

Acconeer receives order worth USD 260,000 for delivery to the automotive industry

The order relates to Acconeer's pulsed coherent radar sensor A212 for mass production within the automotive industry, where it will be used for multiple in-cabin applications at a European premium vehicle manufacturer. The order comes from a leading Japanese distributor with a particularly strong position in the automotive industry, and delivery is planned for the first quarter of 2027.

CEO Ted Hansson comments: "We have previously communicated our belief in growth within the automotive segment, and we are pleased to see this now materializing in our order book ahead of 2027."

In addition to publicly announced orders, Acconeer continuously receives orders of smaller amounts which are not publicly announced as they are not considered to affect the share price.

About Acconeer AB

With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm². The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye Nordic Growth AB is the company's Certified Advisor (CA). For more information: www.acconeer.com.
