## Folktandvården in Region Stockholm signs a framework agreement with Medclair

**Medclair has been awarded a framework agreement following the procurement of equipment for nitrous oxide destruction and monitoring of staff exposure to Folktandvården in Region Stockholm. The procurement supports Folktandvården's work towards Region Stockholm's goal of climate neutrality by 2030. At the same time, it strengthens Medclair's position within public dental care and serves as an important reference for future procurements.**

Folktandvården in Region Stockholm has chosen Medclair's mobile unit for nitrous oxide destruction and the company's solution for monitoring staff exposure. Medclair's solutions thereby contribute to both a reduced climate impact and a safer working environment within dental care.

The agreement means that Medclair becomes a supplier to one of Sweden's largest public dental care organizations. The procurement strengthens the company's presence in the public sector and solidifies Medclair's position as a supplier of solutions for sustainable nitrous oxide management.

"Being awarded the agreement with Folktandvården in Region Stockholm is an important step for Medclair. The region's ambition to be climate neutral by 2030 aligns well with our offering. The procurement strengthens our position within public dental care and provides us with an important reference for future procurements", says Jonas Lundh, CEO of Medclair.
