

# Surgical Science Announces Appointment of Linus Bergqvist as Chief Operating Officer

**Stockholm, Sweden – Jan 23, 2026**

Surgical Science, a global leader in medical simulation training and software solutions, today announces the appointment of Linus Bergqvist as its new Chief Operating Officer (COO), effective March 2, 2026.

In this role, Linus will be responsible for Surgical Science's global operations, including manufacturing, supply chain, sourcing, and customer delivery, contributing towards our vision of a world where all medical professionals have been trained and objectively certified in a safe and lifelike simulated environment.

Linus brings two decades of experience within manufacturing and supply chain, business process optimization, operational excellence and purchasing. He has a strong track record of scaling operations, improving efficiency and service levels, reducing production costs, and leading cross-functional teams in international environments.

Linus most recently comes from Delta Nordic, a company developing and manufacturing advanced electric and electronic systems solutions to the global market. Previously, Linus also held various leadership positions at Polarium, Axfood, NKT and Ericsson.

*"We are very pleased to welcome Linus to Surgical Science and to our Group Leadership Team, says Tom Englund, CEO of Surgical Science. Linus has deep operational expertise, extensive leadership experience and a value set in harmony with that of Surgical Science. He will play a critical role as we increase our delivery pace and volume of innovative simulation solutions to healthcare professionals globally."*

*"I am thrilled to join the incredible team at Surgical Science as Chief Operating Officer, and to contribute to the exciting journey ahead. I look forward to working with our important mission of enhancing patient safety by elevating medical simulation and training to new heights around the globe, says Linus Bergqvist."*

**About Surgical Science**

---

One of the biggest challenges within healthcare globally is reducing injuries incurred during care. Medical education and training are key, especially as a large part of the training can now be performed outside the operating room. Surgical Science is a world leader in the development of virtual reality simulators for evidence-based training. The simulators enable surgeons and other medical specialists to train and improve their psycho-motor skills and instrument handling before entering the clinical environment. Alongside its own products, Surgical Science works with simulation solutions for medical device companies that develop instruments for clinical use, such as robotic surgery.

Surgical Science has approximately 330 employees. The company is headquartered in Gothenburg, Sweden, and has operations in Tel Aviv, Israel; Stockholm, Sweden; Cleveland, US; and Cardiff, UK. Through sales offices in the US and China as well as a global network of distributors, Surgical Science maintains a presence in most markets. Shares in Surgical Science Sweden AB (publ) are traded on Nasdaq First North Growth Market.
