

FRANCKS KYLINDUSTRI EXPANDS NORWEGIAN PLATFORM THROUGH THE ACQUISITION OF ØYANGEN

Francks Kylindustri, a leading Nordic specialist in industrial and commercial refrigeration and cooling solutions, has acquired Øyangen AS, a Norwegian refrigeration service and contracting specialist based in Ålesund. The acquisition strengthens Francks Kylindustri's Norwegian platform, Therma Industri, and further expands Francks Kylindustri's position in attractive segments such as fisheries, aquaculture and marine refrigeration. Founded in 2010, Øyangen has established a strong position on Norway's west coast, delivering business-critical refrigeration, freezing and heat pump solutions to customers at sea and on land. The current owners, Bernhard Øyangen and Kåre Lyngheim, will remain active in the business and retain a significant ownership interest, supporting continuity for customers and employees.

“Øyangen is exactly the type of strong local specialist we want to partner with as we build Francks Kylindustri into the leading Nordic refrigeration platform. The company brings high technical competence, strong customer relationships and exposure to resilient end-markets. Together with Therma Industri, Øyangen strengthens our regional presence and our ability to deliver business-critical cooling solutions across Norway.”, says Sören Jensen, CEO of Francks Kylindustri.

“Øyangen adds complementary expertise and capacity to Therma Industri, particularly in Western Norway and within fisheries, aquaculture and marine applications. We will continue to build on Øyangen's local customer focus while broadening the offering within refrigeration, freezing and heat pump solutions.”, says Per Christian Sandved, Managing Director of Therma Industri AS.

“Becoming part of Francks Kylindustri and Therma Industri creates long-term opportunities for Øyangen. We retain our local identity and customer focus while gaining access to broader technical expertise, resources and support. We believe the combination strengthens Øyangen for customers and employees.” say Bernhard Øyangen and Kåre Lyngheim, owners of Øyangen AS.

About Øyangen

Øyangen AS is a Norwegian refrigeration and service specialist based in Ålesund. The company was founded in 2010 and provides refrigeration, freezing and heat pump solutions, with particular expertise in marine, fisheries and aquaculture applications.
