

Bufab once again achieves top score of A in CDP's Supplier Engagement Assessment

Bufab has once again been awarded the top score of A in the Supplier Engagement Assessment conducted by CDP, a global non-profit environmental organisation, confirming the Group's strong commitment to responsible sourcing, climate action and close collaboration across its global supply chain.

The recognition highlights Bufab's continued efforts to engage suppliers on climate-related issues and to drive improvements throughout the value chain. CDP's annual Supplier Engagement Assessment evaluates how companies work with suppliers on governance, targets, Scope 3 emissions and supply chain collaboration, and an A score represents the highest level of performance in the assessment.

"We are proud to serve our customers with a world-class supplier base. Achieving an A in CDP's Supplier Engagement Assessment once again is a strong validation of our long-term work to build a more sustainable, resilient and transparent supply chain together with our suppliers," says Carina Löf, Group Director Sustainability & Sourcing of Bufab.

For Bufab, sustainability is an integral part of creating long-term customer value. Through structured supplier engagement and a clear sustainability agenda, the Group continues to strengthen its ability to support customers with reliable sourcing solutions while contributing to reduced climate impact across the supply chain.
