- Net sales for the second quarter increased by 38.3% compared to the same period in 2024, thanks to the rollout of new customer agreements. This is again our highest quarterly revenue to date, despite a weaker USD/SEK exchange rate.
- Net earnings increased by 50.4% compared to the same period in 2024.
- Cash flow for the period was negative due to a dividend of approximately SEK 5.6 million in May. Delayed customer payments that are expected to come in during the next quarter also had a negative impact on cash flow.

"We are once again closing a quarter with record revenue and entering the summer with strong demand for efficient and safe air travel. With new customer agreements, continued investment in our product portfolio, and a strengthened organization, we are aiming for a record year in 2025 and to build long-term, scalable value for our customers and shareholders." said CEO, David Rytter.

The full report for the second quarter will be published as planned in the interim report on August 22, 2025.
