

NOBA BANK GROUP AB (PUBL)

INTERIM REPORT JANUARY-SEPTEMBER 2026

INTERIM REPORT THIRD QUARTER OF 2026

THIRD QUARTER OF 2026 (COMPARED WITH THE THIRD QUARTER OF 2025)

- The loan portfolio amounted to SEK 151.0bn (131.5), corresponding to a growth of 15 per cent. The organic growth rate expressed in local currencies amounted to 10 per cent
- Operating profit amounted to SEK 1,630m (1,161), and the adjusted operating profit from core operations[1] amounted to SEK 1,668m (1,357)
- Adjusted core profit for the period attributable to shareholders[1] amounted to SEK 1,213m (1,009)
- Basic earnings per share amounted to SEK 2.37 (1.71) and adjusted core basic earnings per share amounted to SEK 2.43 (2.02)
- Return on equity excluding intangible assets and Tier 1 capital instruments (ROTE) was 28.5 per cent (23.7), and the adjusted return from core operations[1] (Core ROTE) was 29.6 per cent (28.2)

JANUARY-SEPTEMBER 2026 (COMPARED WITH JANUARY-SEPTEMBER 2025)

- The loan portfolio amounted to SEK 151.0bn (131.5), corresponding to a growth of 15 per cent. The organic growth rate expressed in local currencies amounted to 10 per cent
- Operating profit amounted to SEK 4,397m (3,340), and the adjusted operating profit from core operations[1] amounted to SEK 4,500m (3,699)
- Adjusted core profit for the period attributable to shareholders[1] amounted to SEK 3,261m (2,742)
- Basic earnings per share amounted to SEK 6.36 (4.92) and adjusted core basic earnings per share amounted to SEK 6.52 (5.48)
- Return on equity excluding intangible assets and Tier 1 capital instruments (ROTE) was 25.9 per cent (24.0), and the adjusted return from core operations[1] (Core ROTE) was 26.8 per cent (26.9)
- NOBA's Board of Directors proposes, ahead of the planned Extraordinary General Meeting in 2026, an ordinary dividend of SEK 2.70 per share for the period 1 January - 30 September 2026

"NOBA'S LOAN PORTFOLIO SURPASSED SEK 150 BILLION, WITH ALL SEGMENTS CONTRIBUTING TO GROWTH."

JACOB LUNDBLAD / CEO

EVENTS DURING THE THIRD QUARTER

On 4 September, NOBA issued subordinated Tier 2 notes with a nominal value of SEK 350m.

On 23 September, NOBA issued senior preferred bonds of SEK 350m and NOK 350m.

During the quarter, NOBA reached a total lending volume of SEK 150bn, of which the private loan volume reached SEK 100bn.

THIS IS NOBA

With a diversified offering through our four brands – Nordax Bank, Bank Norwegian, Svensk Hypotekspension and DBT – and over two million customers, we have the size, knowledge and scalability required to enable financial health for more people. NOBA provides specialised, customer-centric financial offerings that are sustainable for the individual, the SME, the bank and society at large, today and in the future.

NOBA Bank Group AB (publ) ("NOBA") has around 750 employees and is active in eight markets. As of September 2026, lending amounted to SEK 151bn, and our customers had entrusted us with SEK 119bn in savings. Our business is growing organically with a high and stable earnings capacity, providing us with ample opportunities to be on the offense and expand further organically and potentially also through future acquisitions. As of 26 September 2025, the NOBA share is listed on Nasdaq Stockholm.

Our vast expertise in responsible lending has given us a unique understanding of people's challenges and needs, and together, we have both the knowledge and the capacity to contribute to improved financial health for more people.

STABLE DEVELOPMENT IN LINE WITH OUR STRATEGY

ONE YEAR AS A LISTED COMPANY

On 26 September 2025, together with NOBA's Board of Directors, management and employees, I rang the bell at Nasdaq Stockholm. Our listing gave new investors the opportunity to take part in NOBA's continued development, but it did not change our strategic direction. One year later, we can conclude that we have continued to execute our established strategy, which is built on profitable and responsible growth, strategic acquisitions and attractive returns to shareholders.

For quite some time, specialist banks have been taking market share from larger banks across several product areas. We are convinced that this trend will continue and that NOBA, as the leading specialist bank in the Nordics, is well positioned to benefit from it. Our capabilities in credit risk assessment and pricing have been continuously refined over the past 20 years. Combined with our recently implemented core banking platform, this creates a clear competitive advantage and enables scalable growth for many years to come. NOBA's strong capital generation creates room for both high growth and attractive capital distributions to our shareholders.

STABLE FINANCIAL DEVELOPMENT

During the third quarter, NOBA continued to deliver stable financial results and took further steps towards our financial targets. Total lending surpassed SEK 150 billion, while personal loan volumes exceeded SEK 100 billion. Organic lending growth amounted to 10 per cent in local currencies, once again with contributions from all segments.

Significant exchange rate movements affected reported volumes, income and expenses during the quarter. The C/I ratio was 23 per cent, and we continue to see a clear path towards our C/I ratio target of below 20 per cent during 2027. Although the third quarter is seasonally strong and profitability can be volatile between quarters, it is pleasing to see that Core ROTE for the third quarter amounted to 30 per cent, in line with our target. In light of the results for the first nine months of the year, NOBA's Board of Directors proposes an ordinary interim dividend of SEK 2.70 per share.

Alongside our stable financial performance, we are pleased that MSCI awarded NOBA an ESG rating of AA in October. The rating places us in the top tier of our peer group and recognises the work we do in financial health and responsible lending.

CONTINUED IMPROVEMENT IN CREDIT QUALITY

The positive development in credit quality continued during the third quarter. The credit loss level was 2.4 per cent, registering an improvement for the tenth consecutive quarter. During the summer, we divested another portfolio of non-performing loans. Once again, completing this transaction at a price above book value, which further underlines the quality of NOBA's loan book and provisions.

"NOBA'S LOAN PORTFOLIO SURPASSED SEK 150 BILLION, WITH ALL SEGMENTS CONTRIBUTING TO GROWTH."

In the third quarter, market expectations of future policy rate hikes rose across the Nordic economies. We stand by our previous assessment of how rising interest rates may affect credit quality. Even if the rate increases that the market expects were to materialise, we do not believe they would have any material impact on our credit quality. This assessment is based both on the improvements we have made to our underwriting processes in recent years and on the resilience we see among our customers. Any rate increases are also expected to occur gradually over the coming years, in contrast to the sharp rise in interest rates that Nordic households experienced during the previous rate hike cycle.

LOOKING AHEAD WITH CONFIDENCE

With one year as a listed company behind us, and another strong quarter of growth and profitability, I´m looking ahead with great confidence. We are, of course, mindful that unexpected events and changing market conditions may affect our journey going forward. But given the strategy we have set out and the scalable platform we have built, I am confident that we have positioned ourselves in the best possible way to tackle these challenges, while delivering attractive returns to our shareholders for many years to come. Finally, I would like to thank all our employees for your efforts during our first year as a listed company, and our shareholders for the trust you have shown in us.

JACOB LUNDBLAD
CEO

KEY FIGURES FOR THE GROUP

In addition to the financial measures defined by IFRS, NOBA presents alternative performance measures that provide investors and management with valuable supplementary information for evaluating NOBA's financial development and position. These alternative performance measures, which are not defined according to IFRS and which are explained on pages 67-69, are not necessarily comparable with performance measures with similar names used by other companies. They should also not be regarded as substitutes for the financial reporting performance measures that are prepared according to IFRS.

HIGHLIGHTS OF RECENT YEARS

SIGNIFICANT EVENTS IN THE THIRD QUARTER

On 1 July, NOBA issued SEK 200m of senior preferred bonds as a tap of outstanding bonds maturing in June 2029.

On 4 September, NOBA issued subordinated Tier 2 notes with a nominal value of SEK 350m.

On 23 September, NOBA issued senior preferred bonds of SEK 350m and NOK 350m.

On 30 September, NOBA called for early redemption of its Additional Tier 1 notes of SEK 1,400m and subordinated Tier 2 notes of SEK 650m.

During the quarter, NOBA reached a total lending volume of SEK 150bn, of which the private loan volume reached SEK 100bn.

During the quarter, NOBA completed the portfolio sales of non-performing loans, referred to in the second-quarter report, comprising portfolios in Norway, Denmark and Finland. These amounted to a total gross volume of approximately SEK 400m, with a positive impact on earnings.

SIGNIFICANT EVENTS AFTER THE END OF THE PERIOD

On 1 October, NOBA issued SEK 300m and NOK 300m of senior preferred bonds in a tap outstanding senior preferred bonds maturing in October 2029.

After the end of the quarter, NOBA's Chief Technology Officer, Adam Wiman, announced his decision to leave the company. He will remain in his role through the end of the first quarter of 2027, and NOBA has initiated the recruitment of his successor.

THE GROUP'S DEVELOPMENT

THIRD QUARTER OF 2026

(Compared with the third quarter of 2025, unless otherwise stated)

OPERATING INCOME

Operating income was SEK 3,290m (2,913), corresponding to an increase of 13 per cent compared with the same period in the previous year. Net interest income grew to SEK 3,054m (2,712). The underlying net interest margin (NIM), adjusted for changes in the number of interest days and currency fluctuations, was 8.3 per cent (8.3), which is a slight increase compared with the previous quarter and largely unchanged compared to the corresponding quarter previous year. The reported NIM for the third quarter amounted to 8.3 per cent (8.4). Net fee and commission income was SEK 243m (234), where the increase was due to insurance-related income.

OPERATING EXPENSES

Operating expenses were SEK -742m (-803) over the period, corresponding to an decrease of 8 per cent compared with the same period previous year. Excluding transformation costs, the expenses amounted to SEK -742m (-646), corresponding to an increase of 15 per cent. This is due to the consolidation of DBT, increased administrative costs and increased sales costs. Of the total costs, SEK -13m are related to DBT, and excluding those the cost increase amounted to 13 per cent. Transformation costs were SEK 0m (-157). The adjusted C/I ratio amounted to 23 per cent (22).

CREDIT LOSSES

Credit losses were SEK -883m (-918), corresponding to 2.4 per cent (2.8) of average lending. The decrease was primarily driven by lower provisions related to loans in Stage 3.

AMORTISATION OF TRANSACTION SURPLUS VALUES

The amortisation of transaction surplus values was SEK -35m (-32), as scheduled. This is in all essentials related to the allocation of intangible surplus values from the acquisition of Bank Norwegian and does not affect cash flows or capital adequacy, as the asset has already been deducted from own funds.

OPERATING PROFIT

Operating profit was SEK 1,630m (1,161), corresponding to an increase of 40 per cent compared with the same period in the previous year. The increase was due to revenue growth as well as lower operating expenses and credit losses.

ADJUSTED CORE OPERATING PROFIT

As the bank's profit in recent years has been affected by transformation costs, profit and loss related to the segment "Other", and amortisation of intangible transaction surplus values primarily related to Bank Norwegian, operations are also reported based on adjusted core operating profit, which excludes the effect of these items. As of the second quarter 2025, transformation costs only include costs related to the strategic review, which was finalised with the stock exchange listing in the third quarter 2025. The final transformation costs were reported in the fourth quarter 2025. During earlier periods, costs related to the integration of Bank Norwegian and the change of the core banking system were also included.

Adjusted core operating profit was SEK 1,668m (1,357)[1], corresponding to an increase of 23 per cent compared with the same period in the previous year, where the increase was due to revenue growth and lower credit losses.

JANUARY-SEPTEMBER 2026

(Compared with January-September 2025, unless otherwise stated)

OPERATING INCOME

Operating income was SEK 9,286m (8,348), corresponding to an increase of 11 per cent compared with the same period in the previous year. Net interest income grew to SEK 8,644m (7,788) driven by an increasing portfolio volume. Net fee and commission income was SEK 669m (641), where the increase was due to insurance-related income.

OPERATING PROFIT AND ADJUSTED OPERATING PROFIT

Operating profit was SEK 4,397m (3,340), corresponding to an increase of 32 per cent compared with the same period in the previous year. The increase was mainly driven by revenue growth, but also by lower credit losses. The adjusted core operating profit amounted to SEK 4,500m (3,699), corresponding to an increase of 22 per cent.

[1] Reported operating profit of SEK 1,630m (1,161) adjusted by transformation costs of SEK 0m (-157), scheduled amortisation of intangible transaction surplus values of SEK -35m (-32) and the adjusted operating profit of SEK -3m (-8) from the segment "Other".

VOLUME GROWTH THIRD QUARTER OF 2026

(Compared with the third quarter of 2025, unless otherwise stated)

Compared with the previous year, growth in lending was solid, and all segments grew, including the segment "Other" through the acquisition of DBT. Total lending was SEK 151.0bn (131.5). The reported growth amounted to 15 per cent. The organic growth in local currencies amounted to 10 per cent. Lending in the Private Loans segment was SEK 105.2bn (92.5). Lending in the Credit Cards segment was SEK 22.6bn (19.5). Lending in the Secured segment was SEK 21.6bn (18.8). The number of active and semi-active credit cards in the Nordic region and Germany was roughly 1.4m (1.3)[1].

LIQUIDITY AND FINANCIAL INVESTMENTS THIRD QUARTER OF 2026

(Compared with the third quarter of 2025, unless otherwise stated)

The liquidity reserve was SEK 19,862m (20,226), primarily comprising secured bonds and balances with central and Nordic banks. The liquidity coverage ratio (LCR) was 144 per cent (171). The net stable funding ratio (NSFR) was 108 per cent (112).

FUNDING THIRD QUARTER OF 2026

(Compared with the third quarter of 2025, unless otherwise stated)

NOBA has a diversified funding structure with various sources of capital, distributed over banks, the capital market and deposits from the public. Deposits from the public is the largest source of funding at SEK 118,914m (111,704). Over the period, funding through financing against pledges with international banks and repo transactions increased to SEK 24,914m (20,943) and through corporate bonds to SEK 6,386m (4,055).

In addition to existing sources of financing, NOBA, in February 2026, established a commercial paper programme. As of 30 September 2026, SEK 1,691m (-) was funded through the programme.

The Swedish National Debt Office makes regular assessments of which Swedish credit institutions should be categorised as liquidation institutions and resolution institutions respectively, based on the institutions' impact on the financial system in the event of default. NOBA is currently categorised as a liquidation institution. During the third quarter of 2026, NOBA was informed that the Swedish National Debt Office had initiated an in-depth analysis to assess whether the authority should, going forward, categorise NOBA as a resolution institution. A decision is expected to be made in December 2026.

CAPITAL AND CAPITAL RATIOS THIRD QUARTER OF 2026

(Compared with the third quarter of 2025, unless otherwise stated)

Common Equity Tier 1 capital increased to SEK 15,760m (14,561). Common Equity Tier 1 capital was strengthened by the profit recognised over the period. The increase was reduced by the foreseeable ordinary dividend of SEK 1,350m for the first to the third quarters of 2026, the dividend of SEK 1,550m paid in May 2026, and deductions for goodwill and intangible assets that stem from the acquisition of DBT.

The total risk exposure amount increased by 15 per cent to SEK 119,334m (103,581), driven by growth in lending and the acquisition of DBT. Three percentage points of the increase in the risk exposure amount were attributable to the weakening of the Swedish krona against the other lending currencies during the period.

As of 30 September 2026, the Common Equity Tier 1 capital ratio was 13.2 per cent (14.1), the Tier 1 capital ratio was 15.1 per cent (16.2) and the total capital ratio was 16.4 per cent (17.9).

At the same point in time, the capital requirement were a Common Equity Tier 1 capital ratio of 10.3 per cent (10.2), a Tier 1 capital ratio of 12.0 per cent (12.0) and a total capital ratio of 14.4 per cent (14.3). See note 5 for further information on NOBA's calculation of capital.

Countercyclical buffer rates in the countries where NOBA has operations remained unchanged over the period. NOBA's countercyclical buffer requirement was 1.6 per cent.

The leverage ratio was 9.6 per cent (10.1).

DIVIDEND

NOBA's Board of Directors proposes, ahead of the planned Extraordinary General Meeting in 2026, an ordinary dividend of SEK 2.70 per share for the period 1 January–30 September 2026, corresponding to SEK 1,350m.

[1] Refers to cards that were active in the last six months or had a performing balance.

PRIVATE LOANS

SEGMENT OVERVIEW, Q3 2026

(Compared with Q3 2025, unless otherwise stated)

NOBA offers unsecured private loans under the Nordax Bank and Bank Norwegian brands. The segment has some 600k Nordic customers. The average outstanding private loan amounts to about SEK 180k.

LOAN PORTFOLIO DEVELOPMENT

The total loan portfolio in the Private Loans segment was SEK 105.2bn (92.5). In local currencies, the portfolio grew by 11 per cent over the year, while currency effects had a positive impact on the loan growth of 3 per cent. The increased lending volume was mainly due to new customers.

Private loans in Sweden were SEK 41.3bn (36.3). In Finland, the loan portfolio was EUR 3.06bn (2.85). Lending was NOK 18.7bn (17.8) in Norway, while it reached DKK 6.4bn (5.3) in Denmark.

FINANCIAL PERFORMANCE

The total income in the segment amounted to SEK 2,368m (2,056), corresponding to an increase of 15 per cent compared with the same period the previous year. Revenue growth was primarily driven by higher lending volumes and higher net commission income. The net interest margin (NIM[1]) amounted to 8.9 per cent in the quarter (8.8). NIM, adjusted for changes in the number of interest-generating days and currency fluctuations, amounted to 8.8 per cent (8.7). During the quarter NIM experienced some headwinds from delayed pass-through of higher rates to customers.

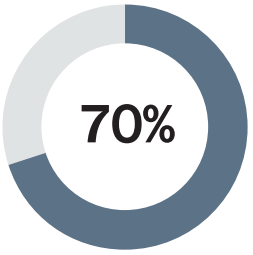

The segment's operating expenses were SEK -461m (-432), corresponding to an increase of 7 per cent. The cost increase was mainly due to higher other administrative expenses. The C/I ratio was 19 per cent (21).

Credit losses were SEK -651m (-744) over the quarter, corresponding to a credit loss level of 2.5 per cent (3.3).

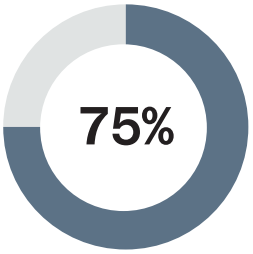

The adjusted operating profit[2] in the segment increased by 43 per cent and amounted to SEK 1,256m (879).

(For further segment information, see Note 8)

SHARE OF NOBA'S TOTAL LENDING WITHIN CORE OPERATIONS[3]

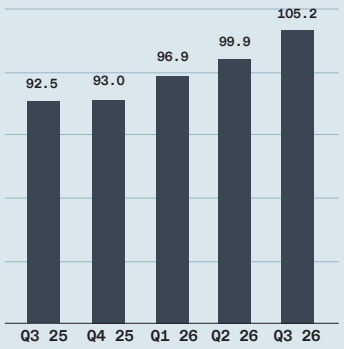

SHARE OF NOBA'S (ADJUSTED) CORE[3] OPERATING PROFIT

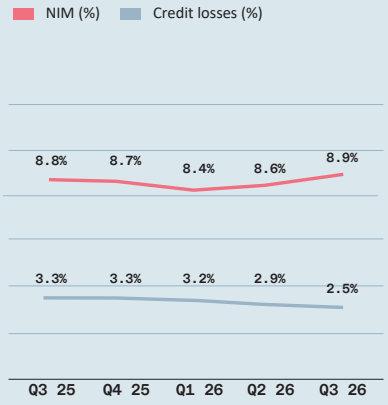

SEGMENT CUSTOMERS

On average, NOBA's Private Loan customers are 49 years old with an average monthly income of roughly SEK 50k. Roughly 66 per cent of customers own their homes. NOBA offers private loans of up to SEK 800k. The average customer has an outstanding loan of roughly SEK 180k.

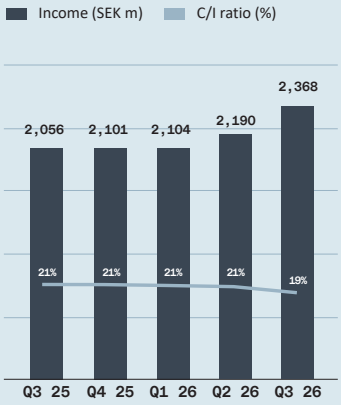

LENDING (SEKbn)

NIM AND CREDIT LOSSES

INCOME AND C/I RATIO

[1] Refers to net interest margin, which is defined in the "Definitions" section.
[2] Operating profit adjusted for amortisation of surplus values from transactions.
[3] "Core" refers to core operations, or the total of all NOBA's operations, excluding the "Other" segment.

CREDIT CARDS

SEGMENT OVERVIEW, Q3 2026

(Compared with Q3 2025, unless otherwise stated)

NOBA offers credit cards under the brand Bank Norwegian. The segment has approximately 1.6 million product customers in the Nordic countries and Germany. At the end of the quarter, the segment had roughly 1.4m active and semi-active cards.

LOAN PORTFOLIO DEVELOPMENT

The total loan portfolio in the Credit Card segment was SEK 22.6bn (19.5). In local currencies, the portfolio grew by 10 per cent over the year, while currency effects increased the growth rate by 6 percentage point. The increased lending volume was both due to new customers and increased lending to existing customers.

In Norway, credit card loans amounted to NOK 9.1bn (8.2). In Sweden, the loan portfolio amounted to SEK 4.4bn (4.2), while in Finland it amounted to EUR 0.37bn (0.35).

FINANCIAL PERFORMANCE

The total income in the segment was SEK 715m (662), corresponding to an increase of 8 per cent compared with the same period previous year. The revenue growth was primarily due to higher lending volumes. The net interest margin (NIM[1]) amounted to 10.3 per cent in the quarter (10.5). NIM, adjusted for changes in the number of interest-generating days and currency fluctuations, amounted to 10.4 per cent (10.4).

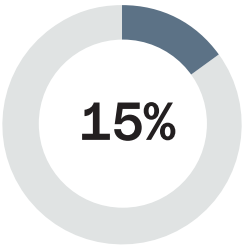

Operating expenses were SEK -218m (-170), corresponding to an increase of 28 per cent. The increase is mainly explained by higher sales and administrative costs. The C/I ratio amounted to 30 per cent (26).

Credit losses were SEK -176m over the quarter (-140). Thus, the credit loss level ended at 3.2 per cent (2.9).

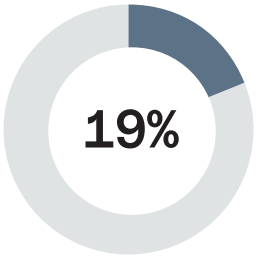

The adjusted operating profit[2] decreased by 9 per cent to SEK 322m (352) during the quarter.

(For further segment information, see Note 8)

SHARE OF NOBA'S TOTAL LENDING WITHIN CORE OPERATIONS[3]

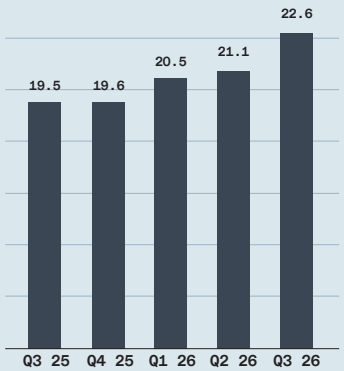

SHARE OF NOBA'S (ADJUSTED) CORE[3] OPERATING PROFIT

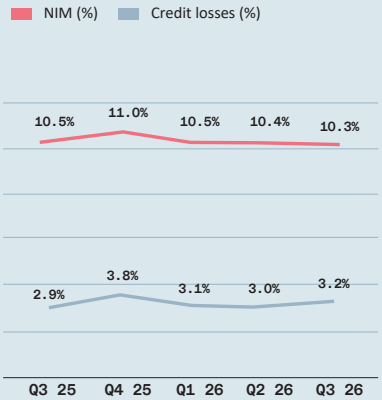

SEGMENT CUSTOMERS

The segment has roughly 1.6m product customers in total. New customers are offered up to roughly SEK 150k in credit. Our customers appreciate our digital registration process, the possibility of an interest-free period of 45 days, the earning of CashPoints and cashback and the fact that no annual fees are charged.

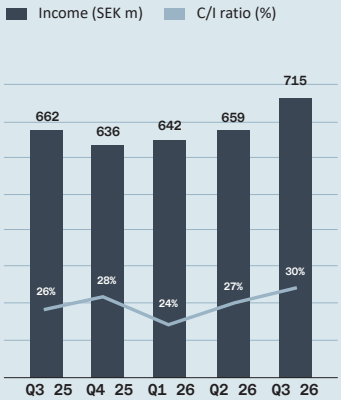

LENDING (SEKbn)

NIM AND CREDIT LOSSES

INCOME AND C/I RATIO

[1] Refers to net interest margin, which is defined in the "Definitions" section.
[2] Operating profit adjusted for amortisation of surplus values from transactions.
[3] "Core" refers to core operations, or the total of all NOBA's operations, excluding the "Other" segment.

SECURED

SEGMENT OVERVIEW, Q3 2026

(Compared with Q3 2025, unless otherwise stated)

NOBA offers residential mortgages to people who are excluded by the major banks, for example, due to non-conventional forms of employment. NOBA also offers equity release mortgage products to senior borrowers who wish to free up value from their homes. The segment has roughly 20k product customers in Sweden and Norway. The average outstanding mortgage amounts to approximately SEK 1.4m, and the average outstanding equity release mortgage amounts to approximately SEK 0.9m.

LOAN PORTFOLIO DEVELOPMENT

The total loan portfolio in the Secured segment was SEK 21.6bn (18.8). In local currencies, the portfolio grew by 12 per cent over the year, while currency effects increased the growth rate by 2 percentage point. The total lending volume was SEK 10.9bn (8.3) for mortgages and SEK 10.7bn (10.5) for equity release mortgages.

FINANCIAL PERFORMANCE

The total income in the segment was SEK 172m (181), corresponding to a decrease of 5 per cent compared with the same period in the previous year. The net interest margin (NIM[1]) amounted to 3.4 per cent in the quarter (3.9) and was negatively affected by a higher share of new sales consisting of mortgages to the near-prime segment, where NIM is lower but the risk-adjusted return is considered attractive. NIM, adjusted for changes in the number of interest-generating days and currency fluctuations, amounted to 3.4 per cent (3.9).

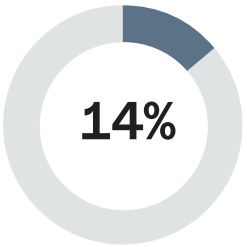

Operating expenses were SEK -46m (-39), corresponding to a increase of 17 per cent compared to the same period previous year. The C/I ratio was 27 per cent (22).

Credit losses in the quarter were SEK -36m (-16), corresponding to a credit loss level of 0.7 per cent (0.3). The higher credit loss level was mainly driven by higher interest rate expectations, which affected provisions within Svensk Hypotekspension.

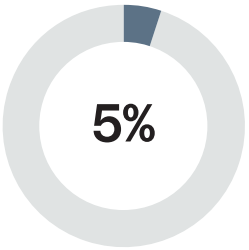

The segment's adjusted operating profit[2] amounted to SEK 90m (126), a decrease of 29 per cent compared with the previous year.

(For further segment information, see Note 8)

SHARE OF NOBA'S TOTAL LENDING WITHIN CORE OPERATIONS[3]

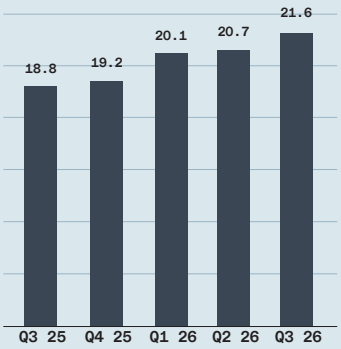

SHARE OF NOBA'S (ADJUSTED) CORE[3] OPERATING PROFIT

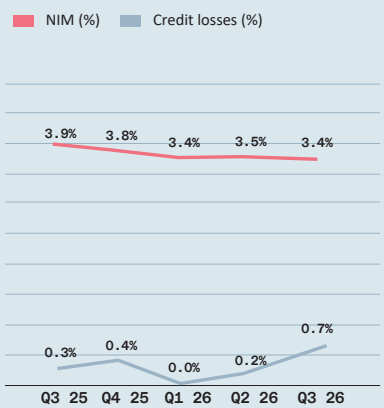

SEGMENT CUSTOMERS

The segment has roughly 20k customers in Sweden and Norway. The average loan-to-value ratio was roughly 75 per cent for residential mortgages and roughly 43 per cent for equity release mortgages. On average, customers repay their loans in roughly 2-3 and 10 years, respectively.

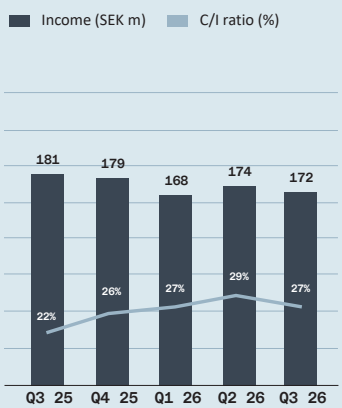

LENDING (SEKbn)

NIM AND CREDIT LOSSES

INCOME AND C/I RATIO

OTHER

OVERVIEW

NOBA is one of Europe's leading specialist banks. NOBA provides retail customers with private loans, credit cards, mortgages, equity release mortgages and deposits under three brands: Nordax Bank, Bank Norwegian and Svensk Hypotekspension. As of 2026, the bank also offers lending to small and medium-sized enterprises under the brand DBT. NOBA has a broad offering in four Nordic countries and offers credit cards and deposit products in Germany and deposit products in Spain, the Netherlands and Ireland.

HISTORY AND DEVELOPMENT

NOBA Bank Group AB (publ), formerly operating under the company names Nordax Bank AB (publ) and Nordax Finans AB (publ), was incorporated on 15 July 2003, and registered with the Swedish Companies Registration Office (Bolagsverket) on 26 August 2003, with the object of offering private loans to individuals in the Nordic region. On 27 January 2004, NOBA was granted a license by the Swedish Financial Supervisory Authority to conduct financing operations as a credit market company under the Swedish Financing Business Act (1992:1610) (replaced by the Swedish Banking and Financing Business Act (2004:297) on 1 July 2004) and commenced lending operations to Swedish customers in February 2004.

Throughout its history, NOBA has grown both organically and through acquisitions. Under the Nordax Bank brand, NOBA commenced cross-border lending operations in Norway in 2006, Finland in 2007 and Germany in 2012. Through its mortgage offering, NOBA began focusing on individuals whose mortgage applications are often rejected by traditional banks due to factors such as non-standard employment, short credit histories or other reasons, despite having generally strong personal financial profiles.

In 2018, NOBA acquired Svensk Hypotekspension, a specialist provider of equity release mortgages. These loans are secured against residential properties and are available to Swedish residents aged 60 and above. Following the acquisition, Svensk Hypotekspension operates as a subsidiary of NOBA, enhancing NOBA's product offering in the equity release mortgage market.

In 2021, NOBA acquired a Norwegian bank, Bank Norwegian, which operated as a subsidiary until the merger at the end of 2022.

In 2024, an intra-group merger was performed between NOBA Bank Group AB (publ), NOBA Group AB (publ) and NOBA Holding AB (publ), which resulted in the dissolution of the two latter entities.

On 26 September 2025, the NOBA share was listed on Nasdaq Stockholm.

In 2026, NOBA acquired all shares in DBT, a player in the Swedish market for lending to small and medium-sized enterprises and through the acquisition, an SME vertical was established.

THE EXTERNAL ENVIRONMENT AND ITS IMPACT

NOBA's operations are affected by the macroeconomic situation, particularly in the Nordic countries and Germany. Household and small and medium-sized business demand for loans and the ability to repay them depend on GDP development and related factors, such as unemployment rates, interest rates and property prices. During the quarter, the world was also still marked by significant concern related to the conflict in the Middle East. NOBA has not seen any material negative impact on its operations from this concern.

SIGNIFICANT RISKS AND UNCERTAINTY FACTORS

The group is exposed to credit risks and other financial risks, such as market risk and liquidity risk. The group is also exposed to operational risks such as IT risks, process risks and external risks, compliance risks, risks of exposure to financial crime and business risks. For further information, please see the section "Risks and risk management" on pages 27–29 of NOBA's 2025 Annual Report.

BOARD OF DIRECTORS

The board of directors of NOBA Bank Group AB (publ) comprises Hans-Ole Jochumsen, Chairman, and Board Members Birgitta Hagenfeldt, Martin Tivéus, Christopher Ekdahl, Ricard Wennerklint, Ragnhild Wiborg, Patrick Lapveteläinen and the employee representative Leslie Restovic Lopez.

MANAGEMENT TEAM

The management team of NOBA Bank Group AB (publ) comprises: Chief Executive Officer Jacob Lundblad, Chief Financial Officer Patrick MacArthur, Chief Operating Officer Malin Jönsson, Chief Product Officer Private Loans Per Alinder, Chief Technology Officer Adam Wiman, Chief Legal Officer Matthias Frost, Chief Credit & Analytics Officer Markus Kirsten, Chief Risk Officer Olof Mankert (co-opted), Chief Marketing Officer & Chief Product Officer Credit Cards Fredrik Mundal, Branch Manager and Branch CFO Mats Benserud, Chief Compliance Officer Elin Öberg Shaya (co-opted), Chief People Officer Malin Frick and Chief Product Officer SME & Secured Johan Magnuson.

EMPLOYEES

The average number of full-time employees (FTE) in the group was 739 (670) from 1 January - 30 September 2026. At the end of the period, the group had 752 employees (FTEs).

SHARE-RELATED INCENTIVE PLANS

WARRANTS

At an Extraordinary General Meeting held on 25 September 2025, it was resolved to issue warrants under two incentive plans. Incentive plan 1, for members of the group management team and other key individuals, divided into three series ("Series 2025/2027", "Series 2025/2028" and "Series 2025/2029"), and Incentive plan 2 ("Series 2025/2028:2") for certain members of the Board of Directors. The outstanding incentive programmes comprise a maximum of 10,699,006 warrants, each entitling the holder to subscribe for one share in NOBA. Of these, 224,268 warrants have been repurchased and cancelled. If all transferred warrants under the outstanding plans are exercised, the maximum dilutive effect would amount to no more than 2.05 per cent. However, as a result of repurchases, the recalculation at net value and the application of an upper value cap, the dilutive effect of the warrants is not expected to exceed 0.81 per cent.

At the Annual General Meeting held on 21 May 2026, it was resolved to issue warrants as part of a long-term incentive programme. The programme comprises 1,300,000 warrants ("Series 2026/2029"), each entitling the holder to subscribe for one share in NOBA, of which 999,252 are held in treasury. The maximum dilution resulting from LTIP 2026 may amount to approximately 0.26 per cent of the total number of shares and votes in the Company. Taking into account recalculation at net value and the value cap, the dilutive effect will not exceed 0.11 per cent of the total number of shares and votes.

The warrant plans are implemented on market terms. For further information, please visit noba.bank/investor-relations. The number of registered and outstanding shares as of 30 September 2026 was 500,000,000.

SHARE RIGHTS (RSUS)

During the third quarter, 95,518 new shares were subscribed for through the exercise of warrants and the related share issue. The shares are used to cover the first delivery of shares under the RSU programme granted to key employees in 2025. The increase in share capital of SEK 13,888 is recognised as an ongoing share issue as of 30 September 2026. The new share issue was registered with the Swedish Companies Registration Office (Bolagsverket) on 1 October 2026. Following the registration, the number of shares amounts to 500,095,518 and the share capital to SEK 72,713,888. During the third quarter of 2026, the Group entered into an equity swap for to the future acquisition of shares, intended to cover the next delivery of shares under the RSU programme.

SEASONAL VARIATIONS

The demand for private loans exhibits some seasonal variations, with an increase in demand during holiday periods, such as in the summer and before the Christmas holidays. The use of credit cards is also generally higher in the summer months due to increased travel. There are also some seasonal variations for credit losses, as tax refunds have a positive impact in the spring. When comparing quarters, the number of days in each period also has an impact on the net interest income.

FINANCIAL TARGETS

- An annual organic loan growth, in local currencies, of at least 10 per cent in the medium term. NOBA's total lending volume shall amount to SEK 250bn by the year 2030.
- The adjusted C/I ratio shall be below 20 per cent in the medium term.
- Core ROTE shall be approximately 30 per cent in the medium term.
- The Common Equity Tier 1 (CET1) ratio shall be 13-15 per cent.
- Dividend policy:
  1) Dividend corresponding to 40 per cent of the adjusted core profit attributable to shareholders[1].
  2) To ensure that NOBA maintains a CET1 ratio within the target range, it is NOBA's intention to distribute excess capital to the company's shareholders.

[1] The dividend distributed during the fourth quarter is based on the adjusted core profit attributable to shareholders generated during the first nine months of the fiscal year and is resolved upon by an extraordinary general meeting. The dividend distributed during the second quarter is based on the adjusted core profit attributable to shareholders generated during the last quarter of the previous year and is resolved upon by the annual general meeting.

[1] Other funds

[2] In connection with the acquisition of DBT Capital AB, the company issued warrants under several programmes. The warrants were subscribed for by the company's employees for a total value of SEK 8m. As the participants paid fair market value at the time of subscription, no expenses have been recognised in connection with the issuance of the warrants. At NOBA Bank Group AB (publ)´s Annual General Meeting held on 21 May 2026, a resolution was passed to issue warrants under a long-term incentive programme. As the participants paid fair market value at the time of subscription, no expenses have been recognised in connection with the issuance of the warrants. As of the balance sheet date, warrants with a value of SEK 2.8m have been subscribed.

[3] Relates to 95,518 shares subscribed during the third quarter of 2026 through the exercise of warrants for the delivery of shares under NOBA´s RSU programme. The increase in share capital amounts to SEK 13,888. The new share issue was registered with the Swedish Companies Registration Office (Bolagsverket) on 1 October 2026.

Cash and cash equivalents are defined as cash and balances with central banks and lending to credit institutions (excluding the Riksbank's deposit requirement). Pledged lending to credit institution under Note 16 are available to NOBA in connection with monthly settlement under financing agreements and are therefore defined as cash and cash equivalents due to their being pledged for a maximum of 30 days and therefore short-term.

[1] Additional setup costs during Q3 2026 of SEK 3m.

NOTES

NOTE 1 GENERAL INFORMATION

NOBA Bank Group AB (publ) (Corporate Identity Number 556647-7286), with its registered office in Stockholm, Sweden, is the parent company in the NOBA Bank Group. The group includes the parent company, where the Norwegian branch, NOBA Bank Group AB (publ) NUF is a part, a number of direct subsidiaries of NOBA Bank Group AB (publ), the subsidiary Svensk Hypotekspension AB with its subsidiaries and the subsidiary DBT Capital AB with its subsidiaries.

The Group's business involves lending to the public through private loans, credit cards, residential mortgage loans, equity release products, and small to medium-sized enterprise loans, as well as receiving deposits in Sweden, Norway, Denmark, Finland, Germany, Spain, the Netherlands, and Ireland. The primary business of NOBA Bank Group AB's (publ) direct subsidiaries, as well as the subsidiaries of Svensk Hypotekspension, is to acquire loan portfolios originated by NOBA Bank Group AB (publ) and Svensk Hypotekspension, respectively. This is done with the purpose of raising loan or bond financing, as well as to optimize loan portfolios within the group structure. Some of these companies are dormant and currently do not conduct any operations.

NOBA's share was listed on Nasdaq Stockholm on 26 September 2025.

NOTE 2 ACCOUNTING AND MEASUREMENT POLICIES

The interim report has been prepared according to IAS 34, Interim Financial Reporting. The consolidated accounts for the NOBA Bank Group have been prepared in accordance with International Financial Reporting Standards (IFRS Accounting Standards), as adopted by the EU, together with the Annual Accounts Act for Credit Institutions and Securities Companies (1995:1559), the Swedish Corporate Reporting Board´s recommendation RFR 1, Supplementary Accounting Rules for Groups, and the Swedish Financial Supervisory Authority's regulations and guidelines FFFS 2008:25 *Annual accounts for credit institutions and securities companies*.

The report has been prepared in accordance with the same accounting principles and calculation methods that were applied in the annual report for 2025.

No new or amended laws, accounting standards or interpretations with material effect entered into force in 2026.

The financial statements are presented in Swedish kronor and all figures are rounded to millions of kronor (SEKm) unless otherwise indicated. No adjustments for rounding are made, therefore summation differences may occur.

During the third quarter of 2026, the equity swap entered into by the Group is classified as an equity instrument in accordance with IAS 32, as the contract provides for physical settlement through the delivery of a fixed number of own shares for a fixed amount of cash. The consideration paid under the equity swap is recognised as a reduction in equity at inception of the contract.

FUTURE REGULATORY CHANGES

IFRS 18 Presentation and Disclosure in Financial Statements
The IASB published the new IFRS 18 *Presentation and Disclosure in Financial Statements* standard on 9 April 2024, which replaces IAS 1 P*resentation of Financial Statements*. The standard, which has been adopted by the EU, will be applied as of the 2027 financial year. IFRS 18 sets out new requirements for the presentation and disclosure of information in financial statements, with a particular focus on the income statement and enhanced transparency surrounding management-defined performance measures.

The changes that IFRS 18 will bring about for NOBA are as follows:

- NOBA assesses that its operations mainly comprise providing financing to customers through lending, which constitutes a "specified main business activity". Consequently, essentially all income and expenses will be classified in the operating category.

- Management-defined performance measures (MPMs), as defined by management, will be presented in the notes.

The standard is not expected to entail any material effects on the presentation and disclosure for NOBA. Nor is the standard expected to have any financial impact on NOBA, as IFRS 18 focuses on presentation and disclosure in financial statements. Work is ongoing during 2026 at NOBA to analyse the effects of the new standard.

Other changes in IFRS Accounting Standards
None of the other forthcoming changes in the accounting regulations issued for application are assessed to have a material impact on NOBA's financial reports, capital adequacy, large exposures or other circumstances according to the applicable regulatory requirements.

NOTE 3 SIGNIFICANT ACCOUNTING ESTIMATES

Presentation of consolidated financial statements in conformity with IFRS Accounting Standards requires the executive management to make judgments and estimates that affect the recognised amounts of assets, liabilities and disclosures of contingent assets and liabilities as of the reporting date as well as the recognised income and expenses during the reporting period. The executive management team continuously evaluates these judgments and estimates, including assessing control over investment funds, the fair value of financial instruments, provisions for credit impairment, impairment testing of goodwill and deferred taxes.

Beyond that, there have been no significant changes to the basis upon which the critical accounting judgments and estimates have been determined compared with 31 December 2025.

NOTE 4 FINANCIAL RISK MANAGEMENT – GROUP

MAXIMUM EXPOSURE TO CREDIT RISK SEKm	30 SEP 2026	31 DEC 2025
Credit risk exposures relate to the balance sheet as follows:		
Cash and balances with central banks	346	1,146
Treasury bills eligible for repayment, etc.	1,860	1,698
Lending to credit institutions	8,726	5,339
Lending to the public	151,004	132,341
Bonds and other fixed-income securities	14,838	13,557
Total on-balance	**176,774**	**154,081**
Unutilised loan commitments	75,109	63,009
Total off-balance	**75,109**	**63,009**

The assets above are recognised at carrying amount in accordance with the balance sheet. Cash and balances with central banks, treasury bills eligible for repayment, etc., lending to credit institutions, as well as bonds and other fixed-income securities refer to exposures to, among others, Swedish and Norwegian counterparties. Of the treasury bills eligible for repayment, etc., SEK 1,860m (1,698) consists of financial instruments measured at fair value through other comprehensive income. Bonds and other fixed-income securities amount to SEK 14,838m (13,557), of which SEK 486m (814) are financial instruments measured at fair value through profit or loss, SEK 13,998m (12,340) are financial instruments measured at fair value through other comprehensive income, and SEK 355m (404) are financial instruments measured at amortised cost (relating to securitization, SRT transactions).

Of lending to the public, SEK 148,260m (130,068) constitutes financial instruments measured at amortised cost and SEK 2,744m (2,274) constitutes financial instruments measured at fair value through profit or loss (for further information, see Note 6). Loans to the public that are measured at fair value through profit or loss relate to equity release credits secured by real estate. The geographical concentrations of risk for loans to the public are presented in a table on the next page.

NOTE 5 CAPITAL ADEQUACY ANALYSIS – CONSOLIDATED SITUATION

The information in this note is disclosed in accordance with Chapter 8, Section 4 of the Swedish FSA's regulations and general guidelines regarding annual reports at credit institutions and securities companies (FFFS 2008:25), Chapter 8, Section 1 of the Swedish FSA's regulations and general guidelines regarding prudential requirements and capital buffers (FFFS 2014:12), Regulation (EU) No 575/2013 Article 447, as well as the disclosure requirements in part eight of the same regulation. The liquidity and funding information is disclosed in accordance with Chapter 5, Section 2 of the Swedish FSA's regulations regarding management and disclosure of liquidity risks in credit institutions and investment firms (FFFS 2010:7).

INFORMATION ON THE CONSOLIDATED SITUATION

The top company in the Consolidated Situation is NOBA Bank Group AB (publ). The following companies are included in the Consolidated Situation when calculating capital requirements: NOBA Bank Group AB (publ), NOBA Finland 1 AB (publ), NOBA Sverige AB, Nordax Sverige 5 AB (publ), Nordax Sweden Mortgages 1 AB (publ), Norrvidd Finance AB (publ), NOBA Funding Management AB (publ), NOBA Asuntorahoitus Oy, Finsol Oy, DBT Capital AB with its subsidiaries DBT Capital HY AB and DBT Capital Inv AB, and Svensk Hypotekspension AB with its subsidiaries Svensk Hypotekspension Fond 2 AB, Svensk Hypotekspension Fond 3 AB (publ), Svensk Hypotekspension Fond 4 AB (publ) and Svensk Hypotekspension 5 AB (publ). On 16 June 2026 Norrvidd Finance AB (publ) was granted a license by the Swedish FSA to conduct financing operations.

COMMON EQUITY TIER 1 CAPITAL

The Common Equity Tier 1 (CET1) capital consists of equity excluding Additional Tier 1 (AT1) capital instruments and warrants issued, and with regulatory adjustments for, among other things, intangible assets. NOBA may, with prior approval from the Swedish FSA and in accordance with Article 26(2) of the Capital Requirements Regulation, include in the CET1 capital the profit for the period after deduction for foreseeable and proposed dividends.

NOBA has established a dividend policy where 40 per cent of adjusted core profit attributable to shareholders is paid as dividend semi-annually. The dividend paid in the fourth quarter should be resolved upon by an extraordinary general meeting and relate to the profit generated during the nine months period ended on 30 September. NOBA's Board of Directors proposes, ahead of the planned Extraordinary General Meeting in 2026, an ordinary dividend of SEK 2.70 per share for the period 1 January - 30 September 2026, corresponding to SEK 1,350m, deducted from the CET1 capital.

TIER 1 CAPITAL AND CAPITAL BASE

The Tier 1 capital consists of CET1 capital plus SEK 2,284m AT1 capital instruments. In addition to Tier 1 capital, the Consolidated Situation's Total capital also includes Tier 2 capital of SEK 1,579m. On 30 September 2026, NOBA gave notice to the holders of AT1 bond of SEK 1,400m and T2 of SEK 650m that the bonds would be redeemed on 29 October 2026. These two instruments are therefore not included in the Tier 1 capital and Total capital as of 30 September 2026.

DBT CAPITAL AB

On 2 February 2026 NOBA Bank acquired DBT Capital AB, a lender to Swedish small and medium-sized enterprises. The acquisition increased NOBA's total risk exposure amount, mainly through DBT's lending portfolio. The acquisition also reduced NOBA's CET1 capital mainly due to the increase in deductions of goodwill and intangible assets. In total the acquisition reduced the CET1 ratio and the Total capital ratio by 0.3 percentage points.

EXEMPTION AS PER ARTICLE 352(2)

On 18 March 2022, the Swedish FSA granted NOBA an exemption for the Consolidated Situation according to article 352.2 of Regulation (EU) No 575/2013, to include goodwill and intangible assets resulting from the acquisition of Bank Norwegian, when calculating open FX positions. On 30 August 2024, the Swedish FSA renewed the exemption granted to NOBA for the new Consolidated Situation that arose in connection with the merger between NOBA Holding, NOBA Group and NOBA Bank Group.

On 30 December 2022, a similar exemption was granted for NOBA Bank Group AB regarding goodwill and intangible assets which, after the merger of Bank Norwegian, became part of NOBA Bank Group's balance sheet. The Swedish FSA decision means a corresponding reduction in NOBA Bank Group's risk exposure amount for market risk

LIQUIDITY RESERVE AND OWN FUNDS

Except for Riksbank certificates, all of NOBA's securities holdings in the liquidity reserve are measured at fair value. Changes in fair value are either recognised through profit or loss or through other comprehensive income. In either case the changes in fair value affect CET1. Thus, sales of holdings in the liquidity reserve have no impact on Total capital.

NOTE 5 CAPITAL ADEQUACY ANALYSIS — CONSOLIDATED SITUATION

COMBINED BUFFER REQUIREMENT

The combined buffer requirement for the Consolidated Situation consists of the capital conservation buffer requirement, the countercyclical capital buffer requirement and the systemic risk buffer requirement for Norwegian exposures. The capital conservation buffer requirement amounts to 2.5 per cent of the total risk exposure amount. The countercyclical capital buffer is weighted based on geographical requirements. For Finland the requirement amounted to 0 per cent, for Spain the requirement amounted to 0.5 per cent, for Germany the requirement amounted to 0.75 per cent, for Norway and Denmark the requirement amounted to 2.5 per cent, while the requirement was 2 per cent for Sweden.

NOBA is also subject to the systemic risk buffer requirement for Norwegian exposures, since its total risk exposure amount for those exposures exceeds NOK 5bn. The systemic risk buffer requirement amounts to 4.5 per cent of the risk exposure amount in Norway, which for NOBA's Consolidated Situation corresponds to 0.94 per cent of the total risk exposure amount.

INTERNALLY ASSESSED CAPITAL REQUIREMENT, PILLAR 2 REQUIREMENTS AND PILLAR 2 GUIDANCE

On 29 April 2025 the Swedish FSA communicated the outcome of their Supervisory Review and Evaluation Process (SREP) for NOBA. The Swedish FSA decided that NOBA should be subject to a risk-based Pillar 2 requirement of 1.40 per cent and a risk-based Pillar 2 guidance of 0 per cent of NOBA’s total risk exposure amount.

As of 30 September 2026, the internally assessed capital requirement, in addition to the Pillar 1 requirement, for the Consolidated Situation amounted to SEK 1,773m (1,384), which corresponds to 1.49 per cent (1.33) of the total risk exposure amount. Unlike the Pillar 2 requirement decided by the Swedish FSA, which is based on NOBA’s risk exposure as of 31 December 2024, the internally assessed capital requirement takes into account the current risk exposure not covered by the Pillar 1 requirements. NOBA’s capital and risk management is always based on the higher of the Pillar 2 requirement and the internally assessed capital requirement for each risk type.

The total internally assessed capital requirement for NOBA’s Consolidated Situation, including Pillar 1 requirements, combined buffer requirements, Pillar 2 requirements and internally assessed capital requirement in excess of Pillar 2 requirements for the period amounts to SEK 17,285m (14,917).

LEVERAGE RATIO

Leverage ratio is a non-risk-based capital measure where Tier 1 capital is set in relation to the total assets with adjusted derivative exposures as well as off-balance sheet commitments recalculated with conversion factors. As of 30 September 2026, the Consolidated Situation’s leverage ratio was 9.64 per cent (10.15), which is well in excess of the 3 per cent requirement and the Pillar 2 guidance for leverage ratio decided by the Swedish FSA, amounting to an additional 1 per cent of the exposure amount for leverage ratio.

NOTE 5 CAPITAL ADEQUACY ANALYSIS – CONSOLIDATED SITUATION

INFORMATION ON LIQUIDITY RISK

NOBA defines liquidity risk as the risk of failing to fulfil payment obligations at maturity without a significant increase in the cost of obtaining means of payment. NOBA uses asset-backed borrowing in which parts of the asset portfolios are pledged as collateral for the funding. The long-term strategy is to match the maturities of lending assets with the maturities of liabilities. The strategy strives to achieve a diversified funding platform comprising equity, subordinated debt, securitisations ("ABS"), credit facilities provided by banks, deposits from the public, senior unsecured bonds and commercial paper.

The goal is to use funding sources that meet the following criteria:
- Provide a high degree of matching of currencies and interest periods as well as maturities between assets and liabilities.

- Offer diversification in terms of markets, investors, instruments, maturities, currencies, counterparties, and geography.

- Give a low liquidity risk and offer a strong possibility of refinancing at maturity, as evidenced by price stability, regularity of issuance and a broad investor base.

- Provide access to relatively large volumes, to meet the funding requirements of a growing balance sheet.

The Treasury function is responsible for managing liquidity risk, including daily measurement and reporting to the company's management. Stressed cash flows and items both on and off-balance sheet are used to determine values for regulatory metrics and internal risk indicators such as the liquidity coverage ratio (LCR), net stable funding ratio (NSFR), survival horizon, and deposit usage. The risk indicators are limited and monitored over time to highlight changes in the financial structure and the group's liquidity risk.

The Risk Control function is responsible for the independent control of liquidity risk and reports risk indicators to the Board of Directors and the CEO on a monthly basis. This function analyses and reports the impact on the liquidity situation in various scenarios, such as changes in exchange rates, deposit and lending volumes, credit losses, and market values.

The liquidity contingency plan contains a clear division of responsibilities and instructions on how NOBA should respond in a liquidity crisis. The plan specifies appropriate actions to manage the consequences of various types of crises and contains definitions of events that trigger and escalate the contingency plan.

As of 30 September 2026, NOBA's Consolidated Situation's Liquidity Coverage Ratio (LCR) was 144 per cent (151) and for NOBA Bank Group AB it amounted to 140 per cent (147). The net stable funding ratio (NSFR) was 108 per cent (111) and for NOBA Bank Group AB it amounted to 110 per cent (112), calculated in accordance with the definition in Regulation (EU) No 575/2013.

The Consolidated Situation's liquidity reserve as of 30 September 2026 amounts to SEK 19,862m (19,485), of which 37 per cent (44) are invested in covered bonds, 37 per cent (21) in cash balances with credit institutions and 2 per cent (6) in cash balances with central banks. The remaining 24 per cent (29) of the balances are mainly invested in interest-bearing securities issued by central governments, municipalities, supranationals and international development banks. The credit assessments of these investments are generally high and therefore have high credit ratings, between AAA and AA+, from leading credit rating agencies. Of these investments 87 per cent (83) were AAA and 13 per cent (17) were AA+. The average maturity amounts to 2.7 years (2.9) and the interest duration is 0,13 years (0.17).

As of 30 September 2026, NOBA Consolidated Situation's funding sources comprise SEK 8,077m (4,345) in senior unsecured bonds and commercial paper, SEK 24,914m (19,351) financing against pledges with international banks and repo transactions, and SEK 118,914m (107,870) of deposits from the public.

The Swedish National Debt Office makes assessments of which Swedish credit institutions should be categorised as liquidation institutions and resolution institutions respectively, based on the institutions' impact on the financial system in the event of default. NOBA is currently categorised as a liquidation institution. During the third quarter of 2026, NOBA was informed that the Swedish National Debt Office had initiated an in-depth analysis to assess whether the authority should, going forward, categorise NOBA as a resolution institution. A decision is expected to be made in December 2026.

[1] The Riksbank has previously decided that all banks and other Swedish credit institutions must deposit a portion of their deposit base as interest-free deposits. The deposit requirement is set in a recurring process each year. For NOBA, this means that SEK 167m (221) has been deposited with the Riksbank at 0 percent interest until a new amount is set next year.

[1] Fair value is deemed to be consistent with the carrying amount, since these are of a short-term nature.

[2] Fair value is deemed to be consistent with the carrying amount, since these carry a variable interest rate.

NOTE 7 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES – GROUP

CALCULATION OF FAIR VALUE

VALUATION TECHNIQUE FOR MEASURING FAIR VALUE – LEVEL 1

The fair value of financial instruments traded in an active market is based on quoted market prices on the balance sheet date. A market is considered active if quoted prices from a stock exchange, broker, industry group, pricing service or monitoring authority are readily and regularly available and these prices represent real and regularly occurring arm's length market transactions. The quoted market price used for the Group's financial assets is the current purchase price.

VALUATION TECHNIQUE FOR MEASURING FAIR VALUE – LEVEL 2

Fair value of bonds is measured, as in level 1, from market prices, with the difference that the prices are not considered from an active market. The market price is derived in this case from buy and sell position prices, but regular trading does not take place in the bond. If market prices are missing, the value is calculated by discounting expected cash flows. For discounting, the current market interest rate on securities issued by similar issuers is used.

The fair value of derivatives is measured as the present value of future cash flows based on observable market prices.

FAIR VALUE MEASUREMENT USING MATERIAL, UNOBSERVABLE INPUTS – LEVEL 3

If one or more essential inputs are not based on observable market information, the instrument is classified as level 3. The table below shows the financial instruments measured at fair value, based on their classification in the fair value hierarchy.

As of 30 September 2026, NOBA holds two investments in unlisted shares: Vipps AS and VN Norge AS. These holdings are measured at fair value based on unobservable inputs. The fair value of the shares in VN Norge AS as of the balance sheet date were calculated based on the share price for Visa Inc, the USD/NOK foreign exchange rate, a liquidity discount and a conversion rate.

The part of NOBA's lending to the public that is measured at fair value through profit or loss is calculated based on assumptions of lifetime, reference rates and collateral value, and is classified in its entirety at Level 3.

INFORMATION ABOUT FAIR VALUE

The value of lending to the public has been measured based on unobservable market data by discounting the expected future cash flows of the assets to present value using a discount factor. The expected future cash flows have been based on the size of the portfolio at the end of the balance sheet date and an expected future cash flow on the maximum maturity of the portfolio.

For determining the fair value of issued securities and subordinated liabilities, level 1 is applied if the criteria are met, followed by level 2.

TRANSFERS BETWEEN THE LEVELS

There have been no transfers of financial instruments between the different levels.

SENSITIVITY ANALYSIS FOR LENDING TO THE PUBLIC MEASURED AT FAIR VALUE WITHIN LEVEL 3

A sensitivity analysis of lending to the public measured at fair value within level 3 has been made by changing the assumptions of non-observable data in the valuation model. The sensitivity analysis is made in two parts, one parallel shift of the interest rate curve with 1 percentage point and a decrease in the housing price index of 10 percentage points.

An upwards parallel shift of the interest rate curve with +1 percentage point would result in a negative change in the fair value of SEK 36m (24) and a downwards parallel shift of the interest rate curve with 1 percentage point would result in a positive change in the fair value of SEK 7m (4). An immediate positive change in the housing price index of +10 percentage points would result in a positive change in the fair value of SEK 10m (6) and a negative change in the housing price index of -10 percentage points would result in a negative change in the fair value of SEK 33m (21).

The table below shows the changes that have occurred in relation to level 3 instruments:

NOTE 8 OPERATING SEGMENTS

Segment information is presented based on the chief operating decision maker's (CODM) perspective, and the segments are identified based on internal reporting to the CEO, who is identified as the chief operating decision maker. Several profit/loss measurements are included, as they are presented to the CODM to make decisions to allocate resources and assess segment performance, where adjusted operating profit for Core operations and Total are viewed as the main measurements. Profit/loss that cannot be attributed to a single segment is allocated using a distribution matrix according to internal principles that management believes to provide a fair allocation to the segments. Transformation costs are not allocated by segment.

The business model is to offer the general public the products Private Loans, Credit Cards and Secured (which includes both Mortgages and Equity Release) along with small to medium-sized enterprise loans conducted through cross-border banking activities in Sweden, Norway, Denmark, Finland, Germany, and Spain. In addition, deposit operations are also carried out in the same way in the corresponding countries, in addition to the Netherlands and Ireland, which form part of the financing for the mentioned products.

In the Private loans segment NOBA offers unsecured private loans under both the Nordax Bank and Bank Norwegian brands. While in the Credit cards segment NOBA offers credit cards under the Bank Norwegian brand. In the Secured segment, NOBA offers residential mortgages to people who are excluded by major banks, for example due to non-conventional employment forms, under the Nordax Bank brand. In addition, NOBA offers equity release mortgage products to elderly borrowers who wish to free up value from their home under the Svensk Hypotekspension brand.

The Other segment includes small to medium-sized enterprise loans offered through the DBT brand, acquired during Q1 2026. The segment also includes the markets and products where new sales do not take place, which refers to private loans in Germany and Spain and credit cards in Spain.

During the last quarter, there have been no changes from prior periods in the measurement methods used to determine operating segments and reported segment profit or loss.

Segment information is presented according to a set arrangement to further emphasise the underlying operational business. Transformation costs and amortisation of transaction surplus values are excluded from the operating expenses and shown on separate rows to reconcile adjusted operating profit and operating profit. In addition, Alternative Performance Measures (APMs) are included to show the segments' performance and an additional total column separating the Other segment. To facilitate the calculation of these APMs, rows are included in the segment note for tax on adjusted operating profit, profit for the period of which attributable to holders of Tier 1 capital, and adjusted profit for the period to shareholders.

NOTE 14 NET CREDIT LOSSES – GROUP

COLLATERAL RECEIVED

Part of NOBA's loan portfolio includes residential mortgages and equity release products (via the subsidiary Svensk Hypotekspension AB), and this lending is secured by mortgages on real property or rights in co-op apartments. The valuation of collateral is part of NOBA's credit origination process and collateral values are continuously monitored through updated valuations.

NOBA's policies for received collateral have not significantly changed during the period and there has been no significant change in the quality of collateral. As of the balance sheet date the average value of the received collateral on mortgage exceeds the carrying amount. The received collateral is thus assessed as mitigating the credit risk and limiting the financial effect at default. As of the balance sheet date, NOBA has not taken over any collateral as protection for a claim.

SENSITIVITY ANALYSIS MACRO

As a general rule, deteriorating macroeconomic factors in a society lead to higher credit losses. Similarly, improvements in the macroeconomic situation result in lower credit losses. In calculating the future need for credit loss reserves, an assessment is made of the probability of various future scenarios occurring. This probability-weighted outcome is the amount recognised as the credit loss reserve. The table below shows how the credit loss reserve would be affected based on a negative or positive scenario.

The sensitivity analysis is based on analysis of the combined sensitivity of the ECL models applied within the Group. For loans on the Nordax platform the Negative scenario entails increasing the likelihood of the Negative macro scenario from a base assumption of 5 per cent to 30 per cent. Currently 5 percent (5) is applied. For loans on the Bank Norwegian platform the Negative scenario is based on applying 100 per cent weighting of the pessimistic scenario. Current weighting is 32.5 per cent base, 30 per cent optimistic and 37.5 per cent pessimistic, which is the same as per 31 December 2025. For loans on the Nordax platform the positive scenario entails reducing the likelihood of the negative macro scenario to 1 per cent and for Bank Norwegian applying 100 per cent weighting of the optimistic scenario.

The negative scenario entails a negative impact on the loan loss reserves of SEK 273m (275), of which SEK 197m (196) relates to loans on the Nordax platform and SEK 76m (79) relates to loans on the Bank Norwegian platform. While the Positive scenario entails a positive impact on the loan loss reserves of SEK 108m (112), of which SEK 31m (31) relates to loans on the Nordax platform and SEK 77m (81) relates to loans on the Bank Norwegian platform.

SIGNIFICANT INCREASE IN CREDIT RISK SINCE INITIAL CREDIT ASSESSMENT ("SICR")

As of the reporting date, the bank had 50,676 (48,071) accounts in Stage 2 with a total exposure of SEK 6,979m (6,339). An increase of 25 per cent in the number of accounts in Stage 2 would lead to an increase in ECL of SEK 76m (63), and a decrease of 25 per cent would lead to a decrease in ECL of SEK 93m (73).

NOBA grants security over its assets in connection with the Group's asset-related funding operations: securitisation and secured funding with international banks, in repo transactions, and derivative contracts.

The collateral in the asset-related funding operations consists of pledges over, among other things, shares issued in subsidiaries, accounts receivable and contractual rights, which may be enforced by financiers or counterparties if the Group companies do not fulfil their obligations or manage their commitments as borrowers. Repo transactions are conducted with bonds as collateral. For derivative transactions, cash collateral and bonds are provided in accordance with ISDA and CSA agreements entered with the counterparty.

As of the balance sheet date, NOBA has no contingent liabilities.

NOTE 17 TRANSACTIONS WITH RELATED PARTIES

During the first quarter, NOBA Bank Group AB (publ) provided new intragroup financing to the recently acquired subsidiary DBT Capital AB in the amount of SEK 951.8m. The financing was primarily utilised to repay DBT Capital AB's existing funding, thereby fully settling and closing DBT Capital AB's previous financing arrangements.

Other related parties, from a group perspective, consist partly of Nordic Capital Fund VIII and Nordic Capital IX, as well as entities controlled by them. Transactions with these entities are part of NOBA's ordinary course of business, and for the period expenses amount to SEK 45m (88).

Transactions with related parties were made on market terms.

In connection with the IPO in September 2025, the CEO and board of directors subscribed for a total of 2,138,052 warrants of different series for a total amount of SEK 14.3m.

The table below shows group transactions with related parties from NOBA Bank Group AB's (publ) perspective.

NOTE 19 ACQUISITION OF DBT CAPITAL AB

On December 18, 2025, NOBA announced that the company had entered into an agreement with the owners of DBT Capital AB to acquire all shares in the company. After all conditions for the transaction were fulfilled, the transaction was completed on February 2, 2026. The purchase price was paid in cash and amounted to a total of SEK 397m.

Goodwill primarily relates to future customers, market position, workforce and know-how. Goodwill is not expected to be deductible for tax purposes.

Goodwill	128

Cash impact from acquisition	
Consideration paid in cash	-397
Less: Acquired cash and cash equivalents	199
Net cash flow	-198

Since the acquisition, DBT Capital AB has contributed to the Group's operating income with SEK 55m (for the period of February 2 to September 30) and to profit before tax, before costs related to the acquisition process, with SEK 2m.

If the acquisition had been completed on January 1, 2026, the NOBA group's operating income and profit before tax as of September 30, would have amounted to SEK 9,290m and SEK 4,388m, respectively. These amounts have been calculated using the subsidary's results as well as the additional group adjustments specified below.

In connection with the acquisition, loans to the public were valued at their fair value which results in an adjustment of interest income to reflect the group's effective interest rate on the acquired loan portfolio.

In addition, on a group level adjustment has been made for amortisation of identified intangible assets in the acquisition.

NOTE 20 SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

On 1 October, NOBA issued SEK 300m and NOK 300m of senior preferred bonds in a tap of outstanding senior preferred bonds maturing in October 2029.

Subsequent to the end of the quarter, Chief Technology Officer Adam Wiman announced his resignation. He will remain in his role until the end of the first quarter of 2027, and NOBA has initiated the recruitment of his successor.

[2] Fair value fund

[3] Relates to 95,518 shares subscribed during the third quarter of 2026 through the exercise of warrants for the delivery of shares under NOBA´s RSU programme. The increase in share capital amounts to SEK 13,888. The new share issue was registered with the Swedish Companies Registration Office (Bolagsverket) on 1 October 2026.

[4] At NOBA Bank Group AB (publ)´s Annual General Meeting held on 21 May 2026, a resolution was passed to issue warrants under a long-term incentive programme. As the participants paid fair market value at the time of subscription, no expenses have been recognised in connection with the issuance of the warrants. As of the balance sheet date, warrants with a value of SEK 2.8m have been subscribed.

Registered share capital as at 30 September 2026 comprised 500,000,000 shares of the same class, with a quota value of SEK 0.1454 par share. During the third quarter of 2026, 95,518 new shares were subscribed for through the exercise of warrants for the delivery of shares under the company´s RSU programme. Following the registration of the new share issue with the Swedish Companies Registration Office (Bolagsverket) on 1 October 2026, the share capital amounts to SEK 72,713,888.3172 and the number of shares to 500,095,518.

Cash and cash equivalents are defined as cash and balances with central banks and lending to credit institutions (excluding the Riksbank's deposit requirement). Pledged lending to credit institutions are available to NOBA in connection with monthly settlements under financing agreements, and are therefore defined as cash and cash equivalents, due to being pledged for a maximum of 30 days and therefore short-term.

[1] Additional setup costs during Q3 2026 of SEK 3m.

PARENT COMPANY NOTE 1 ACCOUNTING AND MEASUREMENT POLICIES

The parent company's interim report was prepared in accordance with the Swedish Annual Accounts Act for Credit Institutions and Securities Companies (1995:1559), the Swedish Corporate Reporting Board's recommendation RFR 2 – Accounting for legal entities and the Swedish Financial Supervisory Authority's Regulations FFFS 2008:25 *Annual accounts for credit institutions and securities companies*.

The accounting policies have not been changed compared to the 2025 Annual Report. No new or amended laws, accounting standards or interpretations with material effect entered into force in 2026.

ASSURANCE OF THE CHIEF EXECUTIVE OFFICER

The Chief Executive Officer assures that this financial report for the period 1 January 2026 through 30 September 2026 provides a fair overview of the parent company's and the group's operations, their financial position and results, and describes material risks and uncertainties facing the parent company and the group.

Stockholm, 2 November, 2026

JACOB LUNDBLAD
CHIEF EXECUTIVE OFFICER

This interim report has been reviewed by the company's auditors.

AUDITOR'S REVIEW REPORT

INTRODUCTION

We have reviewed the condensed interim financial information (interim report) for NOBA Bank Group AB (publ) as of 30 September 2026 and for the nine-month period then ended. The Board of Directors and the CEO are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on this interim report based on our review.

SCOPE OF REVIEW

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410 Review of Interim Financial Information performed by the company's auditors. A review consists of making inquiries, primarily with persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with ISA and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not, in all material aspects, prepared for the Group in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies, and for the Parent Company in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies.

DEFINITIONS

THE GROUP CONSIDERS THE KEY FIGURES TO BE RELEVANT TO USERS OF THE FINANCIAL REPORT AS A COMPLEMENT IN ASSESSING THE FINANCIAL PERFORMANCE OF THE GROUP

Additional Tier 1 capital
Capital instruments that are perpetual and meet certain other conditions in order to be counted as Tier 1 capital under Regulation (EU) No 575/2013.

Adjusted cost/income ratio (C/I ratio)
Operating expenses excluding transformation costs in relation to total operating income.

Adjusted earnings per share from core operations before dilution
Adjusted profit for the period, see adjustments under "adjusted core profit for the period", attributable to shareholders in relation to the weighted average number of shares outstanding before dilution.

Adjusted core profit for the period
Profit for the period adjusted for transformation costs, amortisation of transaction surplus values and operating profit from portfolios included in operating segment "Other".

Adjusted core operating profit
Operating profit adjusted for transformation costs, amortisation of transaction surplus values and operating profit from portfolios included in operating segment "Other".

Adjusted core return on equity excl. intangible assets and Tier 1 capital (Core ROTE)
Adjusted profit for the period, see adjustments under "adjusted core profit for the period", after deduction of profit attributable to holders of Tier 1 capital in relation to total equity after deduction of intangible assets and Tier 1 capital. The denominator is calculated as an average where quarterly figures consist of a two-point average and YTD figures consist of a two- to five-point average depending on the number of quarters elapsed.

Average loan portfolio
Average lending to the public, where quarterly figures consist of a two-point average, while YTD figures consist of a two- to five-point average depending on the number of quarters elapsed.

Average number of employees
The average number of hours worked during the period, converted to full-time equivalents (FTE). Excluding employees on long-term sick leave and parental leave.

Cost/income ratio (C/I ratio)
Total operating expenses in relation to total operating income.

Common Equity Tier 1 capital
Equity excluding foreseeable dividend, deferred tax assets, intangible assets and certain other adjustments as defined in Regulation (EU) No 575/2013.

Common Equity Tier 1 capital ratio
Common Equity Tier 1 capital in relation to Total risk exposure amount.

Core ROTE
See "Adjusted core return on equity excl. intangible assets and Tier 1 capital".

Credit loss level (%)
Net credit losses in relation to the average loan portfolio.

Basic earnings per share
Profit for the period attributable to shareholders in relation to the weighted average number of shares outstanding before dilution.

Diluted earnings per share
Profit for the period attributable to shareholders in relation to the weighted average number of shares, adjusted for the dilution effect of potential shares.

Leverage ratio
Tier 1 capital in relation to the total exposure measure in accordance with Regulation (EU) No 575/2013 (CRR), calculated as the sum of exposure values for assets and off-balance sheet items. The exposure value for off-balance sheet items and certain assets, such as derivatives, is calculated in accordance with specific rules in the Regulation.

Liquidity Coverage Ratio (LCR)
High-quality liquid assets in relation to the estimated net cash outflows over the next 30 calendar days, as defined in Commission Delegated Regulation (EU) 2015/61 and Regulation (EU) No 575/2013.

Liquidity reserve
A ring-fenced reserve of high-quality liquid assets that can be used to secure short-term payment capacity in the event of loss of, or deteriorated access to, normally available funding sources, in accordance with the regulations of the Swedish Financial Supervisory Authority (FFFS 2010:7, Chapter 4, Section 5).

DEFINITIONS

Net interest margin (%)
Net interest income in relation to average loan portfolio.

Net Stable Funding Ratio (NSFR)
Available stable funding in relation to required stable funding in a 1-year perspective, calculated according to Regulation (EU) No 575/2013.

Own funds
The sum of Tier 1 and Tier 2 capital.

Return on equity excluding intangible assets and Tier 1 capital (ROTE)
Profit for the period after deduction of profit attributable to holders of Tier 1 capital in relation to total equity after deduction of intangible assets and Tier 1 capital. The denominator is calculated as an average where quarterly figures consist of a two-point average and YTD figures consist of a two- to five-point average depending on the number of quarters elapsed.

Return on total assets
Profit for the period in relation to total assets. The denominator is calculated as an average where quarterly figures consist of a two-point average and YTD figures consist of a two- to five-point average depending on the number of quarters elapsed.

Risk exposure amount
Total assets and off-balance sheet items, weighted in accordance with capital adequacy regulation for credit and market risks. Operational risks are measured and added as risk exposure amount.

ROTE
See "Return on equity excluding intangible assets and Tier 1 capital".

Tier 1 capital
Common Equity Tier 1 capital plus Additional Tier 1 capital.

Tier 1 capital ratio
Tier 1 capital in relation to the Total risk exposure amount.

Tier 2 capital
Subordinated liabilities that fulfills the requirements in Regulation (EU) No 575/2013 to be included in total capital.

Total capital ratio
Total own funds in relation to the Total risk exposure amount.

Total risk-weighted exposure amount
The sum of risk exposure amounts for credit, market and operational risk, as well as credit valuation adjustment risk (CVA) for derivatives, calculated in accordance with Regulation (EU) No 575/2013.

Transformation costs
Costs incurred over a limited period with the clear purpose of transforming the bank.
