

Maven Wireless validates additional 8 European patents

Maven Wireless, a market leader of groundbreaking solutions for wireless coverage, has been granted additional 8 European patents for the patent application "Real-valued passband data transport in DAS"

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique, future-proof and supports all relevant technologies from 2G to 5G as well as blue light services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary technology.

Including the new validated patents, Maven Wireless possesses 67 patents worldwide and has additionally 12 patent applications pending. These patents protect Maven Wireless digital DAS products and the way how the products transport data over the fibre network. They also support and protect Maven Wireless' business throughout the European market.
