

PRESS RELEASE

November 9, 2023

Ziccum launches News portal

Ziccum today launches a news portal - Ziccum Updates - on its website to share company news updates in a short, accessible format for investors, partners and followers..

The news posts will typically cover internal updates and initiatives, as well as scientific updates and reports from industry events, to complement the company's regular press releases and give more insight into the company activities and progress.

Visit the portal here: www.ziccum.com

About Ziccum

Ziccum is developing LaminarPace™, a unique drying method for biopharmaceuticals and vaccines based on mass transfer, not heat transfer. The technology is offered by licensing to vaccine and biologics developers and manufacturers in the global pharmaceutical industry. By reducing drying stress to the active ingredient, LaminarPace™ uniquely enables particle-engineered, thermostable dry powder biopharmaceuticals which can be easily handled and transported and are highly suitable for novel administration routes. The technology has been successfully applied to mRNA, peptides, proteins, antibodies, lipids and enzymes as well as excipients and adjuvants, and is well suited for industrial application. Ziccum is listed on the Nasdaq First North Growth Market.
