## **Senzime receives its largest order to date from top-10 ranked US hospital system**

**Senzime, an industry leader in algorithm-based patient monitoring solutions today announces an initial order from a prominent, top-10 nationwide rated California-based hospital system. The order consists of 110 TetraGraph monitors as well as consumables and is the result of a comprehensive clinical and competitive product evaluation.**

“This is another fantastic milestone for Senzime and our largest US order to date from one of the greatest hospital systems in the country. It continues to prove that Senzime is the trusted vendor of choice for hospitals demanding the most clinically relevant, user friendly and sustainable neuromuscular monitoring solutions”, comments Philip Siberg, CEO of Senzime.

“The new clinical guidelines issued by The American Society of Anesthesiologists are driving a rapid clinical shift in the US market. Large-scale hospital system wins like this are a direct result of Senzime’s commitment to patient safety, best-in-class commercial team, commitment to continuous innovation, and the strongest financial backing in our industry”, comments George Hamilton, VP and Commercial Lead for Senzime USA.

The initial order value amounts to approximately 2.75 MSEK and annual recurring revenues from this hospital system are estimated to exceed 5 MSEK when the monitors are in full use. Deliveries commence immediately.
