
Freemelt enters German market with subsidiary and Showroom

Freemelt Deutschland GmbH, a wholly owned subsidiary of Freemelt AB, with a new Freemelt office in Esslingen close to Stuttgart in Germany, has been established to manage the commercialization of Freemelt systems in Germany and in Europe at large.

Peter Jain, part of the Freemelt management team as Managing Director global sales since September 1, 2021, will be based at the new office where there will also open a Freemelt showroom to showcase Freemelt's Electron Beam Powder Bed Fusion (E-PBF) technology.

"The opening of a subsidiary in Germany is an important milestone for Freemelt as we take our first steps outside of Sweden," says Ulric Ljungblad, CEO of Freemelt. "We are extremely excited to offer our customers the possibility to meet with us also in Germany, and to experience the possibilities of new material development with the use of E-PBF.

About Us

Freemelt is a high-tech growth company whose ground-breaking solution creates new opportunities for rapid growth in 3D printing, also known as additive manufacturing. The Company's protected technology – which already are available – takes 3D printing to a new level and provides new opportunities for printing products in a cost-effective way and to a consistent and high quality that previously was impossible. By choosing an open source solution, the conditions are created for strong growth, and the Company will expand towards manufacturing markets, moving forward. For more information, see www.freemelt.com.
