Sdipotech has acquired lifting specialist JLM Teknik

Sdipotech AB (publ) has acquired JLM Teknik ApS, a leading provider of vacuum lifters, cranes, and other industrial lifting equipment. The company, based in Denmark, has an annual turnover of approximately DKK 55 million with good profitability. The acquisition will strengthen Sdipotech's Supply Chain & Transportation offering with efficient lifting solutions.

With over 25 years' experience, JLM Teknik has built a strong market position in Denmark serving industries including warehouse and logistics, food and pharmaceuticals, and glass and window production. The company develops and manufactures its own vacuum lifter series alongside a broad range of other lifting solutions. An expanding international distributor network provides further growth potential.

"JLM Teknik's focus on efficient, safety-oriented lifting solutions addresses a critical need in modern logistics and industrial environments and complements our existing portfolio of business units well", says Daniel Unge, Head of business area Supply Chain & Transportation at Sdipotech.

"We are proud of the position JLM Teknik has built over more than 25 years. With Sdipotech's support, we look forward continuing to develop best-in-class lifting solutions for our customers", says Jan Bryld, Managing Director of JLM Teknik.

JLM Teknik is the 11th business unit in Supply Chain & Transportation and is included in the business area from April 2026.
