

Obducat receives order for NIL system from the University of Liverpool

OB DucAT has received an order from the University of Liverpool for an EITRE 3 nanoimprint lithography (NIL) system. The order value amounts to approximately SEK 2 million and delivery is planned for the second quarter of 2026.

The EITRE 3 system will be installed at the Magnetic Materials Lab within the Department of Physics at the University of Liverpool. The system will be used in research related to medical imaging, with a focus on developing advanced materials that can support new diagnostic methods within healthcare.

The EITRE 3 system enables the manufacturing of very small and precise structures, which is an important capability in this type of applied research. The order further strengthens Obducat's position within academic research and advanced development environments.

Patrik Lundström, CEO: +46 (0)46 10 16 00 or +46 (0) 703 27 37 38

About Obducat AB (publ)

Obducat AB (publ) is an innovative developer and supplier of technologies, products and processes used for the production and replication of advanced micro and nano structures. Obducat's products and services serve the demands of customers worldwide within the LED and Display, Optics and Photonics, MEMS and Sensor industries as well as in High Power and High Frequency electronics and Biomedical Devices. Obducat's technologies include nano imprint technology, resist- and wet processing technologies. Obducat has its own market presence in Sweden, Germany, Japan, USA, England, Portugal and China and the headquarter is located in Lund, Sweden. Obducat is a public company. The Obducat share is traded on the Swedish NGM Main Regulated Equity exchange. Read more at www.obducat.com or contact us via email investorrelations@obducat.com
