

High Coast Distillery launches the new Special Release series.

High Coast Whisky Special Release 2024. 11-year-old peated whisky aged in Oloroso casks.

High Coast Distillery continues to develop its product portfolio and is now launching a new series of carefully selected exclusive whiskies. The Special Release will be released annually and is always age-stated. The 2024 release and the first in the series is an 11-year-old smoky whisky, initially matured in bourbon casks for over five years and then matured for the last few years in casks containing really old Oloroso sherry. These Oloroso casks were already earmarked when they were filled for an extra special bottling that now became Special Release 2024.

'When we started planning for the Special Release, many of our older casks were sampled. The selected Oloroso casks stood out and were an obvious choice for the first bottling in the series' - Master Distiller, Roger Melander

Special Release 2024 will be launched on 7 June at Systembolaget in Sweden and will be available in selected countries during the year.

About Us

The whisky from High Coast Distillery under the High Coast Whisky brand has been available since 2014. The Origins series with Berg, Älv, Timmer and Hav is already a big sellers among the premium brands. At the production and visitor facility in Bjärträ, Sweden, whisky is produced seven days a week and more than 17,000 casks are maturing in the warehouses. High Coast Whisky is currently sold in about ten countries. The company's shares are traded on Nasdaq First North Growth Market. Turnover is about SEK 60 million excluding alcohol tax and the business employs about 25 people.
