

FlexQube receives order of approximately USD 0.9 million

FlexQube has received orders with a total value of approximately USD 0.9 million from a customer within the aviation industry in the US. The orders include mechanical material handling carts in several different configurations and will be used in the customer's operations for maintenance and service of aircraft engines.

Deliveries will take place gradually from the beginning of the third quarter of 2026 and continue into the beginning of 2027.

CEO Anders Fogelberg comments: *"We are pleased to continue winning business within advanced industrial production and service operations, where the requirements for flexibility, quality and customization are high. This type of project is a very good fit for FlexQube's solutions, as our modular and mechanical cart concepts can be adapted to the customer's specific applications."*

About FlexQube

FlexQube is a technology company headquartered in Gothenburg, Sweden with subsidiaries in USA, Mexico, Germany and England. FlexQube offers solutions for cart-based material handling using a patented modular concept. FlexQube develops and designs customized solutions for both robotic and mechanical cart logistics. Through the own developed and unique automation concept FlexQube can offer robust and self-driving robotic carts. FlexQube has more than 1300 customers in 40 countries with primary markets being North America and Europe. FlexQube's customers can be found within the manufacturing industry, distribution- and warehousing. We represent some of the most successful companies in the world with a significant share being represented on the Fortune 500 list. These companies exist within automotive, electric vehicle manufacturing, online retail, heavy-duty trucks, industrial automation and retail logistics.
