

PRESS RELEASE

24 August 2021 17:00:00 CEST

Launch of the game Northgard on Android

Fragbite Group AB's subsidiary Playdigious SAS has today launched the popular game Northgard on Android platforms. The game was initially launched on iOS platforms in the second quarter of 2021.

On May 31, 2021, Fragbite Group AB acquired the French gaming publisher Playdigious SAS. Playdigious places traditional PC games on primarily mobile platforms, where well-known PC games such as e.g. Dead Cells, Northgard and Evoland has been launched for mobile players. Northgard was initially developed for PC by the game studio Shiro Games and Playdigious has developed the mobile versions of the same game. In total, the game has sold over 2 million copies on PC, console and iOS devices. The launch of Northgard on iOS and Android has taken place globally, but excludes the Chinese market, where the company is investigating a possible launch of the game in the future. Additional updates such as i.e. multiplayer feature will be launched in the fall.
