TERRANET PRESENTS AT REDEYE AUTOTECH EVENT 2025

Terranet will participate in the Redeye Autotech Event 2025 in Gothenburg on October 9, where companies active in the automotive industry will gather. The focus will be on how increased digitalization and the use of sensors are transforming the vehicles of the future.

The rapid development of self-driving cars, electrification, and connected cars is driving demand for advanced hardware and software at a fast pace. To highlight this development, Redeye has invited several companies that are in various ways exposed to the sector.

During the day, Terranet, Zenseact, Smart Eye, Sightic, Acconeer, and Gapwaves will present their businesses and technologies, followed by panel discussions led by Redeye's analysts.

"Redeye Autotech Event is a valuable forum for meeting investors and industry stakeholders. It's also an excellent opportunity to present our business, especially at this stage. We have recently delivered our first MVP to a partner for external evaluation, and more will follow during the autumn," says Lars Lindell, CEO of Terranet.

About Terranet AB (publ)

Terranet's mission is to save lives in urban traffic. We develop groundbreaking technology solutions for advanced driver assistance systems (ADAS) and autonomous vehicles, with a focus on protecting vulnerable road users from injury. Using a unique and patented sensor technology, Terranet's system BlincVision scans the road with laser precision – detecting objects up to ten times faster and with greater accuracy than any other ADAS solution on the market today.

Terranet is headquartered in Lund, Sweden, with additional operations in Gothenburg and Stuttgart – at the heart of the European automotive industry. Since 2017, the company has been listed on Nasdaq First North Premier Growth Market (Nasdaq: TERRNT-B).
