

OPTICEPT RECEIVES ADDITIONAL ORDER VIA FPS FOOD PROCESS SOLUTIONS

OptiCept Technologies AB (publ) announces that the company's partner, Food Process Solutions (FPS), has received an additional order for the PEF system OPTICEPT® SP7. The order comes from a French fries producer in the United States.

OptiCept announces that the Company's partner within solid foods, FPS, has signed an agreement for the Company's PEF system OPTICEPT® SP7 with a French fries producer based in the United States. Delivery is planned for Q3 2026.

"The deal confirms the growing market interest in our solution within the potato segment and represents an important step in continued commercialization," says Thomas Lundqvist, CEO of OptiCept.

FPS markets, sells, manufactures, and installs OptiCept's equipment for the solid food segment. Systems for liquid foods have also been manufactured by FPS since the second half of 2025 under a subcontracting agreement, in which key components such as critical hardware and software are provided by OptiCept.

Once FPS has fulfilled its obligations under its customer agreement, the remaining surplus—constituting the profit—is shared equally between FPS and OptiCept. When the surplus is known, half of it is reported as revenue by OptiCept. This transaction will not generate any cash flows until that time.
