

## BEAMMWAVE EXPANDS ITS DIGITAL BEAMFORMING PATENT PORTFOLIO

**BeammWave has received a notice of allowance from the Swedish Patent and Registration Office. The patent covers a building practice for mounting a distributed antenna system into an end-user product.**

BeammWave have has a total of 38 patent families in different stages protecting its unique digital beamforming concept.

*"Cost efficient mechanical integration into high volume consumer products can not come as an afterthought, but is an integral part of our concept with cost and power efficient semiconductors and algorithms for digital beamforming", says Per-Olof Brandt CTO of BeammWave.*

**About Us**

BeammWave AB are experts in communication solutions for frequencies over 24GHz. The company is building a solution intended for 5G and 6G, in the form of a radio chip with antenna and associated algorithms. The company's approach with digital beamforming is unique and patented, with the aim of delivering a solution with higher performance at a lower cost. The company's share serie B (BEAMMW B) is listed on the Nasdaq First North Growth Market in Stockholm. Certified Adviser is Redeye AB, e-mail: [certifiedadviser@redeye.se](mailto:certifiedadviser@redeye.se) and phone +46(0)8 - 121 576 90.
