standards for marine diesel engines, depending on their date of installation. At the MEPC meeting held from March to April 2014, amendments to Annex VI were adopted which address the date on which Tier III Nitrogen Oxide (NOx) standards in ECAs will go into effect. Under the amendments, Tier III NOx standards apply to ships that operate in the North American and U.S. Caribbean Sea ECAs designed for the control of NOx produced by vessels with a marine diesel engine installed and constructed on or after January 1, 2016. Tier III requirements could apply to areas that will be designated for Tier III NOx in the future. At MEPC 70 and MEPC 71, the MEPC approved the North Sea and Baltic Sea as ECAs for nitrogen oxide for ships built on or after January 1, 2021. For the moment, this regulation relates to newbuilding vessels and has no retroactive application to existing fleet. The EPA promulgated equivalent (and in some senses stricter) emissions standards in 2010. As a result of these designations or similar future designations, we may be required to incur additional operating or other costs.

As determined at the MEPC 70, the Regulation 22A of MARPOL Annex VI became effective as of March 1, 2018 and requires ships above 5,000 gross tonnage to collect and report annual data on fuel oil consumption to an IMO database, with the first year of data collection having commenced on January 1, 2019. The IMO intends to use such data as the first step in its roadmap for developing its strategy to reduce greenhouse gas emissions from ships, as discussed further below.

As of January 1, 2013, MARPOL made mandatory certain measures relating to energy efficiency for ships. All ships are required to develop and implement Ship Energy Efficiency Management Plans (“SEEMPs”), and new ships must be designed in compliance with minimum energy efficiency levels per capacity mile as defined by the Energy Efficiency Design Index (“EEDI”). Under these measures, by 2025, all new ships built are required to be 30% more energy efficient than those built in 2014. Additionally, MEPC 75 adopted amendments to MARPOL Annex VI which brought forward the effective date of the EEDI’s “phase 3” requirements from January 1, 2025 to April 1, 2022 for several ship types, including gas carriers, general cargo ships, and LNG carriers.

MEPC 75 also introduced draft amendments to Annex VI which impose new regulations to reduce greenhouse gas emissions from ships. These amendments introduce requirements to assess and measure the energy efficiency of all ships and set the required attainment values, with the goal of reducing the carbon intensity of international shipping. The requirements include (1) a technical requirement to reduce carbon intensity based on a new Energy Efficiency Existing Ship Index (“EEXI”), and (2) operational carbon intensity reduction requirements, based on a new operational carbon intensity indicator (“CII”). The attained EEXI is required to be calculated for ships of 400 gross tonnage and above, in accordance with different values set for ship types and categories. With respect to the CII, the draft amendments would require ships of 5,000 gross tonnage to document and verify their actual annual operational CII achieved against a determined required annual operational CII. Additionally, MEPC 75 proposed draft amendments requiring that, on or before January 1, 2023, all ships above 400 gross tonnage must have an approved SEEMP on board. For ships above 5,000 gross tonnage, the SEEMP would need to include certain mandatory content. MEPC 75 also approved draft amendments to MARPOL Annex I to prohibit the use and carriage for use as fuel of heavy fuel oil (“HFO”) by ships in Arctic waters on and after July 1, 2024. The draft amendments introduced at MEPC 75 were adopted at the MEPC 76 session held in June 2021 and entered into force on November 1, 2022, with the requirements for EEXI and CII certification having entered into effect from January 1, 2023. A review of the measures is underway. Phase 1 of the review was finalized in 2025, which gathered and analyzed data from Member States about their experience in implementing the short-term measures, identifying a list of challenges and gaps. Phase 2 will run from Spring 2026 to Spring 2028, to further develop the SEEMP framework and metrics.

The Himalaya fleet holds approved SEEMP and certification of compliance to EEXI. CII is a continuous annual certification, and we may incur costs to comply with revised standards. Additional or new conventions, laws and regulations may be adopted that could require the installation of expensive emission control systems.

#### *Safety Management System Requirements*

The SOLAS Convention was amended to address the safe manning of vessels and emergency training drills. The Convention of Limitation of Liability for Maritime Claims (the “LLMC”) sets limitations of liability for a loss of life or personal injury claim or a property claim against ship owners. We believe that our vessels are in substantial compliance with SOLAS and LLMC standards.

Under Chapter IX of the SOLAS Convention, or the ISM Code, our operations are also subject to environmental standards and requirements. The ISM Code requires the party with operational control of a vessel to develop an extensive safety management system that includes, among other things, the adoption of a safety and environmental protection policy setting forth instructions and procedures for operating its vessels safely and describing procedures for responding to emergencies. We rely upon a safety management system that we have developed for compliance with the ISM Code together with the technical management team from our Ship Managers. A failure of a vessel owner or bareboat charterer to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports.

The ISM Code requires that vessel operators obtain a safety management certificate for each vessel they operate. This certificate evidences compliance by a vessel’s management with the ISM Code requirements for a safety management system. No vessel can obtain a safety management certificate unless its manager has been awarded a document of compliance, issued by each flag state, under the ISM Code. We have obtained applicable documents of compliance for our offices and safety management certificates for all of our vessels for which the certificates are required by the IMO.

The SOLAS Convention regulation II-1/3-10 on goal-based ship construction standards for bulk carriers and oil tankers, which entered into force on January 1, 2012, requires that all oil tankers and bulk carriers of 150 meters in length and above, for which the shipbuilding contract is placed on or after July 1, 2016, satisfy applicable structural requirements conforming to the functional requirements of the International Goal-based Ship Construction Standards for Bulk Carriers and Oil Tankers.

Amendments to the SOLAS Convention Chapter VII apply to vessels transporting dangerous goods and require those vessels be in compliance with the International Maritime Dangerous Goods Code (“IMDG Code”). Effective January 1, 2018, the IMDG Code includes (1) updates to the provisions for radioactive material, reflecting the latest provisions from the International Atomic Energy Agency, (2) new marking, packing and classification requirements for dangerous goods, and (3) new mandatory training requirements. Amendments which took effect on January 1, 2020 also reflect the latest material from the UN Recommendations on the Transport of Dangerous Goods, including (1) new provisions regarding IMO type 9 tank, (2) new abbreviations for segregation groups, and (3) special provisions for carriage of lithium batteries and of vehicles powered by flammable liquid or gas. The upcoming amendments, which came into force on June 1, 2022, include (1) addition of a definition of dosage rate, (2) additions to the list of high consequence dangerous goods, (3) new provisions for medical/clinical waste, (4) addition to various ISO standards for gas cylinders, (5) a new handling code, and (6) changes to stowage and segregation provisions.

The IMO has also adopted the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers (“STCW”). As of February 2017, all seafarers are required to meet the STCW standards and be in possession of a valid STCW certificate. Flag states that have ratified the SOLAS Convention and STCW generally employ the classification societies, which have incorporated the SOLAS Convention and STCW requirements into their class rules, to undertake surveys to confirm compliance.

The IMO’s Maritime Safety Committee and MEPC, respectively, each adopted relevant parts of the International Code for Ships Operating in Polar Water (the “Polar Code”). The Polar Code, which entered into force on January 1, 2017, covers design, construction, equipment, operational, training, search and rescue as well as environmental protection matters relevant to ships operating in the waters surrounding the two poles. It also includes mandatory measures regarding safety and pollution prevention as well as recommendatory provisions. The Polar Code applies to new ships constructed after January 1, 2017, and after January 1, 2018, ships constructed before January 1, 2017 are required to meet the relevant requirements by the earlier of their first intermediate or renewal survey.

Furthermore, recent action by the IMO’s Maritime Safety Committee and United States agencies indicates that cybersecurity regulations for the maritime industry are likely to be further developed in the near future in an attempt to combat cybersecurity threats. For example, it became mandatory for ship-owners and managers to incorporate cyber-risk management systems by 2021. Such regulations require companies to create additional procedures for monitoring cybersecurity, which could require additional expenses and/or capital expenditures.

#### *Pollution Control and Liability Requirements*

The IMO has negotiated international conventions that impose liability for pollution in international waters and the territorial waters of the signatories to such conventions. For example, in 2004, the IMO adopted an International Convention for the Control and Management of Ships’ Ballast Water and Sediments, (the “BWM Convention”). The BWM Convention entered into force on September 8, 2017. The BWM Convention requires ships to manage their ballast water to remove, render harmless, or avoid the uptake or discharge of new or invasive aquatic organisms and pathogens within ballast water and sediments. The BWM Convention’s implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits, and require all ships to carry a ballast water record book and an international ballast water management certificate.

On December 4, 2013, the IMO Assembly passed a resolution revising the application dates of the BWM Convention so that the dates are triggered by the entry into force date and not the dates originally in the BWM Convention. This, in effect, makes all vessels delivered before the entry into force date “existing vessels” and allows for the installation of ballast water management systems on such vessels at the first International Oil Pollution Prevention (“IOPP”) renewal survey following entry into force of the convention. The MEPC adopted updated guidelines for approval of ballast water management systems (G8) at MEPC 70. At MEPC 71, the schedule regarding the BWM Convention’s implementation dates was also discussed and amendments were introduced to extend the date existing vessels are subject to certain ballast water standards. Those changes were adopted at MEPC 72. Ships over 400 gross tonnes generally must comply with a “D-1 standard,” requiring the exchange of ballast water only in open seas and away from coastal waters. The “D-2 standard” specifies the maximum amount of viable organisms allowed to be discharged, and compliance dates vary depending on the IOPP renewal dates. Depending on the date of the IOPP renewal survey, existing vessels must comply with the D-2 standard on or after September 8, 2019. For most ships, compliance with the D-2 standard will involve installing on-board systems to treat ballast water and eliminate unwanted organisms. Ballast water management systems, which include systems that make use of chemical, biocides, organisms or biological mechanisms, or which alter the chemical or physical characteristics of the

ballast water, must be approved in accordance with IMO Guidelines (Regulation D-3). As of October 13, 2019, MEPC 72's amendments to the BWM Convention took effect, making the Code for Approval of Ballast Water Management Systems, which governs assessment of ballast water management systems, mandatory rather than permissive, and formalized an implementation schedule for the D-2 standard. Under these amendments, all ships must meet the D-2 standard by September 8, 2024, and all of our vessels are fitted with the D-2 standard water treatment system. Costs of compliance with these regulations may be substantial for dry bulk carriers. Additionally, in November 2020, MEPC 75 adopted amendments to the BWM Convention which require a commissioning test of the ballast water management system for the initial survey or when performing an additional survey for retrofits. This analysis will not apply to ships that already have an installed BWM system certified under the BWM Convention. These amendments came into force on June 1, 2022.

Many countries already regulate the discharge of ballast water carried by vessels from country to country to prevent the introduction of invasive and harmful species via such discharges. U.S. for example, require vessels entering U.S. waters from another country to conduct mid-ocean ballast exchange, or undertake some alternate measure, and to comply with certain reporting requirements.

The IMO also adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage (the "Bunker Convention") to impose strict liability on ship owners (including the registered owner, bareboat charterer, manager or operator) for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker. The Bunker Convention requires registered owners of ships over 1,000 gross tonnes to maintain insurance for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime (but not exceeding the amount calculated in accordance with the LLMC). With respect to non-ratifying states, liability for spills or releases of oil carried as fuel in ship's bunker typically is determined by the national or other domestic laws in the jurisdiction where the events or damages occur.

Under the Bunker Convention, ships are required to maintain a certificate attesting that they maintain adequate insurance to cover an incident. In jurisdictions, such as the United States where the Bunker Convention has not been adopted, various legislative schemes or common law govern, and liability is imposed either on the basis of fault or on a strict-liability basis. Our vessels maintain such certificates.

#### *Anti-Fouling Requirements*

In 2001, the IMO adopted the International Convention on the Control of Harmful Anti-fouling Systems on Ships, or the "Anti-fouling Convention." The Anti-fouling Convention, which entered into force on September 17, 2008, prohibits the use of organotin compound coatings to prevent the attachment of mollusks and other sea life to the hulls of vessels. Vessels of over 400 gross tonnes engaged in international voyages will also be required to undergo an initial survey before the vessel is put into service or before an International Anti-fouling System Certificate, or "IAFS Certificate," is issued for the first time; and subsequent surveys when the anti-fouling systems are altered or replaced.

In November 2020, MEPC 75 approved draft amendments to the Anti-fouling Convention to prohibit anti-fouling systems containing cybutryne, which have been in effect since January 1, 2023. For ships already bearing such an anti-fouling system, compliance is required at the next scheduled renewal of the system after that date, but no later than 60 months following the last application to the ship of such a system. In addition, the IAFS Certificate has been updated to address compliance options for anti-fouling systems to address cybutryne. Ships which are affected by this ban on cybutryne must receive an updated IAFS Certificate no later than two years after the entry into force of these amendments. Ships which are not affected (i.e., with anti-fouling systems which do not contain cybutryne) must receive an updated IAFS Certificate at the next anti-fouling application to the vessel. These amendments were formally adopted at MEPC 76 in June 2021, and entered into force on January 1, 2023.

We have obtained Anti-fouling System Certificates for all of our vessels that are subject to the Anti-fouling Convention.

#### *Compliance Enforcement*

Non-compliance with the ISM Code or other IMO regulations may subject the ship owner or bareboat charterer to increased liability, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to, or detention in, some ports. The USCG and European Union authorities have indicated that vessels not in compliance with the ISM Code by applicable deadlines will be prohibited from trading in U.S. and European Union ports, respectively. Our vessels are ISM Code certified. However, there can be no assurance that such certificates will be maintained in the future. The IMO continues to review and introduce new regulations. It is impossible to predict what additional regulations, if any, may be passed by the IMO and what effect, if any, such regulations might have on our operations.

## ***U.S. Regulations***

### *The U.S. Oil Pollution Act of 1990 and Comprehensive Environmental Response, Compensation and Liability Act*

The U.S. Oil Pollution Act of 1990 (“OPA”) established an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills. OPA affects all “owners and operators” whose vessels trade or operate within the U.S., its territories and possessions or whose vessels operate in U.S. waters, which includes the U.S.’s territorial sea and its 200 nautical mile exclusive economic zone around the U.S. The U.S. has also enacted the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”), which applies to the discharge of hazardous substances other than oil, except in limited circumstances, whether on land or at sea. OPA and CERCLA both define “owner and operator” in the case of a vessel as any person owning, operating or chartering by demise, the vessel. Both OPA and CERCLA impact our operations.

Under OPA, vessel owners and operators are “responsible parties” and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third-party, an act of God or an act of war) for all containment and cleanup costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunker (fuel). OPA defines these other damages broadly to include:

- injury to, destruction or loss of, or loss of use of, natural resources and the costs of assessment;
- injury to, or economic losses resulting from, the destruction of real and personal property;
- loss of subsistence use of natural resources that are injured, destroyed or lost;
- net loss of taxes, royalties, rents, fees or net profit revenues resulting from injury, destruction or loss of real or personal property, or natural resources;
- lost profits or impairment of earning capacity due to injury, destruction or loss of real or personal property or natural resources; and
- net cost of increased or additional public services necessitated by removal activities following a discharge of oil, such as protection from fire, safety or health hazards, and loss of subsistence use of natural resources.

OPA contains statutory caps on liability and damages; such caps do not apply to direct cleanup costs. As of March 23, 2023, the USCG adjusted the limits of OPA liability for non-tank vessels, edible oil tank vessels, and any oil spill response vessels, to the greater of \$1,300 per gross ton or \$1,076,000 (subject to periodic adjustment for inflation). These limits of liability do not apply if an incident was proximately caused by the violation of an applicable U.S. federal safety, construction or operating regulation by a responsible party (or its agent, employee or a person acting pursuant to a contractual relationship), or a responsible party’s gross negligence or willful misconduct. The limitation on liability similarly does not apply if the responsible party fails or refuses to (i) report the incident as required by law where the responsible party knows or has reason to know of the incident; (ii) reasonably cooperate and assist as requested in connection with oil removal activities; or (iii) without sufficient cause, comply with an order issued under the Federal Water Pollution Act (Section 311, (e)) or the Intervention on the High Seas Act.

CERCLA contains a similar liability regime whereby owners and operators of vessels are liable for cleanup, removal and remedial costs, as well as damages for injury to, or destruction or loss of, natural resources, including the reasonable costs associated with assessing the same, and health assessments or health effects studies. There is no liability if the discharge of a hazardous substance results solely from the act or omission of a third-party, an act of God or an act of war. Liability under CERCLA is limited to the greater of \$300 per gross ton or \$5.0 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$500,000 for any other vessel. These limits do not apply (rendering the responsible person liable for the total cost of response and damages) if the release or threat of release of a hazardous substance resulted from willful misconduct or willful negligence, or the primary cause of the release was a violation of applicable safety, construction or operating standards or regulations. The limitation on liability also does not apply if the responsible person fails or refuses to provide all reasonable cooperation and assistance as requested in connection with response activities where the vessel is subject to OPA.

OPA and CERCLA each preserve the right to recover damages under existing law, including maritime tort law. OPA and CERCLA both require owners and operators of vessels to establish and maintain with the USCG evidence of financial responsibility sufficient to meet the maximum amount of liability to which the particular responsible person may be subject. Vessel owners and operators may satisfy their financial responsibility obligations by providing a proof of insurance, a surety bond, qualification as a self-insurer or a guarantee. We comply with the USCG's financial responsibility regulations by providing applicable certificates of financial responsibility.

The 2010 Deepwater Horizon oil spill in the Gulf of Mexico resulted in additional regulatory initiatives or statutes, including higher liability caps under OPA, new regulations regarding offshore oil and gas drilling, and a pilot inspection program for offshore facilities. However, several of these initiatives and regulations have been or may be revised. For example, the U.S. Bureau of Safety and Environmental Enforcement's ("BSEE") revised Production Safety Systems Rule ("PSSR"), effective December 27, 2018, modified and relaxed certain environmental and safety protections under the 2016 PSSR. Compliance with any new requirements of OPA and future legislation or regulations applicable to the operation of our vessels, could impact the cost of our operations and adversely affect our business.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, provided they accept, at a minimum, the levels of liability established under OPA and some states have enacted legislation providing for unlimited liability for oil spills. Many U.S. states that border a navigable waterway have enacted environmental pollution laws that impose strict liability on a person for removal costs and damages resulting from a discharge of oil or a release of a hazardous substance. These laws are in some cases more stringent than U.S. federal law. Moreover, some states have enacted legislation providing for unlimited liability for discharge of pollutants within their waters, although in some cases, states which have enacted this type of legislation have not yet issued implementing regulations defining vessel owners' responsibilities under these laws.

Title VII of the Coast Guard and Maritime Transportation Act of 2004, or CGMTA, amended OPA 90 to require the owner or operator of any non-tank vessel of 400 gross tonnes or more that carries oil of any kind as a fuel for main propulsion, including bunker fuel, to prepare and submit a response plan for each vessel. These vessel response plans include detailed information on actions to be taken by vessel personnel to prevent or mitigate any discharge or substantial threat of such a discharge of oil from the vessel due to operational activities or casualties.

We have obtained pollution liability coverage insurance for each of our vessels. If the damages from a catastrophic spill were to exceed our insurance coverage, it could have an adverse effect on our business, financial condition and results of operation. In addition, we carry hull and machinery and P&I insurance to cover the risks of collision, grounding and machinery breakdown. Although our vessels only carry bunker fuel, a spill of oil from one of our vessels could be catastrophic under certain circumstances. In addition, not all risks can be insured, and if the damages from a catastrophic spill exceeded our insurance coverage, the payment of those damages could have an adverse effect on our business, financial condition or the results of our operations. For additional information about our insurance policies, see "Item 4. Information on the Company—B. Business Overview."

#### *Other U.S. Environmental Initiatives*

The U.S. Clean Air Act of 1970 (including its amendments of 1977 and 1990) ("CAA") requires the EPA to promulgate standards applicable to emissions of volatile organic compounds and other air contaminants. The CAA requires states to adopt State Implementation Plans, or SIPs, some of which regulate emissions resulting from vessel loading and unloading operations which may affect our vessels.

The U.S. Clean Water Act (“CWA”) prohibits the discharge of oil, hazardous substances and ballast water in U.S. navigable waters unless authorized by a duly issued permit or exemption, and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA and CERCLA. In 2015, the EPA expanded the definition of “waters of the United States” (“WOTUS”), thereby expanding federal authority under the CWA. Following litigation on the revised WOTUS rule, in December 2018, the EPA and Department of the Army proposed a revised, limited definition of WOTUS. In 2019 and 2020, the agencies repealed the prior WOTUS Rule and promulgated the Navigable Waters Protection Rule (“NWPR”) which significantly reduced the scope and oversight of EPA and the Department of the Army in traditionally non-navigable waterways. On August 30, 2021, a federal district court in Arizona vacated the NWPR and directed the agencies to replace the rule. On December 7, 2021, the EPA and the Department of the Army proposed a rule that would reinstate the pre-2015 WOTUS definition, and on January 18, 2023, the EPA issued a revised final rule that used the pre-2015 definition as its foundation. Pursuant to a 2023 decision of the U.S. Supreme Court in *Sackett v. Environmental Protection Agency* affecting the permissible scope of the WOTUS definition, in August 2023 the EPA issued a final rule further amending and narrowing the definition of WOTUS.

The EPA and the USCG have also enacted rules relating to ballast water discharge, compliance with which requires the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial costs, and/or otherwise restrict our vessels from entering U.S. Waters. The EPA will regulate these ballast water discharges and other discharges incidental to the normal operation of certain vessels within United States waters pursuant to the Vessel Incidental Discharge Act (“VIDA”), which was signed into law on December 4, 2018 and replaced the 2013 Vessel General Permit (“VGP”) program (which authorizes discharges incidental to operations of commercial vessels and contains numeric ballast water discharge limits for most vessels to reduce the risk of invasive species in U.S. waters, stringent requirements for exhaust gas scrubbers, and requirements for the use of environmentally acceptable lubricants) and current Coast Guard ballast water management regulations adopted under the U.S. National Invasive Species Act (“NISA”), such as mid-ocean ballast exchange programs and installation of approved USCG technology for all vessels equipped with ballast water tanks bound for U.S. ports or entering U.S. waters. VIDA establishes a new framework for the regulation of vessel incidental discharges under the CWA, requires the EPA to develop performance standards for those discharges within two years of enactment, and requires the U.S. Coast Guard to develop implementation, compliance, and enforcement regulations within two years of EPA’s promulgation of standards. Under VIDA, all provisions of the 2013 VGP and USCG regulations regarding ballast water treatment remain in force and effect until the EPA and U.S. Coast Guard regulations are finalized. Non-military, non-recreational vessels greater than 79 feet in length must continue to comply with the requirements of the VGP, including submission of a Notice of Intent (“NOI”) or retention of a PARI form and submission of annual reports. We have submitted NOIs where required. We have U.S. Coast Guard approved ballast water treatment installed on all our vessels.

### ***European Union Regulations***

In October 2009, the European Union amended a directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. Aiding and abetting the discharge of a polluting substance may also lead to criminal penalties. The directive applies to all types of vessels, irrespective of their flag, but certain exceptions apply to warships or where human safety or that of the ship is in danger. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims. Regulation (EU) 2015/757 of the European Parliament and of the Council of 29 April 2015 (amending EU Directive 2009/16/EC) governs the monitoring, reporting and verification of carbon dioxide emissions from maritime transport, and, subject to some exclusions, requires companies with ships over 5,000 gross tonnage to monitor and report carbon dioxide emissions annually, which may cause us to incur additional expenses.

The European Union has adopted several regulations and directives requiring, among other things, more frequent inspections of high-risk ships, as determined by type, age, and flag as well as the number of times the ship has been detained. The European Union also adopted and extended a ban on substandard ships and enacted a minimum ban period and a definitive ban for repeated offenses. The regulation also provided the European Union with greater authority and control over classification societies, by imposing more requirements on classification societies and providing for fines or penalty payments for organizations that failed to comply. Furthermore, the EU has implemented regulations requiring vessels to use reduced sulfur content fuel for their main and auxiliary engines. The EU Directive 2005/33/EC (amending Directive 1999/32/EC) introduced requirements parallel to those in Annex VI relating to the sulfur content of marine fuels. In addition, the EU imposed a 0.1% maximum sulfur requirement for fuel used by ships at berth in the Baltic, the North Sea and the English Channel (the so called “SOx-Emission Control Area”), and, beginning May 1, 2025, in the Mediterranean Sea. As of January 2020, EU member states must also ensure that ships in all EU waters, except the SOx-Emission Control Area, use fuels with a 0.5% maximum sulfur content.

On September 15, 2020, the European Parliament voted to include greenhouse gas emissions from the maritime sector in the European Union’s carbon market. On December 18, 2022, the European Parliament formally agreed to include the maritime sector beginning in 2024. Effective January 2024, the EU ETS was extended to cover CO2 emissions from all ships of 5,000 gross tonnage and above entering EU ports, regardless of the flag they fly. The system covers: a) 50% of emissions from voyages starting or ending outside of the EU (allowing the third country to decide on appropriate action for the remaining share of emissions) and b) 100% of emissions that occur between two EU ports and when ships are within EU ports. The EU ETS covers CO2 (carbon dioxide), CH4 (methane) and N2O (nitrous oxide) emissions, but the two latter only as from 2026. Shipping companies will need to surrender to the relevant EU authorities the allowances that correspond to the emissions covered by the system. These allowances are normally purchased by the entity responsible for the purchase of bunkers, i.e., the charterers in the case of time charter agreements. In the case of voyage charter agreements, the cost of the allowances is normally included in the charter rate. Our actions in connection with the EU ETS regulation target CO2 emissions reductions by implementing and continuing to adopt measures to decarbonize our fleet and improve the Carbon Intensity Indicator (“CII”) and the minimization of financial impact by the inclusion of a clause in our charter party agreements which imposes an obligation on the charterer to cover the cost associated with the CO2 emissions generated during voyages to and from and within the EU.

The EU aims to substantially increase the use of renewable and low-carbon fuels to reduce the carbon footprint of the maritime sector. On March 23, 2023, the European Parliament and the Council agreed on FuelEU Maritime, a new EU regulation that includes a provision, among others, to gradually decrease over time the greenhouse gas intensity of fuels used by the shipping sector, by 2% in 2025 to as much as 80% by 2050. Further, as of January 1, 2025, the EU MRV Regulation 2015/757 was extended to cover offshore vessels and general cargo ships of over 400 gross tonnage. Shipping companies will need to buy allowances that correspond to the emissions covered by the system. Additional jurisdictions may adopt similar greenhouse gas emissions monitoring and reduction schemes in the future.

### ***International Labor Organization***

The International Labor Organization (the “ILO”) is a specialized agency of the UN that has adopted the Maritime Labor Convention 2006 (“MLC 2006”). A Maritime Labor Certificate and a Declaration of Maritime Labor Compliance is required to ensure compliance with the MLC 2006 for all ships that are 500 gross tonnage or over and are either engaged in international voyages or flying the flag of a Member and operating from a port, or between ports, in another country. All our vessels in operation have been certified to meet MLC 2006.

### ***Greenhouse Gas Regulation***

Currently, the emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change, which entered into force in 2005 and pursuant to which adopting countries have been required to implement national programs to reduce greenhouse gas emissions with targets extended through 2020. International negotiations are continuing with respect to a successor to the Kyoto Protocol, and restrictions on shipping emissions may be included in any new treaty. In December 2009, more than 27 nations, including the U.S. and China, signed the Copenhagen Accord, which includes a non-binding commitment to reduce greenhouse gas emissions. The 2015 United Nations Climate Change Conference in Paris resulted in the Paris Agreement, which entered into force on November 4, 2016 and does not directly limit greenhouse gas emissions from ships.

At MEPC 70 and MEPC 71, a draft outline of the structure of the initial strategy for developing a comprehensive IMO strategy on reduction of greenhouse gas emissions from ships was approved. In accordance with this roadmap, in April 2018, nations at the MEPC 72 adopted an initial strategy to reduce greenhouse gas emissions from ships. The initial strategy identifies “levels of ambition” to reducing greenhouse gas emissions, including (1) decreasing the carbon intensity from ships through implementation of further phases of the EEDI for new ships; (2) reducing carbon dioxide emissions per transport work, as an average across international shipping, by at least 40% by 2030, pursuing efforts towards 70% by 2050, compared to 2008 emission levels; and (3) reducing the total annual greenhouse emissions by at least 50% by 2050 compared to 2008 while pursuing efforts towards phasing them out entirely. The initial strategy notes that technological innovation, alternative fuels and/or energy sources for international shipping will be integral to achieve the overall ambition. These regulations could cause us to incur additional substantial expenses.

Starting in January 2018, large ships over 5,000 gross tonnage calling at EU ports are required to collect and publish data on carbon dioxide emissions and other information. As previously discussed, regulations relating to the inclusion of greenhouse gas emissions from the maritime sector in the European Union’s carbon market are also forthcoming.

In the United States, the EPA issued a finding that greenhouse gases endanger the public health and safety, adopted regulations to limit greenhouse gas emissions from certain mobile sources, and proposed regulations to limit greenhouse gas emissions from large stationary sources. The EPA or individual U.S. states could enact environmental regulations that would affect our operations.

Any passage of climate control legislation or other regulatory initiatives by the IMO, the EU, the U.S. or other countries where we operate, or any treaty adopted at the international level to succeed the Kyoto Protocol or Paris Agreement, that restricts emissions of greenhouse gases could require us to make significant financial expenditures which we cannot predict with certainty at this time. Even in the absence of climate control legislation, our business may be indirectly affected to the extent that climate change may result in sea level changes or certain weather events.

### ***Vessel Security Regulations***

Since the terrorist attacks of September 11, 2001 in the United States, there have been a variety of initiatives intended to enhance vessel security such as the U.S. Maritime Transportation Security Act of 2002 (“MTSA”). To implement certain portions of the MTSA, the USCG issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States and at certain ports and facilities, some of which are regulated by the EPA.

Similarly, Chapter XI-2 of the SOLAS Convention imposes detailed security obligations on vessels and port authorities and mandates compliance with the International Ship and Port Facility Security Code (“the ISPS Code”). The ISPS Code is designed to enhance the security of ports and ships against terrorism. To trade internationally, a vessel must obtain an International Ship Security Certificate (“ISSC”) from a recognized security organization approved by the vessel’s flag state. Ships operating without a valid certificate may be detained, expelled from, or refused entry at port until they obtain an ISSC. The various requirements, some of which are found in the SOLAS Convention, include, for example, on-board installation of automatic identification systems to provide a means for the automatic transmission of safety-related information from among similarly equipped ships and shore stations, including (i) information on a ship’s identity, position, course, speed and navigational status; (ii) on-board installation of ship security alert systems, which do not sound on the vessel but only alert the authorities on shore; (iii) the development of vessel security plans; (iv) ship identification number to be permanently marked on a vessel’s hull; (v) a continuous synopsis record kept on-board showing a vessel’s history including the name of the ship, the state whose flag the ship is entitled to fly, the date on which the ship was registered with that state, the ship’s identification number, the port at which the ship is registered and the name of the registered owner(s) and their registered address; and (vi) compliance with flag state security certification requirements.

The USCG regulations, intended to align with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures, provided such vessels have on board a valid ISSC that attests to the vessel's compliance with the SOLAS Convention security requirements and the ISPS Code. Future security measures could have a significant financial impact on us. Upon delivery of our vessels, we intend to comply with the various security measures addressed by MTSA, the SOLAS Convention and the ISPS Code. The cost of vessel security measures has also been affected in the industry by the escalation in the frequency of acts of piracy against ships, notably off the coast of Somalia, including the Gulf of Aden and Arabian Sea area. Substantial loss of revenue and other costs may be incurred as a result of detention of a vessel or additional security measures, and the risk of uninsured losses could significantly affect our business. Costs may be incurred in taking additional security measures in accordance with Best Management Practices to Deter Piracy, notably those contained in the BMP5 industry standard.

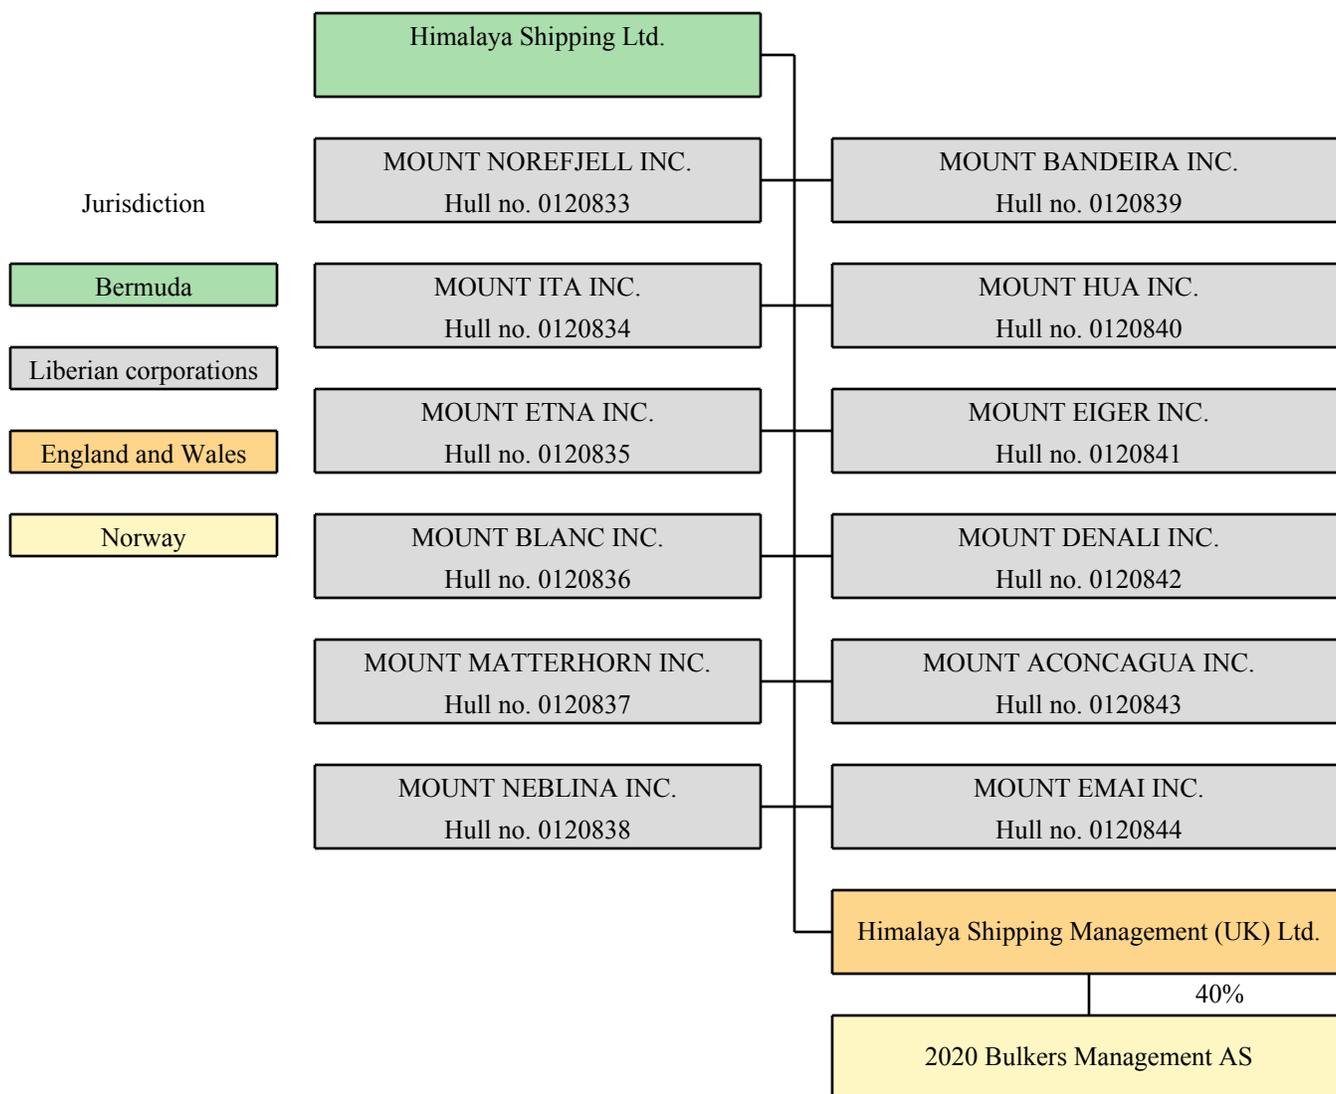

### ***Inspection by Flag Administration and Classification Societies***

Every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the SOLAS Convention. Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified "in class" by a classification society which is a member of the International Association of Classification Societies, the IACS. The IACS has adopted harmonized Common Structural Rules, or "the Rules," which apply to oil tankers and bulk carriers contracted for construction on or after July 1, 2015. The Rules attempt to create a level of consistency between IACS Societies. All of our vessels are certified as being "in class" by the American Bureau of Shipping.

A vessel must undergo annual surveys, intermediate surveys, dry dockings and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Every vessel is also required to be dry docked every 30 to 36 months for inspection of the underwater parts of the vessel. In all cases, the interval between any two such examinations is not to exceed 36 months. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry docking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable and could prevent us from obtaining secured financing on that vessel. Any such inability to carry cargo or be employed, or any such violation of covenants, could have a material adverse impact on our business, financial condition and results of operations.

### **C. Organizational Structure**

Himalaya Shipping Ltd. is incorporated under the laws of Bermuda. We operate our vessels through separate wholly owned subsidiaries incorporated in Liberia. A list of our significant subsidiaries is shown in Exhibit 8.1 of this annual report and in the following diagram. All of our subsidiaries are, directly or indirectly, wholly-owned by us.

All holdings are 100% unless otherwise indicated.

#### D. Property, plant and equipment

Other than our vessels, we do not own or lease any material property.

We operate a fleet of twelve newbuilding dual fueled Newcastlemax dry bulk vessels. See “Item 4.B. Business Overview” for a summary of our fleet and charter agreements.

Our vessels are pledged to secure loan facilities. See “Item 5.B. Liquidity and Capital Resources — Financing Arrangements” for more information.

#### ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

## **ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**

The following discussion of our financial condition and results of operations should be read in conjunction with the sections of this Annual Report entitled “Item 4. Information on the Company” and our consolidated financial statements and notes thereto, included herein. Our financial statements have been prepared in accordance with U.S. GAAP. This discussion includes forward-looking statements based on assumptions about our future business. You should also review the section of this Annual Report entitled “Cautionary Statement Regarding Forward-Looking Statements” and “Item 3. Key Information—D. Risk Factors” for a discussion of important factors that could cause our actual results to differ materially from the results described in or implied by certain forward-looking statements.

### **Significant Developments during 2025**

#### ***Financing***

In 2025, we drew down \$6.0 million under our Drew Holdings RCF which was fully repaid in March 2025. As of March 5, 2026, we have \$10.0 million available to draw down from this facility.

In December 2025, the Company entered into an addendum in relation to the Drew Holdings RCF, to extend the timeframe to drawdown from the facility to December 31, 2026 and the latest repayment date to December 31, 2027.

#### ***Equity transactions***

In March 2025, the Company issued 2,650,000 common shares of par value \$1.00 each in a private placement at a price of \$5.73 per share, raising net proceeds of \$14.8 million to be used for general corporate purposes.

In April 2025, the Board approved a grant of 200,000 share options to key employees, including contracted management.

We declared cash distributions totaling \$0.57 per common share in 2025. The cash distributions were made from the Company's Contributed Surplus account.

In December 2025, in connection with the exercise of share options under the long-term incentive plan, the Company issued 100,000 common shares of par value \$1.00 each at the exercise price of \$7.05 per share.

See Note 19 - “Shareholders’ Equity,” and Note 20 - “Subsequent events” of our audited Consolidated Financial Statements included herein, for further information.

#### ***Corporate matters***

On April 1, 2025, Lars-Christian Svensen commenced his role as contracted Chief Executive Officer and Vidar Hasund was appointed contracted Chief Financial Officer.

Our shares started trading on Euronext Oslo Bors on June 3, 2025 following the transfer of our listing from Euronext Expand. Our shares are also listed on the NYSE.

### **Significant Developments since January 1, 2026**

#### ***Dividends and equity issuances***

We declared cash distributions totaling \$0.25 per common share in January, February and March 2026.

In February 2026, in connection with the exercise of share options under the long-term incentive plan, the Company issued 100,000 common shares of par value \$1.00 each at the exercise price of \$6.76 per share.

#### ***Investment in 2020 Bulkers Management***

On February 9, 2026, the Company entered into a contract with 2020 Bulkera Ltd. to purchase an additional 4,200 shares in 2020 Bulkera Management for NOK1.1 million, which will be effective on April 1, 2026. This will increase our ownership in 2020 Bulkera Management from 40% to 54%.

### **Factors Affecting Our Results of Operations**

Our results of operations are affected by a range of factors many of which are beyond the Company's control. Our future results may not be comparable to our historical results of operations for the periods presented. In addition, when evaluating our historical results of operations and assessing our prospects in the periods under review, you should consider the factors discussed below.

The principal factors which affect our results of operations include:

- the earnings from our vessels;
- vessel operating expenses;
- voyage commissions;
- administrative expenses;
- depreciation; and
- interest expense under our Sale and Leaseback Agreements.

### ***Factors affecting our revenues***

Factors affecting our revenues include the number of vessels in operation, operating days and Baltic Capesize rates.

We derive our earnings from time charters and voyage charters of our vessels. The dry bulk industry has historically been highly cyclical, experiencing volatility in profitability, vessel values and freight rates.

Revenues are driven primarily by the amount of daily charter hire that vessels earn under time charters and by the number of operating days during which they generate revenues.

Most of the vessels in our fleet are currently employed on index-linked rate time charter contracts, and future rates on the Capesize Index published by the Baltic Exchange will significantly impact the level of our revenues in the future.

### ***Factors affecting our costs***

#### *Operating and general and administrative expenses*

We incur operating costs as follows:

- vessel operating expenses such as crewing, spares, repairs and maintenance, insurance, stores, lube oils, among others;
- vessel management fees;
- voyage expenses and commissions; and
- depreciation.

Vessel operating costs are the direct costs associated with running a vessel and include crew costs, vessel supplies, repairs and maintenance, dry dockings, lubricating oils, insurance and management fees.

The majority of our general and administrative costs related to legal and advisory fees, management fees, expenses relating to our listing on NYSE and Euronext Oslo Bors.

Administrative expenses are comprised of general corporate overhead expenses, including personnel costs, audit fees, legal and professional fees, stock compensation costs and other general administrative expenses. Personnel costs may include, among other things, salaries, pension costs, fringe benefits, travel costs and health insurance. In addition, upon completion of our U.S. IPO in 2023, we incur incremental general and administrative expenses as a result of our being a publicly traded company in the United States.

We may incur impairment losses in the future. An impairment loss on a vessel that has been delivered is recognized when the vessel's carrying value exceeds the estimated future net undiscounted cash flows expected to be earned over the remaining estimated useful life of the vessel. During the year ended December 31, 2025, we considered whether indicators of impairment existed that could indicate that the carrying amounts of our vessels may not be recoverable as of December 31, 2025 and concluded that no such indicators existed.

We may also incur losses from uncollectible receivables. Such losses are accrued when information is available before the financial statements are issued that indicates that it is probable that a receivable will not be collected.

Depreciation, or the periodic costs charged to our income for the reduction in usefulness and long-term value of our vessels, is also related to the number of vessels we own or lease. We depreciate the cost of vessels we have recorded on the balance sheet in failed sale leaseback transactions, less their estimated residual value, over their estimated useful life on a straight-line basis. No charge is made for depreciation of vessels under construction until they are delivered.

### *Financing Arrangements*

We entered into Sale and Leaseback Agreements with our Leasing Providers that financed a significant part of the purchase price of our 12 vessels. Upon delivery, each vessel was sold to an SPV owned by the Leasing Providers, and each SPV has agreed to charter back the vessels back, under bareboat charters, which we have the absolute obligation to pay the hire rates irrespective of any contingency ("Hell or High Water Terms"). For more details of our Financing Arrangements and the terms and conditions thereunder, see "Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements—Sale and Leaseback Agreements."

Under the Sale and Leaseback Agreements, the average bareboat rate per day is currently \$16,567 per vessel.

When a sale and leaseback transaction does not qualify for sale accounting, the transaction is accounted for as a financing transaction by the seller-lessee. To account for a failed sale and leaseback transaction as a financing arrangement, the seller-lessee does not derecognize the underlying asset; the seller-lessee continues depreciating the asset as if it was the legal owner. The sales proceeds received from the buyer-lessor are recognized as a financial liability. A seller-lessee will make rental payments under the leaseback. These payments are allocated between interest expense and principal repayment of the financial liability. The amount allocated to interest expense is determined by the incremental borrowing rate or imputed interest rate.

The Sale and Leaseback Agreements are accounted for as financing arrangements.

The interest expenses we incur on the outstanding indebtedness under our existing Sale and Leaseback Agreements are included in our financial costs. Financial costs also include amortization of other loan issuance costs incurred in connection with establishing such facilities.

For additional details of our Financing Arrangements, see "Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements."

## **A. Operating Results**

### **Results of Operations for the Years Ended December 31, 2025 and December 31, 2024**

The following table summarizes our results of operations for the years ended December 31, 2025 and 2024.

<i>(in millions of \$)</i>	Year ended December 31, 2025	Year ended December 31, 2024	Change	% Change
<b>Total operating revenues</b>	<b>131.9</b>	<b>123.6</b>	<b>8.3</b>	<b>7 %</b>
Vessel operating expenses	(28.0)	(23.8)	(4.2)	18 %
Voyage expenses and commissions	(1.6)	(1.6)	—	— %
General and administrative expenses	(4.9)	(5.0)	0.1	(2) %
Depreciation	(29.2)	(26.5)	(2.7)	10 %
<b>Total operating expenses</b>	<b>(63.7)</b>	<b>(56.9)</b>	<b>(6.8)</b>	<b>12 %</b>
<b>Operating profit</b>	<b>68.2</b>	<b>66.7</b>	<b>1.5</b>	<b>2 %</b>
<b>Total financial expenses, net</b>	<b>(50.5)</b>	<b>(45.6)</b>	<b>(4.9)</b>	<b>11 %</b>
<b>Income tax (expense)/benefit</b>	<b>—</b>	<b>—</b>	<b>—</b>	
<b>Net income attributable to shareholders of Himalaya Shipping Ltd</b>	<b>17.7</b>	<b>21.1</b>	<b>(3.4)</b>	<b>(16)%</b>

### *Total operating revenues*

Time charter revenues increased by \$8.3 million in the year ended December 31, 2025. This increase was primarily due to a higher number of operating days, which rose to 4,380 days in the year ended December 31, 2025 from 3,941 days in the year ended December 31, 2024, following the delivery of six vessels in the first half of 2024. This resulted in a \$13.8 million increase in total operating revenues. The increase in the number of operating days is partially offset by a decrease in average daily time charter equivalent (“TCE”) earnings, gross, to \$31,200 per day in the year ended December 31, 2025 from \$32,500 per day in the year ended December 31, 2024, resulting in a \$5.5 million reduction in total operating revenues. The decrease in TCE earnings was mainly attributable to lower average Baltic 5TC Capesize Index rates, which decreased from \$22,593 per day in the year ended December 31, 2024 to \$21,297 per day in the year ended December 31, 2025. See "Non-U.S. GAAP Financial Information."

Set forth below is a reconciliation of average TCE earnings, gross to total operating revenues for the years presented.

<i>(in millions of \$ except TCE earnings and number of days)</i>	Year ended December 31, 2025	Year ended December 31, 2024	Change
Total operating revenues	131.9	123.6	8.3
Add: Address commissions	4.9	4.5	0.4
Total operating revenues, gross	136.8	128.1	8.7
Fleet operational days	4,380	3,941	439
Average daily TCE earnings, gross	<u>31,233</u>	<u>32,504</u>	(1,271)

### *Vessel operating expenses*

Vessel operating expenses increased by \$4.2 million in the year ended December 31, 2025. The increase was primarily a result of the entire fleet being fully operational for the entire year in the year ended December 31, 2025, with six vessels having been delivered and commenced operations during the first half of 2024. In addition, for vessels delivered in 2023, certain expenses such as spares and service fees increased by \$0.4 million and \$0.3 million, respectively, in the year ended December 31, 2025 compared to the prior year. The Company achieved average vessel operating cost per day of \$6,400 for the year ended December 31, 2025 compared to \$6,100 in the year ended December 31, 2024.

Average vessel operating cost per day is calculated by dividing vessel operating expenses by the number of calendar days the fleet operated in the year.

### **General and administrative expenses**

General and administrative expenses decreased by \$0.1 million in the year ended December 31, 2025. This decrease was mainly due to a \$0.3 million decrease in Directors and Officers Liability insurance, partially offset by a \$0.2 million initial admission fee charged by Oslo Bors ASA in connection with the transfer of our listing from Euronext Expand to Euronext Oslo Bors during 2025.

### **Depreciation**

Depreciation increased by \$2.7 million in the year ended December 31, 2025. The increase is primarily a result of the delivery and commencement of operations of the remaining six vessels during the first half of 2024.

### **Total financial expenses, net**

Set forth below is a breakdown of our total financial expenses, net for the years presented.

<i>(in millions of \$)</i>	<b>Year ended December 31, 2025</b>	<b>Year ended December 31, 2024</b>	<b>Change</b>	<b>% Change</b>
Interest income	1.0	1.0	—	— %
Interest expense, net of amounts capitalized	(51.4)	(46.6)	(4.8)	10 %
Other financial (expenses) income, net	(0.1)	—	(0.1)	100 %
<b>Total financial expenses, net</b>	<b>(50.5)</b>	<b>(45.6)</b>	<b>(4.9)</b>	<b>11 %</b>

**Interest expense, net of amounts capitalized**, increased by \$4.8 million in the year ended December 31, 2025. The increase is mainly due to a higher average balance of outstanding debt following the delivery of the six remaining vessels during the first half of 2024. In addition, interest capitalization ceased in June 2024, following the delivery of the last vessel of our fleet.

**Other financial expenses, net** of \$0.1 million in the year ended December 31, 2025 primarily related to the commitment fee on the revolving credit facility with Drew.

### **Net income for the year**

Net income decreased by \$3.4 million in the year ended December 31, 2025. The decrease is mainly due to the increase in interest expense, partially offset by an increase in operating income resulting from the delivery of the remaining six vessels in the first half of 2024.

### **EBITDA**

EBITDA increased by \$4.2 million to \$97.4 million for the year ended December 31, 2025 compared to \$93.2 million for the year ended December 31, 2024. EBITDA is a non-GAAP measure. We present EBITDA because we believe this measure increases comparability of total business performance from period to period and against the performance of other companies. See "Non-U.S. GAAP Financial Information." Set forth below is a reconciliation of EBITDA to net income for the years presented.

<i>(in millions of \$)</i>	Year ended December 31, 2025	Year ended December 31, 2024	Change
Net income	17.7	21.1	(3.4)
Depreciation	29.2	26.5	2.7
Total financial expenses, net	50.5	45.6	4.9
Income tax	—	—	—
<b>EBITDA</b>	<b>97.4</b>	<b>93.2</b>	<b>4.2</b>

## Results of Operations for the Year Ended December 31, 2024 and the Year Ended December 31, 2023

For a discussion of our results for the year ended December 31, 2024 compared to the year ended December 31, 2023, please see “Item 5. Operating and Financial Review and Prospects A. Operating Results — Results of Operations for the Years Ended December 31, 2024 and December 31, 2023” contained in our annual report on Form 20-F for the year ended December 31, 2024 filed with the SEC on March 26, 2025.

### B. Liquidity and Capital Resources

We operate in a capital-intensive industry and have primarily financed our newbuildings through a combination of equity capital and sale and leaseback financing. Since the delivery of our vessels, we have funded our working capital requirements from cash generated by operations, equity raises and our Drew Holdings RCF.

Our ability to generate adequate cash flows in the short and medium term depends substantially on the trading performance of our vessels, which is subject to the cyclical nature of the dry bulk market.

We expect continued volatility in dry bulk market rates for our vessels in the foreseeable future with a consequent effect on our short and medium-term liquidity.

Our cash and cash equivalents are held in U.S. dollars, Norwegian Kroner and British Pounds.

Our short, medium and long-term liquidity requirements relate to funding working capital requirements and lease payments under our Sale and Leaseback Agreements. Sources of short-term liquidity include cash, payments from customers under charters, and amounts available under our \$10 million Drew Holdings RCF, under which drawings are only allowed until December 31, 2026, and amounts drawn must be repaid by December 31, 2027. In addition, our Sale and Leaseback Agreements contain debt incurrence covenants which could limit our ability to raise debt financing to meet liquidity or other capital requirements.

As of December 31, 2025, we were in compliance with all of our covenants in each of our Financing Arrangements.

As of December 31, 2025, we had cash and cash equivalents of \$32.4 million.

### Cash Flows

The following table summarizes our cash flows from operating, investing and financing activities for the years indicated:

<b>(in millions of U.S. dollars)</b>	<b>Year ended December 31, 2025</b>	<b>Year ended December 31, 2024</b>
Net cash provided by operating activities	51.7	55.9
Net cash used in investing activities	—	(313.4)
Net cash provided by (used in) financing activities	(38.7)	251.4
<b>Net increase/(decrease) in cash, cash equivalents and restricted cash</b>	<b>13.0</b>	<b>(6.1)</b>
<b>Cash and cash equivalents at the beginning of the year</b>	<b>19.4</b>	<b>25.5</b>
<b>Cash and cash equivalents at the end of the year</b>	<b>32.4</b>	<b>19.4</b>
<b>Supplementary disclosure of cash flow information</b>		
Interest paid, net of capitalized interest	(49.5)	(40.3)

### ***Net cash provided by operating activities***

Net cash provided by operating activities was \$51.7 million for the year ended December 31, 2025 compared to \$55.9 million in 2024. The decrease of \$4.2 million was primarily attributable to higher vessel operating expenses, which increased by \$4.2 million year-over-year. Interest payments included within net cash provided by operating activities totaled \$49.5 million in the year ended December 31, 2025, compared to \$40.3 million (net of capitalized interest) in the year ended December 31, 2024. The impact of these increases was partially offset by higher total operating revenues and related cash receipts during 2025.

### ***Net cash used in investing activities***

Net cash used in investing activities was nil for the year ended December 31, 2025, as there were no capital expenditures or investments during the year.

Net cash used in investing activities totaled \$313.4 million for the year ended December 31, 2024, primarily reflecting the following:

- \$305.6 million for the fifth and sixth installment payments for “Mount Bandeira,” “Mount Hua,” “Mount Elbrus,” “Mount Denali,” “Mount Aconcagua” and “Mount Emai” of which \$98.6 million and \$196.9 million were financed by the sale and leaseback arrangements with Jiangsu and CCBFL, respectively;
- \$7.4 million in newbuilding supervision fees and capitalized interest; and
- \$0.3 million for the acquisition of 40% of the outstanding shares of 2020 Bulkers Management AS.

### ***Net cash provided by (used in) financing activities***

Net cash used in financing activities was \$38.7 million for the year ended December 31, 2025. The principal components were:

- repayments on the sale and leaseback financings of \$27.3 million, comprising of (i) payments of installments on the sale leaseback financing with AVIC of \$10.4 million, (ii) payments of installments on the sale leaseback financing with CCBFL of \$12.8 million, and (iii) payments of installments on the sale leaseback financing with Jiangsu of \$4.1 million;
- draw downs under the revolving credit facility with Drew of \$6.0 million and the subsequent repayment of \$6.0 million; and
- payment of cash distributions of \$26.9 million.

These outflows were partially offset by:

- net proceeds of \$14.8 million from the private placement in March 2025; and
- proceeds from share issuance in connection with the exercise of share options of \$0.7 million.

Net cash provided by financing activities of \$251.4 million for the year ended December 31, 2024 is a result of cash generated from:

- proceeds from the issuance of long-term debt (net of deferred finance charges paid to lender) of \$295.5 million, comprised of \$196.9 million and \$98.6 million drawn down under the sale leaseback financing with CCBFL and Jiangsu, respectively.

These inflows were partially offset by:

- payment of deferred fees to other third parties such as lawyers and brokers of \$2.3 million;
- repayments of long-term debt of \$21.2 million, comprising of (i) payments of installments on the sale leaseback financing with AVIC of \$9.9 million, (ii) payments of installments on the sale leaseback financing with CCBFL of \$8.4 million, and (iii) payments of installments on the sale leaseback financing with Jiangsu of \$2.9 million; and
- payment of cash distributions of \$20.6 million.

### ***Equity Issuances***

In the second quarter of 2023, the Company completed its IPO in the U.S, whereby the Company issued 8,630,000 common shares, raising gross proceeds of \$50 million, a significant majority of which was used for general corporate purposes, which included funding acquisitions of vessels on order, repayment of indebtedness and funding our working capital needs.

In December 2023, the Company issued 3,117,143 common shares in a private placement, raising gross proceeds of \$17.6 million which were used for general corporate purposes.

In March 2025, the Company issued 2,650,000 common shares in a private placement, raising gross proceeds of approximately \$15.0 million which were used for general corporate purposes.

Additionally, in December 2025, the Company issued 100,000 common shares, par value \$1.00 each per share, in connection with the exercise of share options under its long-term incentive plan. The shares were issued at an exercise price of \$7.05 per share.

### ***Financing Arrangements***

#### ***Sale and Leaseback Agreements***

Pursuant to the Shipbuilding Contracts, we acquired 12 vessels for an average purchase price of \$69.3 million per vessel. The total average purchase price, including estimated variation orders, Address Commissions and the cost of scrubbers we installed on each of our vessels was \$71.6 million.

Set forth below is an overview of our Sale and Leaseback Agreements. The aggregate amount of lease payments under the lease agreements for all our vessels is approximately \$72.6 million per year.

#### ***Avic Leasing Arrangements***

For the four vessels under the 1-4 Shipbuilding Contracts, we entered into agreements with Avic International Leasing Co. Ltd., which covers a substantial part of the remaining payment obligations. Pursuant to the Avic Leasing, we received financing for some of the delivery installments under the 1-4 Shipbuilding Contracts, including the financing of 90% of the scrubber costs related to the four vessels under such contracts. The sale and leaseback arrangement is accounted for as a financing transaction.

In addition, upon delivery of the relevant vessels from New Times, each buyer (a subsidiary of Himalaya Shipping) sold its vessel to a special purpose vehicle (SPV) owned by Avic, and chartered the vessel back to our subsidiaries, on bareboat charters, on Hell and High Water Terms.

Pursuant to the terms of each bareboat charter, we pay in advance a fixed bareboat daily charter hire rate plus amortization and interest on the scrubber financing, payable every consecutive three months and we have options to purchase each vessel starting on the third anniversary of such vessel's delivery to us at a pre-determined, amortizing purchase price (see "Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements—Sale and Leaseback Agreements—Purchase Options").

We have provided security and guarantees for the financing from the Avic Leasing, including a parent company guarantee from Himalaya Shipping, account pledges over the related subsidiaries' bank accounts and a share pledge over the shares in each related subsidiary. In addition, we have entered into an assignment of all rights, title and interest in and to the insurances, requisition compensation and charter earnings, in existence and have unconditionally agreed to assign all such rights to the same property to come into existence in the future. In addition, the subsidiaries have arranged for a manager's undertaking from each of the managers of the respective vessels.

The Avic Leasing Arrangement contains customary covenants for this type of arrangements, including (i) covenants relating to the vessels, class, flag, compliance with the ISM Code and ISPS Code, including restrictions on sales of the vessels, (ii) general compliance requirements relating to laws and regulations, and environmental protection, (iii) customary information covenants and financial reporting covenants, including requirements to provide our financial statements for each financial year and half year to Avic and to provide a valuation report of each of the vessels at Avic's request, (iv) restrictions on change of control of subsidiaries, (v) restrictions on entering into any corporate restructuring, without the prior written consent of Avic, and (vi) certain financial covenants, as well as limitations to incur any financial indebtedness or grant any loan without the prior written consent of Avic. In addition, a dividend or other distribution to us from the subsidiary is only allowed if immediately following such payment or distribution there will be maintained in the relevant subsidiary's account a total amount no less than the higher of (a) \$3.6 million, and (b) the aggregate of the bareboat rate under the facility and the operating expenses for the relevant vessel that are payable within the next six months on a pro forma basis after such distribution.

The Avic Leasing Arrangement has a charter period of 84 consecutive months and contains customary events of termination, which include non-payment, non-compliance with insurance requirement, any misrepresentation, cross default, insolvency and changes that have or are likely to have a material adverse change on Himalayas or our relevant subsidiary's business, failure to perform material obligations or undertakings under such arrangement or security documents.

#### *CCBFL Leasing Arrangements*

In addition to the Avic Leasing, we entered into similar sale and leaseback arrangement with CCBFL, which covers a substantial part of some of the payment obligations for the eight vessels under the 5-8 Shipbuilding Contracts and the 9-12 Shipbuilding Contracts. We have provided a similar security and guarantee package for the CCBFL Leasing as under the Avic Leasing Arrangement. The sale and leaseback arrangement is accounted for as a financing transaction.

In addition, upon delivery of the relevant vessels from New Times, each buyer (a vessel-owning subsidiary of Himalaya Shipping) sold its vessel to a special purpose vehicle (SPV) owned by CCBFL, and chartered the vessel back to our subsidiaries, on bareboat charters, on Hell and High Water Terms. Accordingly, all vessels delivered by New Times were sold to an CCBFL SPV and immediately thereafter chartered back to us under bareboat charters.

Pursuant to the terms of each bareboat charter, we pay in arrears a fixed bareboat daily charter hire rate, payable every three months and we have options to purchase each vessel starting on the third anniversary until the seventh anniversary of such vessel’s delivery to us, at a pre-determined, amortizing purchase price (see “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements—Sale and Leaseback Agreements—Purchase Options”). The CCBFL Leasing Arrangement also contains customary covenants for this type of arrangements, including (i) covenants relating to the vessels, class, flag, compliance with the ISM Code and ISPS Code, including restrictions on sales of the vessels, (ii) general compliance requirements relating to laws and regulations, environmental protection, (iii) customary information covenants and financial reporting covenants, (iv) restrictions on change of control of subsidiaries, (v) restrictions on entering into any corporate restructuring, without the prior written consent of CCBFL, and (vi) certain financial covenants, including limitations to incur any financial indebtedness or grant any loan without the prior written consent of CCBFL, and minimum cash requirements. On the latter, each relevant subsidiary is required to maintain a minimum cash balance in its account equivalent to three months’ charter hire under each applicable CCBFL Leasing, which amounts to approximately \$1.5 million. As of March 5, 2026, the Company is required to maintain a total minimum cash balance of \$9.3 million in the subsidiaries that lease “Mount Matterhorn”, “Mount Neblina”, “Mount Elbrus”, “Mount Denali”, “Mount Aconcagua” and “Mount Emai” subject to this financing.

The CCBFL Leasing Arrangement has a charter period of 84 consecutive months and contains customary events of termination, which include non-payment, non-compliance with insurance requirement, any misrepresentation, cross default, insolvency and changes that have or are likely to have a material adverse change on Himalayas or our relevant subsidiary’s business, failure to perform its material obligations or undertakings under such arrangement or security documents.

#### *Jiangsu Financial Leasing Arrangements*

Further, CCBFL, Jiangsu Financial and the Company have entered into novation and assignment agreements, in relation to the “Mount Bandeira” and “Mount Hua” pursuant to which CCBFL transferred and assigned all of its rights and obligations to Jiangsu Financial, on the same terms and conditions as contemplated in the corresponding CCBFL Leasing for such two vessels, which became effective on March 9, 2023. The sale and leaseback arrangement is accounted for as a financing transaction. As of March 5, 2026, the Company is required to maintain a total minimum cash balance of \$3.0 million in the subsidiaries that lease “Mount Bandeira” and “Mount Hua.”

#### *Purchase Options*

Under the Sale and Leaseback Agreements, we have options to purchase each vessel starting on the third anniversary until the seventh anniversary of such vessel’s delivery to us, at the following pre-determined, amortizing purchase prices:

<b>Vessel name</b>	<b>Hull No.</b>	<b>Third Anniversary</b>	<b>Fourth Anniversary</b>	<b>Fifth Anniversary</b>	<b>Sixth Anniversary</b>	<b>Seventh Anniversary</b>
Mount Norefjell	0120833	\$56,934,360	\$54,492,480	\$52,050,600	\$49,608,720	\$47,166,840
Mount Ita	0120834	\$56,934,360	\$54,492,480	\$52,050,600	\$49,608,720	\$47,166,840
Mount Etna	0120835	\$56,934,360	\$54,492,480	\$52,050,600	\$49,608,720	\$47,166,840
Mount Blanc	0120836	\$56,934,360	\$54,492,480	\$52,050,600	\$49,608,720	\$47,166,840
Mount Matterhorn	0120837	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Neblina	0120838	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Bandeira	0120839	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Hua	0120840	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Elbrus	0120841	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Denali	0120842	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Aconcagua	0120843	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000
Mount Emai	0120844	\$56,000,000	\$54,000,000	\$51,000,000	\$48,000,000	\$46,000,000

Pursuant to the Avic Leasing, if we do not exercise our option to purchase our vessels at the latest of the seventh anniversary date of the relevant vessel's delivery to us, we are required to pay to Avic, on such date, \$25 million per vessel for which the option was not exercised on such date. Our CCBFL and Jiangsu Leasing Agreements do not provide for such compensation if we do not exercise any of our options to purchase the vessels.

We have not exercised the purchase options on the third anniversary of the delivery of Mount Noreffjell and Mount Ita, which were on March 2, 2026 and March 9, 2026, respectively.

In addition, the Company was required to pay loan fees to Avic, CCBFL and Compass Advisory Services Pte. Ltd. from the date we entered into the Sale and Leaseback Agreements up to the delivery date of the vessels, of which \$2.3 million were paid for the year ended December 31, 2024.

### ***Drew Holdings Revolving Credit Facility***

In December 2022, Drew Holdings provided us with an unsecured revolving credit facility of \$15.0 million, which was available to the Company in tranches if we have no other liquid funds available to meet our working capital requirements. The Drew Holdings RCF is an unsecured revolving credit facility, bearing an interest rate of LIBOR for the applicable interest period under the facility, plus a margin of 8% p.a. The Company may select an interest period for each tranche of one, three or six months as specified in each relevant drawdown notice.

Effective December 2023, an addendum to the Drew Holdings RCF was executed, decreasing the maximum amount available under the facility from \$15.0 million to \$10.0 million, and extending the maturity of the facility from December 31, 2024 to December 31, 2025. In addition, the addendum extended the drawdown window to December 31, 2024 and aligned the interest rate with the Term Secured Overnight Financing Rate ("SOFR"). The amended facility bears interest for the applicable interest periods under the facility, at a rate of SOFR plus a margin of 8% p.a.

On October 31, 2024, the Company entered into an addendum to the Drew Holdings RCF, to: (i) include a commitment fee of 1% per annum on any undrawn amount from January 1, 2025 to the end of the availability period, (ii) extend the timeframe to drawdown from the facility to December 31, 2025 and the latest repayment date to December 31, 2026, and (iii) change the margin on SOFR to 6.5% per annum.

In December 2025, the Company entered into an addendum with Drew in relation to the Drew Holdings RCF to extend the timeframe to drawdown from the facility to December 31, 2026 and the latest repayment date to December 31, 2027.

In 2025, the Company drew down \$6.0 million under Drew Holdings RCF which was fully repaid in March 2025.

### ***DNB Bridge Facility***

In March 2023, the Company entered into an unsecured Bridge Facility with DNB Markets as arranger and DNB Bank ASA as lender and agent for a maximum amount of \$15.0 million for general corporate purposes with a maturity date of September 1, 2023. Amounts outstanding under the Bridge Facility bore interest at SOFR plus a margin of 6% per annum. The Company drew down \$7.5 million in March 2023 which it fully repaid in April 2023 from the proceeds of the IPO. Subsequently, the Bridge Facility was terminated in April 2023.

As of December 31, 2025, we were in compliance with all of our covenants in each of our Financing Arrangements to the extent applicable.

We believe that we will have sufficient resources to satisfy our obligations in the ordinary course of business for the 12-month period from the date of the most recent financial period end in the Consolidated Financial Statements. We have performed stress testing with respect to our forecasted cash positions under various scenarios, and accordingly, we believe we will meet our obligations as and when they fall due.

### **Contractual Obligations**

The following table sets forth our contractual obligations for the periods indicated as at December 31, 2025:

<i>(in millions of \$)</i>	<b>Total obligation</b>	<b>Due in 2026</b>	<b>Due in 2027 - 2028</b>	<b>Due in 2029 - 2030</b>	<b>Due Thereafter</b>
<b>Financing</b>					
Bareboat charters for vessels (1)	909.1	72.5	145.3	402.4	288.9
Repayment of scrubber financing including interest commitments (2)	0.4	0.4	—	—	—
	909.5	72.9	145.3	402.4	288.9

(1) This includes repayment of loan principal under the sale and leaseback agreements and related interest.

(2) Our interest commitments on our scrubber financing is calculated based on assumed SOFR rate of 3.87% plus the margin rate and credit spread associated with the financing of the scrubbers on the first 4 vessels.

## Capital Commitments

We have no short-term capital commitments as of March 5, 2026.

### C. Research and Development, Patents and Licenses

Not applicable.

### D. Trend Information

The average Baltic Capesize Index (BCI) for 2025 was \$21,297. The average for the fourth quarter of 2025 was \$28,875 per day, while the 12-vessel Himalaya fleet achieved average TCE earnings of around \$39,600 per day, gross, over the same period. This performance reflects the operating capabilities of our vessels, and our strong commercial execution.

The fourth quarter of 2025 saw an increase in ton miles of approximately 9.4% year-on-year for Capesize cargoes. Across the three major commodities, ton miles increased by 12.4% for iron ore and 21.0% for bauxite, partially offset by a 15% decrease in coal. The increase in bauxite ton miles was primarily driven by volumes from West Africa to China.

The trend has continued into the first few months of 2026, with BCI rates averaging \$23,078 year-to-date through March 5, 2026.

The market has been driven by a combination of continued demand from China, increased exports from Brazil and West Africa, coupled with stable tonnage balance in favor of owners.

We maintain a positive long-term outlook for large dry bulk vessels. The current order book for new Capesize vessels represents approximately 11% of the existing fleet. Although we have observed a modest increase in the order book, Capesize vessels have the lowest order book of all major shipping segments, and yard capacity has decreased significantly from its peak. Additionally, by 2028, approximately 14% of the entire fleet will be more than 20 years old, marking the earliest opportunity for significant fleet expansion. Furthermore, approximately 28% of the total Capesize fleet will require drydocking in 2026 due to 5, 10, 15, and 20-year Special Surveys.

The Company's outlook remains positive with respect to expected growth in ton miles, driven by China's continued demand for bauxite, with approximately 77% of the 2025 volumes originating from West Africa and Brazil. The anticipated increase in iron ore production capacity in the Atlantic, specifically from Guinea (approximately 120 million tonnes) and Brazil (approximately 50 million tonnes) between 2025 and 2027, is expected to further increase ton mile demand.

Key downside risks to the Capesize market include a potential slowdown in the Chinese economy and geopolitical tensions, including trade wars and tariffs. Although we have not been directly impacted by the tariffs and tolls announced by the U.S. administration in 2025, we are closely monitoring the Panamax and Supramax segments, as trends in the market for smaller dry bulk vessels have historically influenced the market for Capesize and Newcastlemax vessels. We are monitoring the impact of the current situation in the Middle East. As of March 5, 2026, there has been no direct impact on the BCI rates.

See the sections of this Item 4.B entitled “Business Overview—Dry Bulk Shipping Industry” and “Business Overview—Capesize Fleet Development” and “Factors Affecting Our Future Results of Operations and Financial Condition” for additional information.

#### **E. Critical Accounting Estimates**

Our Operating and Financial Review and Prospects is based on our financial statements, which we have prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported expenses during the reporting periods. Certain accounting policies involve judgments and uncertainties to such an extent that there is a reasonable likelihood that materially different amounts could have been reported under different conditions, or if different assumptions had been used. We evaluate our estimates and assumptions on a regular basis. We base our estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe that the estimates, assumptions and judgments involved in the accounting policies described below have the greatest potential impact on our financial statements. For a discussion of our accounting policies, see Note 2—“Basis of Preparation and Significant Accounting Policies” to our Consolidated Financial Statements.

##### *Impairment of long lived assets*

The carrying values of our vessels may not represent their fair market value at any point in time since the cost of vessels tend to fluctuate with changes in charter rates. Historically, both charter rates and vessel values tend to be cyclical. The carrying amounts of vessels are reviewed for potential impairment whenever events or changes in circumstances indicate that the carrying amount of a particular vessel may not be fully recoverable. Such indicators may include depressed spot rates and depressed second-hand vessel values. We assess recoverability of the carrying value of each asset on an individual basis by estimating the future undiscounted cash flows expected to result from the asset and eventual disposal. If the future net undiscounted cash flows are less than the carrying value of the asset, an impairment loss is recorded equal to the difference between the assets’ carrying value and fair value. Fair value is estimated based on values achieved for the sale/purchase of similar vessels and appraised valuations.

During the years ended December 31, 2025 and 2024, we considered whether indicators of impairment existed that could indicate that the carrying amounts of our vessels may not be recoverable as of December 31, 2025 and 2024, and concluded that no such events have occurred. Accordingly, we have not recorded an impairment charge during the years ended December 31, 2025 and 2024.

We received appraised valuations from third-party ship brokers, which is commonly used and accepted by our counterparties to the Sale and Leaseback Agreements. The determination of the estimated market values may involve considerable judgment. Significant factors that could impact estimated market values include (i) unanticipated changes in demand for transportation of dry bulk cargoes, (ii) greater than anticipated levels of newbuilding orders or lower than anticipated levels of vessel scrappings, and (iii) changes in rules and regulations applicable to the dry bulk industry, including legislation adopted by international organizations such as the IMO and the European Union or by individual countries. Also, estimated market values can be volatile and may not be indicative of future market values of the vessels or selling prices that we could achieve should we decide to sell them.

##### *Use of estimates*

The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Actual results could differ from those estimates.

##### *Recently Issued Accounting Standards*

See Item 18. Financial Statements: Note 3—“Recently Issued Accounting Standards.”

## ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

### A. Directors and Senior Management

The business address of the directors and officers is S. E. Pearman Building, 2nd Floor, 9 Par-la-Ville Road, Hamilton HM11, Bermuda.

#### Directors

The following provides information about each of our directors as of the date of this annual report.

Name	Age	Position
Bjorn Isaksen	42	Chairman of our Board of Directors, Director and Nominating and Corporate Governance Committee Member
Jehan Mawjee	38	Director and Audit Committee Chairperson
Alexandra Kate Blankenship	61	Director and Audit Committee Member
Carl Steen	75	Director, Audit Committee Member, and Nominating and Corporate Governance Committee Chairperson
Mi Hong Yoon	55	Director, Nominating and Corporate Governance Committee Member, and Company Secretary

***Bjorn Isaksen*** has been a member of our Board of Directors since June 2, 2021. Mr. Isaksen was employed by ABG Sundal Collier Ltd. as a partner from 2005 until 2014 and has been employed by Magni Partners Limited, in the UK, as a partner since 2014. Mr. Isaksen is a resident of Monaco.

Magni Partners Limited is a subsidiary of Magni Partners. The founder and sole shareholder of Magni Partners is Mr. Tor Olav Trøim. Drew Holdings Limited, which is wholly owned by Drew Trust, a trust established for the benefit of Mr. Trøim and his immediate family, owns approximately 29.1% of the common shares of the Company as of March 5, 2026. See “Item 7. Major Shareholders and Related Party Transactions.”

***Jehan Mawjee*** has been a member of our Board of Directors and Chair of the Audit Committee since December 19, 2022. Ms. Mawjee has been employed as Chief Accounting Officer of Borr Drilling Limited since April 2021. She previously served in various accounting roles at Golar LNG Limited from 2015 to 2021 and at KPMG from 2012 to 2015. Ms. Mawjee is a Chartered Accountant and holds a Master of Professional Accounting degree from the University of Saskatchewan as well as an Honors Degree in Applied Economics from Queen’s University.

***Alexandra Kate Blankenship*** has served as a member of the Board of Directors and Audit Committee since May 21, 2025. Mrs. Blankenship is a member of the Institute of Chartered Accountants in England and Wales and graduated from the University of Birmingham with a Bachelor of Commerce in 1986. Mrs. Blankenship joined Frontline Ltd in 1994 and served as its Chief Accounting Officer and Company Secretary until October 2005. Among other positions, she has served on the board of numerous publicly listed companies, including as Director and Audit Committee Chairperson of North Atlantic Drilling Ltd., Archer Limited, Golden Ocean Group Limited, Frontline Ltd., Avance Gas Holding Limited, Ship Finance International Limited, Seadrill Limited, Seadrill Partners LLC, 2020 Bulkers Ltd, Diamond S Shipping Inc prior to its merger with International Seaways Inc, and Eagle Bulk Shipping Inc prior to its merger with Star Bulk Carriers Corp. Mrs. Blankenship also currently serves as a Director of International Seaways Inc and Borr Drilling Limited.

***Carl Steen*** has been a member of our Board of Directors since November 1, 2021 and currently serves on our Audit Committee. His career spans several high-profile companies, including in his role as Head of the Shipping, Oil Services & International Division at Nordea Bank, where he served from January 2001 to February 2011. Mr. Steen holds directorship positions in various Norwegian and international companies including Golar LNG Limited, Wilhelmsen Holding ASA (Chairman), and CMB Tech NV. Mr. Steen holds a Master of Science in Industrial and Management Engineering from ETH Zurich, Switzerland.

**Mi Hong Yoon** has served as a member of our Board of Directors and as Company Secretary since May 23, 2022. Ms. Yoon has been Managing Director of Golar Management (Bermuda) Limited since February 2022. Prior to this role, she served as Chief Legal, Regulatory and Compliance Officer at Digicel Bermuda from 2019 to 2022 and previously as Senior Legal Counsel of Telstra Corporation Limited’s global operations in Hong Kong and London from 2009 to 2019. Ms. Yoon brings extensive international legal, regulatory, corporate governance and compliance experience. She holds a Bachelor of Laws degree (LLB) from the University of New South Wales in Australia and a Masters of Laws (LLM) in International Economic Law from the Chinese University of Hong Kong. She is a member of the Institute of Directors. Current directorships and management positions include serving as Director and Company Secretary of Golar LNG Ltd., Borr Drilling Ltd. and Bruton Limited, and as Company Secretary of 2020 Bulkera Ltd.

## Executive Officers

The following provides information about each of our executive officers as of the date of this annual report.

Name	Age	Position
Lars-Christian Svensen	40	Chief Executive Officer <sup>(1)</sup>
Vidar Hasund	48	Chief Financial Officer <sup>(1)</sup>

(1) Contracted from 2020 Bulkera Management AS.

**Lars-Christian Svensen** assumed the role of Chief Executive Officer of Himalaya Shipping on April 1, 2025. Prior to that, he was Chief Commercial Officer of 2020 Bulkera and Himalaya Shipping from September 1, 2024. Mr. Svensen has a 17-year career in international shipping. From 2007 to 2008, he worked as a shipbroker for Cmarine Services. From 2008 to 2009, he served as a Project Analyst for Petredec Pte Ltd in Singapore. From 2009 to 2020, Mr. Svensen served in Western Bulk, where he held various positions within the group in Singapore (Head of Arabian Gulf), Seattle, US (President), and Oslo (Senior Vice President). From 2020 to 2024, he acted as Chief Commercial Officer and Chief Executive Officer of Golden Ocean Management AS.

**Vidar Hasund** assumed the role of Contracted Chief Financial Officer of Himalaya Shipping on April 1, 2025. Mr. Hasund is also Chief Financial Officer of 2020 Bulkera and Contracted Chief Financial Officer of Bruton Limited. Other positions previously held include Contracted Chief Financial Officer of Himalaya Shipping from 2021 to 2023, Chief Accounting Officer of Borr Drilling from 2017 to 2018, Financial Officer and International Tax Accounting Manager at PGS from 2008 to 2017, Financial Controller at BW Gas ASA from 2005 to 2007 and Auditor at KPMG from 2002 to 2004. He holds a Master of Accounting and Auditing degree from Norwegian School of Economics.

## B. Compensation

The aggregate cash compensation, including benefits in kind, accrued or paid to our directors with respect to the year ended December 31, 2025, for services in all capacities was \$320,000.

Our contracted executive officers are employees of 2020 Bulkera Management, our Manager. Our contracted executive officers are compensated by our Manager and, except as described below in connection with our long-term incentive plan, do not receive any compensation directly from us. Other than through the fees we pay the Manager as set out in the Management Agreement, we do not reimburse our Manager or any of its affiliates for the compensation of our executive officer and do not make any decisions regarding the compensation of our executive officers. For a description of our Manager’s compensation, please refer to the section entitled “Item 7. Major Shareholders and Related Party Transactions.”

Our contracted Chief Executive Officer, Lars-Christian Svensen and contracted Chief Financial Officer, Vidar Hasund, devote a substantial portion of their working time to our affairs as is required for the performance of the duties of our Manager to us under the Management Agreement, however, since inception, they have not exclusively provided services to us. As a result, our contracted executive officers from time to time are not exclusively dedicated to performing services to us.

## **C. Board Practices**

We are subject to Bermuda law regarding corporate governance. Our Board of Directors is composed of five directors. A director is not required to hold any shares in our Company by way of qualification. A director who is in any way, whether directly or indirectly, interested in a contract or proposed contract with our Company is required to declare the nature of his interest at a meeting of our directors. A director may vote in respect of any contract, proposed contract, or arrangement notwithstanding that he or she may be interested therein, and if he or she does so, their vote shall be counted and may be counted in the quorum at any meeting of our directors at which any such contract or proposed contract or arrangement is considered. The directors may exercise all of our powers to borrow money, mortgage our undertaking, property and uncalled capital, and issue debentures or other securities whenever money is borrowed or as security for any of our obligations or of any third party.

In addition, under Bermuda common law, members of the board of directors of a Bermuda company owe a fiduciary duty to the company to act in good faith in their dealings with or on behalf of the company and exercise their powers and fulfill the duties of their office honestly. This duty includes the following essential elements:

- a duty to act in good faith in the best interests of the company;
- a duty not to make a personal profit from opportunities that arise from the office of director;
- a duty to avoid conflicts of interest; and
- a duty to exercise powers for the purpose for which such powers were intended.

The Companies Act imposes a duty on directors of a Bermuda company to act honestly and in good faith with a view to the best interests of the company, and to exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances. In addition, the Companies Act imposes various duties on directors and officers of a company with respect to certain matters of management and administration of the company. Directors and officers generally owe fiduciary duties to the company, and not to the company's individual shareholders.

Our Board of Directors is elected annually by a vote of a majority of the common shares represented at the meeting at which at least two shareholders, present in person or by proxy, and entitled to vote (whatever the number of shares held by them) constitutes a quorum. In addition, the maximum and minimum number of directors is determined by a resolution of our shareholders, but no less than two directors shall serve at any given time. Each director shall hold office until the next annual general meeting or until his or her successor is elected.

The Directors may be re-elected. Directors stand for re-election at each annual general meeting but there is no limit on the term of office.

There are no service contracts between us and any member of our Board of Directors providing for the accrual of benefits, compensation or otherwise, upon termination of their employment or service.

The NYSE requires that a U.S. listed company maintain a majority of independent directors. As a foreign private issuer, we are exempt from certain rules of the NYSE and are permitted to follow home country practice in lieu of the relevant provisions of the NYSE Listed Company Manual, including this requirement.

Our Board of Directors has determined that a majority of our directors are considered "independent" under New York Stock Exchange independence standards.

### **Board Committees**

#### ***Audit Committee***

The NYSE requires, among other things, that a listed U.S. company have an audit committee with a minimum of three members, all of whom must be independent. Additionally, at least one member of the audit committee must have accounting or related financial management expertise. As a foreign private issuer, we are exempt from certain rules of the NYSE and are permitted to follow home country practice in lieu of the relevant provisions of the NYSE Listed Company Manual, including the requirement to have three members on the audit committee.

Consistent with NYSE requirements, our audit committee currently consists of three members, Jehan Mawjee, Carl Steen and Alexandra Kate Blankenship. The audit committee assists the Board of Directors in overseeing the audits of the Company's financial statements, overseeing the quality and integrity of our external financial reporting. The audit committee is also responsible for reviewing, evaluating and advising the Board concerning the adequacy of our accounting systems, internal controls, and compliance with legal and regulatory requirements. In addition, the audit committee is directly responsible for the nomination, engagement (following approval of the appointment of the auditor by the shareholders at the annual general meeting), compensation, retention and oversight of the work of our independent registered public accounting firm. The audit committee is also responsible for reviewing and determining whether to approve certain transactions with related parties. See “Item 7. Major Shareholders and Related Party Transactions.”

The Board of Directors has determined that Ms. Mawjee and Mrs. Blankenship qualify as “audit committee financial experts,” as such term is defined in the rules of the SEC, and all members of the audit committee are independent, as defined under SEC regulations and NYSE same rules. Ms. Mawjee is chairperson of our audit committee.

### ***Compensation Committee***

The NYSE requires U.S. listed companies to have a compensation committee composed entirely of independent directors and a committee charter addressing the purpose, responsibility, rights and performance evaluation of the committee. As a foreign private issuer, we rely on home country practice in Bermuda to be exempted from certain of the corporate governance requirements of the NYSE, such that we do not have a compensation committee. In lieu of a compensation committee, our Board is responsible for establishing the executive officers’ compensation and benefits including our equity compensation plan.

### ***Nominating and Corporate Governance Committee***

The nominating and corporate governance committee, which consists of Carl Steen, Bjørn Isaksen and Mi Hong Yoon, develops and recommends to the Board of Directors a set of corporate governance principles applicable to our company, oversees the evaluation of our Board of Directors and identifies and nominates candidates for election to the Board of Directors. The NYSE requires U.S. listed companies to have a nominating and corporate governance committee comprised entirely of independent directors and a committee charter addressing certain minimum responsibilities. As a foreign private issuer, we rely on home country practice in Bermuda to be exempted from certain of the corporate governance requirements of the NYSE requirements. Not all our committee members are independent. Carl Steen has been appointed to act as chairperson of our nominating and corporate governance committee.

### **D. Employees**

We had three employees as of December 31, 2025. See “Item 6. Directors, Senior Management and Employees” for additional information.

There is no relationship between management and labor unions.

### **E. Share Ownership**

The table below shows the number and percentage of our issued and outstanding common shares beneficially owned by our directors and officers as of March 5, 2026. Also shown are their interests in share options granted to them under our long-term incentive program (the “LTI Plan”).

<i>Director or Officer</i>	<i>Beneficial Ownership in Common Shares</i>		<i>Interest in Options</i>		
	Number of shares	%	Total number of options	Exercise price <sup>(1)</sup>	Expiry date
Bjorn Isaksen <sup>(2)</sup>	450,000	*	150,000 <sup>(4)</sup>	\$8.00	December 8, 2026
Jehan Mawjee	—	—	50,000 <sup>(5)</sup>	\$8.00	February 19, 2029
Carl Steen <sup>(3)</sup>	202,496	*	75,000 <sup>(4)</sup>	\$8.00	December 8, 2026
Lars-Christian Svensen	19,186	*	65,000 <sup>(6)</sup>	\$10.00	September 1, 2029
			120,000 <sup>(7)</sup>	\$7.50	March 31, 2030
Vidar Hasund	—	—	100,000 <sup>(4)</sup>	\$8.00	December 8, 2026
			20,000 <sup>(7)</sup>	\$7.50	March 31, 2030
All executive officers and directors as a group	671,682	1.4% **	580,000		

\* Represents beneficial ownership of less than 1.0% of total outstanding shares.

\*\* This is calculated based on the number of common shares outstanding as of March 5, 2026.

(1) Exercise prices are presented gross of cash distributions declared.

(2) Represents shares beneficially owned by Bjorn Isaksen, including those held by Freng Invest AS. In addition, Mr Isaksen holds 200,000 shares under a forward purchase agreement with Drew Holdings Ltd. for settlement on June 15, 2026.

(3) Represents shares beneficially owned by Carl Steen, including those held by Capreca AS.

(4) On December 8, 2021, our Board of Directors approved the award of share options under the LTI Plan to our executive officers and directors to vest within a period of three years of the grant and expiring on December 8, 2026.

(5) On February 19, 2024, our Board of Directors approved the award of share options under the LTI Plan to a director to vest within a period of three years of the grant and expiring on February 19, 2029.

(6) On September 1, 2024, our Board of Directors approved the award of share options under the LTI Plan to an executive officer to vest within a period of three years of the grant and expiring on September 1, 2029.

(7) On April 3, 2025, our Board of Directors approved the award of share options under the LTI Plan to executive officers to vest within a period of three years of the grant and expiring on March 31, 2030.

## Equity Incentive Plan

We have adopted a long-term incentive plan and have authorized the issuance of up to 1,250,000 options pursuant to awards under our long-term incentive program (the “LTI Plan”), of which 250,000 options remain unallocated for further awards and recruitments. Any person who is contracted to work at least 20 hours per week in our service, the members of our Board and any person who is a member of the board of any of our subsidiaries and an individual who is employed by a regular service provider to the Company provided such individual participates in the team providing such services on a regular basis are eligible to participate in our LTI Plan. The purpose of our LTI Plan is to align the long-term financial interests of our employees, contracted officers and directors with those of our shareholders, to attract and retain those individuals by providing compensation opportunities that are competitive with other companies, and to provide incentives to those individuals who contribute significantly to our long-term performance and growth. To accomplish this, our LTI Plan permits the issuance of our common shares.

For further details on share options please refer to Note 18—“Share Based Compensation” of our Consolidated Financial Statements included herein.

### F. Disclosure of a Registrant's Action to Recover Erroneously Awarded Compensation

Not applicable.

## ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

### A. Major Shareholders

The following table presents certain information as of March 5, 2026 regarding the beneficial ownership of our common shares with respect to shareholders that, to the best of our knowledge, beneficially own more than 5% of our issued and outstanding common shares:

<i>5% Equity holders</i>	<i>Beneficial Ownership in Common Shares<sup>(1)</sup></i>	
	Number of shares	%
Drew Holdings Ltd. <sup>(2)</sup>	13,590,549	29.1%

(1) The calculations in the table above are based on 46,750,000 common shares outstanding as of March 5, 2026.

(2) This information is derived from Schedule 13G of Drew Holdings Ltd. filed with the SEC on October 14, 2025. Drew Holdings Ltd. is wholly owned by Drew Trust, a trust established in Bermuda for the benefit of Mr. Tor Olav Trøim and his immediate family.

To our knowledge, as of March 5, 2026, 46,750,000 of our common shares are held by Cede & Co., a nominee of The Depository Trust Company, which directly holds our shares that trade on the NYSE and Oslo Bors.

We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our company. See the sections entitled “Item 4. Information on the Company—A. Our History and Development” and “Item 10. Additional Information—A. Share Capital” for historical changes in our shareholding structure.

## **B. Related Party Transactions**

Himalaya Shipping is party to a number of significant contractual arrangements with related parties. Related party transactions that we were party to for the years ended December 31, 2025, 2024 and 2023 are described in Note 17—“Related Party Transactions” of our audited consolidated financial statements included herein.

## **C. Interests of Experts and Counsel**

Not applicable.

## **ITEM 8. FINANCIAL INFORMATION**

### **A. Consolidated Financial Statements and Other Financial Information**

See “Item 18. Financial Statements”

See “Item 4.B. Business Overview—Legal Proceedings” for a discussion of legal proceedings. We may, from time to time, be involved in legal proceedings and claims that arise in the ordinary course of business. A contingent liability will be recognized in the financial statements only where we believe that a liability will be probable and for which the amounts are reasonably estimable, based upon the facts known prior to the issuance of the financial statements.

### ***Dividend policy***

Under our bye-laws, our Board of Directors may declare dividends or cash distributions. We are subject to Bermuda legal constraints that may affect our ability to pay dividends on our common shares and make other payments. Under Bermuda law, a company may not declare or pay dividends if there are reasonable grounds for believing that: (i) the company is, or would after the payment be, unable to pay its liabilities as they become due; or (ii) the realizable value of its assets would thereby be less than its liabilities.

Since we are a holding company with no material assets other than the shares of our subsidiaries through which we conduct our operations, our ability to pay dividends will depend on our subsidiaries distributing their earnings and cash flow to us. See “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources—Financing Arrangements.”

Our Board of Directors has adopted a dividend policy to distribute monthly dividends to our shareholders subject to our vessels generating sufficient cash flow allowing such payments. Any determination related to our dividend policy will be subject to the discretion of our Board of Directors, requirements of Bermuda law and other applicable laws, our results of operations, financial condition, cash requirements and availability, including requirements under capital expenditure programs, market prospects, contractual restrictions under our Financing Arrangements, the ability of our subsidiaries to distribute funds to us and other factors deemed relevant by our Board of Directors. We have not adopted a separate written dividend policy to reflect our Board’s policy.

Although we are incorporated in Bermuda, we are classified as a non-resident of Bermuda for exchange control purposes by the BMA. Other than transferring Bermuda Dollars out of Bermuda, there are no restrictions on our ability to transfer funds into or out of Bermuda to pay dividends to U.S. residents who are holders of our common shares or other non-resident holders of our common shares in currency other than Bermuda Dollars.

## **B. Significant Changes**

Significant changes since the date of our consolidated financial statements are discussed on “Item 5. Operating and Financial Review and Prospects” and further disclosed in Note 20—“Subsequent Events” of our consolidated financial statements included herein.

## **ITEM 9. THE OFFER AND LISTING**

### **A. Offer and Listing Details**

Our common shares have traded on the NYSE since April 3, 2023 and the Euronext Oslo Bors since June 3, 2025, following the transfer of our listing from Euronext Expand, both under the ticker “HSHP.”

### **B. Plan of Distribution**

Not applicable.

### **C. Markets**

See “Item 9A. The Offer and Listing—Offer and Listing Details” above.

### **D. Selling Shareholders**

Not applicable.

### **E. Dilution**

Not applicable.

### **F. Expenses of the issue**

Not applicable.

## **ITEM 10. ADDITIONAL INFORMATION**

This section summarizes our share capital and the material provisions of our Memorandum of Association and Bye-Laws, including rights of holders of our common shares. The description is only a summary and does not describe everything that our Memorandum of Association and Bye-laws contain. Our Memorandum of Association and the Bye-Laws have previously been filed as Exhibits 3.2 and 3.3, respectively to our Registration Statement on Form F-1, (File No. 0001140361-23-010529) filed with the Commission on March 7, 2023, and are hereby incorporated by reference into this Annual Report.

## **A. Share Capital**

Our authorized share capital is \$140,010,000 divided into 140,010,000 common shares, par value \$1.00 per share.

The Company had 32,152,857 issued and fully paid common shares as of January 1, 2022. In April 2023, the Company completed its IPO in the U.S., whereby the Company issued 7,720,000 common shares of par value \$1 each at an offering price of \$5.80 per common share and subsequently issued an additional 910,000 common shares of par value \$1 each in a partial exercise of the over-allotment option in May 2023.

In December 2023, the Company issued 3,117,143 common shares of par value \$1.00 each in a private placement at a price of \$5.64 per share. The Company had 43,900,000 issued and fully paid common share of par value \$1.00 each as of December 31, 2024 and 2023.

In March 2025, the Company issued 2,650,000 common shares of par value \$1.00 each in a private placement at a price of \$5.73 per share. Following the issuance, the Company has 46,550,000 issued and fully paid common shares of par value \$1.00 each.

In December 2025, in connection with the exercise of share options under the long-term incentive plan, the Company issued 100,000 common shares of par value \$1.00 each at the exercise price of \$7.05 per share. The Company has 46,650,000 issued and fully paid common shares of par value \$1.00 each as of December 31, 2025.

In February 2026, in connection with the exercise of share options under the long-term incentive plan, the Company issued 100,000 common shares of par value \$1.00 each at the exercise price of \$6.76 per share. Following the issuance, the Company has 46,750,000 issued and fully paid common shares of par value \$1.00 each.

## **B. Memorandum of Association and Bye-Laws**

We were incorporated by registration under the Companies Act. Our business objects, as stated in section six of our Memorandum, are unrestricted and we have all the powers of a natural person.

Pursuant to our bye-laws, our Board of Directors is authorized to issue any of our authorized but unissued shares. Under our bye-laws, no shares shall be issued until they are fully paid except as may be prescribed by a resolution of the shareholders. There are no limitations on the right of non-Bermudians or non-residents of Bermuda to hold or vote our common shares.

### *Common Shares*

Holders of common shares have no pre-emptive, redemption, conversion or sinking fund rights. Holders of common shares are entitled to one vote per share on all matters submitted to a vote of holders of common shares. Unless a different majority is required by law or under our bye-laws, resolutions required to be approved by holders of common shares require approval by a simple majority of votes cast at a general meeting at which a quorum is present or by a resolution in writing signed by a simple majority of the common shareholders.

In the event of our liquidation, dissolution or winding up, the holders of common shares are entitled to share equally and ratably in our assets, if any, remaining after the payment of all of our debts and liabilities, subject to any liquidation preference on any issued and outstanding preference shares.

### *Preference Shares*

Pursuant to Bermuda law and our bye-laws, our Board of Directors may, by resolution, establish one or more series of preference shares having such number of shares, designations, dividend rates, relative voting rights, conversion or exchange rights, redemption rights, liquidation rights and other relative participation, optional or other special rights, qualifications, limitations or restrictions as may be fixed by the Board of Directors without any further shareholder approval. Such rights, preferences, powers and limitations, as may be established, could have the effect of discouraging an attempt to obtain control of the company. As of March 5, 2026, we have not issued preference shares.

### *Dividend Rights*

Under Bermuda law, a company may not declare or pay dividends if there are reasonable grounds for believing that (i) the company is, or would after the payment be, unable to pay its liabilities as they become due; or (ii) that the realizable value of its assets would thereby be less than its liabilities. Under our bye-laws, each common share is entitled to dividends if, as and when dividends are declared by our Board of Directors, subject to any preferred dividend right of the holders of any preference shares.

Any cash dividends payable to holders of our common shares listed on the NYSE will be paid to Broadridge Financial Solutions, our paying agent in the United States for disbursement to those holders.

### *Variation of Rights*

If at any time we have more than one class of shares, the rights attaching to any class, unless otherwise provided for by the terms of issue of the relevant class, may be varied either (i) with the consent in writing of the holders of 75% of the issued shares of that class; or (ii) with the sanction of a resolution passed by a majority of the votes cast at a general meeting of the relevant class of shareholders at which a quorum consisting of at least two persons holding or representing by proxy any of the issued shares of the relevant class is present. Our bye-laws specify that the creation or issue of shares ranking equally with existing shares will not, unless expressly provided by the terms of issue of existing shares, vary the rights attached to existing shares.

### *Transfer of Shares*

Our Board of Directors may, in its absolute discretion and without assigning any reason, refuse to register the transfer of a share that is not fully paid. Our Board of Directors may also refuse to recognize an instrument of transfer of a share unless it is accompanied by the relevant share certificate and such other evidence of the transferor's right to make the transfer as our Board of Directors shall reasonably require. Subject to these restrictions, a holder of common shares may transfer the title to all or any of his common shares by completing a form of transfer in the usual common form or in any other form which our Board of Directors may approve. The instrument of transfer must be signed by the transferor and transferee, although in the case of a fully paid share our Board of Directors may accept the instrument signed only by the transferor.

Where our common shares are listed or admitted to trading on any appointed stock exchange, such as the NYSE, they will be transferred in accordance with the rules and regulations of such exchange.

### *Meetings of Shareholders*

Under Bermuda law, a company is required to convene at least one general meeting of shareholders each calendar year (the "annual general meeting"). However, the shareholders may by resolution waive this requirement, either for a specific year or period of time, or indefinitely. When the requirement has been so waived, any shareholder may, on notice to the company, terminate the waiver, in which case an annual general meeting must be called. We have chosen not to waive the convening of an annual general meeting.

Bermuda law provides that a special general meeting of shareholders may be called by the Board of Directors of a company and must be called upon the request of shareholders holding not less than 10% of the paid-up capital of the company carrying the right to vote at general meetings. Bermuda law also requires that shareholders be given at least five days' advance notice of a general meeting, but the accidental omission to give notice to any person does not invalidate the proceedings at a meeting. Our bye-laws provide that our Board of Directors shall convene an annual general meeting and the Board of Directors may convene a special general meeting. Under our bye-laws, at least 7 days' notice of an annual general meeting or a special general meeting must be given to each shareholder entitled to vote at such meeting. The notice shall be exclusive of the day on which it is served or deemed to be served and of the day for which it is given, and shall specify the place, day and time of the meeting, and, in the case of a special general meeting, the general nature of the business to be considered. This notice requirement is subject to the ability to hold such meetings on shorter notice if such notice is agreed: (i) in the case of an annual general meeting by all of the shareholders entitled to attend and vote at such meeting; or (ii) in the case of a special general meeting by a majority in number of the shareholders entitled to attend and vote at the meeting holding not less than 95% in nominal value of the shares entitled to vote at such meeting. The quorum required for a general meeting of shareholders is two or more shareholders either present in person or represented by proxy, holding shares carrying voting rights entitled to be exercised at such meeting.

#### *Access to Books and Records and Dissemination of Information*

Members of the general public have a right to inspect the public documents of a company available at the office of the Registrar. These documents include the company's memorandum of association, including its objects and powers, and certain alterations to the memorandum of association. The shareholders have the additional right to inspect the bye-laws of the company, minutes of general meetings and the company's audited financial statements, which must be presented in the annual general meeting. The register of members of a company is also open to inspection by shareholders and by members of the general public without charge. The register of members is required to be open for inspection for not less than two hours in any business day (subject to the ability of a company to close the register of members for not more than thirty days in a year). A company is required to maintain its share register in Bermuda but may, subject to the provisions of the Companies Act 1981 of Bermuda, as amended (the "Companies Act"), establish a branch register outside of Bermuda. A company is required to keep at its registered office a register of directors and officers that is open for inspection for not less than two hours in any business day by members of the public without charge. A company is also required to file with the Registrar a list of its directors to be maintained on a register, which register will be available for public inspection subject to such conditions as the Registrar may impose and on payment of such fee as may be prescribed. Bermuda law does not, however, provide a general right for shareholders to inspect or obtain copies of any other corporate records.

#### *Election and Removal of Directors*

Our bye-laws provide that our Board of Directors shall consist of a minimum of two directors or such greater number as the shareholders may from time to time determine.

In accordance with our bye-laws, a director may be removed by the shareholders, provided notice of the shareholders meeting convened to remove the director is given to the director. The notice must be served on the director not less than 14 days before the meeting. The director is entitled to attend the meeting and be heard on the motion for his removal.

#### *Proceedings of Board of Directors*

Our bye-laws provide that our business is to be managed by our Board of Directors. Bermuda law permits individual and corporate directors and there is no requirement in our bye-laws or Bermuda law that directors hold any of our common shares. There is also no requirement in our bye-laws or Bermuda law that our directors must retire at a certain age.

The compensation of our directors is determined by the shareholders, and there is no requirement that a specified number or percentage of "independent" directors must approve any such determination. Our directors may also be paid all travel, hotel and other reasonable out-of-pocket expenses properly incurred by them in connection with our business or their duties as directors.

Provided a director discloses a direct or indirect interest in any contract or arrangement with us as required by Bermuda law, such director is entitled to vote in respect of any such contract or arrangement in which he or she is interested.

### *Amendment of Memorandum of Association and Bye-laws*

Bermuda law provides that the memorandum of association of a company may be amended by a resolution passed at a general meeting of shareholders. Our bye-laws provide that our bye-laws may be amended from time to time in the manner provided for in the Companies Act, provided that any such amendment shall only become operative to the extent that it has been confirmed by a resolution of our shareholders, which includes the affirmative vote of a majority of all votes cast on the resolution.

Under Bermuda law, the holders of an aggregate of not less than 20% in par value of a company's issued share capital or any class thereof or the holders of not less than 20% of a company's debentures have the right to apply to the Supreme Court of Bermuda for an annulment of any amendment of the memorandum of association adopted by shareholders at any general meeting, other than an amendment that alters or reduces a company's share capital as provided in the Companies Act. Where such an application is made, the amendment becomes effective only to the extent that it is confirmed by the Supreme Court of Bermuda. An application for an annulment of an amendment of the memorandum of association must be made within 21 days after the date on which the resolution altering the company's memorandum of association is passed and may be made on behalf of persons entitled to make the application by one or more of their number as they may appoint in writing for the purpose. No annulment application may be made by shareholders voting in favor of the amendment.

### *Amalgamations, Mergers and Business Combinations*

The amalgamation or merger of a Bermuda company with another company or corporation (other than a subsidiary or certain affiliated companies) requires the amalgamation or merger agreement to be approved by the company's Board of Directors and by its shareholders. Unless the company's bye-laws provide otherwise, the approval of 75% of the shareholders voting at such meeting is required to approve the amalgamation or merger agreement, and the quorum for such meeting must be two or more persons holding or representing more than one-third of the issued shares of the company. Our bye-laws provide that our Board of Directors may, with the sanction of a resolution passed by a simple majority of votes cast at a general meeting of our shareholders with the necessary quorum for such meeting of two persons at least holding or representing 33 1/3% of our issued shares (or the class, where applicable) amalgamate or merge with another company.

Under Bermuda law, in the event of an amalgamation or merger of a Bermuda company with another company or corporation, a shareholder of the Bermuda company who did not vote in favor of the amalgamation or merger and who is not satisfied that fair value has been offered for such shareholder's shares may, within one month of notice of the shareholders meeting, apply to the Supreme Court of Bermuda to appraise the fair value of those shares.

### *Capitalization of Profits and Reserves*

Pursuant to our bye-laws, our Board of Directors may recommend to the shareholders to approve a resolution to (i) capitalize any part of the amount of our share premium or other reserve accounts or any amount credited to our profit and loss account or otherwise available for distribution by applying such sum in paying up unissued shares to be allotted as fully paid bonus shares pro rata to the shareholders; or (ii) capitalize any sum standing to the credit of a reserve account or sums otherwise available for dividend or distribution by paying up in full, partly paid or nil paid shares of those shareholders who would have been entitled to such sums if they were distributed by way of dividend or distribution.

### *Registrar or Transfer Agent*

The transfer agent and registrar for our common shares is Broadridge Corporate Issuer Solutions, LLC. The transfer agent's address is 51 Mercedes Way, Edgewood, NY 11717, and its telephone number is +1 800 353 0103.

### *Untraced Shareholders*

Our bye-laws provide that our Board of Directors may forfeit any dividend or other monies payable in respect of any shares that remain unclaimed for six years from the date when such monies became due for payment.

### *Certain Provisions of Bermuda Law*

We have been designated by the BMA as a non-resident for Bermuda exchange control purposes. This designation allows us to engage in transactions in currencies other than the Bermuda dollar, and there are no restrictions on our ability to transfer funds (other than funds denominated in Bermuda dollars) in and out of Bermuda or to pay dividends to U.S. residents who are holders of our common shares.

The BMA has given its consent for the issue and free transferability of our common shares to and between non-residents of Bermuda for exchange control purposes, provided our common shares remain listed on an appointed stock exchange, which includes NYSE. Approvals or permissions given by the BMA do not constitute a guarantee by the BMA as to our performance or our creditworthiness. Accordingly, in giving such consent or permissions, neither the BMA nor the Registrar shall be liable for the financial soundness, performance or default of our business or for the correctness of any opinions or statements expressed in this annual report. Certain issues and transfers of common shares involving persons deemed resident in Bermuda for exchange control purposes require the specific consent of the BMA.

In accordance with Bermuda law, share certificates are only issued in the names of companies, partnerships or individuals. In the case of a shareholder acting in a special capacity (for example as a trustee), certificates may, at the request of the shareholder, record the capacity in which the shareholder is acting. Notwithstanding such recording of any special capacity, we are not bound to investigate or see to the execution of any such trust.

### **Implications of Being an Emerging Growth Company**

As a company with less than \$1.235 billion in revenue during our last fiscal year, we qualify as an “emerging growth company” as defined in the Jumpstart Our Business Startups Act (“JOBS Act”). An emerging growth company may take advantage of specified reduced reporting and other burdens that are otherwise applicable generally to public companies. These provisions include an exemption from the auditor attestation requirement in the auditor assessment of our internal control over financial reporting pursuant to the Sarbanes-Oxley Act.

We may take advantage of these provisions for up to five years or such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company (i) upon the last day of the fiscal year (A) in which we had more than \$1.235 billion in annual revenue, or (B) we are deemed to be a “large accelerated filer” under the rules of the SEC, which means the market value of our common shares held by non-affiliates exceeds \$700.0 million as of the prior June 30th, or (ii) upon the date on which we have issued more than \$1.0 billion of non-convertible debt over a three-year period. We may choose to take advantage of some but not all of these reduced burdens. To the extent that we take advantage of these reduced reporting burdens, the information that we provide shareholders may be different than you might obtain from other public companies in which you hold equity interests.

The JOBS Act permits an “emerging growth company” like us to take advantage of an extended transition period to comply with new or revised accounting standards applicable to public companies. We are choosing to “opt out” of this provision and, as a result, we will comply with new or revised accounting standards as required when they are adopted. Our decision to opt out of the extended transition period is irrevocable.

### **Implications of Being a Foreign Private Issuer**

In general, under NYSE corporate governance standards, foreign private issuers, as defined under the Exchange Act, are permitted to follow home country corporate governance practices instead of the corporate governance practices of NYSE. Accordingly, we follow certain corporate governance practices of our home country, Bermuda, in lieu of certain of the corporate governance requirements of NYSE. A brief summary of those differences is provided in “Item 16G. Corporate Governance.”

In addition, as a foreign private issuer, we are not subject to the following requirements under US securities laws applicable to domestic issuers:

- the requirement to file quarterly reports on Form 10-Q, from filing proxy solicitation materials on Schedule 14A or 14C in connection with annual or special meetings of shareholders;
- the requirement to file reports on Form 8-K disclosing certain significant events within four business days of their occurrence; and
- the requirements of Regulation FD.

The HFIAA, which was signed into law on December 18, 2025, amended Section 16(a) of the Securities Exchange Act of 1934 (Exchange Act), to require directors and officers of foreign private issuers to comply with the Section 16(a) insider reporting requirements beginning March 18, 2026. Directors and officers of foreign private issuers remain exempt from the short-swing profits rule under Section 16(b) and the short sale prohibition under Section 16(c).

If at any time we cease to be a “foreign private issuer” under the rules of NYSE and the Exchange Act, as applicable, our Board of Directors will be required to comply with NYSE corporate governance rules.

Due to our status as a foreign private issuer and because we follow certain home country corporate governance practices, our shareholders will not have the same protections afforded to shareholders of companies that are subject to all NYSE corporate governance standards. See “Item 6. Directors, Senior Management and Employees—E.Share Ownership.”

### **C. Material contracts**

For a discussion of our material contracts, please refer to “Item 4. Information on the Company—A. Our History and Development,” “Item 4. Information on the Company—B. Business Overview,” “Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources,” “Item 6. Directors, Senior Management and Employees—E. Share Ownership,” and “Item 19. Exhibits.”

### **D. Exchange Controls**

The BMA, must give permission for all issuances and transfers of securities of a Bermuda exempted company like us, unless the proposed transaction is exempted by the BMA’s written general permissions, pursuant to the provision of the Exchange Control Act 1972 and related regulations. We have received a general permission from the BMA to issue any unissued common shares, and for the free transferability of the common shares as long as our common shares are listed on the NYSE. Our common shares may therefore be freely transferred among persons who are residents or non-residents of Bermuda.

Although we are incorporated in Bermuda, we are classified as non-resident of Bermuda for exchange control purposes by the BMA. Other than transferring Bermuda Dollars out of Bermuda, there are no restrictions on our ability to transfer funds into or out of Bermuda to pay dividends to U.S. residents who are holders of our common shares or other non-resident holders of our common shares in currency other than Bermuda Dollars.

### **E. Taxation**

#### **Bermuda Tax Considerations**

At the present time, there is no Bermuda income or profits tax, withholding tax, capital gains tax, capital transfer tax, estate duty or inheritance tax payable by us or by our shareholders in respect of our common shares. However, Bermuda enacted the Corporate Income Tax Act 2023 (the “CIT Act”) on December 27, 2023. Entities subject to tax under the CIT Act are the Bermuda constituent entities of multi-national groups. A multi-national group is defined under the CIT Act as a group with entities in more than one jurisdiction with consolidated revenues of at least EUR750 million for two out of the previous four fiscal years. If Bermuda constituent entities of a multi-national group are subject to tax under the CIT Act, such tax is at a rate of 15% of net taxable income of such constituent entities, as determined in accordance with and subject to the adjustments set out in the CIT Act (including in respect of foreign tax credits applicable to the Bermuda constituent entities). Bermuda’s new 15% corporate income tax is now chargeable under the CIT Act for tax years starting on or after January 1, 2025.

We have obtained tax assurances from the Minister of Finance in Bermuda under the Exempted Undertakings Tax Protection Act 1966, as amended (the “EUTP Act”) that, in the event that any legislation is enacted in Bermuda imposing any tax computed on profits or income, or computed on any capital asset, gain or appreciation or any tax in the nature of estate duty or inheritance tax, such tax shall not, until March 31, 2035, be applicable to us, except insofar as such tax applies to persons ordinarily resident in Bermuda or is payable by us in respect of real property owned or leased by us in Bermuda. While we have such tax assurance under the EUTP Act, section 4(4) of the CIT Act provides that any liability for tax of a Bermuda constituent entity that is in scope of the CIT Act shall apply notwithstanding any assurance given pursuant to the EUTP Act.

Based on a number of operational, economic and regulatory assumptions, we do not expect to have consolidated revenue sufficient for us to fall within scope of the CIT Act in the near future. We will continue to monitor developments with regards to the implementation and regulation of the CIT Act in Bermuda. To the extent our consolidated revenue is sufficient for us to be within the CIT Act thresholds, we may become subject to taxation in Bermuda. If we are subject to taxation in Bermuda under the CIT act, our international shipping income may be excluded from taxation if we can demonstrate either strategic or commercial management in Bermuda.

### **Liberian Tax Considerations**

Our Liberian subsidiaries are non-resident Liberian corporations which, under the Liberia Revenue Code of 2000, as amended (including by the Consolidated Tax Amendments Act of 2011), are exempt from Liberian taxation.

### **U.S. Federal Income Tax Considerations**

The following is a summary of U.S. federal income tax considerations generally applicable to the ownership and disposition of our common shares by U.S. Holders (as defined below) that hold our common shares as “capital assets” (generally, property held for investment) for U.S. federal income tax purposes. This summary is based on the U.S. Internal Revenue Code of 1986, as amended (the “Code”), U.S. Treasury Regulations promulgated thereunder (“Regulations”), administrative pronouncements, judicial decisions and other relevant authorities, all as in effect as of the date hereof and all of which are subject to change, possibly with retroactive effect.

This discussion does not address all aspects of U.S. federal income taxation that may be relevant to a particular U.S. Holder in light of its particular circumstances or that may be relevant to U.S. Holders subject to special rules under U.S. federal income tax law, such as

- banks and other financial institutions;
- real estate investment trusts;
- regulated investment companies;
- insurance companies;
- dealers in securities;
- traders in securities that elect to use a mark-to-market method of accounting;
- persons holding our common shares as part of a hedge, straddle, conversion, constructive sale or other integrated transaction;
- persons whose functional currency is not the U.S. dollar;
- tax-exempt entities;
- persons who acquire our common shares pursuant to any employee share option or otherwise as compensation; or
- persons who actually or constructively own ten percent or more of our common shares by vote or value.

This discussion, moreover, does not address U.S. federal estate, gift or other non-income tax considerations, the alternative minimum taxes, the Medicare tax on certain net investment income, or any state, local or non-U.S. tax considerations.

U.S. Holders should consult their tax advisors with respect to the U.S. federal, state, local and non-U.S. income and other tax considerations relevant to the ownership and disposition of our common shares in light of their particular circumstances.

#### *General*

For purposes of this summary, a “U.S. Holder” means a beneficial owner of our common shares, that is, for U.S. federal income tax purposes:

- a citizen or individual resident of the United States.;
- a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) that is created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income tax regardless of its source; or

- a trust if (i) a U.S. court is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all of its substantial decisions or (ii) it has a valid election in effect under applicable Regulations to be treated as a U.S. person.

If a partnership (including any entity or arrangement treated as a partnership for U.S. federal income tax purposes) is the beneficial owner of our common shares, the U.S. federal income tax treatment of a partner in such partnership will generally depend upon the status of the partner and the activities of the partnership. Partnerships that hold our common shares and partners in such partnerships should consult their tax advisors regarding an investment in our common shares.

### *Distributions*

Subject to the discussion below under the heading “Item 10. Additional information—E. Taxation—U.S. Federal Income Tax Considerations—Passive Foreign Investment Company Considerations,” the gross amount of any distributions with respect to our common shares will generally be subject to tax as dividend income to the extent paid out of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles, and will be includible in the gross income of a U.S. Holder on the day actually or constructively received. Distributions in excess of our current or accumulated earnings and profits will first be treated as a tax-free return of capital to the extent of the U.S. Holder’s adjusted tax basis in our common shares, and thereafter generally as capital gain. Any such dividend will not be eligible for the dividends-received deduction generally available to U.S. corporations. Because we do not intend to determine our earnings and profits on the basis of U.S. federal income tax principles, any distributions we pay will generally be treated as dividends for U.S. federal income tax purposes.

Individuals and other non-corporate U.S. Holders may be subject to tax on any such dividends at the lower capital gains rate applicable to “qualified dividend income,” provided that (i) certain holding period requirements are met, (ii) shares of our common stock on which dividends are paid are readily tradable on an established securities market in the United States, and (iii) we are neither a PFIC (defined below) nor treated as such with respect to the U.S. Holder (as discussed below) for the taxable year in which the dividend is paid. Our common shares are listed on the NYSE, so we expect our common shares to be considered readily tradable on an established securities market in the United States, although there can be no assurance in this regard. U.S. Holders should consult their tax advisors regarding the availability of the preferential tax rates on dividends in their particular circumstances.

For foreign tax credit purposes, dividends received on our common shares will generally be treated as income from sources outside the United States and will generally constitute passive category income. The rules governing the U.S. foreign tax credit are complex and their application depends in large part on the U.S. Holder’s individual facts and circumstances. Accordingly, U.S. Holders should consult their tax advisors regarding the availability of the U.S. foreign tax credit under their particular circumstances.

### *Sale or Other Disposition of Our Common Shares*

Subject to the discussion below under the heading “Item 10. Additional information—E. Taxation—U.S. Federal Income Tax Considerations—Passive Foreign Investment Company Considerations,” a U.S. Holder will generally recognize capital gain or loss on the sale or other disposition of our common shares in an amount equal to the difference between (i) the amount of cash and the fair market value of any property received on the disposition and (ii) the U.S. Holder’s adjusted tax basis in our common shares. Any such gain or loss will generally be long-term capital gain or loss if the U.S. Holder’s holding period in our common shares exceeds one year at the time of the disposition. Long-term capital gains recognized by individuals and certain other non-corporate U.S. Holders are generally subject to a reduced rate of taxation. The deductibility of capital losses is subject to limitations.

For foreign tax credit purposes, any gain or loss recognized on the sale or other disposition of our common shares will generally be U.S. source gain or loss. U.S. Holders should consult their tax advisors regarding the tax consequences if a foreign tax is imposed on a disposition of our common shares, including the availability of the foreign tax credit under their particular circumstances.

### *Passive Foreign Investment Company Considerations*

In general, a non-U.S. corporation, such as us, will be classified as a passive foreign investment company (“PFIC”) for U.S. federal income tax purposes for any taxable year if either (i) 75% or more of its gross income consists of passive income (the “income test”) or (ii) 50% or more of its assets (determined on the basis of a quarterly average) is attributable to assets that produce or are held for the production of passive income (the “asset test”). Passive income generally includes dividends, interest, annuities, certain royalties and rents not derived in the active conduct of a business, and net gains from the sale or exchange of property that produces such income. Cash is generally treated as a passive asset for these purposes, and our goodwill and other unbooked intangibles are taken into account and may be classified as active or passive generally depending upon the relative amounts of our income in each category. We will be treated as owning a proportionate share of the assets and earning a proportionate share of the income of any other corporation in which we own, directly or indirectly, 25% or more (by value) of the stock.

We believe that the income we earn from our time charters and voyage charters should not be treated as passive income for purposes of the income test. Accordingly, based on the current composition of our income and assets and our expected income and operations, we believe that we were not a PFIC for our most recent taxable year ending December 31, 2025 and do not expect to be a PFIC for the current taxable year or foreseeable future taxable years. PFIC status is a factual determination, however, and must be made annually after the close of each taxable year. The composition of our income and assets may change over the course of the year or from year to year, and the value of our unbooked intangibles will generally be determined by reference to the public price of our common shares (which may fluctuate significantly). Therefore, there can be no assurance that we will not be classified as a PFIC for the current taxable year or for any past or future taxable years.

If we are treated as a PFIC for any taxable year included in the holding period of a U.S. Holder, and unless the U.S. holder makes a mark-to-market election (as described below), the U.S. Holder will generally be subject to special rules (the “Default PFIC Regime”) with respect to (i) any gain realized by such U.S. Holder on the sale or other disposition, including an indirect distribution such as a pledge, of our common shares and (ii) any “excess distribution” made to the U.S. Holder (which generally means any distribution paid during a taxable year to such U.S. Holder that is greater than 125% of the average annual distributions paid to such U.S. Holder in respect of our common shares during the three preceding taxable years of such U.S. Holder, or, if shorter, such U.S. Holder’s holding period for our common shares). Under the PFIC rules:

- the excess distribution or gain will be allocated ratably over the U.S. Holder’s holding period for our common shares;
- amounts allocated to the current taxable year and any taxable years in the U.S. Holder’s holding period prior to the first taxable year in which we are classified as a PFIC (each, a “pre-PFIC year”), will be taxable as ordinary income; and
- amounts allocated to each prior taxable year, other than a pre-PFIC year, will be subject to tax at the highest marginal tax rate in effect for individuals or corporations, as appropriate, for that year, and such amounts will be increased by an additional tax equal interest on the resulting tax deemed deferred with respect to such years.

If we are a PFIC for any taxable year during which a U.S. Holder holds our common shares, we will generally continue to be treated as a PFIC with respect to such holder for subsequent taxable years during which such holder holds our common shares, whether or not we continue to be a PFIC.

A U.S. Holder owning shares in a PFIC that are treated as marketable stock may be able to avoid the Default PFIC Regime by making a “mark-to-market” election. If the U.S. Holder makes a valid mark-to-market election, such holder will generally not be subject to the Default PFIC Regime in respect of its common shares as long as such shares continue to be treated as marketable stock. Instead, the U.S. Holder will generally include as ordinary income for each year in its holding period that we are treated as a PFIC the excess, if any, of the fair market value of its common shares at the end of its taxable year over the adjusted basis in its common shares. The U.S. Holder also will be allowed to take an ordinary loss in respect of the excess, if any, of the adjusted basis of its common shares over the fair market value of its common shares at the end of its taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). The U.S. Holder’s basis in its common shares will be adjusted to reflect any such income or loss amounts, and any further gain recognized on a sale or other taxable disposition of the common shares in a taxable year in which we are treated as a PFIC will be treated as ordinary income.

The mark-to-market election is available only for “marketable stock,” which is stock that is traded in other than de minimis quantities on at least 15 days during each calendar quarter (“regularly traded”) on a qualified stock exchange or other market, as defined in the applicable Regulations. For these purposes, our common shares are treated as listed on a qualified exchange or other market since their listing on the NYSE. U.S. Holders should consult their tax advisors regarding the availability and tax consequences of a mark-to-market election in respect of our common shares under their particular circumstances.

If we are a PFIC and, at any time, have a non-U.S. subsidiary that is classified as a PFIC, U.S. Holders would be deemed to own a portion of the shares of such lower-tier PFIC, and could incur liability for the deferred tax and interest charge described above if we receive a distribution from, or dispose of all or part of our interest in, the lower-tier PFIC or the U.S. Holders otherwise were deemed to have disposed of an interest in the lower-tier PFIC. In addition, a mark-to-market election would not be available with respect to such lower-tier PFIC. U.S. Holders should consult their tax advisors regarding the application of the PFIC rules to any of our subsidiaries.

We do not intend to prepare or provide the information necessary for a U.S. Holder to make and maintain a qualified electing fund election. U.S. Holders should consult their tax advisors regarding the potential tax consequences to such holder if we are or become a PFIC and the possibility of making certain PFIC elections.

If a U.S. Holder owns our common shares during any taxable year that we are a PFIC, the holder must generally file an annual IRS Form 8621 or such other form as is required by the U.S. Treasury Department. U.S. Holders should consult their tax advisors regarding the potential tax consequences to such holder if we are or become a PFIC, including the possibility of making a mark-to-market election.

#### ***Information with Respect to Foreign Financial Assets***

A U.S. Holder that holds certain foreign financial assets (which may include our common shares) other than in an account at certain financial institutions are required to report their holdings to the IRS. Failure to report such information, if required, may result in substantial penalties. U.S. Holders should consult their tax advisors regarding the application of these reporting requirements, and the penalties for non-compliance.

### **ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

In addition to the risks inherent in our operations, we are exposed to a variety of financial risks, such as market risk (including interest rate risk and currency risk), and credit risk.

Further information on our exposure to various market risks arising on our financial instruments is included in Note 15—“Financial Instruments” of our consolidated financial statements included herein. Credit risk exposures are monitored on a counterparty basis, with all new transactions subject to senior management approval. Credit risk is mitigated by the charter hires being payable 15 days in advance, and all charterers are established companies.

The following analysis provides quantitative information regarding our exposure to interest rate risk, foreign currency exchange rate risk, and shipping index risk.

*Interest rate risk.* The acquisition of our vessels is mainly financed by leasing arrangements with Avic, CCBFL and Jiangsu. The bareboat charter rate per day under the leasing arrangements are fixed for the duration of the arrangement except for the scrubber financing on the first four vessels financed by Avic. The scrubber financing is subject to interest at a rate of Overnight SOFR plus a margin and credit adjustment spread. As of December 31, 2025, the amount of our outstanding debt subject to variable interest rates was \$0.4 million. The impact of a one percentage point increase in interest rate is not expected to be material.

*Foreign currency risk.* The majority of our transactions, assets and liabilities are denominated in United States dollars. However, we incur expenditure in currencies other than United States dollars, mainly in Norwegian Kroner (NOK) and British Pounds (GBP). There is a risk that currency fluctuations in transactions incurred in currencies other than the functional currency will have a negative effect on the value of our cash flows. We are then exposed to currency fluctuations and we may enter into foreign currency swaps to mitigate such risk exposures. The company has not entered into derivative agreements to mitigate the risk of these fluctuations.

Based on our expenses in the year ended December 31, 2025, a 10% depreciation of the U.S. Dollar against the Norwegian Kroner would have increased our expenses by \$0.3 million, but a 10% depreciation of the U.S. Dollar against the British Pound would have no material impact. The sensitivity analysis is based on a ten percent increase applied against the foreign currency transactions separately for Norwegian Kroner and British Pound transactions for the period thereby assuming foreign exchange rates change in a parallel manner, and assumes unchanged market conditions other than exchange rates, such as volatility and interest rates. For this reason, it is purely indicative.

*Shipping index risk.* For the year ended December 31, 2025, certain vessels of the Company were on index-linked charters and earned revenues based on the Baltic 5TC index (BCI) rates. Based on our time charter revenues on index-linked charters for 2025, a 10% reduction in the BCI rates would have decreased our time charter revenues by \$8.5 million.

## **ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES**

### **A. Debt Securities**

Not applicable.

### **B. Warrants and Rights**

Not applicable.

### **C. Other Securities**

Not applicable.

### **D. American Depositary Shares**

## **PART II**

## **ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

None.

#### **ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS**

None.

#### **ITEM 15. CONTROLS AND PROCEDURE**

##### **a) Disclosure Controls and Procedures**

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision of our Company's Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of our disclosure controls and procedures, pursuant to Rule 13a-15(b) and 15d-15(b) of the Exchange Act of 1934, as of December 31, 2025. Our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2025.

##### **(b) Management's annual report on internal controls over financial reporting**

In accordance with the requirements of Rule 13a-15 of the Securities Exchange Act of 1934, the following report is provided by management in respect of our internal control over financial reporting. As defined in the Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, internal control over financial reporting is a process designed by, or under the supervision of, an issuer's Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, and effected by the issuer's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with U.S. GAAP and includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions and dispositions of assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with U.S. GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and our directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our published consolidated financial statements in accordance with U.S. GAAP.

In connection with the preparation of our annual "Consolidated Financial Statements," management has undertaken an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2025, based on criteria established in Internal Control - Integrated Framework (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Management's assessment included an evaluation of the design of our internal control over financial reporting and testing of the operational effectiveness of those controls. Based on this assessment, management has concluded and hereby reports that as of December 31, 2025, our internal control over financial reporting was effective.

##### **(c) Changes in internal control over financial reporting**

There were no changes in our internal control over financial reporting during the period covered by this Annual Report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Based on the qualifications and relevant experience described in “Item 6. Directors, Senior Management and Employees—A. Directors and Senior Management,” our board of directors has determined that Jehan Mawjee qualifies as audit committee financial expert and is independent in accordance with SEC Rule 10A-3 pursuant to Section 10A of the Securities Exchange Act of 1934. Jehan Mawjee is chairperson of our audit committee.

## ITEM 16B. CODE OF ETHICS

We have a Code of Business Conduct and Ethics, applicable to our employees, directors and officers, which is designed to promote legal and regulatory compliance with applicable anti-corruption laws as well as sanctions and embargo laws and regulations (including U.S. Department of the Treasury Office of Foreign Assets Control requirements). Our Code of Business Conduct and Ethics covers a range of matters including the handling of conflicts of interest, compliance with applicable laws, rules and regulations of the countries where we do business, and the reporting of misconduct, as well as other corporate values such as transparency, fairness and equal opportunity. Our Code of Business Conduct and Ethics is publicly available on our website at [www.himalaya-shipping.com](http://www.himalaya-shipping.com) and is reviewed periodically. We will provide any persons, free of charge, a copy of our code of ethics upon written request to our registered office. Any amendments to the code, or any waivers of its requirements, may be made by our Board of Directors and will be promptly disclosed as required by applicable U.S. federal securities laws and the corporate governance rules of NYSE.

## ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Our principal accountant for 2025 and 2024 was PricewaterhouseCoopers AS (PCAOB ID 01318).

### (a) Audit Fees

The following table sets forth, for the two most recent fiscal years, the aggregate fees billed for professional services rendered by the principal accountant, PricewaterhouseCoopers AS for the audit of our annual financial statements and services provided by the principal accountant in connection with statutory and regulatory filings or engagements.

*(in millions of \$)*

Fiscal year ended December 31, 2025	0.4
Fiscal year ended December 31, 2024	0.4

### (b) Audit-Related Fees

The following table sets forth, for the two most recent fiscal years, the aggregate fees billed for assurance and related services, not included under “(a) Audit Fees,” rendered by the principal accountant.

*(in thousands of \$)*

Fiscal year ended December 31, 2025	—
Fiscal year ended December 31, 2024	—

### (c) Audit Committee’s Pre-Approval Policies and Procedures

Our board of directors has adopted pre-approval policies and procedures in compliance with paragraph (c)(7)(i) of Rule 2-01 of Regulation S-X that require our board of directors to approve the appointment of our independent auditor before such auditor is engaged and to approve each of the audit and non-audit related services to be provided by such auditor. All services provided by the principal auditor in 2025 and 2024 were approved by our board of directors pursuant to the pre-approval policy.

#### **ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

Not applicable.

#### **ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

Not applicable.

#### **ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT**

Not applicable.

#### **ITEM 16G. CORPORATE GOVERNANCE**

In general, under NYSE corporate governance standards, foreign private issuers, as defined under the Exchange Act, are permitted to follow home country corporate governance practices instead of the corporate governance practices of NYSE. Accordingly, we follow certain corporate governance practices of our home country, Bermuda, in lieu of certain of the corporate governance requirements of NYSE. A brief summary of those differences is provided as follows:

- The NYSE requires U.S. listed companies to have a compensation committee composed entirely of independent directors and a committee charter addressing the purpose, responsibility, rights and performance evaluation of the committee. We will rely on home country practice in Bermuda to be exempted from certain of the corporate governance requirements of the NYSE, such that we do not have a standing compensation committee. In lieu of a compensation committee, our Board is responsible for establishing the executive officers' compensation and benefits including our equity compensation plan.
- Our bye-laws do not require shareholder approval for the issuance of shares (i) in connection with the acquisition of stock or assets of another company; (ii) when it would result in a change of control; (iii) when a share option or purchase plan is to be established or materially amended or other equity compensation arrangement made or materially amended, pursuant to which shares may be acquired by officers, directors, employees, or consultants; or (iv) in connection with a transaction (other than a public offering) involving the sale, issuance or potential issuance of shares at a price less than market value.

If at any time we cease to be a "foreign private issuer" under the rules of NYSE and the Exchange Act, as applicable, our Board of Directors will be required to comply with corporate governance rules.

#### **ITEM 16H. MINE SAFETY DISCLOSURE**

Not applicable.

#### **ITEM 16I. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS**

Not applicable.

#### **ITEM 16J. INSIDER TRADING POLICY**

We have adopted insider trading policies governing the purchase, sale, and/or other dispositions of our securities by employees, executive officers, directors and consultants that is reasonably designed to promote compliance with applicable insider trading laws, rules and regulations, and any applicable listing standards. Our insider trading policy is included as Exhibit 11.1 of this annual report.

In addition, with regard to any trading in our own securities, it is our policy to comply with the federal securities laws and the applicable exchange listing requirements.

## **ITEM 16K. CYBERSECURITY**

### ***Risk Management and Strategy***

We have a risk-based approach to identify and assess the cybersecurity threats that could affect our business and information systems, which is integrated in our overall enterprise risk management system and processes. A third party IT service provider supports us through their fully managed platform service which includes end-to-end operational responsibility that includes devices, network and security to identity and access management, 24/7 support and cloud services. Our IT service provider also monitors cybersecurity risks on an ongoing basis through regular vulnerability scans and penetration tests, results of which are available via a portal or direct notifications given to customers.

As we outsource IT services to a third party IT service provider, our cybersecurity risk management includes policies for:

- **Selection.** Third party IT service provider should have policies and processes that align with our own security policies and processes, legal or regulatory obligations, data preservation expectations as well as demonstrate an adherence to industry best practices and standards.
- **Monitoring.** We obtain and review ISAE 3402 reports to ensure that the IT service provider's policies and processes continue to be effective and aligned with our policies and processes.
- **Reporting.** Third party must notify us without undue delay regarding security incidents which impact or potentially impact the Company.

We are also a member of the Norwegian Maritime Cyber Resilience Centre ("NORMA Cyber"). NORMA Cyber provides information sharing to its members about threat assessments, intelligence reports, vulnerability notifications and mitigation advice, dark web monitoring, vulnerability scanning, providing alerts to members when valid threats are identified, as well as incident and crisis support.

Based on the information we have, cybersecurity threats have not materially affected and we believe are not reasonably likely to materially affect us, including our business strategy, results of operations or financial condition. However, we cannot predict the scope and impact of any future incident. See "Item 3. Key Information—D. Risk Factors" for more information on cybersecurity risks.

### ***Governance***

Our board of directors oversees the Company's risk management process, including on cybersecurity risks, directly. The board oversees the Company's risk management program, which focuses on the most significant risks the Company faces in the short-, intermediate-, and long-term timeframe.

The Company takes a risk-based approach to cybersecurity and has implemented cybersecurity policies throughout its operations that are designed to address cybersecurity threats and incidents. In particular, our management team is responsible for the selection and monitoring of our IT service provider. Our management team also assesses any cybersecurity risks identified by our IT service provider and NORMA Cyber by monitoring and reviewing any specific incident report and general information shared about threat assessments and vulnerability notifications. In addition, the management team communicates these with the Board on a quarterly basis.

**HIMALAYA SHIPPING LTD.**  
**INDEX TO AUDITED CONSOLIDATED FINANCIAL STATEMENTS**

	Page
Report of Independent Registered Public Accounting Firm (PCAOB ID 01318)	<a href="#">F-2</a>
Consolidated Statements of Operations for the periods ended December 31, 2025, 2024 and 2023	<a href="#">F-3</a>
Consolidated Balance Sheets as of December 31, 2025 and 2024	<a href="#">F-4</a>
Consolidated Statements of Cash Flows for the periods ended December 31, 2025, 2024 and 2023	<a href="#">F-5</a>
Consolidated Statements of Changes in Equity for the periods ended December 31, 2025, 2024 and 2023	<a href="#">F-7</a>
Notes to the Audited Consolidated Financial Statements	<a href="#">F-8</a>

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Himalaya Shipping Ltd.

### *Opinion on the Financial Statements*

We have audited the accompanying consolidated balance sheets of Himalaya Shipping Ltd. and its subsidiaries (the “Company”) as of December 31, 2025 and December 31, 2024, and the related consolidated statements of operations, of changes in shareholders’ equity and of cash flows for each of the three years in the period ended December 31, 2025, including the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2025 in conformity with accounting principles generally accepted in the United States of America.

### *Basis for Opinion*

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers AS

Oslo, Norway  
March 12, 2026

We have served as the Company’s auditor since 2021.

**HIMALAYA SHIPPING LTD.**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**1. General information**

Himalaya Shipping Ltd. was incorporated in Bermuda on March 17, 2021. We are listed on the New York Stock Exchange and on the Euronext Oslo Bors under the ticker HSHP. Our shares started trading on Euronext Oslo Bors on June 3, 2025, following the transfer of our listing from Euronext Expand. Himalaya Shipping Ltd. was founded for the purpose of owning high-quality Newcastlemax dry bulk vessels, each with capacity in the range of 210,000 dead weight tons (“dwt”) which are equipped with the latest generation dual fuel LNG technology. As of December 31, 2025, we have a total of twelve vessels in operation. The Company has entered into sale and leaseback financing arrangements for its vessels which are described in Note 14.

As used herein, and unless otherwise required by the context, the term “Himalaya Shipping” refers to Himalaya Shipping Ltd. and the terms “Company,” “we,” “Group,” “our” and words of similar import refer to Himalaya Shipping and its consolidated companies. The use herein of such terms as “group,” “organization,” “we,” “us,” “our” and “its” or references to specific entities, is not intended to be a precise description of corporate relationships.

*Going concern*

The financial statements have been prepared on a going concern basis.

As of December 31, 2025, the Company has cash and cash equivalents of \$32.4 million. In addition, the Company has \$10.0 million available to drawdown under the Drew Revolving Credit Facility.

**2. Basis of preparation and significant accounting policies**

**Basis of Preparation**

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Amounts are presented in millions (with one decimal) of United States Dollar (“US dollar or \$”), unless otherwise stated.

The accounting policies set out below have been applied consistently to all periods in these consolidated financial statements.

The principal accounting policies are set out below.

*Principle of Consolidation*

The consolidated financial statements include our assets and liabilities and of our wholly owned subsidiaries. All intercompany balances and transactions have been eliminated upon consolidation.

*Fair value measurement*

We have determined the estimated fair value amounts presented in these consolidated financial statements using available market information and appropriate methodologies. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. The estimates presented in these consolidated financial statements are not necessarily indicative of the amounts that we could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

We account for fair value measurement in accordance with the accounting standards guidance using fair value to measure assets and liabilities. The guidance provides a single definition for fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities.

*Reporting and functional currency*

The Company and its subsidiaries use the U.S. dollar as their functional currency as the majority of their expenses and financing are denominated in U.S. dollars. Accordingly, the Company's reporting currency is U.S. dollars. Transactions in foreign currencies are translated into U.S. dollars at the rates of exchange in effect at the date of transaction. Gains and losses on foreign currency transactions are included in "Other financial expenses" in the Consolidated Statements of Operations.

### ***Lease accounting***

When a contract contains a lease, which is assessed at inception, we make an assessment of the lease classification in accordance with the criteria under ASC 842 Leases. An agreement will be classified as a sales-type lease for a lessor (or a finance lease for a lessee) if any of the following conditions are met at lease commencement:

- ownership of the asset is transferred at the end of the lease term;
- the contract contains an option to purchase the asset which is reasonably certain to be exercised;
- the lease term is for a major part of the remaining useful life of the contract, although contracts entered into the last 25% of the underlying asset's useful life are not subject to this criterion;
- the present value of the lease payments and any residual value guarantees present represent substantially all of the fair value of the underlying asset; and
- the asset is heavily customized such that it could not be used for another use at the end of the term.

If none of these criteria are met for a lessor, the lease will be classified as a direct financing lease (if the present value of the sum of the lease payments and any residual value guarantees present, equals or exceeds substantially all of the fair value of the underlying asset and it is probable that the lessor will collect lease payments and any residual value guarantees), or an operating lease. If none of these criteria are met for a lessee, the lease will be classified as an operating lease.

The lease term is assessed at lease commencement. The existence of any purchase options, extension options, termination options and residual value guarantees, if any are disclosed. Agreements which include extension options are included in the lease term if we believe they are reasonably certain to be exercised by the lessee. Agreements which contain purchase options and termination options are included in the lease term if we believe they are reasonably certain to not be exercised by the lessee. An extension option or a termination option is included in the lease term if the exercise of the option is controlled by the lessor. The determination of whether options are reasonably certain considers whether the option creates an economic incentive.

### ***Lessor accounting***

Generally, lease accounting commences when the asset is made available to the counterparty, however, where a contract contains specific acceptance testing conditions, lease accounting will not commence until the asset has successfully passed the acceptance tests. We assess a lease under the modification guidance when there is a change to the terms and conditions of the contract that results in a change in the scope or the consideration of the lease.

For operating leases, costs directly associated with the execution of the lease or costs incurred after lease inception (the execution of the contract) but prior to the commencement of the lease that directly relates to preparing the asset for the contract (for example bunker costs), are capitalized and amortized to the Consolidated Statement of Operations over the lease term.

### ***Revenue recognition***

#### ***Time charter agreements***

The performance obligations in a time charter agreement will be satisfied over the term of the contract beginning when the vessel is delivered to the charterer until it is redelivered back to us. The time charter agreements are considered operating leases and therefore do not fall under the scope of ASC 606 Revenue from Contracts with Customers because (i) the vessel is an identifiable asset, (ii) we do not have substantive substitution rights, and (iii) the charterers have the right to control the use of the vessel during the term of the contract as they have full discretion over the ports visited, shipping routes and vessel speed, and derive the economic benefits from such use. Our operating revenues are generated from time charters. Time charter agreements are accounted for as operating leases in accordance with ASC 842 Leases and related interpretations.

Revenues include minimum lease payments under time charters. Revenues generated from time charters, which we generally classify as operating leases, are recorded over the term of the charter as the service is provided. Fixed revenue from operating leases is accounted for on a straight-line basis over the term of the charter. When a time charter agreement is linked to an index, we recognize revenue for the applicable period based on the actual index for that period.

We defer upfront net revenue payments (for example positioning fees) for operating leases to the Consolidated Balance Sheet and amortize to the Consolidated Statements of Operations over the lease term.

During the years ended December 31, 2025, 2024 and 2023, we had revenues from fixed and index linked time charter agreements.

For our operating leases, where the timing and pattern of transfer for the non-lease component and the associated lease component to the lessees are the same, we elect the practical expedient which allows the Company to treat the lease and non-lease components as a single lease component.

Under time charters, voyage expenses such as bunker expenses, port charges and canal tolls are generally paid by our customers. Voyage related expenses, principally fuel, may also be incurred when positioning or repositioning the vessel before or after the period of time charter and during periods when the vessel is not under charter or is off-hire, for example when the vessel is undergoing repairs. These expenses are recognized as incurred.

In a time charter contract, we are responsible for all the costs incurred for running the vessels. Vessel operating expenses, which are recognized when incurred, include crewing, repairs and maintenance, insurance, stores, lube oils, communication expenses and third-party management fees.

#### ***Share-based compensation***

Our share-based compensation includes share options. The cost of equity settled transactions is measured by reference to the fair value at the date on which the share options are granted. The fair value of share options is estimated using the Black-Scholes Option pricing method. The fair value of the share options is recognized in General and administrative expense in the Consolidated Statements of Operations, with a corresponding increase in equity over the period the share options vest. We amortize share-based compensation awards on a straight-line basis over the period during which the individuals are required to provide service in exchange for the reward - the requisite service (vesting) period. No compensation costs are recognized for share-based compensation for which the individuals do not render the requisite service. We account for forfeitures as they occur.

#### ***Equity method investment***

Investments in entities over which we have significant influence, but do not meet the criteria for consolidation, are accounted for by the equity method of accounting. Under this method, we record our investment at cost, including transaction costs, and adjust the carrying amount for our share of the income or losses from these equity method investment subsequent to the date of the investment and report the recognized earnings or losses in the Consolidated Statements of Operations. Dividends received from an equity method investment reduce the carrying amount of the investment. We allocate the excess, if any, of the purchase price of the investment acquired over our proportionate share of the carrying value of the underlying net assets, or basis difference, across the assets and liabilities of the investee, with the residual assigned to goodwill. The basis difference assigned to amortizable net assets will then be amortized through our Consolidated Statements of Operations as part of the "Income (Loss) from equity method investment."

Investments in equity method investment are assessed for other-than-temporary impairment whenever changes in the facts and circumstances indicate that the fair value may be below the carrying value of our investment. Where determined to be other-than-temporary impairment, an impairment loss in the period will be recognized in the line item "Income (Loss) from equity method investment" in the Consolidated Statements of Operations.

### ***Vessels and equipment***

Vessels and equipment are stated at cost less accumulated depreciation. The cost of vessels and equipment, less the estimated residual values, is depreciated on a straight-line basis over the assets' remaining useful economic lives. Management estimates the residual values of our vessels based on historical 10-year scrap steel index prices multiplied by the weight of the ship noted in lightweight ton. Residual values are periodically reviewed and revised to recognize changes in conditions, new regulations or other reasons. The vessel's useful life applied for depreciation is 25 years.

Refurbishment costs incurred during the period are capitalized as part of vessels and equipment and depreciated over the vessels' remaining useful economic lives. Refurbishment costs are costs that increase the capacity or improve the efficiency or safety of vessels and equipment.

Cost of new equipment or expenditures for modifications to the vessel which enhance or increase the operational efficiency and functionality of the vessel are capitalized and depreciated over the remaining useful life of the vessel. Expenditures of a routine repairs and maintenance nature that do not improve the operating efficiency or extend the useful lives of the vessels are expensed as incurred.

### ***Newbuildings***

The carrying value of the vessels under construction ("Newbuildings") represents the accumulated costs as of the balance sheet date which we have had to pay by way of purchase installments and other capital expenditures plus capitalized interest. Capitalization ceases and depreciation commences once the asset is completed and available for its intended use.

### ***Drydocking***

Maintenance of class certification requires expenditures and can require taking a vessel out of service from time to time for survey, repairs or modifications to meet class requirements. When delivered, the Group's vessels can generally be expected to have to undergo a class survey once every five years. The Group's vessels have been and continue to be built to the classification requirements of ABS and the Liberian Ship Register. We will recognize the cost of a drydocking at the time the drydocking takes place. The Group will capitalize a substantial portion of the costs incurred during drydocking, including the survey costs and amortize those costs on a straight-line basis from the time of completion of a drydocking or intermediate survey until the next scheduled drydocking or intermediate survey. Normal vessel repair and maintenance costs will be expensed when incurred.

### ***Impairment of assets***

We continually monitor events and changes in circumstances that could indicate that the carrying amounts of our long-lived assets may not be recoverable. At least annually, and if such events or changes in circumstances are present, we assess the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through future undiscounted expected cash flows.

The carrying values of the Company's vessels and newbuildings may not represent their fair market value at any point in time since the market prices of second-hand vessels and the cost of newbuildings tend to fluctuate with changes in charter rates. Historically, both charter rates and vessel values tend to be cyclical. The Company assesses recoverability of the carrying value of each asset or newbuilding on an individual basis by estimating the future undiscounted cash flows expected to result from the asset, including any remaining construction costs for newbuildings and disposal. If the future net undiscounted cash flows are less than the carrying value of the asset, or the current carrying value plus future newbuilding commitments, an impairment loss is recorded equal to the difference between the vessel's or newbuilding's carrying value and the respective fair value.

### ***Interest cost capitalized***

Interest costs are capitalized on all qualifying assets that require a period of time to get them ready for their intended use. Qualifying assets consisted of Newcastlemax dry bulk vessels under construction. The interest capitalized is calculated using our weighted average cost of borrowings, from commencement of the asset development until substantially all the activities necessary to prepare the asset for its intended use are complete. The Company does not capitalize amounts beyond the actual interest expense incurred in the period.

### ***Sale and leaseback transactions***

When a sale and leaseback transaction does not qualify for sale accounting, the transaction is accounted for as a financing transaction by the seller-lessee. To account for a failed sale and leaseback transaction as a financing arrangement, the seller-lessee does not derecognize the underlying asset; the seller-lessee continues depreciating the asset as if it was the legal owner. The sales proceeds received from the buyer-lessor are recognized as a financial liability. A seller-lessee will make rental payments under the leaseback. These payments are allocated between interest expense and principal repayment of the financial liability. The amount allocated to interest expense is determined by the incremental borrowing rate or imputed interest rate.

### ***Deferred finance charges***

Costs associated with long-term financing, including debt arrangement fees, are deferred and amortized over the term of the relevant loan using the effective interest method. Amortization of loan costs is included in “Interest expenses” in the Consolidated Statements of Operations. If a loan is repaid early, any unamortized portion of the related deferred charge is charged against “Interest expenses” in the period in which the loan is repaid. If a loan is extinguished other than by repayment, any unamortized portion of the related deferred charge is recognized as a loss on extinguishment. Deferred charges are presented as a deduction from the corresponding liability in the Consolidated Balance Sheets.

### ***Earnings per share***

Basic earnings per share (“EPS”) is computed based on the income available to common stockholders and the weighted average number of shares outstanding. Diluted earnings per share includes the effect of the assumed conversion of potentially dilutive instruments, which for the Company includes share options. Such potentially dilutive common shares are excluded when the effect would be to increase earnings per share or reduce a loss per share (anti-dilutive).

### ***Cash and cash equivalents***

Cash comprises cash on hand and cash in the Company’s bank accounts. Demand and time deposits and highly liquid, low risk investments with original maturities of three months or less at the date of purchase are considered equivalent to cash.

### ***Trade Receivables***

Trade receivables are presented net of allowances for expected credit losses. At each balance sheet date, all potentially uncollectible accounts are assessed individually for the purpose of determining the appropriate allowance for expected credit losses. Our trade receivables have short maturities so we have considered that forecasted changes to economic conditions will have an insignificant effect on the estimate of the allowance, except in extraordinary circumstances.

### ***Inventories***

Inventories, which are comprised principally of fuel and lubricants, are stated at the lower of cost and net realizable value. Cost is determined on a first-in, first-out basis.

### ***Current and long-term classification***

Assets and liabilities are classified as current assets and liabilities respectively, if their maturity is within one year of the balance sheet date. Otherwise, they are classified as non-current assets and liabilities.

### ***Related parties***

Parties are related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also related if they are subject to common control or common significant influence.

### ***Equity issuance costs***

Equity issuance costs are recorded as a reduction of additional paid-in-capital when the equity offering is effective. Prior to the effective date of an equity offering, specific incremental costs directly attributable to a proposed or actual offering of securities are deferred and recorded as “Other current assets” in the Consolidated Balance Sheets. Should the Company cancel the planned equity offering, these costs will be charged to the Consolidated Statements of Operations as an expense.

### ***Income taxes***

Income taxes are based on a separate return basis. We provide for income taxes based on our income and statutory tax rates in effect in the jurisdictions in which we operate.

Deferred tax assets and liabilities are based on temporary differences that arise between carrying values used for financial reporting purposes and amounts used for taxation purposes of assets and liabilities and the future tax benefits of tax loss carry forwards.

### ***Use of estimates***

The preparation of financial statements in accordance with U.S. GAAP requires that management make estimates and assumptions affecting the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In determining whether any indicators of impairment on the vessels exist, we consider estimates in respect of residual value, charter rates, vessel operating expenses and drydocking requirements.

A significant input used in determining the fair value of debt is an appropriate discount rate.

## **3. Recently issued accounting standards**

### ***Adoption of new accounting standards***

In December 2023, the FASB issued ASU 2023-09 (Topic 740 Income Taxes): Improvements to Income Tax Disclosures requiring annual disclosure of (1) specific categories in the rate reconciliation; and (2) additional information for reconciling items if the effect of those reconciling items is equal to or greater than 5% of the resulting amount by multiplying pretax income (or loss) by the applicable statutory income tax rate. An entity is also required to provide the nature, effect and underlying causes of the reconciling items, and the judgment used in categorizing them, if not otherwise evident.

ASU 2023-09 became effective for fiscal year ended December 31, 2025. The amendments did not impact the Company’s financial statement disclosures as income tax related accounts and disclosures are immaterial to the financial statements. Management will continue to monitor the Company’s tax position and will provide the required disclosures in future periods if income tax expense or related reconciling items become material.

### ***Accounting pronouncements that have been issued but not yet adopted***

The following table provides a brief description of other recent accounting standards that have been issued but not yet adopted as of December 31, 2025:

Standard	Description	Date of adoption	Expected Effect on our Consolidated Financial Statements or Other Significant Matters
<i>ASU 2024-03 Income Statement - Reporting Comprehensive Income - Expense Disaggregation Disclosures (Subtopic 220-40)</i>	<p>The amendments require disclosure, in the notes to the financial statements of specified information about certain costs and expenses. The amendments require that at each interim and annual reporting period, an entity disclose the amount of:</p> <ul style="list-style-type: none"> <li>(a) purchase of inventory;</li> <li>(b) employee compensation;</li> <li>(c) depreciation;</li> <li>(d) intangible asset amortization; and</li> <li>(e) depreciation, depletion, and amortization recognized as part of oil and gas producing activities.</li> </ul> <p>The amendment also requires disclosure of the qualitative description of the amounts remaining in the relevant expense captions that are not separately disaggregated quantitatively. In addition, disclosure of the entity's definition of selling expenses and its total amount are required.</p>	January 1, 2027	Under evaluation
<i>ASU 2025-01 Income Statement - Reporting comprehensive Income - Expense Disaggregation Disclosures (Subtopic 220-40): Clarifying the Effective Date</i>	<p>The amendment in this Update amends the effective date of Update 2024-03 to clarify that all public business entities are required to adopt the guidance in annual reporting periods beginning after December 15, 2026, and interim periods within annual reporting periods beginning after December 15, 2027.</p>	January 1, 2027	Under evaluation
<i>ASU 2025-03 Business Combinations (Topic 805) and Consolidation (Topic 810): Determining the Accounting Acquirer in the Acquisition of a Variable Interest Entity</i>	<p>The amendments in this Update require an entity involved in an acquisition transaction effected primarily by exchanging equity interests when the legal acquiree is a variable interest entity that meets the definition of a business to consider the factors in paragraphs 805-10-55-12 through 55-15 to determine which entity is the accounting acquirer. Entities are required to adopt the Update in annual reporting periods beginning after December 15, 2026 and interim reporting periods within those annual reporting periods.</p>	January 1, 2027	Under evaluation
<i>ASU 2025-05 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses for Accounts Receivable and Contract Assets</i>	<p>The amendments in this Update provide all entities with a practical expedient when estimating expected credit losses for current accounts receivable and current contract assets arising from transaction accounted for under Topic 606. The practical expedient assumes that current conditions as of the balance sheet date do not change for the remaining life of the asset.</p>	January 1, 2026	Under evaluation
<i>ASU 2025-11 Interim Reporting (Topic 270): Narrow-Scope Improvements</i>	<p>The amendments in this update provide clarity about current requirements, the types of interim reporting, and the form and content of interim financial statements in accordance with GAAP.</p> <p>The amendments also include a disclosure principle that requires entities to disclose events since the end of the last annual reporting period that have a material impact on the entity.</p>	January 1, 2028	Under evaluation
<i>ASU 2025-12 Codification Improvements</i>	<p>The amendments represent changes to the Codification that clarify, correct errors, or make minor improvements to make the Codification easier to understand and apply.</p>	January 1, 2027	Under evaluation

The FASB have issued further updates not included above. We do not currently expect any of these updates to have a material impact on our Audited Consolidated Financial Statements and related disclosures either on transition or in future periods.

#### **4. Income taxes**

##### *Bermuda*

The Company is incorporated in Bermuda. Under current Bermuda law, we are not required to pay taxes in Bermuda on ordinary income or capital gains. We have received written assurance from the Minister of Finance in Bermuda that, in the event of any such taxes being imposed, the Company will be exempted from taxation until March 31, 2035.

On December 27, 2023, Bermuda enacted the Corporate Income Tax Act (the “CIT Act”). Entities subject to tax under the CIT Act are the Bermuda constituent entities of multi-national groups. A multi-national group is defined under the CIT Act as a group with entities in more than one jurisdiction with consolidated revenues of at least €750 million for two out of the last four fiscal years. If Bermuda constituent entities of a multi-national group are subject to tax under the CIT Act, for taxable years beginning on or after January 1, 2025, Bermuda will impose a 15% corporate income tax, as determined in accordance with and subject to the adjustments set out in the CIT Act (including in respect of foreign tax credits applicable to the Bermuda constituent entities).

While we have a tax-exempt status in Bermuda until March 31, 2035, Bermuda specifically provided that the CIT Act applies notwithstanding any assurance given pursuant to the Exempted Undertakings Tax Protection Act 1966 (the “EUTP Act”). Based on a number of operational, economic and regulatory assumptions, we do not expect to have consolidated revenue sufficient for us to fall within scope of the CIT Act in the near future. We will monitor the developments on the Bermuda internal regulations with regards to the CIT Act implementation. To the extent our consolidated revenue is sufficient for us to be within the CIT Act thresholds, we may be subject to taxation in Bermuda. If we are subject to taxation in Bermuda under the CIT act, our international shipping income may be excluded from taxation if we can demonstrate either strategic or commercial management in Bermuda.

##### *Liberia*

The vessel owning companies are not subject to tax on international shipping income.

##### *United Kingdom*

Taxable income in the United Kingdom is generated by our UK subsidiary. The statutory tax rate in the United Kingdom as of December 31, 2025 was 25%.

#### **5. Segment information**

We have one reportable segment as our chief operating decision maker (“CODM”), being our Board of Directors, measures performance based on our overall return to shareholders based on consolidated net income as reported in our Consolidated Statements of Operations. The CODM does not review a measure of operating result at a lower level than the consolidated group. The measure of segment assets is reported on the Consolidated Balance Sheets as total consolidated assets. The CODM reviews quarterly variances of consolidated net income and total consolidated assets, short-term and long-term market trends and cash flow forecasts in making resource allocation decisions.

Segment revenue, profit and significant segment expenses are as follows:

<i>(in millions of \$)</i>	<b>Year ended December 31, 2025</b>	<b>Year ended December 31, 2024</b>	<b>Year ended December 31, 2023</b>
Total operating revenues	131.9	123.6	36.7
Less:			
Crew costs	(15.6)	(14.0)	(4.9)
Other vessel operating expenses <sup>(1)</sup>	(12.4)	(9.8)	(3.7)
Voyage expenses and commissions	(1.6)	(1.6)	(0.6)
General and administrative expenses <sup>(2)</sup>	(4.9)	(5.0)	(3.8)
Depreciation	(29.2)	(26.5)	(9.1)
Income/(Loss) from equity method investment	—	—	—
Interest income	1.0	1.0	0.8
Interest expense, net of amounts capitalized	(51.4)	(46.6)	(13.6)
Other financial income (expenses), net	(0.1)	—	(0.3)
Income tax (expenses)	—	—	—
Segment and consolidated net income (loss)	<u>17.7</u>	<u>21.1</u>	<u>1.5</u>

<sup>(1)</sup> Other vessel operating expenses include repairs and maintenance, spares, stores and consumables, lubricating oil, vessel insurance, services and subscriptions, and vessel management fees.

<sup>(2)</sup> General and administrative expenses include directors and officers insurance, management fees, audit and accounting fees, administrative salaries, directors' fees, legal fees, listing fees, share based compensation costs, and other administrative expenses.

Revenues from each of the following customers accounted for over 10% of our consolidated revenues:

<i>(in millions of \$)</i>	<b>Year ended December 31, 2025</b>		<b>Year ended December 31, 2024</b>		<b>Year ended December 31, 2023</b>	
Major commodity trading company	75.5	57 %	64.6	52 %	14.9	41 %
Commodity and energy transition company	22.3	17 %	24.0	19 %	13.1	35 %
Multi-modal transport company	22.8	17 %	28.4	23 %	8.7	24 %

Our vessels operate on a worldwide basis and are not restricted to specific locations. Accordingly, it is not possible to allocate the assets of these operations to specific geographical locations.

## 6. Earnings per share

The computation of basic earnings per share ("EPS") is based on the weighted average number of shares outstanding during the period. The assumed conversion of potentially dilutive instruments which are 620,000 share options outstanding as at December 31, 2023 does not have an impact on our weighted average number of share outstanding used in calculating diluted EPS.

The dilutive impact of the assumed conversion of potentially dilutive instruments which are 900,000 share options and 800,000 share options outstanding as at December 31, 2025 and 2024, respectively, is shown in the table below:

<i>(in millions of \$ except share and per share data)</i>	<b>Year ended December 31, 2025</b>	<b>Year ended December 31, 2024</b>	<b>Year ended December 31, 2023</b>
Basic earnings per share	\$ 0.38	\$ 0.48	\$ 0.04
Diluted earnings per share	\$ 0.38	\$ 0.48	\$ 0.04
Net income	17.7	21.1	1.5
Issued common shares at end of the year	46,650,000	43,900,000	43,900,000
Weighted average number of shares outstanding for the period, basic	45,983,014	43,900,000	38,644,250
Dilutive impact of share options	33,167	8,667	—
Weighted average number of shares outstanding for the period, diluted	46,016,181	43,908,667	38,644,250

## 7. Interest expense

<i>(in millions of \$ )</i>	<b>Year ended December 31, 2025</b>	<b>Year ended December 31, 2024</b>	<b>Year ended December 31, 2023</b>
Interest expense, gross	(51.4)	(48.6)	(21.4)
Capitalized interest on newbuildings	—	2.0	7.8
Interest expense, net of amounts capitalized	<u>(51.4)</u>	<u>(46.6)</u>	<u>(13.6)</u>

## 8. Time charter revenues

### *Lessor*

Our twelve vessels are operating on time charter contracts, either on fixed rate or variable rate contracts, with remaining charter periods ranging from 3 to 12 months as of December 31, 2025. Under the variable rate contracts, the Company earns revenues based on the Capesize Index published by the Baltic Exchange plus a premium which varies depending on contract terms. In addition, the Company earns scrubber and LNG benefits based on the spread between high sulphur fuel oil and very low sulphur fuel oil or the spread between liquified natural gas and very low sulphur fuel oil.

The component of operating lease income is as follows:

<i>(in millions of \$ )</i>	<b>Year ended December 31, 2025</b>	<b>Year ended December 31, 2024</b>	<b>Year ended December 31, 2023</b>
Time charter revenues	131.9	123.6	36.7

Time charter revenues on our variable rate contracts amounted to \$89.9 million, \$77.4 million and \$22.6 million in the years ended December 31, 2025, 2024 and 2023, respectively.

The future undiscounted minimum lease payments to be received under our fixed rate contracts as of December 31, 2025 is as follows:

<i>(in millions of \$)</i>	
2026 <sup>(1)</sup>	15.3

(1) This includes variable rate contracts that were converted to fixed rate contracts from January 1, 2025 to March 31, 2025.

## 9. Prepaid expenses and other current assets

Prepaid expenses and other current assets comprise of:

<i>(in millions of \$)</i>	<b>December 31, 2025</b>	<b>December 31, 2024</b>
Prepaid interest <sup>(1)</sup>	2.2	2.3
Inventory	1.7	1.5
Other prepaid expenses <sup>(2)</sup>	1.4	1.3
Other current assets <sup>(3)</sup>	1.3	1.1
	<u>6.6</u>	<u>6.2</u>

<sup>(1)</sup> Prepaid interest relates to interest paid in advance for "Mount Norefjell," "Mount Ita," "Mount Etna" and "Mount Blanc". Bareboat payments on the lease for these vessels were paid in advance.

<sup>(2)</sup> Other prepaid expenses are primarily comprised of prepaid operating expenses, prepaid insurance and cash advance to crew for delivered vessels.

<sup>(3)</sup> Other current assets primarily relates to funding advanced to vessel managers.

## 10. Equity method investment

In August 2024, we acquired 12,000 shares in 2020 Bulkers Management AS ("2020 Bulkers Management") for a total consideration of \$0.3 million (NOK3.2 million). The acquired shares represent 40% of the issued shares of 2020 Bulkers Management. As the Company has the ability to exercise significant influence, we have accounted for our investment in 2020 Bulkers Management as an equity method investment.

The table below sets forth the carrying value of our equity method investment:

<i>(in millions of \$)</i>	<b>2025</b>	<b>2024</b>
As of January 1	0.3	—
Additions	—	0.3
Share options expense to employees of acquiree <sup>(1)</sup>	0.1	—
Equity in net income (loss) <sup>(2)</sup>	—	—
As of December 31	<u>0.4</u>	<u>0.3</u>

<sup>(1)</sup> This pertains to 40% of the share options granted by the Company to employees of 2020 Bulkers Management.

<sup>(2)</sup> Equity in net income (loss) from equity method investment for the years ended December 31, 2025 and 2024 amounted to \$7,000 and (\$11,000), respectively.

## 11. Newbuildings

The table below sets forth the carrying value of our newbuildings:

<i>(in millions of \$)</i>	2025	2024
As of January 1	—	132.6
Installment payments <sup>(1)</sup>	—	310.8
Capitalized interest	—	1.9
Other capitalized costs <sup>(2)</sup>	—	5.5
Reclassification to Vessels and equipment <sup>(3)</sup>	—	(450.8)
As of December 31	—	—

<sup>(1)</sup> Installment payments in the year ended December 31, 2024 include \$310.8 million for the fifth and sixth installments net of address commissions to New Times Shipyard for newbuildings “Mount Bandeira”, “Mount Hua”, “Mount Elbrus”, “Mount Denali”, “Mount Aconcagua” and “Mount Emai”. Of this amount, \$5.1 million relating to the sixth installments for “Mount Bandeira” and “Mount Hua” were paid in December 2023 in advance of their deliveries in January 2024 and were presented as “Other non-current assets” on the consolidated balance sheet as of December 31, 2023.

The Company drew down \$295.5 million in the year ended December 31, 2024 on the sale leaseback financing to fund these installments and the installment payments were made by CCBFL and Jiangsu (as these terms are defined in Note 14) on behalf of the Company.

<sup>(2)</sup> Other capitalized costs primarily includes direct costs associated with the supervision of our newbuilding program.

<sup>(3)</sup> “Mount Bandeira”, “Mount Hua”, “Mount Elbrus”, “Mount Denali”, “Mount Aconcagua” and “Mount Emai” were delivered in the year ended December 31, 2024 and their corresponding costs were reclassified to Vessels and equipment.

## 12. Vessels and equipment, net

<i>(in millions of \$)</i>	2025	2024
<b>Cost</b>		
As of January 1	888.6	437.8
Additions	—	450.8
<b>As of December 31</b>	<b>888.6</b>	<b>888.6</b>
<b>Depreciation</b>		
As of January 1	(35.6)	(9.1)
Charge for the year	(29.2)	(26.5)
<b>As of December 31</b>	<b>(64.8)</b>	<b>(35.6)</b>
<b>Net book value as of December 31</b>	<b>823.8</b>	<b>853.0</b>

The table below shows the dates the vessels were delivered to the Company:

<b>Vessel</b>	<b>Delivery date</b>
Mount Norefjell	March 2, 2023
Mount Ita	March 9, 2023
Mount Etna	April 13, 2023
Mount Blanc	May 31, 2023
Mount Matterhorn	July 13, 2023
Mount Neblina	August 29, 2023
Mount Bandeira	January 5, 2024
Mount Hua	January 8, 2024
Mount Elbrus	January 11, 2024
Mount Denali	April 19, 2024
Mount Aconcagua	June 6, 2024
Mount Emai	June 13, 2024

During the years ended December 31, 2025, 2024 and 2023, we considered whether indicators of impairment existed that could indicate that the carrying amounts of our vessels may not be recoverable, and concluded that there were no such indicators.

### 13. Accrued expenses

Accrued expenses comprise of:

<i>(in millions of \$)</i>	<b>December 31, 2025</b>	<b>December 31, 2024</b>
Accrued interest <sup>(1)</sup>	4.6	5.4
Accrued operating expenses	0.8	0.8
Cash distributions payable <sup>(2)</sup>	—	0.4
Other accrued expenses <sup>(3)</sup>	1.0	0.6
	<u>6.4</u>	<u>7.2</u>

<sup>(1)</sup> Accrued interest relates to unpaid interest on the sale and leaseback facilities for “Mount Bandeira”, “Mount Elbrus”, “Mount Hua”, “Mount Matterhorn”, “Mount Neblina”, “Mount Denali”, “Mount Aconcagua” and “Mount Emai”. Bareboat payments on the leases for these vessels are paid in arrears.

<sup>(2)</sup> In December 2024, the Board approved a cash distribution of \$0.01 per share for November 2024, which was paid in January 2025.

<sup>(3)</sup> Other accrued expenses include accruals for commissions, audit fees, legal fees and management fees.

## 14. Debt

<i>(in millions of \$)</i>	<b>Financing company</b>	<b>December 31, 2025</b>	<b>December 31, 2024</b>	<b>Maturity dates</b>
Vessel financing (Mount Norefjell)	AVIC	56.2	58.8	March 2030
Vessel financing (Mount Ita)	AVIC	56.2	58.8	March 2030
Vessel financing (Mount Etna)	AVIC	56.8	59.3	April 2030
Vessel financing (Mount Blanc)	AVIC	56.7	59.3	May 2030
Vessel financing (Mount Matterhorn)	CCBFL	58.3	60.5	July 2030
Vessel financing (Mount Neblina)	CCBFL	58.3	60.5	August 2030
Vessel financing (Mount Hua)	Jiangsu	59.5	61.6	January 2031
Vessel financing (Mount Bandeira)	Jiangsu	59.5	61.6	January 2031
Vessel financing (Mount Elbrus)	CCBFL	59.3	61.5	January 2031
Vessel financing (Mount Denali)	CCBFL	59.8	62.0	April 2031
Vessel financing (Mount Aconcagua)	CCBFL	60.0	62.0	June 2031
Vessel financing (Mount Emai)	CCBFL	60.0	62.0	June 2031
<b>Total debt, gross</b>		<b>700.6</b>	<b>727.9</b>	
Less: Deferred finance charges		(11.4)	(14.0)	
<b>Total debt, net of deferred finance charges</b>		<b>689.2</b>	<b>713.9</b>	
Less: Current portion of long-term debt, net of deferred finance charges		(23.6)	(24.3)	
<b>Long-term debt, net of deferred finance charges</b>		<b>665.6</b>	<b>689.6</b>	

The total debt, gross of deferred finance charges, as of December 31, 2025, is repayable as follows:

### Year ending December 31, 2025

*(in millions of \$)*

2026	26.1
2027	27.6
2028	29.6
2029	31.5
2030	303.6
Thereafter	282.2
<b>Total</b>	<b>700.6</b>

### *AVIC International Leasing Co., Ltd. (“AVIC”) – Sale and leaseback financing arrangements*

The Company has sale and leaseback arrangements with AVIC for “Mount Norefjell,” “Mount Ita,” “Mount Etna” and “Mount Blanc” accounted for as financing transactions. Upon delivery of the relevant vessels from New Times Shipyard in 2023, the vessels were sold to companies owned by AVIC and chartered back on seven-year bareboat charters which include purchase options each year from year 3 until the end of the bareboat period. The first purchase option in year 3 is at a price of \$56.9 million, declining to \$47.2 million after year 7.

In addition, AVIC partially financed the cost of installing scrubbers on the above vessels amounting to \$2.2 million for each vessel. This is repayable in advance in 12 quarterly installments of \$180,000 for each vessel, together with interest calculated as Overnight SOFR plus a margin of 4.5% and credit adjustment spread of 0.26161% from July 1, 2023. The last installment on the scrubber financing is repayable in February 2026.

Under the relevant financing agreements, payment of dividends or other distributions from each relevant subsidiary to the Company will only be allowed if immediately following such payment or distribution there will be maintained in the bank account an amount no less than the higher of (a) \$3.6 million and (b) the aggregate of the bareboat rate under the facility and the operating expenses for the vessel that are payable within the following six months.

The fixed price purchase options in addition to the cash penalty of \$25.0 million per vessel for not exercising any of the purchase options under the sale and leaseback transaction results in a failed sale and leaseback and therefore, the transaction is accounted for as a financing transaction.

In the year ended December 31, 2023, the Company drew down \$200.0 million on the AVIC financing to pay scheduled installments.

*CCB Financial Leasing Co., Ltd. (“CCBFL”) – Sale and leaseback financing arrangements*

The Company has sale and leaseback arrangements with CCBFL for “Mount Matterhorn,” “Mount Neblina,” “Mount Elbrus,” “Mount Denali,” “Mount Aconcagua” and “Mount Emai” accounted for as financing transactions. Upon delivery of the relevant vessels from New Times Shipyard, the vessels were sold to companies owned and designated by CCBFL and chartered back on seven-year bareboat charters which include purchase options each year from year 3 until the end of the bareboat period. The first purchase option in year 3 is \$56.0 million declining to \$46.0 million after year 7.

The fixed price purchase options under the sale and leaseback transaction results in a failed sale and leaseback and the transaction is accounted for as a financing transaction.

In the year ended December 31, 2024, the Company drew down \$196.9 million (2023: \$160.6 million) on the financing to pay scheduled installments.

*Jiangsu Financial Leasing Co. Ltd (“Jiangsu”) – Sale and leaseback financing arrangements*

The Company has sale and leaseback arrangements with Jiangsu for “Mount Bandeira” and “Mount Hua” accounted for as financing transactions. Upon delivery of the relevant vessels from New Times Shipyard in January 2024, the vessels were sold to companies owned and designated by Jiangsu and chartered back on seven-year bareboat charters, which include purchase options each year from year 3 until the end of the bareboat period. The first purchase option in year 3 is \$56.0 million and declines to \$46.0 million after year 7.

The fixed price purchase options under the sale and leaseback transaction results in a failed sale and leaseback and therefore, the transaction is accounted for as a financing transaction.

In the year ended December 31, 2024, the Company drew down \$98.6 million (2023: \$27.4 million) on the financing to pay scheduled installments.

Each of our eight subsidiaries under our sale and leaseback arrangements with CCBFL and Jiangsu has been required to maintain a minimum cash balance equivalent to the bareboat hire payable within the next three months which amounts to approximately \$1.5 million per vessel.

As of December 31, 2025 and 2024, the Company is required to maintain a total minimum cash balance of \$12.3 million, which are included in cash and cash equivalents as there are no legal restrictions on the bank account.

The bareboat rate per day under the sale and leaseback arrangements is fixed for the bareboat period and the average bareboat rate per day for the sale leaseback arrangements with AVIC, CCBFL and Jiangsu is \$16,567. The Company has classified the estimated amortization of the bareboat payments due within twelve months from December 31, 2025 and 2024 as “Current portion of long-term debt” in the consolidated balance sheets.

Under the sale and leaseback financing arrangements, we paid loan fees to AVIC, CCBFL and Compass Advisory Services Pte. Ltd. from the date we entered into the Sale and Leaseback Agreements up to the delivery date of the vessels which we net off against “Current portion of long-term debt” and “Long-term debt” in the Consolidated Balance Sheets. In the years ended December 31, 2024 and 2023, we paid loan fees of \$2.3 million and \$7.4 million, respectively.

### *Drew Holdings Limited. (“Drew”) – Revolving Credit Facility*

As of December 31, 2025, the Company has a \$10.0 million Revolving Credit Facility agreement with Drew, who is a significant shareholder in the Company. Refer to Note 17 for details on the terms of the agreement with Drew.

### *DNB Bridge Facility*

In March 2023, the Company entered into an unsecured Bridge Facility with DNB Markets as arranger and DNB Bank ASA as lender and agent for a maximum amount of \$15.0 million for general corporate purposes with a maturity date of September 1, 2023. Amounts outstanding under the Bridge Facility bore interest at SOFR plus a margin of 6% per annum. The Company drew down \$7.5 million in March 2023 which it fully repaid in April 2023 from the proceeds of the IPO. Subsequently, the Bridge Facility was terminated in April 2023.

As of December 31, 2025 and 2024, we were in compliance with all of our covenants in each of our financing arrangements to the extent applicable.

## **15. Financial instruments**

### *Foreign exchange risk management*

The majority of our transactions, assets and liabilities are denominated in United States dollar. However, we incur expenditures in currencies other than United States dollar, mainly in Norwegian Kroner and British Pounds. There is a risk that currency fluctuations in transactions incurred in currencies other than the functional currency will have a negative effect on the value of our cash flows. We are then exposed to currency fluctuations and we may enter into foreign currency swaps to mitigate such risk exposures. The company has not entered into derivative agreements to mitigate the risk of these fluctuations.

### *Fair values*

The carrying value and estimated fair value of the Company’s financial instruments were as follows:

Level 1: Quoted market prices in active markets for identical assets or liabilities;

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data;

Level 3: Unobservable inputs that are not corroborated by market data

*(in millions of \$)*

	Hierarchy	December 31, 2025		December 31, 2024	
		Fair value	Carrying value	Fair value	Carrying value
<b>Assets</b>					
Cash and cash equivalents <sup>(1)</sup>	Level 1	32.4	32.4	19.4	19.4
<b>Liabilities</b>					
Current portion of long-term debt <sup>(2)(3)</sup>	Level 2	26.1	26.1	26.9	26.9
Long-term debt <sup>(2)(3)</sup>	Level 2	716.3	674.5	730.7	701.0

- (1) All demand and time deposits and highly liquid, low risk investments with original maturities of three months or less at the date of purchase are considered equivalent to cash. Thus, the carrying value is a reasonable estimate of the fair value.
- (2) Fair value of the current portion of long-term debt and long-term debt have been corroborated using discounted cash flow models and market interest rates as of December 31, 2025 and 2024.
- (3) Our debt obligations are recorded at amortized cost in the consolidated balance sheets. The amounts presented in the table are gross of deferred finance charges amounting to \$11.4 million and \$14.0 million at December 31, 2025 and 2024, respectively.

The carrying amounts of accounts receivable, funding to vessel managers, accounts payable and accrued expenses approximated their fair values as of December 31, 2025 and 2024 because of their near term maturity and are classified as Level 1 within the fair value hierarchy.

There have been no transfers between different levels in the fair value hierarchy during the periods presented.

### **Concentrations of risk**

There is a concentration of credit risk with respect to cash and cash equivalents to the extent that all of the amounts are carried with DNB Bank ASA (“DNB”). However, we believe this risk is remote, as DNB is an established financial institution.

A concentration of customer risk exists with four charterers accounting for all of our revenues during the year ended December 31, 2025. We consider the credit risk of these charterers is mitigated by the charter hires being payable 15 days in advance. Further, we believe the risk is remote, as all charterers are well established companies. Details of revenues derived from each charterer that accounted for over 10% of our consolidated revenues are found in Note 5.

There is a concentration of market risk as almost all of our time charters are variable rate contracts, whereby the Company earns revenues based on the Baltic Capesize Index. The Company manages this risk by converting the index linked charters to fixed rate time charters from time to time, for example, during periods of increasing charter hire rates, to cover periods of decreasing charter hire rates.

## **16. Commitments and contingencies**

### **Assets pledged**

<i>(in millions of \$)</i>	<b>December 31, 2025</b>	<b>December 31, 2024</b>
Book value of vessels secured against long-term debt <sup>(1)</sup>	823.8	853.0

<sup>(1)</sup> Legal owner of the vessels are the respective financing companies, see note 14.

### **Contingencies**

We may, from time to time, be involved in legal proceedings and claims that arise in the ordinary course of business. A contingent liability will be recognized in the financial statements only where we believe that a liability will be probable and for which the amounts are reasonably estimable, based upon the facts known prior to the issuance of the financial statements.

### **Guarantee**

We issued a performance guarantee to the vessel manager of the “Mount Elbrus” as security for the performance of its obligations under the European Union Emissions Trading System (“EU ETS”) Scheme up to a maximum liability of \$0.5 million. The vessel owner is responsible for providing such emission allowances to the vessel manager. The vessel manager is responsible for calculation of emission allowances and surrendering these to the administering authority of the EU ETS Scheme.

## **17. Related party transactions**

### *Drew and Magni Partners (Bermuda) Ltd. (“Magni”)*

Drew is considered a related party due to its significant ownership in the Company and Magni is considered a related party as a result of being an affiliate of Drew. As of December 31, 2025, Drew holds 29.1% of the Company’s outstanding common shares.

In December 2022, the Company entered into a \$15.0 million revolving credit facility agreement with Drew. The facility was unsecured and interest-bearing at a rate of LIBOR for the applicable interest periods under the facility, plus a margin of 8% p.a. The revolving credit facility was available to the Company until December 31, 2023 and was to be repaid by December 31, 2024. \$1.0 million was drawn on December 19, 2022 and remained outstanding as of December 31, 2022. In the year ended December 31, 2023, the Company drew down an additional \$1.0 million and subsequently repaid the full outstanding amount of \$2.0 million.

Effective December 18, 2023, an addendum to the Drew facility was executed, decreasing the maximum amount available under the facility from \$15.0 million to \$10.0 million, and extending the maturity of the facility from December 31, 2024 to December 31, 2025. In addition, the addendum extended the drawdown window to December 31, 2024 and aligned the interest rate with the Term Secured Overnight Financing Rate (“SOFR”). The amended facility bore interest for the applicable interest periods under the facility, at a rate of SOFR plus a margin of 8% p.a.

On October 31, 2024, the Company entered into an addendum with Drew in relation to the revolving credit facility to: (i) include a commitment fee of 1% per annum on any undrawn amount from January 1, 2025 to the end of the availability period, (ii) extend the timeframe to drawdown from the facility to December 31, 2025 and the latest repayment date to December 31, 2026, and (iii) change the margin on the Term Secured Overnight Financing Rate (“SOFR”) to 6.5% per annum.

In December 2025, the Company entered into an addendum with Drew in relation to the revolving credit facility to extend the timeframe to drawdown from the facility to December 31, 2026 and the latest repayment date to December 31, 2027.

In the first quarter of 2025, the Company drew down \$6.0 million from the revolving credit facility which was fully repaid in March 2025. Commitment fees of \$0.1 million were recognized in “Other financial (expenses) income, net in the Consolidated Statement of Operations for the year ended December 31, 2025. Interest expense of \$0.1 million and nil were recognized in “Interest expense” in the Consolidated Statement of Operations for the years ended December 31, 2025 and 2024, respectively.

As of December 31, 2025, the Company has \$10.0 million available to drawdown from this facility.

#### *Corporate support agreement*

The Company’s incorporator and sole initial shareholder, Magni was the key initiator of the Himalaya project and provided corporate and financial assistance throughout the process, including extensive assistance in connection with obtaining the financing for the installments to date as well as the private placements. The Company entered into a corporate support agreement with Magni whereby Magni was compensated for its services to the Group since the inception of the Company, and for its key role in identifying and pursuing business opportunities for the Group (the “Corporate Support Agreement”). As Magni indirectly held a controlling interest in the Company at the time the Corporate Support Agreement was entered into, the Company treated the Corporate Support Agreement as a related party transaction. Pursuant to the Corporate Support Agreement, Magni continued to support the Company’s business development through assisting with the pre-financing and post-financing of the Company’s newbuilding program, in finding employment for the vessels, in recruiting suitable individuals to the Company’s organization and with general high-level administrative support. The parties agreed in 2021 that compensation in the amount of \$2.7 million was to be paid by the Company to Magni in four equal tranches for services provided under the Corporate Support Agreement.

The tranches were split equally on each of the first four newbuildings delivered from New Times Shipyard in 2023, so that \$0.7 million was payable on each such delivery. Such amount equals the address commission received on the first four vessels, which was agreed with the yard before the project opened to external investors.

Following the delivery of the first four vessels in the year ended December 31, 2023, the total fee of \$2.7 million was paid in 2023.

#### *2020 Bulkers Management*

In February 2023, the Company signed an agreement with 2020 Bulkiers Management, replacing a similar management agreement entered into in October 2021. Pursuant to the management agreement, 2020 Bulkiers Management provides the Company with certain operational, commercial and management services. The Company pays 2020 Bulkiers Management a management fee subject to annual estimates and calculated, based on, among other things, expected activity level of the Company and the expected scope of services to be provided by 2020 Bulkiers Management in relation to the Company in the year, payable quarterly, in four equal tranches. Such management fee shall equal certain costs, based on the sum of (i) the direct payroll costs allocated to the performance of the services under the management agreement, marked-up by a margin of 13% and (ii) certain shared costs corresponding to infrastructure costs in such year related to the performance of such services. The management fee will be adjusted annually to account for the difference between estimated and actual costs incurred in such year. The management agreement is for an indefinite period and can be terminated by either party upon one month's notice.

Following the acquisition of 40% of the issued shares in 2020 Bulkiers Management, 2020 Bulkiers Management became a related party from August 29, 2024. Management fees from 2020 Bulkiers Management of \$1.5 million and \$0.4 million were recognized as a related-party transaction in the year ended December 31, 2025 and the period from August 29, 2024 to December 31, 2024, respectively.

As of December 31, 2025 and 2024, the Company had \$0.3 million payable to 2020 Bulkiers Management presented under "Trade payables" on the Consolidated Balance Sheets.

## **18. Share based compensation**

In September 2021, the Board of Directors established a long-term incentive plan allocating 800,000 of the Company's authorized but unissued share capital.

In February 2024, the Board approved a grant of 115,000 share options to key human resources and one director. The share options granted have a five-year term and cliff vest three years from the grant date. The exercise price is \$8.00 per share and will be reduced by any dividends and cash distributions declared.

In September 2024, the Board approved a grant of 65,000 share options to a key human resource. The share options granted have a five-year term and cliff vest three years from the grant date. The exercise price is \$10.00 per share and will be reduced by any dividends and cash distributions declared.

In April 2025, the Board approved to increase the allocation of the Company's authorized but unissued share capital under the long-term incentive plan by 450,000 shares and granted 200,000 share options to key human resources. The share options granted have a five-year term and cliff vest three years from the grant date. The exercise price is \$7.50 per share and will be reduced by any dividends and cash distributions declared.

Stock compensation expense of \$0.2 million, \$0.5 million and \$0.5 million was recognized in the years ended December 31, 2025, 2024 and 2023, respectively, under "General and administrative expenses" in the Consolidated Statements of Operations.

The table below sets forth the number of share options, weighted average remaining life, weighted average exercise price and weighted average grant date fair value price for the years ended December 31, 2025, 2024 and 2023, respectively:

	Outstanding share options	Weighted average remaining life	Weighted average exercise price (in \$)	Weighted average grant date fair value (in \$)
<b>Outstanding as of December 31, 2022, unvested</b>	<b>620,000</b>	<b>3.0</b>	<b>8.00</b>	<b>2.15</b>
<b>Outstanding as of December 31, 2022, exercisable</b>	—	<b>0.0</b>	—	—
Granted	—	0.0	—	—
Vested	—	0.0	—	—
<b>Outstanding as of December 31, 2023, unvested</b>	<b>620,000</b>	<b>3.0</b>	<b>8.00</b>	<b>2.15</b>
<b>Outstanding as of December 31, 2023, exercisable</b>	—	<b>0.0</b>	—	—
Granted	180,000	5.0	8.72	2.98
Vested	(500,000)	0.0	7.53	2.20
<b>Outstanding as of December 31, 2024, unvested</b>	<b>300,000</b>	<b>3.5</b>	<b>8.01</b>	<b>2.57</b>
<b>Outstanding as of December 31, 2024, exercisable</b>	<b>500,000</b>	<b>1.9</b>	<b>7.52</b>	—
Granted	200,000	5.0	7.50	1.57
Vested	(120,000)	0.0	7.51	1.95
Exercised	(100,000)	0.0	7.05	1.95
<b>Outstanding as of December 31, 2025, unvested</b>	<b>380,000</b>	<b>3.8</b>	<b>7.33</b>	<b>2.24</b>
<b>Outstanding as of December 31, 2025, exercisable</b>	<b>520,000</b>	<b>1.0</b>	<b>6.95</b>	—

The average of the exercise prices (reduced by dividends and cash distributions declared, if applicable) at the time of granting, exercising forfeiting and vesting of the share options are shown for share options granted, exercised, forfeited and vested on the above table. For share options outstanding at the beginning and end of the year, the average of the exercise prices shown have been reduced by dividends and cash distributions declared.

The total fair value of share options that vested in the years ended December 31, 2025 and 2024 were \$0.2 million and \$1.1 million, respectively.

The aggregate intrinsic value of share options that were both outstanding and exercisable as of December 31, 2025 was \$1.1 million (2024: \$nil as the exercise price was higher than the market value of the share options).

The fair value of the share options granted in April 2025, September 2024 and February 2024 were calculated using the Black-Scholes option pricing model using the following inputs:

	2025	2024	2024
Grant date	April 3	September 2	February 19
Risk-free rate	3.75 %	3.75 %	4.36 %
Expected life	5.0 years	5.0 years	5.0 years
Expected future volatility	39 %	38 %	46 %

In 2025 and 2024, the expected future volatility was based on an analysis of historical volatility of the Company's common shares.

As of December 31, 2025, intrinsic value for unvested outstanding awards was \$0.7 million. As of December 31, 2024 and 2023, there was no intrinsic value for unvested outstanding awards.

As of December 31, 2025, the total unrecognized compensation cost amounting to \$0.5 million relating to options outstanding is expected to be recognized over a weighted average period of 1.8 years.

## 19. Shareholders' equity

The authorized share capital of the Company as of December 31, 2025 and 2024 was \$140,010,000 represented by 140,010,000 authorized common shares of par value \$1.00 each.

In April 2023, the Company completed its IPO in the U.S, whereby the Company issued 7,720,000 common shares at an offering price of \$5.80 per common share and subsequently issued an additional 910,000 common shares in a partial exercise of the over-allotment option in May 2023. Net proceeds from the offering amounted to \$44.9 million, which were used for funding acquisitions of newbuildings on order, repayment of indebtedness, funding our working capital needs and general corporate purposes.

In December 2023, the Company issued 3,117,143 common shares of par value \$1.00 per share in a private placement at a price of \$5.64 per share. Net proceeds amounted to \$16.9 million which were used for funding acquisitions of newbuildings on order, repayment of indebtedness, funding our working capital needs and general corporate purposes.

In January 2024, the shareholders, at a Special General Meeting, approved the transfer of \$97.9 million to the Company's Contributed Surplus Account from the Company's Share Premium account (Additional paid-in capital in the Company's Consolidated Statement of Changes in Shareholder's Equity).

In March 2025, the Company issued 2,650,000 common shares of par value \$1.00 per share in a private placement at a price of \$5.73 per share, with the net proceeds from the private placement to be used for general corporate purposes.

In December 2025, in connection with the exercise of share options under the long-term incentive plan, the Company issued 100,000 common shares of par value \$1.00 each at the exercise price of \$7.05 per share.

The following cash distributions were declared in the twelve months ended December 31, 2025:

Relevant period	Declaration date	Amount per share (in \$)	Payment date
December 2024	January 7, 2025	0.005	February 5, 2025
January 2025	February 10, 2025	0.005	March 5, 2025
February 2025	March 6, 2025	0.005	April 22, 2025
March 2025	April 3, 2025	0.04	May 2, 2025
April 2025	May 7, 2025	0.025	June 3, 2025
May 2025	June 5, 2025	0.03	July 3, 2025
June 2025	July 8, 2025	0.05	August 5, 2025
July 2025	August 7, 2025	0.04	August 29, 2025
August 2025	September 4, 2025	0.10	September 25, 2025
September 2025	October 7, 2025	0.10	October 28, 2025
October 2025	November 5, 2025	0.07	November 24, 2025
November 2025	December 4, 2025	0.10	December 23, 2025

The above cash distributions were made from the Company's Contributed Surplus account.

## 20. Subsequent events

On January 8, 2026, the Board approved a cash distribution of \$0.13 per share for December 2025 for shareholders of record as of January 20, 2026. On February 9, 2026, the Board approved a cash distribution of \$0.06 per share for January 2026 for shareholders of record as of February 20, 2026.

On February 9, 2026, the Company entered into a contract with 2020 Bulkers Ltd. to purchase an additional 4,200 shares in 2020 Bulkers Management for NOK1.1 million, which will be effective on April 1, 2026, for a total ownership of 54%.

In February 2026, in connection with the exercise of share options under the long-term incentive plan, the Company issued 100,000 common shares of par value \$1.00 each at the exercise price of \$6.76 per share.

On March 5, 2026, the Board approved a cash distribution of \$0.06 per share for February 2026 for shareholders of record as of March 17, 2026.
