

Maven Wireless Wins Order for New Train Repeater Worth SEK 17m

Maven Wireless' Swiss partner Strapag, specializing in the integration of repeater solutions on trains, has secured another major deal with the Maven train repeater TOR towards a Swiss train manufacturer. This time serving a Norwegian Train Operator requiring ultra high-speed coverage on trains, also known as Gigabit train coverage. Strapag has placed an order for train repeaters worth approximately SEK 17m.

The Norwegian end customer has ordered 17 train sets of this type that require high-speed coverage with an option of an additional 66. The products will be delivered and invoiced during 2025.

"I am pleased to deliver a new product combination with 5G MIMO support, which enables each connected mobile operator to increase bandwidth to gigabit speeds, thereby enhancing the customer experience. Furthermore, it is exciting to support the Norwegian market with this train repeater, and we see more business opportunities with the same end customer," says Fredrik Ekström, CEO of Maven Wireless.
