

Ovzon receives order of 135 MSEK from Swedish Space Corporation (SSC)

On November 21, Ovzon announced that the company was in ongoing negotiations with Swedish Space Corporation (SSC) regarding a large order. Today, Ovzon has received an order from SSC for Ovzon's SATCOM-as-a-Service, including Ovzon mobile satellite terminals. The service will be delivered during large parts of 2024 with start in the first quarter, and the delivery of terminals will start immediately. The total order value amounts to 135 MSEK.

Ovzon SATCOM-as-a-Service distinguishes itself in the market by its unique ability to support critical missions with assured connectivity that can transmit and receive large amounts of data by seamlessly integrating performance, mobility and resiliency.

"Resilient communications services via satellite are an important tool in both civil society and national security. With the help of Ovzon, we can offer a robust satcom service which is attractive to both traditional space actors and new industries", comments Stefan Gustafsson, Senior Vice President Strategy & Sustainable Business at SSC.

"This significant order strengthens our collaboration with SSC and emphasizes our joint focus on supporting Swedish government agencies. Having a strategic presence in space and being able to ensure reliable satellite communications is of critical importance for both security and the wider public infrastructure in today's society", comments Per Norén CEO of Ovzon.
