

Freemelt expands and appoints new agent in Turkey

Freemelt is a high-tech growth company whose pioneering solution creates new conditions for rapid growth in 3D printing, enters into an agreement with one of Turkey's leading retailers, InfoTRON. This is another step towards continued global expansion and growth of Freemelt's research system, Freemelt ONE.

Swedish Freemelt takes 3D writing to a new level. In Turkey there is both advanced manufacturing industry and research, which is why this is a very interesting market to be established in. The agent InfoTRON has been active in the 3D market since 1994 and is one of the largest retailers in Turkey.

"We see that our research system, Freemelt ONE, has great commercial potential and that we are at the forefront of development. With a new agent in a new market, we see good chances of increased sales," says Ulric Ljungblad, CEO of Freemelt.

The research system Freemelt ONE creates benefits for Freemelt's customers – both in terms of technology and materials. For example, tungsten, titanium, and copper are highly interesting materials in the scientific community in both aerospace and defense industries as well as in medical technology.

"Moving forward, this creates new conditions for printing products in a cost-effective way and to a consistent and high quality that was previously lacking in Turkey," says Ulric Ljungblad.

"We are following our strategy for faster sales and expansion rates and have now entered into an agreement with our first agent and have high hopes for this collaboration", says Peter Jain, Global Sales Manager.

About Us

Freemelt is a high-tech growth company whose ground-breaking solution creates new opportunities for rapid growth in 3D printing, also known as additive manufacturing. The Company's protected technology – which already are available – takes 3D printing to a new level and provides new opportunities for printing products in a cost-effective way and to a consistent and high quality that previously was impossible. By choosing an open source solution, the conditions are created for strong growth, and the Company will expand towards manufacturing markets, moving forward. For more information, see www.freemelt.com.
