

Bio-Works receives second order worth 2.4 MSEK order from customer in Netherlands

Bio-Works has received a second order from the same production customer in Netherlands who ordered last week. The second order is worth 2.4 MSEK. The order is a scale-up order for a project to which Bio-Works has previously delivered at R&D scale. The customer is a global manufacturer of active pharmaceutical ingredients (APIs) with approximately 1,800 employees.

“We are very happy to have received this second order from a customer who has previously had good experience with [WorkBeads Q resin for anion exchange chromatography](#) and is now scaling-up a second production step using our [WorkBeads S resin for cation exchange chromatography](#). Our existing customers rate our products and service very highly, and this is yet another example of a production customer expanding their business with us,” said Jonathan Royce, CEO at Bio-Works.

About Bio-Works

Bio-Works enables scientists to achieve their purification goals, from laboratory research to large scale bioprocess production. Our vision is a biotech industry that embraces, develops and builds on new methods and novel ideas. WorkBeads™, Bio-Works’ next-generation, agarose-based products, are used to purify proteins, peptides and other biomolecules, resulting in purer therapies and safer diagnostics. Through collaboration with customers and partners, we develop purification solutions that make important medicines available and accessible to everyone.

Bio-Works’ headquarters, with R&D and manufacturing, is located in Uppsala Business Park in Uppsala, Sweden. We supply products globally, through a combination of direct sales and via distributors in Europe, North America and Asia. The company is certified according to the ISO 9001:2015 quality management system. Bio-Works is listed on Nasdaq First North (“BIOWKS”), and FNCA Sweden AB is appointed Certified Adviser. For more information, visit www.bio-works.com.
