

## Goobit Group AB submits MiCA application

**Goobit Group AB (NGM: BTCX) has submitted its application for authorisation as a crypto-asset service provider under the EU's Markets in Crypto-Assets Regulation (MiCA). The application has been filed with the Swedish Financial Supervisory Authority (Finansinspektionen) and is now under review.**

MiCA aims to establish a harmonised regulatory framework for crypto-asset services across the EU. The regulation strengthens consumer and investor protection, market integrity, and financial stability. Licensed entities must meet extensive requirements regarding customer protection, risk management, custody of clients' crypto-assets, and corporate governance. Goobit will inform the market once Finansinspektionen has made its decision on the application.
